The Committee of 1810, in their report, seem to have taken the subject as John Locke, for I find it stated as under, "The value of gold, being itself measured and expressed in gold cannot be altered by an increased or diminished demand for it. It will exchange for neither more nor less than an ounce of the same fineness. * * * An ounce of gold bullion is worth more in our market than £3 17*s.* 10½*d.* unless the value of our actual currency is equivalent to less than an ounce of gold. Although we have here a distinct statement that the value of gold is fixed, so little is there any general agreement on the subject. The report of the Committee or Bank Acts of 1858 asserts that the price of gold is not fixed. At the beginning of that paragraph:—"Another mistaken notion has perplexed those who have reasoned about the subject, supposing that by Act of Parliament the price of gold is fixed. It is utterly impossible to understand any part of the report of the Committee or Bank Acts, for the value of gold is the other, whilst the term sovereign is in no way bound,

If, then, Mr. Goschen entertains a like view "a pound" as John Locke, the Bullion Comm. Sir Robert Peel, as Locke has asserted that what occur, because it was impossible, so it may be in the foreign exchanges, viz., that the fluctuations will have not occurred because it is impossible for weight measured by an English or foreign rule. If it be that there may be a difference in the value of gold as compared with another, and that this is measurements which occur in the rates of exchange, how stand that in our dealings with Australia, where gold is very different from what it is in England described as of an uncertain number of pence, or a certain number of francs?

Since calling the attention of Mr. Goschen to this which I hoped he would have answered, and that induced in him caution, an article has appeared in the review, entitled "Seven per Cent.," and although been attached to it, its authorship is ascribed to Mr. not only deals with the subject of "a pound" weight explained, but also deals with another subject equally necessary to be explained, viz., the term "capital." In the review I find as under—"M. Wolowski opposes the notion that an increase of paper issues at the moment be expected to prove a panacea for the scarcity of capital, and consequently high rate of interest.

"The productive capital of the country is increased by an amount of gold; but it is not loanable capital, and the disposal of a borrower which could be permanent is not such a measure." At page 251 I find: "An average of 7 per cent. has been hard to bear; but the lesson has been that scarcity of capital is only to be remedied by outbidding the competitor for the temporary use of floating available capital to that country which offers the highest price."

I now want from Mr. Goschen his definition of capital, for I cannot find any general agreement in respect of the term in dictionary, encyclopædia, or work on political economy. What is capital, and what is floating capital? Is capital a term used by the community or by individuals? Is money capital, and is it confined to gold in one country, and to silver in another? Is it in the hands of a labouring man capital, or in what hands? What is its character after quitting the possession of him who has it? Is there a distinction between the terms money and capital? What are these terms and riches? Had this country no loan in 1797 to 1822, during a suspension of specie payments, £14,000,000 of notes which the Bank of England issued without having gold in deposit to meet their payments, as any other notes? If this Bank were suffered to

0 of notes, on the same conditions as the £14,000,000, would be loanable capital, and would not such an issue prove a or a high rate of interest? What is meant by setting free an gold? Have the Americans no loanable capital? Cannot the Government issue green-backs *ad libitum*, and thus multiply capital, and cannot those notes be lent, used, and invested in all s which floating capital (in any other way described) could be could they not be advanced to the Government on public as fixed capital? What is that capital which is to be attracted ountry by outbidding foreigners? If a person ceases to a trade, or employ his wealth in multiplying productions, wealth cease to be capital?

ill, in his work on capital, says, "The accumulated stock of ce of labour is termed capital. Capital, by persons wholly reflect on the subject, is supposed to be synonymous with * * Money is no more synonymous with capital than it is th. Money cannot in itself perform any part of the office

Capital is precisely that part of a person's possession, it be, which he designs to employ in carrying on fresh pro- The distinction between capital and not-capital does not kind of commodities, but in the mind of the capitalist—to employ them for one purpose rather than another; and cy, however ill adapted for the use of labourers, is a part of soon as it, or the value to be received from it, is set apart tive employment.

and for commodities does not in any manner constitute a or labour, but only determines into a particular channel a ore or less considerable of the demand already existing. It s that a part of the labour and capital of the community employed in producing certain things instead of other

BANK NOTES ISSUE BILL

To the Editor of the "Bankers' Magazine"

SIR,—In the month of October last you did publish an article from my pen, entitled "Reflections on the Bank Notes Issue Bill of 1844-5." That article was penned under the impression that it was the intention of the Chancellor of the Exchequer to introduce a comprehensive bill to remedy the defects of the present measures of Sir Robert Peel. Probably Mr. Goschen would not be right to attempt to pass so important a bill in the present Parliament whose days are so soon to come to an end. If, however, his idea, it would surely have been better to have the "Bank Notes Issue Bill" await the consideration of

could hardly be said that the urgency of the case is in the recollection of the readers of the "Bankers' a few months since a report was current to the effect of the National Provincial Bank of England had decided that the profits derived from the issue of notes were not large to compensate for being debarred from business in and around London, and that in consequence they were to relinquish the issue of notes. It appears, however, to take this final and irrevocable step, the authorities have adopted the expedient of bringing their case before the House, the result of which is the "Bank Notes Issue Bill, of course, blame the National Provincial Bank for the best they can for their shareholders; still they do not very much like stealing a march on their competitors, proceeding which seems likely to bring swift retribution, for I can hardly suppose that had the boon which the boon would be granted been known before, it would have ever been asked for. A sharp-sighted financier could not fail to perceive in the application for the bill to expedite the extinction of the country issues generally, of which he was not slow to avail himself, though with reluctance he tried to keep it in the back ground, and in his speech, on the 1st of May, that "the prime principle of the bill is the removal of the limitations placed on the private banks; not on the business of issue, but on the business

of the bill are four :—

1. The clause in the Act of 1844 which prohibits private banks from having more than six partners, is repealed in favour of the bill, to agree to pay to the Crown an increased per centage of interest on the increase being from 7s. to £1 per cent.

2. The clause, whether private or joint-stock, are, on payment of a reduced per centage, to be allowed to carry on business within London and sixty-five miles round. No bank of issue is to issue notes within three miles of the city of London, and no bank of issue that is at present outside the sixty-five miles is to issue notes within it.

3. The clause given to any bank of issue to transfer its rights in its notes to any other bank of issue, provided the latter undertakes to pay the same reduced per centage.

4. After the 1st January, 1879, the government of the bill is to be given to all banks coming within the scope of this Act to issue notes in twelve months from the date of the bill, in which case, unless Parliament shall otherwise determine, the bill will cease.

Of these clauses it is obviously a step (small though

it be) in the right direction. The restriction which by it is a disadvantage to the banker, but a much greater to the public. On what grounds it was ever enacted I, for one, have been able to discover, and now that the question is again before us, only regret that such a stipulation as an increased restriction should be considered. If it be sound policy to have banks regulated and controlled by law (which is, to say the least, extremely desirable) be for the welfare of the public that such establishments should be allowed to strengthen themselves if necessary.

With reference to the second clause, it is unique in its kind. Mr. Gladstone remarks, that it is an anomaly that the issue of bank notes should be excluded from the Metropolitan districts and Scotch banks of issue are freely admitted. It is an escape remark that in providing a remedy for this anomalous state is introduced, that is to say, the banks are required to pay for a privilege, which establishments in sister countries obtain gratuitously. Should this be done, we shall have in addition to the already numerous banks, a subdivision of the banks of issue into, two classes, terms them, conforming and non-conforming, which will be divided. Of the former, there will be the banks which will carry on banking business within that distance; and of the latter, who issue notes within sixty-five miles of London, who will not only to carry on banking business in London, but also beyond three miles from the city.

Of the latter, or non-conforming class, there will be those who issue notes beyond sixty-five miles from London, and those who issue within that radius, but neither of these will have offices in town, so that it would seem that the inconvenience proposed to be created are at least as great as those which are now experienced.

But the most important subject for consideration is the effect of the alteration, and how many banks will avail themselves of it. I think a perusal of the list of the banks of issue may assist us in making an estimate of the effect at the present moment in England and Wales 196 banks, of which 137 are private, and 59 joint-stock banks.

Of the private banks there are:—

3	whose authorised issues exceed	£100,000	but not
7	...	75,000	...
9	...	50,000	...
52	...	25,000	...
50	...	10,000	...
16
<hr/>			
137			

ant-stock banks—

those authorised issues exceed				£400,000	but are under £450,000	
...	300,000	...	400,000
...	100,000	...	200,000
...	75,000	...	100,000
...	50,000	...	75,000
...	25,000	...	50,000
...	10,000	...	25,000
...	—	...	10,000

statement it will be seen that out of 196 banks there are but five whose authorised issues exceed £100,000, but if the average be deducted from that number, leaving but five who only that amount in circulation. Now, it hardly seems probable that a bank, whose circulation is under this sum, will think it worth establishing an office in London for the purpose of retiring notes, the most ardent of company-mongers can scarcely say that a want of banking accommodation "now exists in London. Again, the profits of note issues have of late years seriously declined, the practice of keeping banking accounts has now become general, that notes which formerly remained in the hands of the shopkeeper for weeks or months, return to the issuer at the shape of deposits, or are paid by the London agents; in this mind, it seems very unlikely that the extra per cent will be incurred by any other bank than the National Bank, which, with its numerous branches, must incur very heavy agency charges, either by direct payments or by the obligation to keep heavy balances with their agents at little or no interest.

Now we come to the third clause, by which banks of issue are enabled to dispose of the privilege to any other bank of issue, under the restriction that banks which are now outside the sixty-mile radius, cannot acquire the right of issue within that distance. It seems to be just possible that this clause may be operative in some instances, where bankers amalgamate, or private banks merge with stock companies, but in all cases where banks are prospering it seems very unwise to transfer such a privilege to a rival, as it would naturally look upon such a step as a confession of weakness, and, of course, act accordingly.

The point is that clause by which power is given to the Government any day to terminate the issues of the banks who take advantage of the Act on the 1st January, 1880. Mr. Gladstone said, in the House of Commons, that if the country issues were only reduced to the rate as since 1844, they will not be finally extinguished for ever.

Neither authority nor figures were given to support this statement, which appears to be altogether fallacious. When the Act

of 1844 was passed there were in England and Wales issue, with an aggregate authorised circulation of £1,000,000. At the present time there are 196 banks having authorised circulation to the extent of £7,415,448, showing a reduction of £1,230,000. If we take the average circulation of these banks for the 10 years ending 31st March last, we find the amount only £5,674,000, or £1,740,000 under the limit, and showing a practical reduction of £3,000,000 in the 21 years, which by no means is a small sum, according to Gladstone's statement.

Of course, the operation of this clause will entirely depend on whether bankers consider the advantages offered by the bill to be the almost certain destruction of their monopoly. It is not clear whether they think their present tenure of the privilege will make it worth while to ensure its retention for the future. It seemed to be the general impression in the House that the bill would not expedite the extinction of the monopoly to any appreciable extent; in fact, some members thought it would retard it. Mr. Thomson Hankey was of that opinion. He made the clause compulsory, while Mr. Goschen proposed a reduction of the lease to ten years instead of fifteen. The House approved of the tax of £1 per cent. which "involved a principle, as showing that the State claimed the right to issue the currency;" a principle, by-the-by, which is exactly the same as the present tax of 7s., and also by the arrangement that the Bank of England is authorised to increase its issue to two-thirds of the amount of lapsed country issues, and that such increase is appropriated by the State.

There was a clause proposed by Alderman Salomonson that, to a certain extent, have placed the issues on a sound basis. It alluded to the proposition that issuing banks should be authorised to issue their circulation; it was, however, vetoed by the Exchequer, though he gave but little reason for his objection except that it would be unfair to oblige those banks who were authorised by this Act to give security, while other banks should be exempted: a line of argument which suggests a very weak case. He rather favoured the idea of making notes a first charge on the assets in the case of bankruptcy, which would most certainly be a less cumbrous and equally safe expedient.

Looking at this Act in all its bearings, it appears to have been awkwardly brought in to further the interests of one class, so that establishment will be almost the only one that will be except perhaps in an occasional case of amalgamation. There were great difficulties to be encountered, and opposition was to be overcome, before a comprehensive measure relative to the issue of bank notes could be carried, but Mr. Gladstone has, on previous occasions, shown no lack of courage to meet opposition, but on the present occasion he has taken the position to court it.

On this occasion he has produced a measure which I venture to be pronounced by the banking community to be unworthy of his splendid talents; a measure which will in all probability be inoperative, but which, if operative, will create more anomalies than it undertakes to remove.

I am, Sir,

Your obedient servant,

J. D. F.

London, May 23rd, 1865.

BANKING AND FINANCIAL ANECDOTES.

No. VI.

A CURIOUS IRISH BANKING TRANSACTION.

Mr. of "The Clubs of London" gives a curious instance of banking business that was sometimes carried on in Ireland at the commencement of the last century. "I once accompanied a party of English ladies and gentlemen to that enchanting spot, the lake of Killarney, when, having amused ourselves for a few hours, we were on the point of returning to Dublin when one of the party collected that he had in his possession a handful of notes on which was a kind of saddler in the town of Killarney. Accordingly we all set out by way of sport to have them exchanged, the principal object being to see and converse with the proprietor of the bank. Having entered the shop, which hardly sufficed to accommodate the whole company, we found the banking saddler hard at work. One of the gentlemen thus addressed him: "Good morning, sir; I presume you are the gentleman of the house?" "At your service, ladies and gentlemen," returned the saddler. "It is very much to be desired that the bank is kept?" continued my friend. "Very much, sir," replied the mechanic; "this is the Killarney bank, and of a better." My friend then said, "We are on the point of visiting your town, and as we have some few of your notes which are of no manner of use to us elsewhere, I'll thank you for them." The banker replied, "Cash, please your honour; what do you want? Is it anything in the leather line? I have a beautiful saddle as was ever put across a horse, good and cheap. How many notes have you, sir, if you please?" "There are no less,"

said my friend, "than sixteen of your promises an amazingly large sum of 15s. 9d. sterling." "I sh noble," returned the banker, "to waste any more time, or of those swate bootiful ladies and joutle illigant bridle here as isn't to be matched in Yoc or Ameriky ; its lowest price is 15s. 6½d.—will a lordship. If ye'll be plased to accept of it, then t a thrupenny note coming to your lordship, and business at once." There was no other course the bridle.

DIABOLICAL ATTEMPT TO RUIN A COUNTRY

Mr. Lawson, in his "History of Banking," narrates a striking episode :—

On the establishment of the —— Fire Insurance Company, the founder was appointed manager ; and after the few years in existence, the conduct of this person to call forth some severe remarks from the directors, the chairman, who was a banker in the town of ——, to such an extent had his conduct been carried that it was necessary, in order to protect the interests of the bank, that he should be requested to resign, or he would not perform his duty of conveying the decision of the board of directors. The chairman, who told him that on a given day he was to call at the office, and receive from Mr. B., the manager, the moneys and moneys belonging to the company.

Accordingly, the chairman, on the day appointed, called at the office, when they found Mr. B. a man, with a brace of pistols, sitting on a box with securities, &c., belonging to the company. The chairman, ordered by the father to shoot the first person who attempted to move him from his seat. This happened unlooked for and unusual, astonished the chairman, and accordingly retired to decide upon what steps it was to take. On their leaving the premises the manager, men, and told them he wanted them to walk in p

—— the bankers, and he would march at their

It is necessary here to state that with the fun

in the hands of the manager he had, since the day he received notice of the termination of his appointment, been engaged in circulating such money for the banker's notes, by which means he had accumulated several thousand pounds. The notes so collected he pasted on large sheets of paper, and then pasted them on twelve large placards: one he carried himself, with these words in large characters, "Going to Messrs. ——— bank to demand payment." Each man carried one, and they marched in single file to the house. On entering the house he demanded instant payment in gold. The men were taken by surprise; they had not so much gold in the house, but they said they could, in a very little time, collect from the circulating banks the requisite amount; but no, this would not do, said the manager; it was just the answer he expected. He replied, "The notes are payable to bearer on demand; I now demand payment, or I shall proclaim your bank as having failed." They granted him a few hours' indulgence, but he was inexorable; he would not give a minute, and turning to his men he said, "Now, my men, hold up your placards." At the same time taking from his pocket a printed paper, with which he had come provided, he pasted on it the one he had carried himself, and again headed the procession. The first placard announced "Messrs. ——— have suspended payments;" and in this manner he marched through the principal streets to the utter amazement of the inhabitants, especially those who had transactions with the bank, or who held any of its notes. It was as might have been anticipated; the bank failed. The manager of the assurance company had been gained; he received his appointment and left the town.

Of this man, though terrible, was not so bad as he deserved. We have been told, in the Fleet Prison, placed there by the judge who had, perhaps unwillingly, aided him in his former career.

BANKERS AND BANKERS.

A young woman was some years since brought before a metropolitan magistrate, charged with begging. The representative of the law sternly interrogated the prisoner, sharply asking her three questions in a breath—who she was, where she came from, and what she did. The girl began to cry, but gave no answer, whereupon the magistrate told her he thought she was an impostor, and he must

know the truth. The young woman, gaining courage, her name was Smith ; that she came from Lincolnshire, her father was a banker. This immediately altered the course of the case. "What !" he exclaimed, "your father would not allow his daughter to go about in this wretched manner, either have done something to bring this on yourself, or in a disgraceful way." The young woman replied that she had done nothing wrong ; that her father could not afford to let her go in that manner, that she had been obliged to come up to London, in distress. Inquiries were then set on foot, and the town from which the young woman had come, from the magistrate, wrote that she was the daughter of a banker in the Fens ; that her father, through her refusal to keep her ; and that the men who followed her alluded to were generally called "bankers" in that country.

THE BANKER'S WIFE AND HER NEIGHBOUR'S

Mrs. Coutts (previously Miss Mellon) during her residence at Lodge, Highgate—a house which had cost her husband a great deal of money—used to be much annoyed by the unthinking conduct of an immediate neighbour. Whenever the wife of the banker gave a dinner-party at Holland House, on an occasion when she particularly desired that the party should be itself in its best aspects, that particular day seemed to her neighbour for her washing-day ; and the guests were not only amused by such a quantity of clothes, but that the thought of a laundry was naturally suggested. They were further entertained by the clatter of tongues, and the contrariety or agreement of opinion among the neighbours. To rid herself of this annoyance Mrs. Coutts sold a portion of land which was so disagreeably approached, but the owner would not consent. The banker then upon built up a wall about 100 feet high, which shut from her guests the view of the clothes-lines, and the clothes thereon ; but the wall also shut from view a very large garden. The obdurate neighbour was, however, ere long satisfied. A quarrel ensued ; the wall, which had cost £1,000, was built, and there was subsequently greater "luck about" the washing-day."

On Chartered Bank of Australia, to be presented at a general meeting, on the 2nd June, states that it is to be able to announce that the general results of the year have been successful. From the accounts it appears that the profits are somewhat in excess of last year, and the directors will learn with satisfaction, viewing the depression which has existed in the Australian colonies, as well as the position on this bank has had to contend with. The latest accounts extend to the 25th March last, and speak in a favourable position and prospects of the bank. The inspector, Mr. J. H. B. Smith, in Melbourne and resumed the management of the bank on the 1st of January last. The accounts for the past year are made up to the 31st December last. After the usual deductions, and allowance for bad and doubtful debts, there remains a profit of £53,436, out of which the directors recommend that a dividend be declared for the half-year of 4 per cent, £40,000; and they further recommend that a reserve fund, which will then amount to £134,436, leaving to be carried to next account a balance of £134,436.

there has existed in Germany a large voluntary merchants, politicians, and professors and others, Congress of German Economists. The plan of the resembles that of the British Association for the Advancement of Science in this country—that is to say, there is an annual meeting of each year in some principal town, and the meeting is controlled by an organisation of presidents, and a committee. The whole purpose of the Congress is to appeal to the public opinion. The meetings hitherto held have been successful. They have been attended by men who fairly represent the educated and active portion of the middle classes, and the more practical intellects among the economists. The objects of the Congress are specific and practical. Leaving aside abstract problems, the questions of the improvement of municipal or commercial law more or less are in the present condition of Germany.

Congress for 1863 was held at Dresden, in September questions principally debated were four, viz., Patent rights, Consular Courts, Consular Jurisdiction, and Consular Privileges, and Commercial Treaties, and in each case the rights of the United States were defended. It might be thought that many important facts illustrative of the present position of the German States, and of the wide differences which exist between them and this country.

We have thought it desirable, therefore, to frame an account of the Dresden proceedings, so far as they relate to banks and banking, by doing so, to preserve to some extent the dramatic form of the debates, by giving the names of the speakers and the lines adopted by each. We need not say that we have endeavoured to give our summary to the more important portions of the proceedings.

At the opening of the Congress on the second day, Mr. von Frankfort, read a paper on the laws relating to banks and on the question in general. He said that the Committee of the Congress had endeavoured to inform itself of the wishes of the chambers of commerce and large banking institutions.

The chambers of commerce had declared against state banks, and the banking institutions had not returned answers.

Prussia had proposed a Bank Act two years ago, and the Congress had declared themselves opposed to it. In 1862 the Congress had declared itself with establishing the problem without trying to solve it. The committee has four proposals to bring forward, and has agreed that banks should be allowed when established with unlimited liability, and that in the case of banks with limited liability, certain restrictions should be imposed. As to what these legal restrictions should be, the committee could not agree: they have therefore decided to leave the best of them for the determination of the Congress.

The four resolutions concerning banks are as follows:—

1st. An extended and regular system of banking is indispensable for the promotion of the material welfare of a civilized nation.

2nd. Monopolies and concessions granted to government banks, to private societies for the issue of bank-notes, diminish, as proved, the safety of the currency, are hurtful to the development of the nation, and contribute to the impoverishment of the nation.

3rd. Banking activity, with or without the capacity to issue bank-notes, should be left open to free competition, provided the liability of the banks be unlimited.

4th. If the shareholders of a bank issuing notes claim limited liability, they must fulfil certain legal conditions, and the committee now submit for consideration.

1. Shall the amount of the notes to be issued be fixed?
2. Shall the minimum amount for which a note can be issued be fixed?
3. Shall a periodical publication of the accounts of the banks be obligatory?
4. Shall the bank, under penalty of bankruptcy, be obliged to coin all the notes presented?
5. Shall security to the amount of the current notes be provided in bullion, and in what proportion?
6. Shall the total amount issued be covered by bullion and by the sale of cantile bills together?
7. Are at least two endorsements necessary to bills issued by banks?
8. Are stock and wares pledged for advances admissible as security for notes?
9. Are state and other scrips allowable as security for notes?
10. Shall the holder of a note have any peculiar advantages in the winding-up of the bank?
11. Ought, irrespective of the note circulation, the business of banks to be restricted, and if so, in what manner?

purchase of scrip and wares to be prohibited as specula-

tion or pawning of bank shares allowable?

Requirement of particular security for the deposits de-

posits to be confined to a particular sum?

Minimum term of notice be required for the payment of de-

After reading these propositions of the Committee, began the paper, by stating that up to the present time banks founded in Germany by means of a concession from one of the governments and the issue of notes is subjected to particular restrictions. Companies at present can only take deposits up to a certain sum. This is one of the most important of banking operations, and is now restricted. We see in Germany that the privileged banks, with the support of their governments, do not even pay well. The Bank of Prussia, for instance, in spite of its monopoly, does not yield the same interest as the government forbid to a great extent the establishment of new banking companies, and on the other they do not obtain what they wish for by forbidding them. What may prevail in official circles may be surmised from the fact that Heydt has maintained in the Prussian project that banks should properly to be conducted only by servants of the state. The Congress must be directed to establish as free a condition for the credit system. My paper has this intention, and that the Congress will declare both for the liberty of industry, as well as for the liberty of credit and banking. Michaelis spoke in favour of the full liability of all banks and of full freedom in banking. He observed that the law was limited, the desire to make extra profit by a more free business was increased. The ease and safety of a bank depended upon the number of payments to be made daily and upon the facility with which the notes could be converted into cash and return to the bank in several ways. It is the best if the notes are in payment of a current demand. It is also convenient if the notes are used as a deposit against bullion. It is not good, and it is not safe, if they are paid in as deposits at interest. It is forbidden to accept more than one million of thalers as a deposit, and even for this sum a minimum term of notice is required, that is, the banks are prevented from fulfilling their important economical duty. It is provided also that notes should be convertible to the extent of one-third by bullion. But if bullion is only one-third be there to-day, and a 10 thaler note is worth away 10 thalers, it is no longer there, and the required security is as soon as it begins to be made use of. Such directions are childish. The only real security consists in a continual circulation of notes in order to avoid danger from the note circulation. It is generally observed as to the admission of mortgaged bills for notes. Discounted bills only, and not pledged stocks, should be a solid basis for notes. Government securities are also a good basis. In New York it is even demanded that a bank should invest its funds in government securities instead of banking business, in order to give security to the notes thus created. This is depriving the notes of a good

security in order to substitute a bad one. As to a preference over other bank creditors, that would be a development of true banking business, and at the same time the note circulation more dangerous, for the safer the bank thinks itself, and the more care it takes with its note circulation. The bank ought to vote for no monopolies, no concessions, full bank freedom, and limited liability joined to similar measures.

Dr. Faucher, of Berlin, said that the exaggerated issue of bank notes was to convert fixed capital into paper money to be taken on the Continent with the same facility. The consequences of this were that the banks attempted to issue notes as possible, and also that the paper of one bank was taken into another, where it had no proper circle of circulation. The bank notes are in circulation than a healthy bank. The cheque system is altogether wanting. Great success has been made in France to extend the cheque system, a considerable success.

If such a custom can only be introduced, a great change will cease which have led to the acceptance of bank notes. Prussian provincial banks have, indeed, assured us that they will introduce the cheque system here; for the traders want their cash in the banks, but desire only credit from the banks. certainly the evil in a most concentrated form; but the traders in Germany require further instruction and the cheque system can be introduced.

The reason for this goes very deep into the nature of our traders. Our traders seek their profit more in advantageous purchase. But the consequence of this is, that the trader depends upon narrower principles than in England. He seeks to obtain an advantage over the thoughtless consumer. But the advantage over the experienced wholesale dealer in the purchase of raw materials is far more lasting and better, I can beat thereby my competitors, and obtain a greater extension. The nation which understands the advantageous manner will, in the end, remain the master of the world; and it is undeniable that the English are at buying. It is the custom now with the English to buy raw materials only at great auctions. In this manner the trader gains once in the beginning the whole profit, while the wholesale dealer pays to the auctioneer. Ready money, however, is not paid at auction sales.

As soon as the custom of keeping ready money has been introduced, keeping it at a bank necessarily follows, on account of the Cash keeping at a bank renders the preservation of cash for the entry of the cheque in the bank books more convenient. The mere fact of having cash at a bank gives a great advantage. With a system of cheques no bank will suffer by the issue of notes; it will profit by it. If our banks are only once sure of the cash on the cheque system, they will no longer be obliged to rely on the reliance upon the issue of notes; for these reasons it is the duty of the body to strive to introduce the cheque system.

Mr. Sumter, a banker of Königsberg—Limited

only with certain restrictions. Five points come principally for consideration—1st. Shall the business of the bank be prescribed by laws.—I answer this shortly; no. Further, for two possibilities, if the bank be solid it will be business, if not, legal restrictions are not worth anything. The fixing of the note issue is not admissible, for it is determined by circumstances. 3rd. The kind of note security cannot be prescribed by law, but ought to be left to the bank. The backing to the extent of one-third of the issue, is according to circumstances too much or too little. 4th. Question 2 ought to be affirmed, for the issue of the note ought to be depreciated, though not upon scientific grounds. 5th. Measures of safety for the public. Question 4 belongs also to the public, but is a little too stringent, although the payment of its claims at all times be the natural duty of the bank. In the same way, question 3 must be also affirmed in the interest of the public.

6th.—Experience has shown that privileged banks impair the general community. The more the banks are left upon their own merits the better. Therefore question 1 ought to be negatived. Mr. Bismarck expressed similar views to those of the last speaker, saying that the unlimited acceptance of deposits had led to bad results, but that it was not well to think too much about the future. He hoped, in conclusion, that the resolution would be adopted by the German Bund to adopt a general bank law for the empire, and that the grounds laid down in the proposals before be realised therein.

7th.—A bank director from Danzig—A chief consideration of all banks is the amount of confidence which the public takes in them. Bankers inspire, whether they represent a proper amount of capital or not. A bank founded by totally unknown persons cannot do business. Referring to the single question, as to No. 1, it is not possible to fix the note issue, but it depends upon the demand. As to No. 2, our minimum is 100 thalers. The question is not, however, of great importance. According to general experience, the 100 thaler and 500 thalers notes are the longest in circulation, whilst the twenty and twenty-five thaler notes are the quickest, quicker even than the ten thaler note. Question 3 is self-understood to be affirmed in the interest of the public. At point 4, it is necessary to impose this condition by law. At point 5, the proportion, according to experience, cannot be fixed to any degree of certainty. In the year 1857 a third proved necessary. I have then paid away as much as 150,000 thalers in such crises do not come over night; certain signs precede which can be provided against. Under ordinary circumstances a reserve of 20 per cent. is still too much. At question 6, I remark that the bank must be secured, and even have a bullion reserve; part, however, may be secured by bills. As to No. 7. Sometimes seven signatures are required, sometimes two. In practice several signatures are considered safer, but a rule can be laid down. The loans upon stock and wares are not convertible. For the same reason question 9 must be negatived. Question 10 is already negatived by commercial law. Questions 11-13 inclusive, that with limited liability the bank must likewise be limited, and speculation excluded alto-

gether. In the same manner the pawning of bank should not be permitted, for it has occurred that twice when certain shares only were forbidden to be pawned, by means of a mutual pawning of their shares, and wrong against the noteholders. Question 14 is answered, certain means of security for the deposits cannot be, the bank manager can easily observe when deposits are like in great amounts. Question 15 ought to be negative, deposits will certainly not leave the amount of the deposit sum will fix itself in practice. Question 16 cannot be as to whether the times are normal or critical, but it is that money ought not to be taken at a year's notice of

Mr. Otto Michaelis—Notes perform the following service in the place of the bill a means of exchange which capability of circulation and a greater circulating area the bill must be passed further. The banks perform the service to the community: they take upon themselves the risks, and by publishing their store of bills and notes exchanges with all its waverings under public control. The issue of bank notes is not the chief point in a banking system, free competition it is an agent which presses the bank into that business for which they are there.

Dr. Brann, the president, rose to remark that several before them. 1st. One from Mr. Mac Wirth, to place before the committee the following words:—"The Commission has the following principles for a German banking law, by agreement among the different states or by the different states."

2. By Dr. Wolff, of Stettin—To resolve in place of the committee be charged with collecting during the next basis of our present debates, the conditions under limited liability shall be permitted."

3. By Mr. Samemann—To change article 4 in the "If the shareholders of a note-issuing bank claim the liability, they must fulfil the following legal conditions value of single notes is to be greater than the highest in the country. 2. The accounts are to be published periodically. 3. The bank is to be bound to pay their notes daily on presentation. 4. Buying and pawning of bank shares is prohibited." And instead of article 5, to say—"That upon the principles of rational banking shall be adopted, that banks for discount and deposit business, without the privilege, is to be recommended, for with these almost all the advantages can be attained as with note-issuing banks."

Mr. Bansi, of Bielefeld, supported Dr. Wolff's proposition, 16 points back to the committee. The 16 points contain a full banking law, and about that we cannot decide, but as a Congress to set up general points of view. The following:—

1. Preventive rules have no effect.
2. Corrective rules are necessary, and should be rapid in their operation as possible.
3. The recognition of the trustworthiness of a bank should be clear to the public by the legislature.

Röpell, of Danzig, after some remarks, said, that Dr. Wolff's tendency to a prolongation of the subject. He had criticised the single point and asserted that there was an inner contradiction between points, which in reality did not exist. It may certainly be desirable to allow banks with unlimited liability, but it was seen, however, that the movement ran directly towards limited liability, as was shown by the example of England. We desire to know how banks with limited liability are to be treated. They receive from the state the right of a limited position, they are liable for only a certain amount; it is natural that they should, therefore, require in this exceptional case an exceptional treatment over the bank. The question must not be delayed, for it is one of the most important questions of the day.

Samemann—We are near the end of our debate, for only four or five points remain to be decided. To Dr. Wolff I beg to remark that the question of limited liability would be a greater hindrance to the extension of banking than all existing at present. In England, as others have said, limited liability comes more and more into use. In one point I am not agreed with Messrs. Michaelis and Röpell, and that is, with regard to the safety of bills. Mr. Michaelis is right so far as the aim of the present issue is concerned, which is to replace a less convenient means of exchange by a more convenient, but wrong when he says that all good bills originate in a transaction or a purchase; for the bank cannot get at all into the origin of a bill. Public opinion goes very much against the admission of pawned stock and wares as security, but a great proportion of bills of exchange are only another form of kind of business. Blank credit is also not altogether a bill of exchange, but still not bill jobbing. The bank does not concern itself with the origin of the bill, but with what the man does with the money he gets from the bank, and as to whether the signatures are good. We should remember that if you only consider business bills as solid and not bring the whole work of Mr. Schulze-Delitzsch into question; if the members of a loan society withdraw a loan and found a bill upon a transaction, it is nothing but bill jobbing. On the contrary, experience shows that bills founded upon transactions can also be bad. Dr. Asher has put business bills to the extent of several hundred thousand marks as a point bad during the commercial crisis at Hamburg. On this point it cannot be legally asserted that security by means of bills is sufficient, and for this reason, that we do not know what the bank managers do and by good bills. Ideas are very different on this point, and a decision is impossible. It is indeed altogether a case of personal confidence. Banks cannot be forbidden to buy Consols, for these are at times bills of securities. The banks must also be left to themselves as to whether they ought to speculate in wares; such speculations must be set clearly in the published accounts, and such banks as engage in them must be on credit; this is by far the best control.

Wolff—So many new and important questions have arisen during this discussion that I consider an adjournment more and more necessary. The question is, ought we to promote the movement in favour of limited liability? We should by our vote pronounce a prejudicial decision on many points, and I do not think we should make any improvement if we do not accept the normal propositions of Mr. Samemann. The question is important, but it is better to postpone it than to decide too quickly.

Otto Michaelis—Two questions have become mixed several times, during the debate, viz., whether anything shall be received as good advice

or whether it shall be required as a legal restriction would remark that with banks with unlimited liability buy their own shares can never come into question, but limited liability, for otherwise the capital, which forms public, could be secretly withdrawn from the business the covering of notes by means of bills. I believe it but it should not be a legal requirement. The four Samemann has proposed are justified by the nature of

Mr. Schottler, of Danzig—I beg to remark as to speculation is not distinctly forbidden, and the public selves to control it, a single good result will make them lead to deception. As to question 4, bankruptcy is not a misfortune. The article ought to be expressed “und up.”

Dr. Fancher—It is clear that the aim of point 13 is from withdrawing their capital out of their business shares. It is quite impossible to compel a company with to keep its capital in the business. The capital affords security lies in the uprightness of the bank. There is a security where none exists. The less the law does to the public will be; and therefore I think that point 13 is justified.

The resolutions of the committee were here put to preliminary proposition of Mr. Max Wirth failed, because with point 1. Article 1 of the committee was adopted, adopted unanimously. Article 3 and the positive part received by a great majority. The motion of Dr. W. refused. The propositions of Mr. Samemann as to points 4 and 5 were accepted. Point 6 was affirmed by 39 votes against 12 were negatived. Article 5, concerning the establishment of deposit banks, according to the motion of M. adopted.

The resolution of the Congress then stood as follows:

“Article I.—An extended and regular system of credit is indispensable to the promotion of the material welfare of a nation.”

“Article II.—Monopolies and concessions granted to banks or to private societies for the issue of banknotes, as experience has proved, the safety of the currency; the development of banking, and contribute to the improvement of the nation by individuals.

“Article III.—Banking activity, with or without the issue of notes, should be left open to free competition, provided that the shareholders be unlimited.

“Article IV.—Shareholders desiring the privilege of issuing banknotes must fulfil the following legal conditions:—

“a. The minimum amount for which a note can be issued.
“b. A periodical publication of the accounts of the bank required.

“c. The bank to be obliged under penalty of liquidation to redeem daily all the notes presented.

“d. State and other scrips to be allowed as security for the issue of banknotes.
“e. The business of the bank, irrespective of the nature of the transactions, to be restricted in any manner.

“f. The purchase or pawning of bank shares to be a

The word "Private" is applied in Germany to Joint-Stock Banks, to distinguish them from banks more or less under state control.

Banking and Commercial

GUARANTEE—WHEN CONTINUING AFTER THE FIRM GUARANTEED, AND WHEN NOT

It is of course well known, that it is not an unusual practice with bankers, to give a firm liberty to open an account to overdraw to a given extent upon a guarantee given by a firm or person, on whom the bankers can rely in case of deficiencies.

Under the old law before the 19th and 20th Vict. (the Mercantile Law Amendment Act), the general principle from the practice was, that if there was any change in the firm guaranteed, the guarantee ceased, unless the guarantee was given by a provision; the principle being, that an obligor is not bound to guarantee a firm of which he knew the members when those members have left it, or when the firm changes. And so it was held in "*Weston v. Barclay*" (10 B. & C. 673), where Mansfield, C. J. says "that from the decision in '*Barclay v. Lucas*' (3 Doug. 326), the principle of the decision has been much questioned, it results that if the obligee dies, the security is at an end." This principle is founded on the very principle which is at the basis of suretiship, viz., the principle of personal confidence. If A is willing to be surety for B, whom he knows, but B afterwards changes terms expresses it, he never intends to become a surety for the representatives or assigns, of whom he knows nothing. As a general rule, on any change of the constitution of the guarantee body, as for instance, if A, B, and C were the guarantee body, and A and C retired in favour of D and E, a new firm would only have one of the original members. The guarantee would cease under the law before the Amendment Act. There was an exception when the firm was a fluctuating body, as a banking company. On the *necessitate rei*, the body is a continually fluctuating body. It was held that the guarantee would continue, notwithstanding changes in the firm. "*Metcalf v. Bruin*" (12 Q. B. 339) 19th and 20th Vict., cap. 97, to a certain extent modified the old law; by section 4 it is enacted that a guarantee should not be binding (in the event of a change in the guarantee body) "unless the intention of the parties to the promise shall continue to be binding notwithstanding any changes, shall appear either by express stipulation or by necessary implication from the nature of the former promise."

it will be observed upon this, that the act really hardly any change from the old law. All that it does is to the doctrine of "*Barclay v. Lucas*" (which it seems was that questioned), and of "*Metcalf v. Bruin*," which does appear to have been questioned at all.

any rate, by the act, in order to make the guarantee a living guarantee, where there has been a change in the there must be either express stipulation or necessary implication, there can be no doubt. The doubt arises as to what necessary implication, and that question arose in a recent "*Backhouse v. Hall*" (6 New Rep. 98). In that case, some years before 1846, G. W. Hall and W. T. Hall carried business as shipbuilders under the firm of G. W. and W. T.

W. T. Hall died in 1840, and the business was then carried on by his widow (his executrix) and the co-executors, G. W. Hall under the firm of G. W. and W. T. Hall, the same as before. G. W. Hall died in 1856, and then the business was carried on by the defendant, a brother of the original G. W. and W. T. Hall, with the widows of the two brothers, the defendant, acting as manager.

In 1857 the partnership was dissolved, and the business was carried on by the two widows, and their nephew M. In January, 1858, on the application of M. to the plaintiff's bankers, to give the firm accommodation by opening an account with them to be overdrawn to the extent of £5,000, the plaintiff bank granted, on a guarantee by M. and the defendant for moneys so to be due not exceeding £5,000, and the guarantee was used to be for the firm of G. W. and W. T. Hall, the old firm of the firm, although there were no such persons then in existence. The guarantee was endorsed by Elizabeth Hall and Sarah Hall, the two widows, who were the real firm. On the 17th of September this account was overdrawn. In July Elizabeth Hall died; her death was known to the defendant, but not to the plaintiff till 1862.

After her death, the balance due to the plaintiff exceeded £5,000; after her death the business still continued to be carried on under the same style, and the account continued with the plaintiff. In July, 1861, the defendant gave notice that he was not to be liable on the guarantee for any future advances, and that he was to be freed from his guarantee. At that time the balance due to the plaintiff exceeded £5,000, and all the advances on which the balance accrued were made subsequent to the death of Elizabeth Hall. The question before the court was, whether the defendant was liable under his guarantee to pay to the

plaintiff any and what portion of the balance of from the firm of G. W. and W. T. Hall on 1861. The only liability, if any, of the defendant is his guarantee.

It was argued for the continuance of the business down to 1858 the business of shipbuilders has continued uninterruptedly under the firm of G. W. and W. T. Hall though both G. W. and W. T. Hall were deceased. The guarantee described the firm as G. W. and W. T. Hall. It was intended to confine the guarantee to the partners, their names would have been mentioned if that circumstance there was necessary implied. The guarantee was intended to be independent of the firm.

But the court held otherwise: the court, after full consideration, said, "Can we say here that the intention appears by necessary implication from the name of the firm or otherwise? Looking at all the facts of the case it does not so appear; there is nothing to show that fresh partners entering the firm, or of the death of the old partners, was contemplated when the guarantee was given. There is nothing in the nature of a shipbuilding firm which would necessarily imply such an intention. The defendant is not bound."

The broad result of this case seems to be, that if a guarantee is given for a firm, you must either show that the nature of the firm is such (as a joint-stock company) that of its very nature it must be known to the guarantor that it is a continually fluctuating body; or that there is nothing quite inconsistent with any other theory than that the guarantor intended a continuing guarantee notwithstanding the death of the partners. It is hardly necessary to add that a guarantee should always express distinctly what is the nature of the parties. And when it does not do so, the presumption is in favour of the guarantor. That he meant to be bound for the persons whom he knew, and not for persons of whom he knew nothing.

THE BANK NOTES ISSUE BILL.

mons on the 1st May, on the motion for going into

the Exchequer explained some alterations which had
 sure, and which would be proposed in committee.

the bill, contending that the Government had no
 only to a given number of persons who had done
 entitle them to class legislation. He moved that
 the subject be postponed for a month.

 nks under the act of 1844.

d with the clause as it originally stood, and could
 was proposed to alter it. He did not think it should
 llor of the Exchequer of the day to determine
 ould cease.

Mr. Alderman Salomons explained that the clause was for the issues of all the country banks in fifteen years; but for three, which would probably accept the terms offered.

Mr. Briscoe said that he should support the bill as introduced by the Chancellor of the Exchequer, though, had it been in its original shape, he should have opposed it.

Mr. Hubbard said one great argument for the bill was that the issues should terminate at a given date; but now that the bill was amended, to enable the Treasury to terminate those issues it should think fit.

Mr. Ayrton thought that the clause as it originally stood was to the clause as amended. The notice contemplated was one which would only be given provided the government was a strong one, and the Chancellor of the Exchequer was an enterprising man. He believed that it would be more prudent to leave the matter to these contingencies.

The Chancellor of the Exchequer said that there was a difference between issuing a notice from Downing Street and proposing a proposition before the House and having to contend with suggestions and amendments. It was not the intention of the government to carry out the policy of this measure to the reconsideration of the Chancellor of the day; but the Act was clear that, with all the difficulties there might be upon collateral questions, the government should have absolute power to determine the issue at a certain period by those banks which came within the scope of the question upon what basis issues should be there. There was no doubt, he determined by the then Parliament, with the act of 1844 and to the experience which would be gained by time for giving notice should arrive.

Sir S. Northcote wished to see the word "if" at the end of the clause omitted, so as to make the enactment positive and not hypothetical.

The Chancellor of the Exchequer assented to the proposal.

Mr. Salt said the word "if" was the very essence of the clause.

After further verbal alterations,

The Chancellor of the Exchequer stated, in answer to a question, that the non-conforming banks would be untouched by the bill.

The clause, as amended, was ultimately added to the bill. Clauses 9 to 18 were then agreed to.

Mr. Alderman Salomons moved an additional clause that any bank of issue having a house of business or establishment in London, or at any place not exceeding 65 miles from London, shall deposit with the Commissioners of the National Debt Office of Exchequer bills or other government securities equal in value to the amount of the issue, to be retained by the said Commissioners until the bank shall continue a bank of issue with a house of business or establishment in London, or within 65 miles thereof."

The Chancellor of the Exchequer said there was in the bill a large amount of unsecured issues of bank notes. The hon. member moved a clause to put an end to that state of things, and joint-stock banks to give security for their notes. The bill had virtually passed through committee, and certain banks had been put in a more favourable position towards the public than they were in general. They were invited to place themselves in a position to

the public than the non-conforming banks, and the hon. gentleman proposed to visit them with a disability in the shape of requiring only them, to give security. In point of fact, the proposition hon. friend was to require security from those banks from which it was needed, while from those from whom it might be needful he took security whatever. His hon. friend required that the notes issued be secured by requiring the banks to deposit with the Commissioners of the National Debt a certain amount of government security; but he (the Chancellor of the Exchequer) was not at all certain that it was necessary, at all sure that it would be equitable to limit the banks from whom they required to get security for their notes to government security. Under the circumstances he could not assent to the clause.

Some observations from Mr. Heygate and Mr. Goschen, Mr. Hubbard said he believed the bill would not be taken advantage of by more than two or three banks, and he therefore heartily wished that it never been brought forward.

Mr. Neate supported the clause.

Alderman Salomons then withdrew the clause he had proposed.

The Chancellor of the Exchequer said there were a certain number of banks which did not compound for the stamp duty on their notes, and they would be put to some disadvantage in respect of their notes which would run out their average time. He had, therefore, prepared a clause which gave power to the Treasury to make those banks such compensation as might be fair on their stamped notes yet in circulation.

The clause was agreed to; as was also the preamble, and the bill as amended was then reported.

On 25th May the subject was again brought before the House when, the Chancellor of the Exchequer, in moving that the bill be recommitted, stated that, in order to admit of the insertion of the amendments proposed to clause 8, the third reading would be postponed until the following week.

Mr. Heygate said when the bill was first proposed it was received by a portion of the commercial community with dissent, nor had it been run with peculiar favour by the banking interest. However, even when fresh proposals being made on the part of the Government to the effect of country bankers, it was carried by a majority of votes that the bill should be accepted, and it was therefore in fulfilment of an honourable undertaking that he intended to support the proposal for the recommitment of the bill.

Mr. Radfield contended that the further progress of the bill should be deferred until the country bankers had had an opportunity of fully stating their objections to it; and with that view he intended to move that, should the bill be recommitted, the bill be agreed to, the committee be adjourned until after the Whitsuntide holidays.

Mr. Neate declared it to be his opinion that it was not competent to the House to deprive these country banks of the power of issue without any compensation.

Mr. Selous Edwards said the passing of such a measure would entail the most serious consequences upon the trade of small country towns; and he moved that at a meeting of bankers, held that day at the Grosvenor Hotel, resolved, by a majority of 41 to 12, that the Chancellor of the Exchequer be requested to withdraw the bill.

Mr. Selous approved of the suggestion that it would be better to postpone the committee on the bill until after the Whitsuntide holidays.

Mr. Graves believed that the country bankers were b interest to accept the bill.

Mr. Hubbard contended that the private banks of the establish a claim to the permanent enjoyment of the quite admitted that they had a right to make as many they chose; but it was a very different thing to paper money. The regulation of the coinage belonged which had more than once exercised this right by pro copper and silver tokens. What difference was there suppressing the issue of paper money? The fact was t issued paper money *pro tanto* levied a tax upon the clear that they could not set up any claim to a perman kind. The Bank of England had not the slightest inter It was an utter delusion to suppose that the lapsing of could occasion the slightest inconvenience to those who For wherever there was a demand for money, that dem be supplied through the usual channels of circulation. could not make any claim to a permanent right of issu Bank Act of 1844; on the contrary, the right of interfere whenever it thought fit was expressly res He thought that Parliament had a perfect right to it deemed it expedient to limit, to restrain, and, if terminate the whole of the country issues.

Mr. Alderman Salomons said that when the bill cam ing he should move that it be read a third time th

The Chancellor of the Exchequer moved that the b mitted so far as the preamble and clause 8.

Mr. Hadfield moved to postpone the recommitment months.

The Chancellor of the Exchequer trusted that the h the immediate recommitment of the bill.

The motion for the recommitment was then agreed t immediately left the chair.

Mr. Cobbold moved to insert in clause 8 a provis banks accepting the conditions laid down in the bill sh the 1st January, 1880.

Mr. Ayrton opposed the amendment, and characteris claim set up by the country bankers to make indefin which their power of issue should continue; and ca mittee not to assent to the entangling language of the Mr. Cobbold.

The Chancellor of the Exchequer objected to the gether out of character, because it was proposed for th introducing utter vagueness and uncertainty into the bill, and would practically have the effect of rather i of Parliament a belief or an intention that the priva act might be continued as a monopoly. The words w in themselves, but the spirit and aim with which t rendered them inadmissible.

After some discussion the amendment was withdraw of the Chancellor of the Exchequer, the following v in the preamble, further to define the objects of the by law a time whereat the present statutory right o of the bankers obtaining such exemption shall deter

Chairman, in moving the adoption of the report, which is of considerable length, observed that the corporation only began their direction of the bank at a very late period. They were in hopes that arrangements had been made which would have enabled them to have obtained the transfer of the business of the Commercial Bank early in July, but which were unavoidable in their character arose, in consequence of the corporation were prevented from taking the direction of the bank until the close of December last. In declaring a dividend of 10 per cent. on the whole paid-up capital of the Corporate Bank at the end of last December, the board did not take credit for any wisdom in the management of the concern, so as to give the shareholders who had taken a premium a dividend of 7 per cent. on the amount which they were entitled to for them, that credit being due to those who managed the affairs of the Commercial Bank of India up to the present year; but they hoped that they would be able to present a prosperous working of the concern for the future. The detailed reports and accounts of the bank had only been received by the mail which arrived on Saturday last, in consequence of some delay which had arisen in transmitting the accounts from the Calcutta branch to Bombay, so that the directors had only been enabled to sign them as presented by the head office at Bombay. He explained the mode which had been adopted by the Commercial Bank of India in reference to the accounts was to have those of all the branches sent to the head office at Bombay and there made up, and the dividend declared upon

the general balance then shown. The Bombay agency had sent them the statement, balance-sheet, and profit and loss account in the manner as they had hitherto been in the habit of preparing for the purpose of enabling the board to declare a dividend upon the profits. Also, the accounts had been audited in Bombay, but they had been audited in this country by Messrs. Strickland & Co. as an audit was practicable. He informed the shareholders that Mr. Cartwright, one of the directors, having occasion to attend to his own business, and the Bombay agency, which had always been assisted by a local board, being now without such assistance, the directors, unwilling to lose Mr. Cartwright's valuable services, had asked him to give his assistance to the Bombay agent, and he had agreed to do so upon the board for the purpose of enabling him to give his assistance in conducting the affairs of the corporation. The business at the present meeting was the re-election of the directors and auditors, and the fixing of the remuneration of the latter at the first meeting of the corporation, and he hoped they would have a successful meeting and a long and successful career. The subject of the dividend, which consisted in the amount of other people's money to deal with, and they could not but entertain sanguine hopes that from the soundness of the security and the favourable position they would be able to offer, they would attract a very large number of depositors for fixed periods, and in return for which they would give a higher rate of interest, combined with great security, perhaps be given by any other similar institution in India. He begged to move the adoption of the report.

Mr. Thornton seconded the motion.

In reply to a shareholder,

The Chairman said that, in future, the accounts would be sent to London.

Mr. Crouch complained that shareholders who had received only, in reality, 7 per cent., for their shares realised 10 per cent., which was an increase of 3 per cent. He suggested that the dividend should be made up to 10 per cent. so that the balance proposed to be carried over was ample for its purpose.

Mr. Leggatt was of opinion that it would be extremely desirable to improve the present embarrassed state of commercial affairs in India. In the course of the year, he did not think that the sum of £69,500 put down to the reserve at all too much. If there was anything to be done in the policy of the bank, he thought it was the payment of a dividend and bonus in Bombay for the first half of the year, at a rate of more than 18 per cent. per annum, because there were at the present time all the symptoms which should have induced hesitation in the declaration of a dividend. He inquired whether the directors were aware of an item of £3,249,554 in the credit account put down as loans. He wished to know the amount of the loans, and whether the item was separated they would have a better view of the position. He inquired whether the reserve of £69,500 would cover the present state of commercial affairs in India they occurred.

The Chairman said he could not give the exact amount of the loans, but the receivables were about £3,000,000, the remainder being the balance of the loans stated in reply to another question that the item of

sheet, which was made up to the 31st of December, had, with the exception of a very trifling amount, inquired whether there was any definite account of losses covered by the reserve of £69,500.

He said that the directors, who for the most part had paid the most anxious to give as large a dividend as possible, were always restrained by prudence in recommending a dividend. In the present case they had not thought it prudent to declare a dividend as had proposed. With respect to the observation of inability to see its justice, because many persons had shares at Bombay at a high premium. No one ever reckoned interest on premium. (Hear, hear.) Although, therefore, the proprietor might at first sight think himself badly served, on reflection agree that a new bank which paid £7 per share almost practically useless, on account of the short time for which the corporation had been carried on, was not a good thing. It by no means followed that because they considered the £69,500, that sum would all be required to pay the dividend. They hoped and trusted that it would not—(Hear, hear)—in the very unsettled state of affairs they considered it a good thing to adopt, instead of dividing 12 or 14 per cent. (Cheers.) The dividends had been made up there had been one or two heavy losses which might be more. All that he could say was that all the dividends up to 31st December last had been provided for out of the £69,500 as was not required to meet the current year would eventually go into the pockets of the shareholders. (Cheers.)

The resolution was adopted unanimously, and the directors and auditors one hundred guineas per annum being awarded to each for their remuneration.

On the occasion of the election of auditors, the chairman took the opportunity of calling the attention of the meeting to the necessity of ascertaining whether or not there was a regular attendance of directors at board meetings, pointing out that it was the duty of the directors in attendance, and consequent ignorance of the real state of the bank, that the great disasters which occasionally occurred to the public in connexion with joint-stock banking arose; that the proceedings of late had shown plainly enough that the directors had not attended board meetings and taken an active part in the affairs of the banks.

The chairman replied that if the hon. proprietor called at the office he would find himself as to the attendance of directors in this case by the attendance book.

A vote of thanks was then given to the chairman and directors, and the meeting terminated.

INDIA FINANCIAL ASSOCIATION, LIMITED.

A general meeting of the shareholders, convened in accordance with the articles of association, was held on the 28th April, at the Victoria Hotel; Mr. L. Balfour in the chair.

The meeting has been convened in accordance with the articles of association which prescribe that the first general meeting of the association should not later than the month of March or April, 1865. The

operations of the company in India extend over a period only at Bombay, and of seven months only at Calcutta, to the difficulty and expense of establishing and maintaining a large amount of working capital, agencies, with efficient control, the company was not able to do more than meet at the middle of November last, since which period all the profits of the statement of accounts now submitted have accrued. It is proposed, in the circumstances, have been unsatisfactory to close the account of December last; the statement of account, therefore, shall be for the result of the operations of the company in India up to the middle of March last, with further interest on loans, &c., then due on April instant, and at the head office to the latter date. The accounts have been submitted to the auditors, and you will have little doubt that the profits will eventually be shown to be somewhat under-estimated. It is proposed in future to make up the books of the company on the 31st December, and to hold the general meeting of shareholders on the 1st of March following, at which the yearly balance-sheet shall be presented, and that the directors shall have authority to pay interest on the profits of the company. The approximate statement of accounts now submitted shows a net profit of £9,716. 1s. 3d. (after income-tax) be now declared, and paid to the shareholders on the 5th day of May next. This will absorb £7,000, leaving a credit of profit and loss account of £2,716. 1s. 3d. It is to be noted that at the end of February last the moneys advanced to the company in India, and further loans sanctioned (and doubtless since then) are as follows:—

At Bombay £99,149 1s.

At Calcutta £113,846

The sum of £86,650 had, up to last advices, been advanced on land and house mortgage securities in India, and it is estimated that at least £14,000 more has since been so placed. Of the advances made to persons of undoubted position and class collateral security. As to the former, a large amount of land is required, equal in the majority of cases to 50 per cent. of the value of the land, carefully estimated, the rates of interest being not less than 11 per cent.; and as to the latter, the securities are all confidently believed to be of an immense value, affording ample margin; the rates of interest being varying in Calcutta from 12 to 14 per cent., and in Bombay from 10 per cent. per annum. The directors have proceeded carefully to regard the present position of the company, and the result is satisfactory and encouraging for the future. The directors have received very numerous applications for advances on land and house mortgage securities, at the most favourable rates, a very small proportion of which they will enable them to meet. India presents an almost unlimited field for business of this nature, and the directors feel that it is alone required to ensure the success of the company, both in the present and future profits. The directors are anxious to devote their efforts principally to the working of the land credit system, as it is conducive to the interests of the association, and with that view to afford greater facilities both for obtaining subscriptions, and placing their funds in land securities in India, they propose to alter the name of the association, and designate it under

and Credit and Finance Company, Limited,' for which the shareholders will now be asked. The directors Cartwright, their late chairman, being obliged to resign his position as a member of the board. In accordance with the articles of association, three of your directors, viz., Mr. James Layton, and Lieut-Col. W. MacGeorge, retire, but, being eligible, they offer themselves for re-election. We have appointed Messrs. James Dickson and J. Hill Williams as directors, who, under the articles of association, now retire, but offer themselves for re-election. In addition to the resolutions as to payment of dividend and re-election of directors, the following special resolutions will be submitted

to the association do, with the approval and sanction of the shareholders, to change its name, and that the new name of this company shall be the Land Credit, and Finance Company, Limited. Resolutions for the amendment of certain clauses in the articles of association.

No. 1. That clause No. 34 be amended as follows:—'The meetings of the company shall be held in the month of April, on such day as the directors may determine. The meetings of the company shall be called ordinary meetings; general meetings shall be called extraordinary general meetings; and meetings shall be held at the office of the company, or at such place as the directors shall from time to time appoint.'

No. 2.—That clause No. 87 be amended as follows:—'The company, with the sanction of the company in general meeting, shall be paid to the shareholders in proportion to their shares, and always, that the directors shall have authority, without a resolution, to declare and pay an *ad interim* dividend half-yearly, of the first six months of each year, out of the profits of the time being.'

No. 3.—That clause No. 98 be amended as follows:—'The balance-sheet shall be made out in every year, and laid before the shareholders of the company, and such balance-sheet shall contain a statement of the property and liabilities of the company, arranged in such manner as the directors may think fit, and may from time to time be altered or adopted, and that the first balance-sheet shall be presented to the general meeting to be held in the month of April.'

Statement of position of the Company on 14th April, 1865.

RECEIVED.

Gross profits

The Chairman, in moving the adoption of the report, considering they had only had a capital of £100,000 in three months, and £146,100 for three months; considering expenses fell very heavily on so limited a capital, and their operations was distant, requiring time to place and institute the necessary agencies, the directors had very much to congratulate the shareholders upon the amount had been attained, and the still more favourable prospect. They had commenced last month receiving moneys on the amount which they had received at present was no doubt that they would receive a very fair share of the objects of the association were better known and as they wanted to command entire success and produce results was more money, and as they extended their operations the working expenses, adding to the capital, either in shares or debentures, the greater would be the amount would accrue to the shareholders. He regretted the loss of Mr. Cartwright, who had gone on his own account.

had received an assurance from that gentleman to catch the interests of this company in that city. He led the motion.

that there was still due on the miscellaneous accounts expenses, the exchange on drafts, and Indian 79. 11s. 2d., and he suggested that instead of paying a share, as proposed, they should devote the profits, to the liquidation of that amount, because if they necessarily go into the pockets of the shareholders would tend greatly to enhance the value of their company and stand better with the public. He suggested that the amount should be reduced from £1,000,000 to £500,000, and should call up half the capital. What he wanted was to do well with the lending public; and he alluded to the want of a sufficient capital to carry on their business were obliged to amalgamate with others or to do no business in which they were engaged was of a kind to employ the debenture capital, and what they borrowed money here at £5 or £6 per cent., and to pay ranging from 11 to 18 per cent. That being their condition should be forwarded by reducing the amount of the calls to at least the extent of half the amount paid, in his opinion, tend greatly to increase the value of the shares. If they adopted his suggestion of paying the sum now proposed to be divided, they would have no paltry debts hanging over them. Whether the item of £3,900 represented calls on

that it did. A portion of those calls had since been paid, about £1,975, would be paid in the course of the year, and the rate of £9 per cent. was paid on arrears of

questions from Mr. Brown, that the item of £2,827, in the miscellaneous accounts, had been included by Mr. Jackson in the £9,979, as a balance of the kind, it being the amount of the exchange on fact, interest at 8 per cent, but it was not yet paid, but they carried to the credit of the profit and loss account £4,529 preliminary expenses, that the item of discount on advances made, for which they had no exceptional securities; the transactions of the Company being very analogous to raising money on debentures or bonds; the profit in regard to the advances being small. With respect to the securities they had all been examined by the auditors. The sum of £2,500 put down as interest, but had not yet been paid.

He said that the sum of £2,281, under the head of interest, represented the interest on the capital in the hands of the company up to the 14th of April, and was not a liability or a preliminary expense.

He said that accounts relating to the head office ought to be kept in detail. He also complained of the heavy expenses of the company, which up to the present time was something more than the profits.

The Chairman explained that while the returns for the months, the working expenses were those of the whole year, who were entitled to take £2,000 a year, had only taken £1,000.

The report was then agreed to unanimously, and Mr. Jackson, seconded by Mr. Dickson, the retiring director, moved the resolution.

Mr. Brown moved the re-appointment of Mr. J. Dickson and Mr. Williams as auditors, and proposed twenty-five per cent. remuneration.

In reply to a question from a shareholder,

Mr. Dickson said that the audit was not a mere formal signing totals, but the auditors had examined into the details of every security, and themselves added up the various items in the books. (Hear, hear).

The motion was seconded by Mr. Forster, and carried.

Mr. Palmer then proposed that the name of the company should be changed to the East India Land Credit and Finance Company, as the new name would describe more accurately the nature of their transactions. Financial by itself was not a true description of the true operations of the company, because they had not the land credit system was the one to which they would look to in the transaction of business, and if they made it known, and it was expressed in the title, the debentures would be more readily; therefore they proposed to change the title in view to extend the operations of the society, and by the result of a very favourable result. At the same time he must say that they had started and been in active operation they had not been ashamed of with respect to the amount of business done; on the contrary, they had every reason to congratulate themselves that they had done so well, and they had no doubt that they would be able to show still better results. In relation to the directors had had under their consideration the reduction of the nominal value of the shares, and were of the opinion of the shareholders on the question. They had no objection if the shares were reduced to £25, it would be to the advantage of the company, and if they obtained the assent of the whole of the shareholders the reduction in nominal value of the shares could be done without any trouble or expense.

Mr. Jackson proposed a resolution, with the object of reducing the nominal capital by half, but in the course of the discussion which ensued, it appeared that such a proposition, if carried into effect, would render upon, any resolution to that effect being illegal, and the directors agreed to adopt the proposition of the directors.

Special resolutions were then passed, altering the title of the company with a view to holding the general meetings in March, and giving power to declare *ad interim* dividends, and providing that the balance-sheet should be made out and presented at the next meeting.

A cordial vote of thanks to the chairman, directors, and committee, on the motion of Mr. Brown, carried by acclamation. A vote of thanks was also given to Mr. Cartwright for the valuable services he had rendered to the company, and the proceedings terminated.

FAILURE OF THE PENNY BANK AT BIRMINGHAM.

se, convened by the mayor, was held in the Town-hall, Birmingham, the 28th April, to take into consideration the affairs of the Penny Bank and the best means of relieving the large number of small depositors who were concerned. The room was crowded. After a few introductory remarks,

the Mayor read the following statement:—"The Birmingham Penny Bank was instituted in the year 1851, for the purpose of promoting the saving amongst the industrial classes, and it was intended that it should be entirely self-supporting. Of the original committee only six have since 1858 taken any part in the proceedings of the bank, and since that time has been under the control of Mr. George Barlow, coachbuilder, Edgbaston; Mr. Benjamin Hawkes, toy-dealer, New-street; and Mr. Wallington, toy-dealer, Bull-street. The bank was opened for business in February, 1851, and on the 31st of December in that year the balance amounted to £769. 3s. 2d.; on the 31st of December, 1856, it had reached the sum of £5,249. 8s. 7d.; on the 31st of December, 1860, it amounted to £6,504. 4s. 8d.; and at the present time they are, according to the books brought in, £8,061. 4s. 8d. spread over 7,431 accounts. At the commencement of the bank nearly 170,000 accounts have been opened, and occasionally above 300 in one day; there have also been at times 1,000 repayments made in one day, and frequently above 1,000

The total amount received in deposits from the beginning has been upwards of £140,000. The expectations of the founders of the bank as to its being self-supporting have been disappointed, the income and expenses from the beginning having been in each year greater than the income, the total amount of charges and expenses over income has been nearly £3,000. The last balance-sheet of assets and liabilities was made out on the 31st December, 1857, but many of the assets then reckoned as good have turned out complete losses, whilst others have been lost in value. The losses of this kind amount to £2,500. There have also been losses, partly through frauds on the bank by depositors and partly through the amount of £1,200. It is probable that the assets of the bank, though put down in the statement at £1,703. 18s. 6d., may, on the next audit, suffer a further depreciation, and may not ultimately produce more than £1,000 after payment of expenses. The position of the parties concerned in the bank has been, as far as practicable, ascertained, and if the worst is avoided, it is expected that at least £1,500 will be obtained from the bank. If they are made bankrupts their separate creditors must be paid in full before the creditors of the bank can obtain one shilling on their claims. It is proposed to take the most peremptory proceedings possible against any who are liable to pay and who may refuse to contribute. The affairs, therefore, stand thus:—Due by the bank £3,500; total amount expected to be divided amongst the depositors £2,500; deficiency, £6,000. It is proposed that an effort be made to subscribe sufficient moneys to pay smaller deposits in full to a limit to be fixed at this meeting, and so alleviate the distress that would otherwise ensue to such of the industrial classes as have their small savings in the bank. The larger depositors will then receive the whole of the assets divided amongst them, and in all probability a dividend might very shortly be made."

Mr. Millor Avery proposed, and Mr. Dixon seconded, the following resolution:—"That this meeting is of opinion that a subscription should forth-

with be commenced for the purpose of raising a sum which will suffice to pay in full all depositors of amount £3, and in number 6,903, leaving the remainder being depositors of larger sums and numbering 519, to the bank, and deal with the directors, trustees, and managers in such manner as they may be advised."

Councillor Brinsley said he thought they proposed to end. They should first of all have an investigation into the bank, and to that end he would propose the following:—that a subscription be forthwith entered into for the purpose of legal and other expenses necessary for instituting a thorough investigation into the conduct of the bank, the directors and other officers thereof, and their liability to pay all depositors, to the extent of the assets of the bank, and the assets of the directors, trustees, and managers thereof."

This was seconded by Mr. Langford, and carried by

FINANCIAL ASSOCIATION OF INDIA AND CHINA

At the first ordinary general meeting of the Financial Association of India and China, Limited, held at Bombay on the 1st July last, the directors' report stated that the Company was registered and commenced operations on the 1st July last, with a capital of Rs. 120,00,000 (£1,200,000), and Rs. 30,00,000 (£300,000). It appears that the association has been interested in the following companies, besides having had a considerable holding of Canning shares, viz.: The Bank of China, the Bank of India, the Bengal Credit Mobilier. The net profit of Rs. 6,00,000 (£60,000) derived from premiums on new shares, and from another source, amount to Rs. 15,64,730 (£156,473), proposed to apply them as follows: Rs. 4,63,150, dividend at the rate of 20 per cent. per annum on 30 lacs, from 22nd June to 30th September to 31st March; Rs. 46,944, income of the reserve fund (in all Rs. 10,00,000, or £100,000); Rs. 5,00,000, to be carried forward to next half-year. The directors' report was adopted, and a dividend at the rate of 20 per cent. per annum declared.

ANGLO-AUSTRIAN BANK.

The following is the report of the directors, submitted at the general meeting of the bank, held in Vienna, on the 2nd July 1864.

"In laying before you the report of the bank's operations for the year ending 31st December, 1864, we beg to offer a few observations. The idea of the organization of our institution was suggested by two of the members of our English Committee, Mr. Grenfell Glyn, Esq., M.P., and Archibald Scott, Esq., M.P. In the course of the year 1863 they were assisted by persons of commercial experience in Austria, and all arrangements for the due constitution of the bank were completed, and its actual operations on the 2nd January, 1864. The results of the year have been unfavourable to the prosecution of the main object of the bank."

 nt of the Austrian Government, and which has

already been repaid. In connection with this is to participation in the Silver Loan of seventy millions of florins, in co-operation with several banking houses in Vienna, where, the bank accepted a share of 23½ millions. On this loan was entered into under the condition that the parties interested in the same should be formed into a Syndicate the Minister of Finance afterwards attached himself with them respecting the remainder of the loan so that the formation of this Syndicate mainly contributed to the firmness with which, under the pressure of so many circumstances, this public security was maintained, so that, in large sales which have been made since the 11th of January, the Syndicate was dissolved, no serious fluctuations in its value in those places for which the loan was designed. The bank is interested in the Customs Loan, which was brought to the half of the year 1864. The amounts of our part in the Silver and Customs Loans have both been realised in the year, so that no loss can now arise on either of these objects of private enterprise in which the bank is itself we have more especially to call attention to the Czernowitz Railway. The bank undertook, as its business in conjunction with the International Financial Society, a share capital of the company, which was successfully accomplished, thus calling particular attention to some of the large transactions our bank has actively interested itself during the past year. I omit to mention that the directors have been from time to time employed in the investigation of other objects of industrial interest, in some cases the bank has declined all participation, in others yielded the field to rivals prepared to offer more tempting conditions. In all such circumstances the directors have acted on the principle that the matter in question was either wholly undesirable, or that which they could not prudently engage, except on conditions which applicants were unwilling to entertain. We think that under your notice all the points which require particular attention of the shareholders having made their payments in cash, it is necessary to provide against the contingency of loss arising from the depreciation of the Austrian currency. For this purpose, as you will observe in our accompanying balance-sheet, we have opened a currency depreciation account, calculated at the rate of 15 per cent. on the amount (fl.900,000) will be kept intact and separately, such time as the notes issued by the Austrian Privileged Bank shall have been paid in cash, or until a general meeting of the shareholders shall have decided otherwise. We have consequently insured our safe and available securities, which we hold against the depreciation. We have, however, considered it advisable to convert our capital in foreign money, regulating the amount of the same against the upward or downward tendency of the Austrian currency, and so as to be in accordance with this principle. The profit for the past year, after paying all expenses (including the fixed remuneration of the directors) amounts in Austrian currency to fl.673,118.84; Austrian currency to fl.56,762.32—total, fl.616,356.52. From this, in accordance with the statutes, 6 per cent. interest on the paid-up capital is to be deducted, amounting to fl.360,000 in silver money, leaving of currency in the past year, is equal to fl.402,853.52,

from this sum, in accordance with the statutes, 10 per cent. to be added as reserve fund, £21,350.30, there is left £192,152.70; and from this amount 10 per cent. as 'Tantième,' to be divided among the members of the Vienna and London committees, £19,215.27; leaving distributed among the shareholders a balance of £172,937.43, making a dividend of £1.72 (being the equivalent of $2\frac{1}{2}$ per cent.) per annum and showing a total dividend for the year 1864 of $8\frac{1}{2}$ per cent. The balance (£17,933.43) remaining in hand, after payment of the above dividend, we propose to carry forward to the credit of profit and loss account for the current year. We shall have to point out for the consideration of the next general meeting, some clauses in the statutes in which we think it will be desirable to make some alterations. Lastly, we have to inform you, in accordance with the statutes, the existing scrip certificates will be exchanged for provisional shares with coupons.—By order of the Council of Directors."

LONDON AND SOUTH AFRICAN BANK.

At the ordinary annual general meeting of the proprietors of this Bank, held on the 4th May, at the London Tavern; Mr. J. R. Thompson in the chair.

The following report was taken as read:—

After deducting all charges for the past year, and providing for bad and doubtful debts, there remains a disposable balance of £25,984. 8s. 4d. This sum £2,500 will have to be placed to the reserve fund, which amounts to £18,053. 6s. 3d., and £1,608. 6s. to preliminary expenses. At the end of the next year this latter account will be doubled. In regard to the depressed state of trade in the South African colonies, it seemed prudent in October last to declare an interim dividend of 5 per cent. only, but the satisfactory returns since received from the branches enable the directors to recommend for the approval of the shareholders a dividend of 18s. per share, which, with the payment made in 1864, will be at the rate of 8 per cent. per annum, free of tax, leaving a balance of £377. 9s. 4d. to be carried forward to the credit of profit and loss account for the next half-year. A branch has recently been opened at Richmond, with a prospect of success. The directors who retire are Mr. John Barry, Colonel J. Holland, Mr. W. Nicol, M.P., and Major-General G. B. Tremeneheere, who, being eligible, offer themselves for re-election. It is with great regret that the directors record the retirement of Mr. Henry Sharman, one of the auditors of the bank. It will be necessary to appoint auditors for the ensuing year."

Statement of liabilities and assets at London office and branches to 31st December, 1864. Liabilities: Capital paid up, £400,000; do. new, £98,733; £498,733; circulation, notes and Bank post bills, £29,983. 1s. 8d.; £406,193. 1s. 11d.; bills payable and other liabilities, £292,333. 6s. 4d.; reserve fund, £15,553. 6s. 3d.; balance of undivided profit, £44,439. 19s. 4d.; payment on account of dividend to June 30, 1864, £17,455. 11s. 8s. 4d.; total, £1,269,780. 4s. 6d. Assets: Specie on hand, and advances, £109,576. 4s. 6d.; bank premises, furniture, fittings, and property, £12,001. 3s. 6d.; local bills discounted, bills receivable, and other securities, £1,144,986. 4s. 9d.; preliminary expenses—original amount, £8,041. 9s. 9d.; less, deducted £4,824. 18s. 11s. 9d.; total, £1,269,780. 4s. 6d.

Profit and loss account: To interest, commission, £12,570. 6s. 9d.; to charges for the past year, including other expenses at head office and branches, £23,322. 2s. 6d.; to bills not due, £13,019. 1s. 11d.; to payment on account of months, ending 30th June, 1864 (paid 18th October, 1864, tax), £17,455. 11s.; together, £66,367. 2s. 7d.; to balance brought forward as per last annual statement of 31st Dec., £539. 15s. 4d.; by rebate on bills not due 31st Dec., 1863, £7,607. 10s. 9d.; by gross profit for the year ending 31st Dec., making provision for doubtful debts), £85,204. 4s. 10d.; total, £93,351. 10s. 11d. Proposed appropriation, viz. for 6 months to 31st December, 1864, at 18s. per share (to be paid by tax), £22,498. 13s.; amount to be applied in augmentation of profits, £2,500.; amount to be applied in reduction of profits, £1,608. 6s.; balance to be carried to next account, £26,984. 8s. 4d.

The Chairman, in moving that the report and statement be adopted, observed that at the last meeting the whole of the shares had been paid up, a few of the shares in the colony not having been paid up; now the whole was complete, and the entire amount stood in the books. It would be satisfactory also to have had been a considerable increase of deposits, the amount in 1863, having been £250,000, and in December, 1864, £300,000. It proved that the public had confidence in the establishment with regard to the circulation, it had been necessarily restricted by the managers, they being required by the deed of incorporation to keep a large amount of unemployed capital in hand to meet the demands of the public. An application had been made to the government for an alteration in the charter for the purpose of relieving the company from this difficulty. That application had been refused, and the new charter now only awaited the signature of the government, and he had no doubt that, as the result, they would have a very large addition to the circulation of bills not yet due formed a large item to the debit of the company. It had been taken at the very fullest rate. The gross amount of bills was £69,800, and in 1864 £85,000, which he submitted was a satisfactory rate of progress. (Hear, hear.) The reserve amounted to £15,500, now by the appropriation of the profits for this year it would stand at £18,000. The preliminary statement stood at £3,216. They now placed to the credit of the company, and the present year would obliterate altogether the debit of the company from their liabilities. In 1863 the gross amount of profits was £17,450; and for the year 1864, if the recommendations of the present report were adopted, it would be £22,498. 13s. result, he thought, showed a gradual and satisfactory progress. (Hear.)

Colonel Holland seconded the motion.

In reply to a question,

The Chairman said that all bad and doubtful debts had been provided for in the accounts.

A Shareholder remarked that while the profits were more than in the previous years, they were only paying 3 per cent. The increase ought to give them 3 per cent. more.

Chairman stated that the directors would do all they could to increase the dividend, but under all circumstances he thought the increase of the present dividend over that of the last half-year, when it was 14s. 6d. against 18s. on the present occasion, was satisfactory.

In answer to a Shareholder,

Mr. Maynard, the auditor, stated that the overdue bills had been brought to the notice of the auditors, and the amount to 31st December last was £1,000. Since then, however, about half that amount had come in, and in regard to the remainder it was amply covered by securities. A motion was then put and carried unanimously.

The dividend, at the rate of 18s. per share, making, with the 14s. 6d. paid for the previous half-year, 8 per cent. for the year, was then affirmed. Retiring directors were re-elected, and Mr. Maynard was re-elected professional auditor, and Mr. Jones was elected auditor, in the room of Mr. Sharman, deceased.

The usual vote of thanks to the chairman and directors concluded the meeting.

ASIATIC BANKING CORPORATION.

At an ordinary general meeting of the shareholders of this corporation held on the 4th May, at the offices, Lombard Street; Mr. F. Boykett presided.

Mr. W. Lawrence, the general manager, read the following report:—The court of directors, in presenting their first report and balance-sheet, expressed great pleasure in congratulating their co-proprietors upon the success attained by the bank during the brief period that has elapsed since the commencement of its operations. The half-year for which the accounts are now rendered, and during which period a portion only of the branches of the bank have been working, represents not only the most favourable season of the year in India, but has also been characterized by a severe monetary crisis in this country, which has necessitated the exercise of the utmost caution in conducting the business of the bank, and consequent restriction of its operations. Notwithstanding these difficulties, the net profits, after deducting all charges upon the current business of the bank, and fully providing for all bad and doubtful debts, amounted to £70,439. 4s. 8d. This sum the directors propose to distribute in the following manner, viz.:—£37,500 by a dividend at the rate of 15 per cent. per annum; £12,500 by a bonus of 10s. per share, equal to 5 per cent. per annum, being together equal to 20 per cent. per annum on the capital on 31st December, to be paid to the proprietors free of income tax; £8,484. 11s. 11d. in liquidation of the whole of the preliminary expenses; £5,500 to be added to the reserve fund, which, with the premiums received from the recent issue of new shares, will then amount on 30th June to £175,000; and the balance, say £6,454. 12s. 9d., they propose to transfer to the credit of the profit and loss account for the current year. The directors have further the pleasure to congratulate the shareholders upon the successful issue of the new shares, both here and in India, which have been promptly taken up upon the terms specified in the circular issued at the time to the original proprietors; the additional capital, not required by any exigencies of the bank, was deemed desirable to put it upon a footing suitable to its increasing business. The directors term of office has now expired, being eligible for re-election, offer

themselves accordingly; and they recommend the present able professional auditors, and the election in professional auditor for the current year. The directors the shareholders to authorise them to declare and pay dividend half-yearly, for the current and future years, desirable, pending the final adjustment of the accounts.

Net profit from 30th June to 31st December, 1864, subject to deduction for income tax

January 1st, 1865. By balance brought forward ...

The Chairman, in moving the adoption of the report he might fairly congratulate them on the position. Looking at the short time of its existence its success was remarkable. There were current and fixed deposits, £3,383,547, and £1,727,329, which were not denied. There were bills payable, £1,727,329, which were not denied; and the profits were £70,439, being at the rate of 10 per cent. on the capital. He believed that also was unprecedented, and he thought them on this result when there had been a panic in the market, and the condition of the market required the directors to take such steps as they thought fit. The whole he thought it was a most extraordinary success. The preliminary expenses. They were £7,800, and a considerable amount. They were retained by their officers before the business commenced. With the permission of the shareholders, they intended to write

there was some general and natural uneasiness felt on of many of the institutions connected with the at, from the 31st December last, everything had them. They had gone very carefully into the , and very closely scrutinised their securities, and as that day they should not only be able to pay a but a larger one; and making a liberal allowance s, they did not allow one-third of the profits for was a most satisfactory result, and they took some it, but it was not all due to them. It was to the ay, to the council there—and one excellent mem- sent—that they owed this result. (Hear, hear.) hrown their heart and soul into the bank, and n that their services were of the highest value, their deep gratitude to them for their care.

the motion, which was instantly agreed to. oved the declaration of the dividend, at the rate m, free of income-tax, with £5 per share bonus, ble on and after the 6th inst.

the motion, which was unanimously carried. ed that the directors be empowered to pay such e current half-year as they may seem fit, pending e accounts.

the motion, which was also agreed to. s, Messrs. Scott, Boykett, and Russell, were re- s, Messrs. Coleman, Bird, and E. J. Milne. r. Parsons, seconded by Mr. Coles, thanks were he bank in India, to whose exertions the success

ted, on the motion of Mr. Scott, to the home rs, the agents and officers of the bank, for their year.

ERN BANKING COMPANY, LIMITED.

ral meeting of the shareholders in this company ay, at the offices of the company, 60, Gracechurch , Esq., occupied the chair. The resolution passed eeting recently held, authorising the name of the at of "The English Joint-Stock Bank, Limited," ned.

BANK OF SCOTLAND, LIMITED.

ne shareholders of this bank was held at the London for the purpose of receiving from the liquidators s of the winding-up of the affairs of the company, ons conferring powers on the liquidators to vary the agreement with the Mercantile and Exchange W. Cargill, M.P., in the chair. e liquidators had not intended to call a meeting at eing necessary that they should call one within liquidation not having been completed. A requi-

sition for a meeting having, however, been laid before the shareholders in accordance with the articles of association, the liquidators admitting the authority of such a document under the terms of which the affairs of the bank were, were unwilling to give the shareholders the opportunity of asking for such explanations. A circular had also been received stating that at a meeting of the shareholders a committee had been appointed to investigate the affairs of the bank, especially as regarded the condition of the bank, the Mercantile and Exchange Bank, but there had been no reply from the liquidators since, and no reply therefore had been made to the shareholders with which the document was accompanied, that access to the books and papers. When the meeting to consider the proposed amalgamation with the Mercantile and Exchange Bank was held, a deal of speculation existed, and the shares of both companies were at a high premium, and the Bank of Scotland was induced to accept the amalgamation on account of the standing of the other company and the confidence it enjoyed in London and Liverpool. Some of the shareholders completing the agreement owing to this company having branches in the north of England which the Mercantile and Exchange Bank resolved not to accept, and subsequently there was a crisis occasioned in consequence of the Bank of Scotland not accepting, to bring the accounts of the various branches in a state of order by accounts as mutually agreed. At length the Mercantile and Exchange Bank made a very fair proposal to them with respect to the division of the net profits as the basis of the agreement; the proposal was accepted, and this company carried out the first part of the arrangement, and over to the other company the first contribution specified in the agreement, the crisis which came upon them last autumn prevented them from settling their accounts and paying over the rest of the money, and the Mercantile and Exchange Bank having at the time fallen into liquidation, the amalgamation was not pressed forward, because if that had been done, this company would have been absolved from the arrangement, and would have been entitled to the sums they had already paid. The Mercantile and Exchange Bank, however, weathered the storm, and a thorough investigation since been made in the interest of the shareholders of the Mercantile and Exchange Bank appeared that it was a solvent concern with a good business, and did not exceed £98,000 in the aggregate, instead of £100,000 as had been stated. Exception had been taken to the payment of any money to that company before a thorough investigation of its affairs had been made by accountants, but as the directors of the Mercantile and Exchange Bank considered the arrangement was the fault of the Bank of Scotland, the liquidators had acted in a proper way, and exercised discretion in the matter. The liquidators took that opportunity to pass in two resolutions, the object of which was to release the company from an obligation to take any further shares in the Mercantile and Exchange Bank beyond the original 10,000 shares created by the arrangement, which had already been taken and paid for. The agreement provided that the second 10,000 shares, credited with £5, should be all taken up, but from this obligation the directors of the Mercantile and Exchange Bank would, if they obtained the concurrence of their shareholders, be ready to release them. (Hear.) Beyond this there was no further to be said, this company was to have at par, in order that the proposed arrangement was made, would have amounted to a

on of the amount they were paying for the purchase of the Mercantile and Exchange Bank; but those at £10 premium, were now at £3 discount, and power to cancel, with the consent of the other bank, but also. He concluded by moving resolutions for maintained.

They could not consent to any arrangement of the resolutions until they were better acquainted with

it, as the object was merely to release them from a little objection to it; but it was for the share-

holders as an amendment a direction to the liquidators to place the creditor account of the affairs in their hands.

The manager, read a statement of the assets and liabilities on the 3rd of May, and estimated the probable loss at £54, which upon 20,000 shares would amount to £108.

He stated that the accounts were more satisfactory than he had expressed an opinion that the shareholders would have been interested in the hands of the present liquidators.

He moved that the meeting should stand adjourned till a later date, as the directors had been appointed to investigate and report on the company's affairs.

He stated that if they rejected the proposal of the liquidators to pay £10 for what they could now go into the market for at £13, they would be

satisfied himself perfectly satisfied to have got a £10 share in the Bank and Exchange Bank for a £13 share in the Bank and Exchange Bank, indeed all that they were promised.

He was seconded by Mr. Marshall, one of the original directors of the Bank, but after a brief discussion was negatived. The resolutions were carried unanimously, and a vote of confidence in the liquidators was carried and the meeting separated.

PROVINCIAL BANK OF ENGLAND.

A general meeting of proprietors was held on the 1st of June at the bank premises in Bishopsgate Street; Mr. J. M.

Mr. Marshall did not but think that the circumstances under which the bank was first started, the first time in that building, destined, he trusted, for the success of the bank, were singularly propitious. The bank had been inaugurated under more favourable auspices, and after a year of unprecedented prosperity, they were now free of seeing struck off the last fetters with which they had shackled their freedom of action, and that they were now on an unimpeded course of progress and development. They were now course aware of the disabilities under which the bank had been placed. Not only had they been prevented from issuing shares within a distance of sixty-five miles from London, but they were forbidden to enter upon the ordinary business of

banking in the metropolis, had been actually prohibited town agents for their own branches, and had been other establishments to execute duties which their much better qualified to perform. There was, when under a grievance imposed upon them by legal enact of compensation if the law of which they complained and that the rule, however obnoxious, extended That consolation, such as it was, had been denied legislative oversight Scotch and Irish banks, constantly were issuing their own notes, were not hampered by as they were thus, in addition to a sense of great galled by a feeling of injustice. Their only remedy things was the sacrifice of their circulation—a sacrifice most reluctant to recommend, but to which he in the end have submitted, so great had they felt of being excluded from their proper position That was no place for political discussion, and it him to express either party censure or party was sure he should not be giving utterance to the leagues or to his own if he did not record their cordial to Mr. Gladstone for the very liberal spirit in which their grievances, for the kind and courteous manner always received their representations, and for the courage exposed himself to troublesome opposition in dealing Doubtless, the Chancellor of the Exchequer, acting sought what he considered to be the public interest. make some sacrifices, but a vested interest of fifteen lation, the right to incorporate other branches of their circulation by the amount of their ascertained in all their disabilities, and giving them fresh privileges which they might well rejoice, and for which be grateful. It was only due to one of their of the member for St. Ives, that he (the chairman) testimony to the ability and industry with which had advocated their cause. Amidst all their pride deplore that Daniel Robertson, late general manager director to whom the bank owed so much—was not a the triumph; and they had also to regret the loss of one of the largest shareholders in the concern and years' standing. He then proceeded to read the report the result of the year's transactions were as follows: Rest or undivided profits at 31st December, 1863, as examined in May, 1864, including premium on shares Less—Bonus declared and paid in cash in 1864 out of £63,000; reserve fund set apart on government securities net profits of 1864, after making allowance for bad &c., £303,800. 1s.; together, £513,252. 6s. 2d.; and carried forward for 1863, £10,000; total, £523,252. dividend on company's stock, paid July, 1864, £38,400; 1864, paid January, 1865, £40,800; bonus of £86,400; undivided profits carried to the next together £185,600; leaving £337,562. 6s. 2d. Our directors propose to declare, in addition to the foregoing bonus paid to proprietors above stated, a further bonus

a division of profits in 1864 in all 28 per cent. upon the paid-up at 31st December, 1864, free of income-tax, amounting to £112,200, reserve, £225,452. 6s. 2d. The directors, with a view to mark their tion of the zeal and efficiency of the staff, and to characterise the prosperous and exceptional nature of the year's operations, voted a of five per cent. to their officers, in addition to the usual bonus of ent. of recent years, which was paid at Christmas last.

The motion of the Chairman, seconded by Mr. J. O. Hanson, the report unanimously adopted.

Retiring directors, Mr. W. J. Maxwell, Mr. H. McChlery, and Mr. J. on were re-elected, and the two vacancies at the board were supplied by the election of Mr. Duncan Macdonald and Mr. George Hanbury

shareholder, while expressing extreme gratification with the results of the year's operations, suggested that it might be well in future to present a detailed balance-sheet, showing in what the securities consisted, and the means of estimating the value of their business in different districts of the country.

The Chairman observed that suggestion involved an entire change of the constitution of the bank, and though of course the directors would act upon the wishes of the shareholders in the matter, he thought it would be well to propose agreeing to alter a system which had hitherto worked so well. The directors could get any information they might desire by applying at the bank. The provision for bad debts, low as it was, was rather over than under, it being the invariable practice to calculate all possible losses actually made.

A vote of thanks was passed to the chairman, and a similar compliment was also passed to Mr. A. Robertson and Mr. E. Atkinson, the joint managers, was acknowledged by Mr. Robertson, who, in the course of his remarks said that in the administration of the affairs of the bank it had been the endeavour of the directors to combine progress with security, and the evidence of their success was to be found in the amount of the increase in the position of the company's stock in the market. The proceedings then terminated.

BANK OF HINDUSTAN, CHINA, AND JAPAN, LIMITED.

An ordinary meeting of this corporation was held on the 15th May, 1865, at the London Tavern, Mr. James Nugent Daniell in the chair.

The following report was taken as read:

The net profits of the year, after defraying all expenses and providing for contingencies, amount to £15,893. 12s. 11d., including a balance of £827. 11s. 1d. carried forward from the accounts of the previous year, out of which a dividend of £14,746. 5s. has already been paid as an interim dividend on the 1st of August last, leaving a balance of £1,147. 7s. 11d., which it is proposed to carry forward. The directors have to express their regret that the operations of this company during the past year have not been a more profitable result; but taking into consideration the commercial depression of the country, the recent formation of the bank, and the gradual extension of the business abroad, the peculiarly disorganised condition of commercial affairs in the latter part of the year 1864, and the existence of a state of

things specially calculated to embarrass the success of the bank, it must be a source of satisfaction that the year have resulted in a profit, that a solid footing has been established by the bank, and its business and connections free from causes which acted prejudicially to the welfare of the bank, a peculiar and exceptional character. They have shown that the operations of the present year have shown satisfactory results, and it is therefore evident that there was no interruption to the successful operations of the bank. The circumstances which were beyond the control of the bank, meeting which confirmed the amalgamation with the Bank of China, India, and Japan, Limited, took place on September last, and on or after the 12th October last, the shareholders in that institution (with the exception of those who pressed their dissent within the specified time) were registered in the register of shareholders of this bank. The number of shares in the Imperial Bank of China, India, and Japan, Limited, and the number of shares refused by shareholders in that institution was fifty-eight. Thus, of the 20,000 shares issued by this bank 1,368 may be considered as unissued. The amount of capital in this bank on the 31st December last, and on the 29th ult. it amounted to £720,444. The pleasure to report that, notwithstanding a variety of circumstances, the calls have, on the whole, been remarkably well met, and the amount of the bank amounts at present to £92,900. In Japan branch, with its sub-branches at Kandy and Point de Galle, the progress of these establishments, although extending scarcely six months, is satisfactory. The directors have the pleasure to report that in February last a branch was opened at Yokohama. They have with regret to report that a vacancy occurred in the past year, by the death of Mr. J. H. R. De Cassin. In accordance with the powers conferred upon them by the Charter of Incorporation, they have elected Mr. Sassoon David Sassoon to the vacant seat, which election, they have no doubt, will meet the approval of the shareholders. The directors who retire by rotation are Mr. Nugent Daniell, Esq., Deane J. Hoare, Esq., and Henry Goodson, Esq., and Frederick Wm. Spooner, Esq., all of whom are likewise eligible, they offer themselves for re-election.

The chairman said it was with no ordinary degree of anxiety that the bank had looked forward to this meeting of the shareholders, that arising from two causes. In the first instance, they, as commercial men, were well aware what had been going on here and in India for months, especially in the latter part of last year, and they were aware that very serious rumours had been set afloat, which he hoped to find were utterly incorrect as to the loss of the capital of the bank. They were conducting a steady but lucrative business, and they were able to pay a dividend at the rate of 10 per cent. per annum for the year. Not only were they justified in paying that dividend—the shareholders justified it—but they felt that the shareholders ought to receive a dividend, which became now 5 per cent. for the year. Well, the fact that took place in this country reacted on India, but the bank

laboured under special disadvantages, as they must be aware that at the latter end of last year the London came, to a certain degree, in disrepute, and no greater was felt than in the bank which was their correspondent manager had to look to safety rather than profit. In disadvantage it was impossible for them to guard against, they found what the position was they got another the National Bank, and from that time to the present on as satisfactorily as the circumstances of India would permit. In the present year everything had gone on very satisfactorily, they had had many difficulties to encounter; in the managers they had endeavoured to select the best men, so successful in this that in two instances their managers had other business at increased salaries, and this was a test to the bank. In all cases of this kind there were no considerations, but above all they must consider the safety, must maintain its integrity and its character, and they never transpired at that meeting they would all remember not to do anything to destroy the confidence that existed in the bank. They had made but very little profit in the year, they stood with an amount of capital of £720,444, £92,000, and when the shares were all paid up that was £1,000,000, so that their position was not an unfavourable one. He was happy to answer any questions, and would conclude the adoption of the report.

In reply to the shareholders, the Chairman said that the dividends had not been paid, and that was why the amount to more than £92,000.

Captain Beville asked how it was that 1,310 shares of China, India, and Japan, remained unallotted.

Mr. James Levick said they were returned with a view to introduce into the bank some gentleman of great influence and to give an opportunity offered.

Mr. Stuart suggested that the miscellaneous expenses were high.

The Chairman pointed out that the expenses of carrying on the business in India were necessarily high.

In reply to Mr. A. Kintrea, the Chairman said that the remuneration received by the directors for remuneration was £3,500 a year, in reference to the rumoured losses, since December last, and in reference to one account in respect of which there seemed a loss of 15s. in the pound, and under very unfavourable circumstances would not exceed £10,000.

Mr. Kintrea urged the directors that in the present circumstances it was undesirable that the retiring directors should be re-elected.

The Chairman thought the proper course would be to proceed in the ordinary manner.

Mr. J. C. Bolton deprecated the course suggested, and thought nothing was so unwise as to remove directors from the affairs of the bank, simply because the shareholders had not seen one half-year's report. He thought one cause of complaint was so late.

The Chairman said the lateness of the period of the

proposed the amendment, contending that commercial companies should be allowed to join the board from which two gentlemen had been expelled.

was true he was a director of a bank at one time. He thought whilst he maintained that position the bank went on as well as it could not prevent a class of business being done to the disadvantage of the bank. He therefore resigned and in twelve months the bank came to grief. He was a director of this bank, and had from its commencement attended to its business and was only connected with three companies. If it was the wish of the shareholders that he should resign, and that wish was

indicated by the meeting, his resignation was in the hands of the chairman.

The meeting having indicated a wish that Mr. Hooper should adopt that course.

The Chairman then proposed the re-election of Mr. Hooper, and he said it was impossible to have a better or a more successful direction.

Mr. Dent seconded the motion, pointing out that Mr. Hooper, collector of customs at Bombay, was an original director of the Bank, and was an *ex-officio* director of the Government of India.

The motion was unanimously agreed to.

Mr. Maynard was elected shareholders' auditor, James Goodson, and Mr. Richard Spooner as professors of accounts.

A vote of thanks to the chairman closed the proceedings.

UNION BANK OF SCOTLAND.

THE following is the thirty-fifth annual report of the directors to the shareholders at Glasgow, on the 10th May :—"The directors have the pleasure to exhibit to the proprietors an abstract of the accounts of the bank as at 1st April last, and to report the results of another year's business. The balance of profit and loss account at 1st April, 1865, after providing for all bad and doubtful debts, is £148,028. 2s. 6d. The directors have written off £5,000 in reduction of the reserve fund, leaving a clear available balance of £143,028. 2s. 6d. To this the balance of 'rest' from last year, after providing for the dividend then declared, £109,368. 6s. 7d. The total profit at 1st April, 1865, is £252,396. 8s. 10d. The directors propose to set apart £80,000 for payment, on 1st December next, of a dividend to the proprietors of 10 per cent. per annum, less income-tax. Notwithstanding the results of the year's business, the directors trust to be able to concur with them in the propriety of retaining the dividend at the rate of 8 per cent. per annum. During the year the directors have elected Mr. John Buchanan, Cawder House, to be the retiring director in room of Mr. Stirling, resigned—an appointment which has now been requested to confirm. The directors who retire by rotation are Mr. Archibald Galbraith and Mr. John Beatson. Mr. Beatson, having joined the board within two years, is eligible for re-election; the directors recommend that he be re-elected; in the place of Mr. Galbraith the directors recommend the election of Mr. Donald Galbraith, who is to be associated with the Glasgow, and Edinburgh committees. In the month of January, Mr. Gairdner, of whose health rendered necessary three years ago the resignation of Mr. Gairdner, tendered his resignation of the office of managing director, now notifying their acceptance thereof, the directors have on record the sense they entertain of the zeal and ability of Mr. Gairdner, and the interest he has invariably manifested. On Mr. Gairdner's resignation, Mr. Gairdner was re-appointed manager, and Mr. Gairdner assistant-manager of the bank."

IONIAN BANK.

A meeting of proprietors was held on the 26th May, at the in Great Winchester Street; Mr. Lloyd in the chair. by Mr. Kettlewell, the secretary, as follows:—
 The last year's operations will sufficiently appear from the statement. The directors think it a fair subject of congratulation, were able, after a careful investigation of the affairs of the bank, to declare on the last occasion a dividend at the rate of 10 per cent. per annum on both the old and new shares, having regard to the fact that after payment of the dividends they had in hand at the beginning of the present year, with the addition of the £6,000 derived from premiums on new shares, amounts to over £48,000, they entertain no doubt that results equally satisfactory may be looked for in the year 1865. The profit and loss account for the year 1864 is as follows:—
 Credit of profit and loss on the 1st January, 1864, was £19,764. 11s. 5d.—
 Profit for the year, after deduction of charges and bad and doubtful debts, is £19,764. 11s. 5d.—
 £163. 2s. 5d. less two dividends of £6,000 each, paid £12,000—leaving to the credit of profit and loss £48,163. 2s. 5d.—
 The board had naturally felt some anxiety as to what the change in the position of the bank relatively to the National Bank of Greece becoming entitled, of the Ionian Islands, to establish its own branches

in those islands, while no reciprocal advantage was company. In this state of things, and there being other might have interfered injuriously with their prospects to Athens, taking Corfu in his way, and in conjunction there, took the necessary measures for the protection of the bank. They were met with great courtesy and National Bank, the commissioner, and by all the result was, that whereas there had been some idea of a relationship between the two companies, yet, seeing the principles of the constitution of this bank differed from of the National Bank, it was thought better that they upon a mutual understanding that there should be no no lowering of the rate of interest without the concurrence in fact, that there should be harmonious action between been done, and assurances of good will had been National Bank in the presence of the minister. As to afloat which they had had to meet, the sting had been directors now had no dread of competition from any both at Corfu and Athens such a general impression of stability of this bank, and such a great readiness to accept in preference to coin, that there appeared to be no doubt the good position they had. If rival concerns were company would still get the best business, and the directors be content with their leavings. The next question to consider was, whether they should extend their operations to more active commerce of the Levant, but it had been more prudent course not to embark in more extensive which, though they might be productive of profits, attended with increased risk. (Hear, hear.) The Loughnan, who retired on account of ill health, pension, and it was also proposed to give him a seat in place would be supplied by Mr. Merlin, the company, who had been resident there for a long time, who was was on the most friendly relations with the government understood the principles and practice of exchange business of capital which had been called up had been employed legitimate banking business. The directors did not think other call would be required at present, but if the experience, or the prospect of profitable employment of capital a demand would probably be made to the extent of £1,000,000 were two things wanting for the development of the good government and the re-establishment of her credit in Europe. No people were more amenable to law and wanted a firm but gentle hand holding the reins to talent and industry to the promotion of their prospects heard from a Greek a dream of repudiation, and if herself in the position she ought to occupy in the there were many things in which the bank could be a the Greek government. He concluded by moving report.

A Shareholder—You do not intend at any time to half of the new shares.

The Chairman—That must of course depend upon do not foresee any likelihood.

was adopted, and the retiring directors, Mr. Alex. Pandia and Mr. H. R. Farrer, having been re-elected, the usual dividend was paid to the chairman and directors, and the meeting

LONDON AND BRAZILIAN BANK, LIMITED.

A general meeting of the shareholders was held on the 11th of January at the Tavern, for the purpose:—1. Of receiving and considering the report of the directors. 2. Of taking into consideration the arrangement which has been entered into by the directors with Messrs. Mauá and Co., and, if the same be approved, of passing resolutions as to the meeting shall seem fit, empowering the directors to take such steps and do all that may be necessary or proper to give effect to the proposed arrangement. 3. To decide on the proposal made by the directors for increasing the capital of the company by the creation of 22,000 shares of the nominal amount of £20 each. Mr. J. W. Cater presided. The report was taken as read:—

The directors have summoned this meeting of the shareholders in order to lay before them the details of the provisional arrangement which was notified by circular of the 17th April) the board have made arrangements with Mauá and Company, and also to advise with the proprietors in which the additional capital which will be required for giving effect to that arrangement, should be raised. The directors have for some time past had under their consideration the extension of the business of the bank to the River Plate, and at the conclusion that such extension was not only desirable as a profitable field for banking, but imperatively called for in all effect to the operations of the establishments in Brazil, the directors took steps to open a communication with the government of Santafé with a view to obtaining a concession for the establishment of branches at Rosario and at the city of Santafé. Pending the result of the government of Santafé, your directors received from Messrs. Mauá and Co. who (as the shareholders are no doubt aware for many years been carrying on a very important and successful business in the River Plate, were about to convert their private bank into a joint-stock company, and suggestions were made for an amalgamation of the interests of the two undertakings, by which this would be to itself the advantage of an existing position and opening a new district to which they proposed to extend the Company. Your directors unanimously adopted the suggestion which was made, and in doing so they were securing an arrangement to the satisfaction of the shareholders, and likely to work satisfactorily, inasmuch as it was mutually advantageous to both of the contracting parties. Following are briefly the details of the agreement which the directors have provisionally entered into with Messrs. Mauá and Co.; and which was read to the meeting:—

The amalgamation shall take effect as from 1st January,

and the amalgamation shall be effected by means of the incorporation of a new joint-stock bank under the limited liability law of the name of the 'London, Brazilian, Mauá, and River Plate

Bank,' and with a nominal capital of £5,000,000 sterling of £20 each, £7. 10s.* of which shall be paid up.

"3rd. That 150,000 shares with £7. 10s. per share to Messrs. Mauá and Company, and the remaining to the London and Brazilian Bank for distribution amongst the public, as the bank shall determine.

"4th. That the shares shall be issued to the public thereto, in exchange for cash or approved securities, that not less than one-half of the shares, to which the public is entitled, shall be taken up on the 1st January 1866, the remainder of the shares shall be taken up, at latest, 1866.

"5th. That the bank of Messrs. Mauá and Company and Brazilian Bank shall each liquidate, and neither shall do any business on their own account beyond the 1st January 1866, period, if it shall be found convenient, the liquidation shall be carried on by the new bank on their respective terms.

"6th. Messrs. Mauá undertake to obtain for the new bank the issue of bank notes at Montevideo and Rosario, which the bank of Mauá and Company.

"7th. That the business of the new bank should be carried on at Rio de Janeiro, Pernambuco, Bahia, Santos, and St. Paulo, Porto Allegre, and Pará, in the Brazils; and at Paysandu, and Mercedes, and at Rosario and Buenos Aires, in the Argentine Plate; at Lisbon and Oporto, in Portugal; and at all other places which shall be determined by the directors of the new company.

"It will thus be seen that the shareholders of this bank are to participate in a large and valuable existing business, and in the issue of bank notes, without any payment being required. In order to enable this bank to take its place in the amalgamated undertaking, it will be necessary to increase the present capital so as to command on the 1st of January 1866 a capital of £750,000 sterling. To effect this, it is proposed to make a further call (to be payable on 1st December next) on the existing 13,000 shares, and to create 22,000 new shares, the allotment of which the shareholders shall be entitled to the extent of three of such new shares for every one of the old shares. The account will stand thus :—

Old shares (£100) 13,000	} On which £400,000 has been paid up, and a call of £50,000 will be made payable on 1st December, 1865.
Three new (£20) shares for every two existing (£100) shares 19,500	
	} On which £2,100,000 will be payable on 1st December, 1865, and a further call of £50,000 on 1st January, 1866.

* "It was originally proposed (as intimated to the shareholders on the 17th April last) that the immediate payment on the new shares should be £20, but it has since been arranged that this sum shall be reduced to £10, the sufficient paid-up capital for the immediate requirements of the business."

of new shares in
tion to any not taken
the proprietors (for allot-
by the board) 2,500

On which £2. 10s. per share
will be payable on allot-
ment, and a further sum
of £5 on 1st December,
1865 18,750

25,000 £750,000

The shares in the amalgamated bank will, as above-mentioned, be of nominal amount of £20; so that on the 1st January, 1866, those shareholders of the London and Brazilian Bank who are the holders of shares of nominal amount of £100, will be entitled to exchange each such share with £45 paid up, for six £20 shares in the amalgamated bank, with £7. 10s. paid up. The holders of the new £20 shares in the bank will exchange those shares for shares of an equal denomination in the new bank, with £7. 10s. paid up. Although the special business of the meeting is the consideration of the proposed arrangement with the Mauá and Company, and the increase and issue of new capital, the directors have thought that it would be satisfactory to their shareholders at the same time to receive a report of the results of the management of the bank during the half-year ending 31st December, 1864, and they have accordingly requested the auditors to examine the balance-sheet and profit and loss account to that date. These accounts are appended to this report. It will be seen thereby that after writing off the £16,575. 7s. 6d. for losses, the net profit for that half-year amounts to £52,175. 11d. This will enable the directors in July next to declare an interim dividend of £1. 10s. per share (being equal to a dividend at the rate of 7½ per cent. per annum), and to carry over a sum of £175. 11d. to the next account, which the directors feel confident their shareholders will consider satisfactory."

The Chairman stated that he considered the proposed amalgamation the most satisfactory act which had been taken for the interests of this company. Independently of the fact which was exceedingly valuable, they had the satisfaction of being on behalf of the amalgamated company Baron Mauá, whose standing were beyond question, and who, as his business was a clever man of business. His business as a bank was a possible standing on the River Plate, and he had a very large circulation—much larger, in fact, than the meeting had heard of (the chairman) did not think it advisable to go into details at present. The extent of the business of the house could be imagined when he stated that on the River Plate there were inwards and outwards, to £1,000,000 sterling, and it was judged of from the fact that, on the resumption of business after suspension caused by the war in Monte Video, the bank had a government that his firm would not require the same security as them in common with all others, but would be prepared to make payments in two months, and they were now sending them to the country for that purpose. In taking over the assets of the bank, arrangements would be made as he trusted would satisfy the directors. The directors would not go rashly to work, and they would not take over 1s. of any assets of which they did not have and in the same way, by the terms of the amalgamation, the company only as were approved by the baron would be amalgamated bank. In conclusion, he moved the adoption of the report, which included the confirmation of the declaration of the dividend recommended, viz., at the rate of 17s. 11d. per annum, carrying over £8,552. 17s. 11d.

The motion having been seconded,

A Shareholder asked whether the amalgamation was on equal terms?

The Chairman—Yes, on perfectly equal terms.

The Shareholder—We have a reserve of £20,000. The Co. have £150,000 of the united capital, and we £20,000. We meet us on equal terms, to raise a reserve half as much as they—how is that arranged?

Chairman—Each party will be entitled to all their own assets be-
 required capital, and whatever surplus there may be over our
 the capital to our credit will, when our affairs are wound up, be
 amongst the shareholders. Some people have imagined that the
 interest being the larger would swamp ours. The facts are these—
 titled to £150,000 in the share of the amalgamated company, our
 on being £100,000. The 150,000 represents the portion of paid-up
 ontributed by Mauá and Co., and the shares will be issued as
 tal is paid up. They will be issued to the baron, whose arrange-
 with his own co-partners do not terminate until 1866, and until
 y cannot claim anything. But the baron informs me that the
 art of his proprietors require more than their proportion of the
 r local distribution. Most of them will retain their own shares,
 n of capital, and having great confidence in the prospects of the
 s regards himself, he tells me that most probably £50,000 of his
 n of the shares will never see the daylight for some time to
 t will be retained by him in his own hands. But, after all, what-
 y become of these shares, the control will always be with our
 y. We merely take in the baron as a director, but in forming
 arrangements I think it will be desirable to stipulate that the
 first appointed shall continue in office for a year and a half or
 s, for it is obviously desirable that in the management of a bank
 urs no sudden change should take place.

eholder asked what were the operating motives which induced
 i to come to this agreement? It had been suggested that if the
 Mauá and Co. was so good a thing as had been represented he
 cely have desired to get rid of it on such terms.

Chairman replied that the baron being no longer a young man was
 of that ease which was suitable to his age, besides which he wished
 isure to be frequently with his children, who were being educated
 ountry. If this company had not taken up the business, the
 Mauá and Co. would have been brought out as a joint-stock

otion was then put and carried unanimously, as were other formal
 as, empowering the directors to take the necessary steps for carry-
 the amalgamation.

Chairman, in reference to the accounts and balance-sheet for the
 year, congratulated the meeting on the results. Notwithstand-
 isruption of trade and a monetary panic, which had put some of
 t banks *hors de combat*, and jeopardised £8,000,000 or £10,000,000
 ty, they carried down £25,000 net profit, besides setting aside
 or losses, which he believed was more than sufficient. Of the
 which had been reserved to meet the losses at Rio, he had reason
 hat a large sum would be recouped, and that they would have a
 n this account in their favour next half-year. He could not say
 uld be no loss in the current half-year, for it was impossible for
 y like theirs to avoid occasional bad debts. They had had a loss
 of £7,000 or £8,000, consequent upon a forgery, but which, as
 y party was tracked, and by the aid of the French and Brazilian
 at Lisbon apprehended at Paris with some £11,000 of property
 a, would be probably reduced by about half. This was a loss
 hich every precaution was taken. A bill was presented to the
 before it was discounted the manager sent to the acceptor to
 if he had accepted such a bill. The reply was that he had, and

the bill was discounted, but it turned out that the one that had been accepted, but a copy of it was fraud. They would probably lose £2,000 or £3,000 securities on cotton and sugar, and in other branches perhaps some trifling losses. Still there was no slightest apprehension, and it must be a source of relief in a period of such difficulty their losses had been past six months the business of the bank had increased which was the amount for the six months ending July being an increase of £1,800,000 in six months. although they only paid $7\frac{1}{2}$ per cent. dividend, the amount there being no losses, would have amounted to £38, the dividend they carried over £8,500, besides providing and doubtful debts; and as he believed the £8,500 any losses that might accrue during the current half to have the entire of the profits made up to the amount amongst the shareholders beyond the reserve when the company were wound-up.

A Shareholder complained that information had been given of the intended amalgamation before it was made public to the shareholders, and the consequence had been great speculation which had been run up to 10 premium from 4, afterwards fell to 5 premium.

The Chairman assured the meeting that no information had been given from any director or any other officer of the bank. He had been so careful in the matter that until the meeting was summoned to decide upon the proposal it had not come to any one of his colleagues, the whole of the matter having been carried on between himself and the directors. A resolution approving of the amalgamation was carried on that day that the mail went out, but the baron stipulated that the matter should not be made public until the mail packet by which the baron's communication to his colleagues had sailed for Lisbon, and the directors were advised that the packet had sailed, they communicated the matter to the shareholders. The proposal had not come directly to him in the first instance. He had first heard that something might be possible from a gentleman in Lisbon. It might perhaps, therefore have been talked about, but the baron would not have whatever for saying that any of the directors or officers had allowed information improperly to go forth, could not be held accountable for the fluctuation in the value of the shares, posing that it arose from the prospect of the amalgamation. He considered that as directors they were in any way responsible for the fall of the shares in the market, whatever it might be. He said that the recent fall in the price of their shares was due to the losses sustained at Rio Grande, or some other place. He was happy to say that he and his colleagues were not responsible for the fall.

A Shareholder bore testimony to the uniform good conduct of the bank and intimated his opinion that the sudden rise of the shares subsequent upon the supposition that the amalgamation was about to take place was due to the fact that the reserve set aside to meet had been exhausted. (Hear.)

A vote of thanks to the chairman and the other directors was carried.

MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

Annual general meeting of proprietors was held at the bank headneedle-street, on the 16th May; Mr. George G. Nicol

report and balance-sheet were taken as read:—

Members have the pleasure of presenting to the shareholders the balance-sheet and profit and loss account of the bank for the year ending 31st December last.

Provision for all bad and doubtful debts, and defraying management at all points, the net profit amounts to £75,831. 11s. 2d., to which has to be added a sum of £75,831. 11s. 2d. brought forward from the preceding year, making a total of £151,662. 22s. 4d.

Of the above total £136,153. 5s. has been paid in two half-yearly instalments together 20 per cent. on the paid-up capital of the appropriated balance of £65,760. 7s. 3d. is carried forward to the profit and loss account of the current year.

Dividend of £12. 10s. per share, due 2nd January last, upon shares issued 1st December, 1863, has been paid.

The Calcutta, and Tuticorin agencies have been closed, the results of the year's operations, and for a similar reason the Mauritius branch has been discontinued at the end of the current year.

Mr. J. G. Palmer retiring from the board in rotation is Sir Frederick James Palmer, who, being eligible, offers himself for re-election, and the directors recommend him accordingly.

Mr. J. G. Palmer Robinson and Mr. Thomas Stenhouse having resigned, the directors in the direction of the bank, the shareholders will have to elect two new directors.

Mr. Murray Robertson, one of the auditors, and Mr. Ellis of the firm of Messrs. Ashton and Co., London, offer themselves as candidates for the vacant seats, and the court have much pleasure in commending them to the shareholders for election. An annual meeting will be held for the purpose.

The directors commend an increased allowance being made to the chairmen of the bank in terms of clause 113 of the deed of settlement will be made accordingly.

The shareholders will have to appoint auditors for the current year. Mr. J. G. Mackenzie, late of the firm of Messrs. Dent and Co., has consented to act, the directors recommend him to you for election in conjunction with the present auditor Mr. J. Smith, Mr. J. G. Robertson retiring, in consequence of his being a candidate for election in the direction."

The Chairman said that, as compared with the year 1864, there was a total increase in the liabilities of £3,000,000, presented by the additional capital created, and the reserve fund. In the current account and fixed capital, there was an increase of £700,000, which he thought was a satisfactory progress of the bank. The bills payable stood near as last year. On the other side of the account there was an increase in cash at bankers', and money at call, an increase of £1,000,000 sterling. He was sorry not to have a more satisfactory

The Chairman was not in a position to say positively whether the dividend was going on satisfactorily, and he had no doubt that it would be paid in July. His motion of the report, which was seconded by a proposition, was carried unanimously.

Sir F. Halliday, who retired by rotation, was re-elected. Mr. Mackenzie was elected auditor.

A resolution was then proposed and carried, fixing the salary of the chairman at £1,000 a year from the 1st of January.

A vote of thanks to the chairman and his colleagues was carried.

At the adjourned meeting of this bank, held on the 17th inst., James Murray Robertson and Mr. Ellis James Gilchrist, two of the elected directors in the room of Mr. G. P. Robinson, resigned.

The Chairman availed himself of the opportunity afforded by the adjournment of the meeting, that the failure of Messrs. Lindsay and Co., which intelligence had that morning been received, would result in a very trifling loss to the bank, owing to the precautionary warnings and orders sent to Bombay some time ago. The greatest caution was observed there and at other branches. The failure of Messrs. Lindsay and Co., in China, would not affect the bank, would the bank be sufficient to meet the claims of Ritchie and Co., Ceylon, would the bank be sufficient to meet the claims of they affected by any failures which had taken place in the colonies. Hamilton and Co. The chairman further intimated that the action of the board to prevent hereafter a re-transference of the London to the Bombay register, it having been found that this facility, which was one not sanctioned by the directors, had opened a door to abuses, and led to speculative operations in the value of shares which the board was determined to prevent as far as they could.

BANK OF QUEENSLAND

On Wednesday, the 17th inst., the third ordinary meeting of the shareholders in this bank was held at the offices, 26, Market Street, Brockett in the chair,

The Secretary (Mr. Muir) read the notice convening the directors' report, viz. :—

“The directors now submit their third report to the shareholders, accompanied by the accounts duly audited, showing the operations of the bank for half-year to 31st December, 1864. The undivided profit on that date amounts to £6,999. 1s. 6d. The directors propose to appropriate as follows :—£500 for the reserve fund; £509. 16s. 8d., or 10 per cent. of the balance of the preliminary expenses; £5,008. 16s. in payment of a dividend free of income-tax, on the shares issued, which, at the rate of 10 per share paid for half-year to 30th June last, will amount for the year 1864 of about 6½ per cent.; £125. 4s. 5d. for the tax on the dividend; and the balance of £855. 1s. 6d. forward to profit and loss new account. It was resolved that arrangements were in progress for opening a branch in Business was commenced there on 1st September 1864. The already made has fully realised the expectations

Rookhampton on 15th December last. This is a place of importance, being the present outlet for the trade of a large squattling district; and the directors purchased the branch until they were in a position, with larger means, to avail of the business offering. Since 31st December 1863, a branch has also been opened at Toowoomba, a rich pastoral district of the Darling Downs. The establishment of these branches was necessary for satisfactorily carrying on inland business emanating from the chief branch at Brisbane, which has been established at moderate cost, which has been a large addition to the bank's earnings for the half-year. The directors have obtained a satisfactory and profitable result to the bank from the operations of the year. The colony continues to progress, and trade, in 1864, was active. The imports and exports for 1864, compared with the previous year, show a large increase, the values being, for imports, £1,247,054, and increase of 32 and 40 per cent. of the exports, £1,037,663 consisted of wool, and gold-dust. In conformity with the articles of association, the directors go out of office at the meeting, viz.,—Edward Gillespie, Esq., John Alers Hankey, jun., Esq., who were re-elected. In pursuance of the articles of association, the directors decided at the late special meeting, two auditors will be appointed at the meeting in room of Mr. David Allardice and Mr. Churchill, who retire from office. As the latter has declined to be again offering himself for re-election, the directors have appointed the shareholders as auditors for the present year, and Mr. Charles F. Kemp, the latter of the firm of Messrs. Ford & Co., public accountants. In conclusion, the directors are sure in reporting that during the half-year the circulation of deposits has increased 89 and 55 per cent. respectively, and during the same period the number of current accounts has increased 10 per cent."

The Chairman, in moving the adoption of the report, regret that, from unforeseen circumstances, they were unable to receive the valuable services of their chairman, and it was his regret that he had been requested to take upon himself the duty of presiding at this important meeting. He most warmly thanked the kind indulgence and support whilst he endeavoured to perform the duty which he had so suddenly and so unexpectedly been called upon to perform. The report, the adoption of which he was about to move, was a long and full one, and it was his hope that they would find it of great value in their possession, and no doubt they had a right to expect that it would therefore be unnecessary for him to go through it in detail. By it they would see that the accounts were in a more detailed form than had hitherto been done, to enable them to understand the different items of credit and expense. He now kindly refer to the balance-sheet they would find in the report. The profits for the past half-year amounted to £6,999. 16s. 8d. It was proposed to pay a dividend of 12s. per share, from the profits, amounting to £5,008. 16s., to pay the income-tax on the same at 10s. in the £100, off £509. 16s. 8d. from preliminary expenses, to pay the same to the reserve fund, and to carry forward a balance of £855. 4s. to the new account. Now, probably, some of them would object to the directors had not decided upon paying a larger dividend. He would admit that the profits of the half-year would have been increased by doing so to some extent, but to have enabled them to do so they should have had to open a new account in the year, to cover the charges incurred in establishing branches at Dalby and Rockhampton, as well as in maintaining out a staff of officers from this country, such charges would have been reduced by writing off annually 20 or 30 per cent. of the preliminary expense account at this office. He would admit that in adopting the other course they were acting with a sound and wise discretion—that is, in giving a dividend, and in paying off and utterly extinguishing the

and thus freeing the new branches from an annual more or less have tended to diminish their future there could be no doubt that these branches would bank, not only from the new business which they the facilities which they would offer for increasing bank's notes. They would be glad to know that commerce of the colony had increased considerably the imports and exports reaching in value no less £1,247,054 respectively, whilst among the latter of export—namely, gold, amounting to £83,292. y it might be to them to hear of the advancing y during the past year, it would not, he was sure, hem to learn that during that period the Bank of ood still. Even within the last half-year the cur- eased upwards of 80 per cent., whilst the increase in eposits was still more remarkable. On the 31st circulation amounted to £3,394; on the 30th June d on 31st December last it reached £14,163. The ember, 1863, were £21,116; on 30th June last, December last they amounted to £67,592. These ke for themselves, and from which he thought they ng to the conclusion that the bank was expanding tance, and assuming, slowly it may be, but gradually which would, in due time, place it in the front rank rishing establishments which had sprung up in the He would not trespass longer on their time, but would y questions they might wish to ask him respecting any. He could assure them it was the earnest wish s and himself that every proper information should olders, and that mutual confidence and good feeling between them, without which it would be impossible nising undertaking ever to succeed. (Cheers.) ded the motion, which was unanimously adopted. rs, Edward Gellatly, Esq., John Gillespie, Esq., and un., Esq., were re-elected. e and Mr. Charles F. Kemp, of the firm of Messrs. and Co., were elected auditors for the present year, of Mr. Churchill, resigned. The remuneration of l at £40 each. on moved a vote of thanks to the chairman and carried unanimously. en terminated.

PROVINCIAL BANK OF IRELAND.

General meeting of the proprietors of this bank was y, at their house, 42, Old Broad-street; Sir Minto y, occupied the chair. Christie, read the notice convening the meeting. er, Esq., Sir Minto Townshend Farquhar, Bart., Esq., and Sir Moses Montefiore, Bart., the retiring ously re-elected. t was then read by the secretary:— g the fortieth since the formation of the bank, the

directors take occasion to express to the proprietors which they contemplate the success which has attended during that long period, while at the same time the advantages arising from the introduction and development of a system of banking in that country. The season was good for the early grain crops, and wheat and barley were of good quality. The later crops, however, suffered from the drought which prevailed during the summer, and the oat crop was a deficient one. From the same cause green crops were deficient; but fortunately the potato crop was of a good quality. Flax was also a heavy crop, and was considerably larger in extent than heretofore. The flax crop and the dry season being unfavourable for steeping, the crops were not in proportion to its bulk; but notwithstanding a rather low range of prices, the flax crop was remunerative to the farmer. The directors regret the pecuniary condition of the small farmers in Ireland, who, notwithstanding the improvement in their principal crop, oats, has been a deficient one, while the prices of grain have been low. This, of course, prolongs the depression which has prevailed in the retail trade of the country. On the part of the larger landholders have continued to derive substantial benefit from the high price of cattle and sheep. Wool also rose in price during last summer, but has since considerably fallen. The linen trade, which forms the staple of the Northern trade, has continued prosperous. The manufacture and export of linen has increased during the past year, and prices were steady. The prospect of peace in America has latterly brought about a rise of prices, but no commercial difficulties have arisen. The value of money has undergone numerous fluctuations during the year, the average rate of interest being 5 per cent. The directors have to express their regret at the loss of the services of Mr. Robert Murray, the late chief officer of the bank, who on the 26th February last, after a very short illness, died. He had been in the service of the bank from its establishment, and had been to within a few months of forty years. He was a man of great business experience, of acknowledged ability, and of great energy in the discharge of his various and responsible duties. The directors appointed their late secretary, Mr. Thomas Hewat, to be chief officer and superintendent of branches. Mr. James Christie, for many years the principal assistant in the bank, and now in London, has succeeded Mr. Hewat as secretary. The minutes of the meeting is now requested to the following statement:

The account submitted to the yearly general meeting in 1864, showed the amount of rest, or undivided profits, as at the 26th March, 1864, to be

Out of which there has been paid to the proprietors the amount of two ordinary and extraordinary dividends as follows:

At Midsummer, 1864—Ordinary dividend of 4 per cent., £21,000; extraordinary dividend of 6 per cent., £23,000; together, £44,000. At Christmas, 1864—Ordinary dividend of 4 per cent., £21,600; extraordinary dividend of 6 per cent., £23,400, together £45,000

£4,500,000 distributed in payment of this one produce is unquestionably a matter pregnant with cannot remain much longer unconscious of the r prices rule low the flax crop will often be found that they could select." This is most important Ireland is concerned, for when the American war b London feared that the linen trade would suffer, b case. It has been said that the small farmers have great depression that occurred during the four year harvests were not so good as we could have wis hope from the prospects of this year that an i place in their condition. It is of consequer should prosper; for if they suffer there must be traders. I find from the poor law reports that the paying poor rates has increased between 1855 and remember that it was in these years there were t I mentioned. The valuation in 1865 was £12,623,0 in 1855. We have reason to feel convinced th position in Ireland of credit and trust which it has we are supported throughout Ireland, and all repo continues to flourish and prosper as a commercial We have forty-four branches in Ireland, and th much attention and supervision. The bank is, as v very sound position. We have three inspectors an tor who visit the branches, and see that the man do their duty. We have to regret that we have l excellent officer Mr. Murray. For almost forty- our service; a man of greater determination to more honest integrity, a man more devoted to the have been. In expressing our regret at his death to pay this testimony to his memory. It is not a bank loses a man of this character that it another, in whom they have the most perfect co my friend on my right, has been in the bank thirty years he was inspector in Ireland; he then be bank in 1845, having succeeded Mr. Marshall to regret is, the loss we suffer by his being rer to Ireland, but we feel it our duty to send him to t he will be the chief superintendent in the place wh is being carried on, and where I am satisfied he wil admirably, as thoroughly, and as truthfully as he l have been fortunate also in being able to fill up appointing Mr. Christie as our secretary, who has this bank, and we are sure that Mr. Christie, havin under Mr. Hewat, will make it his business to emu and to fill the place as well as his predecessor has are not flattery; they are positive truth. I hav regret at the absence of Mr. Farrar. You know ho exertions, and I am sorry to state that during the unwell, and that is the only reason for his absence this is only the second time he has been absent fro for forty years. I now beg to move the adoption of

THE CREDIT MOBILIER COMPANY.

of this company has just been held at Paris; M.
 chair. That gentlemen read the report.

ges of the document assigns reasons for the reduc-
 After reminding the shareholders that the present
 n time of giving an account of the situation of the
 says:—

s not ceased to be satisfactory, although it has not
 as we could have wished; but, as you are aware,
 he past year circumstances have been anything but
 es of difficulties which have been experienced during
 mystery for anyone. The period of pause which our
 ergo is due to the influence of external circumstances
 either foresees or dominate. We allude in particular
 in which the money-market has been so long placed,
 high rate of interest marking the crisis from which we
 sued, and the effects of which still weigh heavily on
 mmerce. An elevated discount always produces grave
 ness, and those perturbations are more particularly
 those propriety depends, above all, on the ameliora-
 rded in the conditions of credit and in the abundance
 al. In such circumstances establishments of credit
 mselves fortunate if they possess, like us, resources
 be obliged to slacken the undertakings engaged in
 re favourable. But the high rate of interest has
 result to augment the charges falling on industrial
 arrests all business, and paralyses all spirit of enter-
 way that in moments of general cessation one of the
 prosperity is found to disappear. Lastly, and it is
 nce between our situation and that of the generality
 capitalists, as soon as the rate of interest rises, all
 l securities, movable or immovable, are struck with
 eciation. Those are facts which we enunciate, not
 u reprehension, but solely on account of the influence
 business. Fortunately, it is not on the income of a
 t to be appreciated the kind of services which an
 is can render; they can only be judged of from re-
 h a series of years, and those results are shown of an
 5½ per cent. on the capital of our shares since our

We have thus explained how we have to suffer from
 at if we suffer from them more than others, on
 nance of our investments, and the loss which is neces-
 us by every depreciation in the value of our

assets—if we thus first receive our share of the country may experience, it must be admitted that we participate in a large proportion in the advantage produced by the return of prosperity. We are at present profit by such a return, for during the period of crisis we have passed we have not ceased to labour for the advancement of all our undertakings; we can congratulate ourselves on not having allowed the companies placed under our management to cease for a single moment, and on having, on the contrary, all the resources at our disposal, so that we have succeeded in an advantageous situation. The report then proceeds to the position of the most important of those undertakings, the Mexican loan, which it admits to have turned out being not only a depreciation of property on the part of the company but a loss to the company who brought it out, and a mission to which the company was entitled. The millions of francs turned out more fortunately, than the second portion of the loan reserved to the subscribers of the Ottoman Bank is described as prosperous, a dividend announced on the 250fr. paid up, or 15 per cent. As to the home debts of Turkey, and a concomitant loan of 100 millions of pounds in 5 per cents., the *Crédit Mobilier* had declined in it. The report also admits that the *Société de Commerce et d'Industrie* has turned out unfortunately, on account of the enormous purchases of property, and partly to the conduct of the director, who had taken to flight under the weight of the losses in speculations at the Bourse. On the other hand, the *Mobilier Italien* has passed through the crisis with credit, and realised a considerable profit. As to the railways, the *Mobilier*, the first, the Austrian group, was decidedly in a position to be pronounced in a favourable position; the second, the *Mobilier de France*, showed an improvement in receipts on the preceding year; third, the Northern of Spain, avowedly unfortunate, on account of representations to the Spanish government relative to the delay in the construction over the official estimates, and as to the receipts. The receipts on this line are represented as improving, and are expected to increase, particularly as the Spanish cabinet has decided to modify the duties on various articles which will be a considerable source of traffic between France and Spain. As to the *Crédit Mobilier*, they are declared to be entirely unsuccessful. The company has realised a net profit in the last year of 18 per cent. The gas company has been constituted, and the shares of the company for ten years by the Spanish *Crédit Mobilier*. The company of coal from the pits belonging to the Northern of Spain, no doubt could be entertained of the success of the company. The Paris Gas Company was regularly extending its consumption of gas, which in 1856 was 47,335,475 cubic feet, and had attained 109,610,000, necessitating a consumption of 3,000 tons of coal annually, or more than 1,000 tons each day. The dividend in 1856, to 105fr. at present, or 21 per cent. on the shares. The Transatlantic Maritime Company was improving rapidly, and for the past year, with a supply of vessels representing

"That for the purpose of effecting the proposed directors be authorised to apply for and accept a suit to adopt a supplemental deed of settlement, or, her Majesty's Treasury, to take such other steps

SOUTH AFRICAN MORTGAGE AND INVESTMENT COMPANY, LIMITED.

THE report of the directors of the South African Mortgage Company, Limited, issued preparatory to meeting on the 30th May, states that the results of the colonies of the Cape of Good Hope and Natal for the year now received, and the accounts duly audited, the directors have the opportunity of submitting to the shareholders the annual and loss account for the year ended 31st December 1864. It will seem that, after deducting rebate of interest (4 per cent.) on the net profits, including premium of £1 per £100, amounted to £12,302. The directors recommended that be applied as follows:—To dividend already paid for the year of June, 1864, £2,219. 9s.; to additional dividend for the year at the rate of 6 per cent. per annum on the respective former amount paid, at the rate of 7 per cent. per annum, £2,182. 14s. 8d.; to reserve fund, £6,500; to necessary expenses and furniture account, £180; to new investment of income-tax and remuneration of directors, £1,220. 13s. 2d.; making a total of £12,302. 16s. 2d.

BANK OF VICTORIA.

THE half-yearly meeting of the proprietors of the Bank of Victoria, held at the head office, Collins Street, Melbourne, on the 29th May, Hon. H. Miller, M.L.C., chairman of the board of directors, reported that the net profits for the half-year ended 30th March last, after providing for bad and doubtful debts, and there was a balance of undivided profits on the 30th March, 1864, of £7,200. 5s., making the total profits available for dividend £14,400. 5s. The directors recommended that a dividend of two pence should be declared, being of opinion that this increase of profits by the profits made during the half-year. The dividend absorbed by the proposed dividend was £31,250; and it was recommended that £5,000 should be carried to the credit account; leaving a balance of £8,154. 2s. 10d. of undivided profits. The reserve fund, it appeared, was £100,000. This was adopted on the motion of Dr. Farrage, seconded by Mr. M.L.C.; and thanks were accorded to the directors for their services during the half-year. This concluded the business of the meeting.

THE IMPERIAL OTTOMAN LOAN.

prospectus of the Imperial Ottoman Five per Cent. Loan, of 17-29, 18-30, and 19-31 March, 1865, was circulated in May. It will be perceived it states clearly and concisely how the operation is to take place. The amount is not less than the subscriptions are opened throughout the money markets there is every reason to anticipate that it will be readily taken up on a Five per Cent. Stock on such a basis, with a 1 per Cent. sinking fund, will give it currency in England, France, and

The capital is 4,000,000 medjidies d'or, or £3,636,363 sterling, or £100 sterling, equal to 110 gold medjidies, equal to 50 sterling equal to 55 gold medjidies, equal to 1,250 francs; equal to 11 gold medjidies, equal to 250 francs, with interest 5 per annum, payable half-yearly, on 1-13 July, and 1-13 January in London, francs in Paris, Frankfort, and Amsterdam, or in Constantinople. Redeemable in 37 years by 1 per Cent. and applied in purchase. The first law creates a 'Grand Livre Generale de l'Empire Ottoman' guaranteed by the revenues of the empire. The second law authorises the inscription of a 'Grand Livre' of 40,000,000 medjidies d'or, to be applied as follows:—the conversion of the existing internal debts, 29,000,000; the loan, 4,000,000; reserve, specially destined for public works, 7,000,000; issued sooner than 2,000,000, one year after the present date; at the soonest after two years; and 2,000,000 at soonest after three years—7,000,000; 40,000,000 or £36,363,363. The laws providing for the inscription of debt is to take place unless by a special law, and after provision has been previously made for the sinking fund of any such new inscription by sufficient increase of revenue or reduction of expenditure.

The debt inscribed in the 'Grand Livre' is guaranteed by the revenues of the empire actually free; and as previously charged, as they become disposable by the liquidation of the existing foreign debts, of which they constitute the principal. The third law provides for the conversion of the existing debts, the consolidés being converted at the rate of £110 for 100 New Five per Cent. Stock for each £100 Turkish, and the full particulars of which will be issued in a few days, when the necessary certificates of conformity will be issued. The price of issue for each bond of £100 sterling (estimated from 1-13 January, 1865), is payable as follows:—£5 on allotment, £10 on the 13th of June, £15 on the 13th of September, £10 on the 13th of December, £5 on the 13th of March, making £50. The coupon of 2½ per cent., due 13th of July, will be paid at the price of the bond to 47½, and subscribers will have the right to pay their instalments under discount at the rate of 5 per Cent. on any of the days fixed for the payment of the instalments, in default of due payment of the respective instalments, all subscribers will be liable to forfeiture.

The certificates in sterling money will be issued to the General Credit Company, for the portion of the loan subscribed in England, and by the foreign agencies for the amount subscribed abroad. The continental scrip certificates will not be uniform until after payment of the final instalment,

when they will be exchanged for definitive bonds according to law in Turkish, French, and English be effected at the contractor's office, Constantinople Finance Company of London (Limited), London; Banque de Credit et de Depot des Pays Bas, Amsterdam; of Austria, Vienna; Von Erlanger and Sons, Credit Genevois, Geneva. The subscription for the loan at—London: General Credit and Finance Company, 7, Lothbury. Constantinople: The Contractor's Office, Von Erlanger and Co. Amsterdam: Banque de Credit des Pays Bas. Frankfort: Von Erlanger and Sons."

THE LOCK OUT.

Considerations on the recent Struggle between Capital and Labour.
North. By BENJAMIN HARDWICK, F.R.G.S.
Royal Exchange.

Mr. Hardwick has produced this pamphlet at a time when the late disastrous strike in the North has not yet reached a satisfactory termination, these papers will not be of much interest by every political economist, but they may be of interest by all classes—employers and employed—particularly in trades in which the iron rule of trades unions prevails. Mr. Hardwick calmly reviews the subjects which give rise to strikes, and particularly the question of supply and demand. He says—"There is a point below which wages cannot fall, amount upon which the labourer can, with decency, live. When wages fall to this point great distress takes place; marriages take place; by reason of the distress children die; and so the labouring class increases in numbers until the proper proportion between capital and labour is re-established. All these elements of distress are in operation the nearer the rate approaches the minimum of wages, so that except in very rare instances wages do not fall low an ebb, because, as they approach it, they induce an increase in population, which gradually restores the balance of labour." Mr. Hardwick having fairly contrasted

es as regards the employer, concludes by submitting
or the prevention of such unfortunate catastrophes
place. That a central emigration society shall be
l representing every class of labour. That every
ro rata subscribe to such society. That every case
sters and workmen shall be laid before this council,
nd that the depressed rate of wages approaches to
e "necessary" or "minimum" rate, that a grant
e society shall be made to assist such a number of
as shall restore the balance between capital and
ular trade, and so again raise the rate of wages.
feasible, there can be no doubt, but we think the
y likely to arise when the pinch comes, "who

Estates of Failed Firms.

F MESSRS. BUCHANAN, HAMILTON & Co.

g on the 26th April, in London, of the creditors of
amilton and Co., of Glasgow. This was the failure
urprise a few days previous owing to the position of the
tions abroad are Messrs. Jarvie, Thorburn and Co.,
Messrs. Hamilton, Gray and Co., of Singapore. The
as submitted by Mr. William Anderson, accountant,
debts and liabilities, £752,588, and assets, £632,068.
s is the surplus of £17,000 from the separate estates
Royal Bank of Scotland are creditors for £50,000,
red. At the conclusion of the proceedings Mr. William
urray, Son and Hutchins, and Mr. Fleming, of Glas-
requisite explanations respecting the estate, a resolu-
effect that the meeting be adjourned until Monday, the
two o'clock, to allow of accounts being received from
pore; meanwhile, the business is to be carried on
of Mr. George May, of Messrs. May, Matheson and
Michael Connol, of Glasgow, and Mr. Anderson, the
nderstood that the banks and the other creditors in the
e not to send their bills abroad or take proceedings
ement, and any payments made are to be with the
ctors. It appears to be imagined that if, by the 2nd
all be enabled to make a reasonable offer of composi-
rably entertained.

OF MESSRS. CHARLES JOYCE & CO.

editors of Messrs. Charles Joyce and Co., in the Alex-
suspended on the 8th of April, was held on the 16th
Tavern, when the annexed statement of their affairs
Messrs. Kemp, Cannan, Ford and Co., the accountants.

What is the difference between a bill payable at sight and a bill on demand?

Will the former, after circulation abroad, be liable to foreign stamp? As a bill payable at sight the usual three days of grace?

Yours respectfully,

CONSTANT READER.

Chester, May 23rd, 1865.

1. A bill payable at sight can seek three day's grace; a bill payable on demand must be met when presented.

2. It will require the *ad valorem* stamp.

3. A bill payable at sight has three days' grace.]

MONTHLY CHRONOLOGY.

1.—Suspension announced of Messrs. Marshall and Sons, spinners, of Manchester, with liabilities reaching to between £800,000 and £1,000,000. Meeting of the creditors, it was agreed to accept a composition of 10s. in the pound.

 Messrs. C. and H. M. Brazil and Co., Herwich
 turers.

Messrs. Woodhouse, Kerrick, and Co., London

BANK MOVEMENTS.

The following gentlemen have agreed to join the Financial Association, Limited :—Mr. Frederick Harnden and County Bank ; Mr. F. B. Henshaw, director of the firm of Burrows and Roberts, Corn Exchange.

Mr. William Haughton, chairman of the Great Southern and Western Railway Company of Ireland, and Mr. Henry Shaw, of Shaw, and Co., of Dublin, have joined the board of the Bank of Ireland.

At an extraordinary meeting of the proprietors of the Bank of Ireland, Mr. William Brown was elected a director, in the room of Mr. Henderson, Esq., deceased.

It is announced that Mr. Ernest Seyd has from his resignation his appointment as London manager of the British India Company, Limited.

Notes of the Month.

W. G. PRESCOTT.—It is with great regret we have to mention the death of Mr. W. G. Prescott, the head of Prescott, Grote, and Co. The deceased gentleman was and was deservedly respected throughout banking and commerce. It is stated that he had been in failing health for some months, and did not attend to business, in which he formerly took an active

THE LATE MR. WILLIAM GEORGE PRESCOTT.—The will, with the late Mr. William George Prescott, the banker, of Clarence, Grosvenor, and of Threadneedle Street, has been proved, and the testator has sworn under £205,000. The executors and trustees are the late Mr. Charles Cave and Mr. Joseph Grote, his brother-in-law, and Mr. Wolstenholme, barrister-at-law, and his cousin and partner, Mr. Prescott. The testator leaves his mansion, called Clarence, with its furniture, plate, linen, books, carriages, and horses, to his wife, Mrs. Prescott an immediate legacy of £5,000. To his son, the wife of Captain Richard Decie, of the Royal Engineers, a legacy of £5,000. He also leaves the following legacies; to his four executors £250, free of duty; to his cousin and partner, Mr. Prescott, £200, free of duty; to the said Captain Decie a legacy of £200. There are also legacies of £200 each, free of duty, to the testator; also to two sisters and to a brother-in-law. The annual income resulting from the sum of £35,000 to be paid to whom he gives a power of appointment over such £35,000 to his children, and in case of default of such appointment the testator's estate for them. Subject to all the foregoing bequests, the residue of the estate to Mrs. Prescott for her absolute use.

TRADE OF THE UNITED KINGDOM.

The trade returns for the month and three months ended the 29th April, and may be regarded on the whole, although there are no changes calling for any special notice, as a small declared value of exports for the month last past was £13,555,674 in 1864, and £10,217,473 in 1863, which is less than the former period of £214,480, and over the latter of £10,217,473. The three months of the present year the total was £36,667,381, and in 1863 £27,561,204, which is less than the former period of £1,031,674 as compared with 1864, but an increase of £1,031,674 as compared with 1863. The most important variations exhibited in the returns are, as respects exports, an increase in the value of beer and ale, coals and culm, cotton manufactures, earthenware and cutlery, linen manufactures, machinery and seed oil, cotton yarn, haberdashery and millinery, linen yarn, metal manufactures, woollen and worsted yarns, and woollen manufactures. As regards imports, an increase is shown in raw cotton, hides, tallow, wool, cocoa, coffee, spirits, sugar, and tobacco. And there has been a decline in flax, leather manufactures, raw silk, woollen manufactures, tea, and wine. With the exception of these, there has been an increase in the importation of barley

and Indian corn, but a large falling-off in wheat, and flour, and a slight decrease in beans. In the decrease is shown in butter, cheese, eggs, and lard, and hams, and salt beef and pork. The annual variations in the chief articles enumerated.

Monetary Intelligence.

MAY REVIEW FOR THE MONTH OF MAY.

of financial and commercial affairs this month has not lagging. The tendency at one period in the money market and pressure, and the rate of discount was temporarily. Subsequently, a reaction took place in the demand, and there was a return to the old rate of 4 per cent., at which the official banks stand. It would not create surprise, the accumulation of bank being so rapid, if it should be necessary for the directors to lower the rate of discount in the course of the next week or so. The late failures in India, China, and Australia have created about millions of paper now having been cleared from the market must consequently be a diminished inquiry for general.

The few suspensions that have occurred at home have been due to the effects of what has ensued abroad, and it is highly probable that the discount will be increased in the course of a month. There is no reason to expect, in the Continent will, there is every reason to expect, before the end of June; the prospects of the harvest and the general producing a favourable feeling. The operation of Exchange have been surfeited with new companies, the in many cases, stand at a very heavy discount.

in Consols have been to the extent of about 1 per cent.; of the month there was considerable depression, chiefly due to the satisfactory nature of the news from America, and the fears regarding various houses connected with trade in the East. However, of money becoming cheaper, with an easier state of credit, subsequently produced a more favourable impression, and the price of Consols was the highest touched during the reduction in the rate of discount and the satisfactory bank returns, have undoubtedly had a beneficial effect on the market. There appears every prospect of a further improvement. The market have exhibited remarkable steadiness, and the official rate that for the next half-year the interest will be reduced 1 per cent., has not had at present any effect upon prices.

The chief operations have been in Spanish, Mexican, and other very uncertain state in which the foreign creditors of Spain are regarded with much anxiety; but, nevertheless, there are yet no indications that the present government of that country will even- with the creditors, hence the issue of their stocks continues to be maintained. Mexican has fluctuated rather more than any other in consequence of the threatening aspect of affairs with regard to the close a somewhat better feeling has prevailed. The market fluctuated but little in price, but on the whole the appearance of the Confederate Cotton Loan has for the last month been rising, and is now at the lowest point yet touched.

Prices have fluctuated in about the same ratio as the other market. All the variations have not been so great as during some of the months. The traffic receipts continuing to contrast favourably with the corresponding period of last year, has tended to add to the buoyancy of the market, which closes with firmness, and with a tendency to improvement.

For joint stock bank shares has shown less buoyancy than

for some time past, the dealings have lacked the long prevailed in this department, and in most declined. Credit and finance shares are also rather more steadiness.

THE GRAIN TRADE

THERE has been a rather more active business in grain trade than for some weeks past, and the price had an upward tendency. Other descriptions maintained firmer rates. The supplies, all sorts, and the importations of all kinds larger than for some time past, for which there is no doubt prices would have advanced. The latest official average quotations were Barley 29s. 9d. per qr., and Oats 22s. 9d. per qr.

The Gazette returns for England and Wales last week were as follows:

Week ending, 1865,	Wheat. Qrs. sold.	Weekly Average.
April 29	62,756 ...	39 5
May 6	84,806 ...	39 10
" 13	74,649 ...	40 11
" 20	88,015 ...	41 8

The importations since the harvest of 1864 have been as follows:

	Wheat. Cwts.
Forty weeks ended 22nd April	... 11,797,8
Four weeks ended 20th May	... 2,057,4
	13,855,3

And the weekly averages have been:—

Forty weeks ended 22nd April...	... 295,0
Four weeks ended 20th May 514,0

More 219,0

STATE OF TRADE

A FAIR extent of business is transacting in the districts; there is every appearance of trade maintaining its former level.

NOTICES TO CORRESPONDENTS

We have arranged in future to issue a double number in May and November. This has been rendered necessary by the Meetings of the Banks and Discount Companies, which are held in the pages of the *Bankers' Magazine*. We shall also give Credit and Finance Companies as they are more or less known, that our subscribers and readers can refer to them with confidence. We will please forward communications addressed to the Editors of the *Bankers' Magazine* to Messrs. Groombridge and Sons, Waterlow and Sons, Carpenters' Hall London Wall.

BANKING AND FINANCIAL ANECDOTES.—It will be perceived that the Editor of the *Bankers' Magazine* is collecting and arranging such Anecdotes. Any contributions from subscribers and others are thankfully received, particularly if the subject-matter shall be of interest to the public. Nothing personal or offensive will receive publicity.

The receipt of further anecdotes is gratefully acknowledged. Two or three communications still stand over.

THE BANKERS' MAGAZINE,

AND

Journal of the Money Market.

JULY, 1865.

WITHDRAWAL OF MR. GLADSTONE'S BANK OF ISSUE BILL.

We have to congratulate the banking interest on the withdrawal of Mr. Gladstone's Bill for regulating Banks of Issue. More than once we have had to expose the right honourable gentleman's errors and hallucinations, and to show that his ability as a financier is by no means equal to his eloquence as an orator. The modifications of our national burdens have been by no means permanent successes, and in remission and impositions alike has been shown his devotion to unsound theories, and his superiority to the lessons of practical wisdom. The measure which has now been defeated exhibited both these imperfections. In presenting it to the House, its author avowed his adherence to a questionable doctrine, and his readiness to commit a great injustice upon the banking fraternity. He claimed for bank notes a character which they do not possess, and he sought to deprive the bankers of a right which is as much an item of personal property, as the wines in Mr. Gladstone's cellar, or the place on Mr. Gladstone's side-board. Happily, his endeavours have been defeated. The House is not yet prepared to take the first step towards making the business of banking a Government monopoly, and as yet the old-fashioned maxim that the powers of the public are not to be exercised to the derogation of individual rights has not been set aside to gratify enthusiastic adherents of Sir Robert Peel's Currency Act.

Mr. Gladstone proposed to allow the private banks to retain their present powers of issuing notes for a limited period, at the end of which all rights of that character which they now enjoy were to cease and determine. This proposal rests on the principle that the State, and the State only, ought to issue paper money. This theory once admitted, it follows that if

any one else has been permitted to do so, the own option, resume its right, and deprive the power to issue notes without any compensation. The Chancellor of the Exchequer unreservedly premises and the conclusion. A private bank paper is, in his eyes, an anomaly only to be removed, and a few weeks ago both the hour and the man had arrived for the dawn of the millenium of the devotees of the to be accelerated by our present Minister. The rights of the private banks were to cease in which none but the State or its licencees were to issue money. The Act of 1844 provided for the withdrawal of this right by those who held it, and the prophecies of its authors which time has said that bankers would hasten to avail themselves of the provisions. But the banking mind in this country is eminently practical. The country bankers feared the loss of powers of issue which were so desired by and so valued in England were of no value to less power. Therefore they preferred to keep their notes in circulation. They were actually wrong-headed enough to believe that they could not withdraw them without seriously diminishing the value of the money. The sound and solid banks, whether private or public, on the even tenour of their way, regardless of the consequences, were causing to the authors of the new financial theories. Now and then a speculation failed, or a weak one died out, but the progress of the country by such means was far too slow to be satisfactory. The things were going on, centuries must elapse before the system of Issue had ceased to exist, and hence it was that Mr. Gladstone introduced his recently defeated measure.

A moment's consideration will suffice to show the fallacy on which that measure rested. The private bank is neither more nor less than a promise. A man takes unless he has confidence in the solvency of the persons or firms whose names are upon it. This is the basis of the system by some speakers during the debates on Mr. Gladstone's measure, and an attempt was made to prove that a bank note is as good as money as a sovereign, and that as we had progressed from issuing a metallic currency, the same principle applied to forbid any attempt, by private persons, to issue a paper currency. The cases, however, are not parallel. The stamp on a piece of gold is the voucher for its value (practically) for uniformity. A coin with

to contain a certain weight of metal, and to represent a particular sum. The standard of paper money rises or falls according as the receiver thinks it is probable or otherwise that he will get the nominal value of the instrument he takes when he presents it for payment. For first-class mercantile paper one can always get the full amount for which it is given, except only to a deduction for discount, varying with the present rate of interest, and the time the bill has to run. The reason why bank notes are taken without any deduction, however, is because they are payable on demand, and upon this, consequently, there is no rebate to be allowed. In aid of the circulation of the Bank of England, the power of Parliament has more than once been invoked. But private bankers get no such help. No one would take one of their notes unless he felt sure that it would be cashed at any moment he presented it at the bank counter. The bankers know this, and keep a stock of bullion proportioned to their own circulation.

The public know it, and their readiness to take the notes depends upon their belief in the ability of the bank to meet its engagements, in just the same way as a trader's readiness or reluctance to take a bill from a customer. In both cases the action is based on the confidence of the person who takes the instrument. In both, the person giving it gets an extension of his available means, and in both the receiver can give a better title to the property the instrument represents, than he himself possesses. Clearly, then, the attempt to distinguish between a bank note and a commercial bill fails, and as no one can maintain that it is beyond the scope of private dealing to issue or take a bill, the whole theory of State rights, for which Gladstone contends, fails also.

The practical part of the question may be very soon disposed of. An attempt was made to show an increased risk of forgery, arising from the multiplication of note-issuing establishments. The answer to this is, that in practice, forgeries are generally committed on the Bank of England, because the plates of the notes are invariably much more elaborate than that in use at the national establishment, and from the narrower area in which they circulate, it would never be worth a forger's while to attempt to imitate them. This very circumstance, it is well known, often makes it no easy matter for a stranger to change a Bank of England note in any district having local paper in circulation. It may be said that this is an inconvenience to the forger which the proposed Act would have remedied. We know the inconvenience is caused by losses experienced by the public, which the proposed Act would have multiplied.

And, as was forcibly remarked by a daimon on the proposal, to withdraw the private banks would be to diminish our power to the extent of four millions, at a time when it is rather to increase than curtail it. Furthermore, one of the soundest banking maxims, it would be to concentrate on one large establishment, rather than on many small ones; an evil which we have carried far enough. Had the Bill passed, it would have made the Bank of England a great monopoly; an instance of a project which has been published by the scheme of a free trade minister, and by a free trade Parliament.

We congratulate the English bankers for their opposition to this measure. Should any attempt to introduce it, it would be well to obtain the assistance of Scottish brethren, whose rights were spared, but who must not suppose that they will be spared if the English banks are sacrificed. It may be the duty of the Chancellor to take each interest in detail, but it is foolish of those who are indirectly menaced to wait until their own turn comes. Having vainly attempted to get the bankers to give up a lucrative branch of business, Gladstone withdrew his measure with the intention of bringing it again, with provisions yet more stringent than those contained in the lately slaughtered measure. That we are not greatly moved by these considerations is a measure which involves a substantial injury to a system which has stood long, and which is not so easy to change. We only hope that whenever the time comes the bankers will be prepared to renew their opposition with skill, spirit, and judgment as they showed in the Issue Bill was before the House in the session of 1844.

HISTORIC OUTLINES OF AMERICAN HISTORY

No. XVII.

GENERAL HARRISON delivered his inaugural address on the 4th of March, 1841, and died on the 4th of April, 1841. He had grown old in the military service, and had passed twenty years of his active life in war.

* *The Morning Herald*, June 1841.

1811 he had won the important battle of Tippecanoe against the Indians, and, in 1813, defeated the English General Proctor at the battle of the Thames, in Canada, where the famous Indian chief Tecumseh was slain. But Harrison was a man of antique ideas, and quite unfitted to rise to power by courting the smiles of the vulgar and capricious democracy. His brilliant and useful services were rewarded neither by honours nor wealth. When promoted of his rank as commander-in-chief in the western district, he received no higher grade than that of clerk of the Court of Common Pleas in Cincinnati, though he had been Governor of the territory of Indiana and a senator in the Congress of the United States. Gratitude to public men has not been an American virtue. Mr. Gallatin had been a legislator twenty years, a member of the Cabinet, and an official negotiator in foreign courts, but he was too disinterested to make any provision for himself, and at the end of his laborious public career would have died in poverty had not his personal friends secured for him the appointment of president of one of the New York banks. Such was the distress of President Jefferson that he was compelled to ask the sanction of the Virginian legislature to sell his estates by auction; and yet it was Jefferson who proposed the declaration of American independence. President Monroe, even still poorer, after having expended his fortune in the service of his country, had to implore the consideration of Congress, though the united efforts of Jefferson and Monroe had acquired Louisiana and the Floridas for the United States. When these examples of public ingratitude are known, it is not surprising that General Harrison, with a numerous family to provide for, was compelled to accept the position and salary of a clerk in a court of law.

The new President had been elected by those who had become infected of the destructive principles adopted by Jackson and Burr. In reference to banking, he made these remarks in his inaugural:—"I am not insensible to the great difficulty which exists in devising a proper plan for the safe keeping and management of the public revenues, and I know the importance which has been attached by men of great abilities and patriotism to the divorce, as it is called, of the Treasury from banking institutions. It is not the divorce that is complained of, but the unlawful union of the Treasury with the Executive which has created such extensive alarm." He then observed, "It was mainly a great error in the framers of the constitution, not to have made the officer at the head of the Treasury department wholly independent of the Executive. He should at most have

been removable only upon the demand of the legislature. I have determined secretary without communicating all the circumstances such a removal to both Houses of Congress direct censure on General Jackson for having Secretary Duane. On the character of the Harrison thus expressed himself:—

“The idea of making it exclusively metallic intended, appears to me fraught with more than any other scheme, having no relation of the citizens, that has ever been devised. It could produce the effect of arresting at once the conditions by which thousands of our most industrious citizens, by their industry and enterprise, have acquired possession of wealth, that is one. If there is no more calculated than another to produce that state of depreciation decried by all true republicans, by which the rich are adding to their hoards and the poor suffering from penury, it is an exclusive metallic currency, the process of which the character of the country and the nobleness of feeling may be destroyed by the necessary toleration of usury, it is an exclusive currency.”

These humane sentiments, honourable to the heart of General Harrison, rendered his personal calamity. What plans he might have devised is vain to conjecture, though we may be sure he would have emancipated industry from the enslaving system. The chief, nay, the sole care of Jackson has been to realise a metallic revenue, they determined on a mode of receipt for the Government, and to issue it at the mint price of the coin, utterly independent of a mode of payment was easy or oppressive. It would furnish the taxes; and experience had proved that such means frustrated the desired end. The future of the public treasury must always depend on the honesty of individual treasuries, for golden streets and beggars' wallets. President Jackson, in his report, had acknowledged that “the tax on goods is the price of the commodity to the consumer, and these duties are imposed on articles of necessity used by the great body of the people, the burden of imports is drawn from their pockets.” This is the correct rect. The producers certainly advance

ance to the Government, but under a just currency they would be enabled to recover the tax from the final consumer of the goods by adding it to the price. Now this addition was effected by the policy of Jackson and Van Buren, for a rise of prices can only take place in a monetary medium which permits the rise; in other words, the money must depreciate precisely to the extent that justice demands the appreciation of the goods. To superficial thinkers the word "depreciation" suggests dishonesty, fraud, or over-reaching, but in a fiscal sense depreciation is the sole conservator of equity where revenue is raised by indirect taxation. The natural value of a commodity is its cost of production simply, from which tax is entirely excluded. For the sake of illustration let that be one sovereign, or 5 dwts. of gold. Now, impose a tax of 10s. or 10 dwts. of gold—the price rises to 7½ dwts., but how is the producer to obtain 7½ dwts. of gold from the consumer in an open market for that which is only worth 5 dwts. of gold? It is entirely impossible, since every one will purchase in the cheapest market, and therefore the tax cannot be added to natural value. Dishonesty, therefore, is not in using a depreciating money when the revenue is raised by indirect taxation; the dishonesty is in using a money that will not depreciate. This distinction was not perceived by Jackson and Van Buren; but we must not be too severe on their error, since they shared it in common with the legislature of England, who uphold it to this day. It will further be observed that though the American President suppressed the national or federal bank, they called into existence another agency, only differing in name from that institution, for the Treasury notes, issued in lieu and in anticipation of revenue, were a close imitation of Bank of England notes issued on the deposit of large exchequer bills by government in the hands of the bank directors. In fact, both instruments were instruments of credit resting on the faith of their respective governments for their redemption at some postponed date.

The death of General Harrison raised Vice-President Tyler to the Presidency. He convened a special session on the 1st of March, 1841, and, in his message, made the following remarks on the banking controversy.

"Within a few years past," he said, "three different schemes have been before the country. The charter of the Bank of the United States expired by its own limitations in 1836; an effort was made to renew it, which received the sanction of the two Houses of Congress, but the then President of the United

States exercised his veto power, and the m
Mr. Tyler considered that General Jackson

ect, I have no accurate means of determining, but by appeal-
to their more immediate representatives. The late contest
h terminated in the election of General Harrison to the
idency, was decided on principles well known and openly
red; and while the Sub-Treasury received in the result the
decided condemnation, yet no other scheme of finance
ed to have been concurred in."

is extract from the message is a complete summary of
finance, and therefore is given unabridged. Mr. Tyler
duced his statement by submitting the entire question to
ress, expressing his readiness to concur in the adoption of
a system as Congress might propose, provided it did not
ict with the constitution. He, however, observed that
restriction should be put on the unlimited creation of banks,
h could only be done with the assent of the several States.
e may here sketch the state of parties on the accession of
Tyler to the Presidency.

e old Federal party, greatly weakened under the Presidencies
ferson and Madison, expired soon after the termination of the
with Great Britain in 1815. Even the very name of Federalist
out during the administration of Mr. Monroe. The sup-
ports of General Jackson assumed the title of Democrats; his
ponents, that of Republicans. In 1833 and 1834 these latter
joined by some seceders from the Democrats, when the
d party took the name of Whigs. In this manner, when
Van Buren was elected to the Presidential chair, the country
divided into Democrats and Whigs. The ranks of the latter
again recruited by some minor parties having local or
al views, such as the Anti-Masons of the middle and eastern
s; the States Rights men of the South, who disapproved
e proceedings against the United States Bank; and a
section, who had supported Jackson in Tennessee, Georgia,
ome other States, but were opposed to Van Buren. The
ocrats had become divided in 1835, particularly in the
ern and middle States. They who opposed all banks and
oneyed institutions, took the name of "Locofocos," and were
called the "Equal-Rights party." These sprang from what
een called the "Working Man's party," organized by
rt Dale Owen and Miss Frances Wright, who brought the
as from Great Britain. They had been the firmest friends
ckson, and were resolutely opposed to what they regarded
monopoly corporations. Thus the Democrats were split into
ns; for though they had unitedly opposed the renewal of

the charter of the United States Bank, so in favour of States and local banks, and agricultural; while the Equal-Rights party insisted on monopoly, and hard money. On these points Democrats separated themselves from Localists, and took title of Conservatives, and eventually joined the Whigs. It was the alliance of Whigs and Conservatives that carried Harrison and Tyler to the Presidential chairs. The quotations we have made from Tyler's inaugural address, prove him an opponent of metallic currency; and during his canvass he avowed himself a Whig and a Protectionist. In the address of a national bank he had addressed, before his inauguration, the following declaration of his sentiments, to a meeting in October, 1840:—

“My opinion of the power of Congress to create a United States Bank remains unchanged. The Constitution contains no express grant or power for such an institution; it never could be constitutional to exercise such a power; and in the event that the powers granted to Congress should be carried on without resort to such an institution, it would be unconstitutional.”

This letter, the sentiments expressed in his inaugural address, and the fact of his having been elected to the Presidency on the united Whig and Conservative ticket, led me to believe that Mr. Tyler would ratify a national bank sanctioned by both Houses of Congress, if it did not directly violate the spirit of the constitution. Accompanying the President was a report from Mr. Ewing, Secretary of the Treasury, earnestly recommending a national bank. It contained the following passage:—

“If such an institution can be so conceived and guarded in its details as to remove all serious questions of constitutional power, and thus avoid the objections which have been urged against those heretofore proposed, Congress, it will, in the opinion of the undersigned, attain the happiest results, and confer lasting and important benefits on the country.”

Mr. Ewing brought forward a Bill for the “Fiscal Bank of the United States,” and in the title he had selected. In the first place, the Bank was to be incorporated in the district of Columbia; and, secondly, to establish branches with the assent of

al was to be fixed at thirty millions of dollars, and it was privileged to discount and deal in the foreign exchanges. The project was submitted to a select committee of the Senate, approved both in principle and details, with the exception of the principle of branches. An amendment gave power to increase the capital from thirty to fifty millions of dollars should be deemed advisable. The Government subscription was to be ten millions. As to branches the Senate made it obligatory on any corporation to establish an office of discount in any State where two thousand shares should have been subscribed," and the legislature of the State demand it; further, "the directors were authorised to establish such offices in any State or Territory where they should think it expedient, without the assent of the local legislature;" or, instead of establishing such offices, they might employ a bank or an agent, to be approved of by the Secretary of the Treasury, at any place, to transact the business of the bank, for any purpose except that of discount. It was soon made known that the President thought that the Constitution gave power to create a bank, but none to create a branch. As this distinction might have endangered the whole project, Congress agreed to the following compromise. The directors were to have power to establish a branch with the assent of the State in which the branch was located, and once established it was not to be withdrawn without the assent of Congress; provided, first, that the power to establish a branch should be unrestrained in respect to any State which had not, at the first session of its legislature after the passage of the Charter, express its disapproval, in default of which assent was to be assumed. And, secondly, whenever Congress might deem it proper and necessary to the executive powers granted by the Constitution to establish a branch in any State, then Congress might require the directors to found one. This compromise to remove the scruples of the President, was incorporated in the Bill which was passed by Congress on the 6th August, 1841. The vote of the Senate was 26 to 23, and of the House of Representatives 128 to 97. The Bill was then sent to Mr. Tyler for his signature, and, contrary to general expectations, he hesitated to sign it. A Whig deputation waited on him, when he said, "Why did you not send me Ewing's Bill?" One of the deputations asked, "Would you sign that Bill?" He answered, "I could." However, he afterwards changed his mind, and vetoed the Bill on the 16th August, 1841. Thus terminated the Senate Bill. Mr. Tyler had said to one of the delegates of a deputation from Ohio, "If you will examine the message I have sent to-

day, you will find shadowed forth a much better that has been long endeared to me." The President maintained that the principle of a national bank was sound. Two members of Congress were deputed by the President to obtain from the President what kind of Bank he desired. In reply he expressed himself in favour of an agent divested of discounting power, and of bills of exchange other than those drawn by a citizen upon another citizen of the same State. A bill was introduced in conformity with those suggestions. It was reported by the celebrated Mr. Webster, then Secretary of the Treasury to the President; it was approved and transmitted to the House of Representatives, reported there, and passed. This happened on the 23rd of August. On the 27th of September it passed the Senate by 27 to 22. The bill was altered from the original report. The name of the bill was omitted in deference to the wishes of the President. The bill was entitled, "An Act to provide for the better management, keeping, and disbursement of the public revenue, by a corporation to be called the Fiscal Corporation of the United States." In the mean time the Sub-Treasury Bill, with the signature of the President having been attached, was an instrument on the 17th August, 1841. But the Fiscal Corporation Bill, introduced under such favourable circumstances, experienced the same fate as the Bank Bill, being vetoed on the 11th of September, 1841.

These extraordinary proceedings led to the dissolution of the Cabinet, all the members, excepting Mr. Van Buren, resigning on the 11th of September. On the 9th of September, 1841, on which the veto message on the Fiscal Corporation Bill was vetoed, Mr. Tallmadge, one of the senators from New York, and a confidential friend of Mr. Van Buren, wrote to him a strong remonstrance, warning him of the consequences of his second veto, and declaring that it would alienate the feelings of all who had raised the question. "It is the part of a great man," said Mr. Tallmadge, "to remove the obstacles which obstruct the way of smart measures." This reminded the President that General Washington, on the first bank Bill fully prepared, though he was inflexible. They who had opposed his election, and of his conduct; and Mr. Van Buren affirmed that he should complete the work so wisely begun, and that the Bill for the creation of a fiscal corporation,

he thanks of the country." There can be no doubt that General Harrison and Mr. Tyler were both elected by the union of the Whigs and Conservatives, who desired a national bank, and that Mr. Tyler had expressed himself favourable to such an institution. Why, then, did he disappoint the hopes of his supporters? Two motives were assigned. In the first, he entertained conscientious scruples as to the proper interpretation of his oath of office, which he finally thought, after mature reflection, forbade the existence of a national bank; and, secondly, he feared to forfeit the consistency of his character; as he had voted against the constitutionality of a bank when a member of Congress, he was reluctant to change his policy as President. It is said that he had modified his earlier opinions when he became a member of the Senate. He recognized the utility of the institution as the regulator of the exchanges, and while he was still sensible to banking abuses, he thought they might be guarded against. His mind was, however, in a state of transition. It was asserted by his enemies that he eagerly desired to occupy the Presidential chair for a second term of office, and that, despairing of success without the votes of the Democrats, he hoped to conciliate them by supporting the two bank Bills. If that were the real motive of his extraordinary conduct, it failed to secure the object of his ambition. He retired unregretted by either of the two great political parties, having lost the confidence of the Whigs and Conservatives, and failed to conciliate their opponents.

Here this series of articles finds its appropriate termination; though all history is a continuation from its commencement as close, still it may be, and is, divided into epochs, each of which is complete in itself. In the period passed under review, a line of illustrious Presidents held sway, who disappeared with General Harrison, and every man of real talent declined to accept of office. No longer content with their own enormous territories, the South cast a covetous eye on Mexico, for the express avowed purpose of extending slavery, their own lands being crowded with a growing negro population. This was the political wedge which in due time split the federation in twain. The history of that revolution is not yet to be written, for it is clouded with prejudice and hireling statement. We pause, therefore, where we can stand on firm ground, and close our *Historic Outlines*," in 1845, with the administration of Mr. Tyler.

BANKING AND FINANCIAL AN

No. VIII.

ROTHSCHILD AND HIS FAVOURITE PILLAR

A FAMILIAR figure to the memory of many, Nathan Meyer Rothschild leaning against one pillar of the Exchange. Every Tuesday and Friday, at least, to be seen there, and to have seen Rothschild leaning against that pillar, would have been a great sight. As in the case of Paterfamilias in the particular corner, or of the leading oracle in the particular room, that pillar became to be regarded as a pillar of the Exchange. A financier on one occasion learned that it was not so, and, with more bravado than sense, and with more wit, one Tuesday afternoon planted himself against the pillar on the arrival of the great Jewish banker. It was Mr. Rose (for that was his name as the story books tell of the arrival of Mr. Rothschild: but Mr. Rose was not a banker). He maintained his right to occupy that spot as long as he pleased. This was the Royal Exchange, he declared, free to all; but he had a greater right than he. In vain Rothschild grumbled, and bystanders protested. Mr. Rose was a powerful man, and with his back firmly against the pillar, he, from this position, defied the onslaughts of his assailants. Having sustained his post, or rather his pillar, for half-an-hour, he had sufficiently gratified his feeling of bull-dog tenacity, and he at last vacated his position amid the ho-

A CURIOUS INTRODUCTION TO B

Mr. Lawson, the author of the "History of the Bank of England," his financial career in an extraordinary way. One day, having just left the Bluecoat School, in the street where the bankers most do congregate, and his attention attracted by a group where a number of young men were continually coming in and out. To his query, what was the business of the place, the reply was, "It is a banking house." Revolving

er really was, he searched his dictionary, and there found that a
er was a money-changer. "This was precisely that sort of
ness," says Mr. Lawson, "with which I felt myself familiar ; for
d for the preceding seven years been in the constant habit of
ng with money-changers, albeit I never knew that they were
d bankers." In the Bluecoat School no money was allowed to
ent but "hospital money," so that when a boy received any
y from his friends he was anxious to get it exchanged for the
ent coin within the bounds of this ancient educational establish-
t. "The town money-changer," he says, "was familiar to me
my infancy, and in my cloistered simplicity I thought that the
e in Lombard Street was an establishment on the same principle.
rdingly, on the following day, I went again to Lombard Street,
l opposite the house, and saw the same description of young
among them several about my own age. Impelled by some un-
n and undefined influence, I crossed the street, and entered the
e. I saw young men standing behind long counters weighing
and silver in scales. I stood there for some time watching the
s, and inwardly admiring the magnificence of the money-
gers ; at last I said to one of them, 'Pray, Sir, do you want a
' I added, 'Nobody told me so, but having recently left
l, I am desirous of getting some employment. I am living
my mother, who cannot afford to keep me at home idle,
what to do I know not." Whether the teller was struck with
novelty of the application, or the reason I adduced for making
never could discover ; suffice it to say that, after waiting
t ten minutes, I was requested to walk into the partner's
e. On my entering this sanctum sanctorum, I perceived three
ns sitting at a table. One was a very venerable and a very
ble-looking old gentleman, the head of the firm ; the others
younger. One of the latter, the junior partner, addressed
putting the question the teller had done ; and, nothing daunted,
ve the same answer, adding, 'I do not like to be beholden
y friends for any support, if I can anyhow get my own
g.' 'A very praiseworthy determination,' he said ; 'and how
re you, my boy, and how long have you been from school ?'
ng satisfied him upon these points, he continued his queries,
g what sort of a hand I wrote. 'A very good one,' I replied ;
east so my master used to say ;' and, at the same time, pulling
y school copy-book, which I had been thoughtful enough to
n my pocket, I displayed it before him. 'Ay,' he said, 'that is

very good writing ; but can you get any one to write as I said at once, and without the least hesitation, my having the remotest idea what the term signified in the sense in which he used it. Inquiries were made the following Wednesday I received a visit from the banking-house whom I had accosted on Monday, and who said he was very happy to be the bearer of the news that I had been appointed a clerk in the establishment.

ORIGIN OF THE WORDS BANKER AND BANK

In the middle ages, or, at all events, during an indefinite period, the merchants and money-lenders used to sit on a *banco*, or bench, the money that they had lent, and thus the word came to signify a repository of money. When one of these money-lending merchants was broken in his business, his bench, or counter, was broken, and he was spoken of as a *bancorotto*, or bankrupt.

LIBERALITY OF MR. COUTTS TO A SERVANT

One of the clerks at Coutts's bank had on one day, on his collecting day, the money which he had to bring in, amounting to £17,000. At the usual hour for returning, he did not appear, missing. The noting hour passed ; messengers were sent to the settling houses, and to his lodgings, but he was not obtained ; advertisements were sent to all the newspapers in the morning the town was placarded with a full description of the property, and a large reward offered for its recovery. Nothing was heard during the next day ; but on the following morning, one of the partners in the Southampton branch, in haste, bringing with him the note-case and bag containing the missing property. He said that the first coach, in which the coaches arrived had the previous afternoon, and begged him to accompany him to his house, where he arrived early in the morning, had gone to bed, and was, as he thought, now dying, and wished to see the

relative to a large sum of money then in his possession. On his arrival, the person told him his name, said that he was clerk in Mr. L.'s house; that he had been out collecting, and on his return through Piccadilly he was seized with a stupor (a malady he for the few months had been subject to, owing, as he supposed, to a fall). He begged that, for God's sake, an express might be immediately sent to inform the house of the circumstance; and he added that he could give no other account how he came where he was (which he did not know till the landlord informed him) than that at the moment he found the stupor coming on he got into what he thought a hackney coach, that this turned out to be the Southampton coach, and that he remained insensible during the whole journey. The firm immediately caused all the placards to be covered over with a statement that the whole of the property had been recovered, and that the supposed loss was only occasioned by sudden illness. There were some who thought Mr. L. really had tried to abscond, and he was dismissed, the reason assigned being, that a person subject to such a malady was not fit to transact the duties of a banker's clerk. Mr. Coutts, on parting with the clerk, made him a very handsome present—a sum, in fact, sufficient to purchase an annuity for the remainder of his life.

AN OLD £1 NOTE.

It is a rare thing to meet with a £1 note in England at the present time. In April, 1865, much to the surprise of Messrs. Simonds, Messrs. of Reading, two of their £1 notes, issued in 1810, and signed by Mr. H. Simonds, who was then a junior partner in the firm, were presented to them for payment, and honoured. Had the value of the notes been placed at interest for the 55 years which elapsed between their issue and the time they were issued, the amount would have increased, at 5 per cent compound interest, to about £30.

MR. COUTTS AND MISS MELLON.

Mr. Thomas Coutts, some years before the death of his first wife, Mary Starkey, a domestic servant, but an amiable and subsequently an accomplished woman, became acquainted with Miss Mellon. Mr. Coutts was so much struck by Miss Mellon's personal appearance and her performance in one of her favourite popular characters, that he sent

a message requesting the honour of being a visitor. At her next benefit he enclosed five n of tickets, which the lady duly enshrined in a polite note that accompanied them as a mark of the richest banker in the metropolis, little dreaming that immense wealth would in a few years be entirely his.

The attentions of Mr. Coutts to Miss Mellon, in the disparity of their years, did not fail to give rise to a calumnious insinuation. To relieve her from the necessity of her appearance on the stage and her attendant expenses, Mr. Coutts recommended her to retire altogether. In order to reimburse her for the situation from which he had been instrumental in relieving her, Mr. Coutts conferred upon Miss Mellon, in the best possible manner, a very ample independency. He purchased a villa, at the foot of Highgate-hill, called Holly House, at that time to Sir Henry Vane Tempest, for which he presented to Miss Mellon, and here she took up her abode. She subsequently gave her a carriage and horses—to quell those censorious whispers in the beau monde which her friendly intimacy had given rise to.

Shortly after the death of his wife, Mr. Coutts died. Miss Mellon—an event which created considerable surprise, in the fashionable world at the time—shows the estimation in which the lady was held. A gentleman was inspecting a volume of theatricals, and of Mr. Colnaghi, the famous printseller, who with his pencil struck his attention. Opposite to each picture was a graphical notice, and the writing alluded to the notice of Miss Mellon. Her retirement from the stage is recorded, a note in the handwriting of Mr. Coutts, in the following effect : “ When she married Thomas Coutts, of the Strand, which proved the greatest blessing he ever made him the happiest of men.—T. C.”

Legal Miscellany.

BANK OF AUSTRIA—THE BARON DE THIERRY AND ANOTHER V. LORD FERMOY AND ANOTHER.

case was argued in the Court of Queen's Bench in banco, on the June.

was an action by the Baron and Mr. J. O. Lever, M.P., against Lord Fermoy and another gentleman, on an agreement by them to pay £20,000, the transfer to them by the former of a concession for the establishment of a joint-stock bank at Vienna. The Baron and Mr. Lever, the original concessionaires, had, in December, 1862, obtained a preliminary concession, which expressly stated that the concessionaires must obtain a definitive concession, "on submitting proof of the necessary means, and a draft of the statutes (or bye-laws) framed according to the Austrian law." And they had accordingly submitted to the Austrian Government a draft of such statutes. That being so, on the 22nd of April, 1863, they entered into an agreement with Lord Fermoy and his friend to transfer to them all their rights under the preliminary concession and the definitive concession as soon as obtained, and there was then the clause: "A copy of the statutes submitted by the concessionaires to the Imperial Government for approval, to be given forthwith to the assignees (Lord Fermoy and his friend), who, so far as the concessionaires are concerned, hereby agree to accept them as they stand;" and it was further stated that the definitive concession, when obtained, should be assigned to them free from all conditions other than in the agreement, except to the plaintiff, thirty days after allotment of shares in the bank, £20,000, and expenses, which, however, by the subsidiary agreement, was reduced to £20,000, half in cash and half in shares of the intended bank. On the 2nd of September, the definitive concession was issued to the plaintiff with a copy of the statutes annexed, as approved by the Government, which was sent to the defendants at once. In this copy of the statutes the most important alterations had been made,—one was by the insertion of a single line in the clause providing that the directors might pay out of the funds of the company, all the charges, claims, and expenses incurred in the formation of the company, or obtaining of capital. To this the Austrian Government added these words:—"The approval of the acts (or arrangements, as the word in the original signifies) is reserved to the first general meeting;" and they further added a clause that the chairman and majority of directors were to be domiciled in Austria, and also the board was to be established and located, and the first six directors to be approved by the Austrian Government. These alterations were not observed, and the prospectus was issued by the defendants, stating that the company had been established by a concession on the basis of statutes sanctioned by the Government, and upon the 2nd of October, 1863, the allotment of shares took place. At the end of the month, when the period of 30 days from the time of allotment was about to elapse, the Austrian directors observed the alteration as to the allowance of preliminary expenses, and objected to it. Ultimately, on the request of the Austrian Government to waive it, they withdrew from the company. The Baron and Mr. Lever, after the 2nd of November, when 30 days from allotment elapsed, called upon Lord Fermoy and his

Mr. Bovill, Q.C., Mr. Mellish, Q.C., and the plaintiffs, the original concessionaires, that they were bound in the agreement, and that the defendants were not bound when obtained, no matter how the success of the argument on the main question was supported by Mr. Bovill and Mr. Mellish, and it was now to be decided. It came, in substance, to this—that their clients were more bound than the defendants to obtain the concession, or to obtain it on the basis of the statutes as they stood. If of Lord Fermoy was to pay the money when the concession was obtained and they were bound to take it on the basis of the statutes, the Government might choose to impose.

Digitized by Google

it was to be and was actually granted. He urged that the "allotment of the shares in the bank" meant the allotment of shares in the bank itself, which could not be deemed to be established until the statutes approved were accepted; but upon this point the Court were strongly of a contrary opinion, and so intimated. He then fell back upon the main argument, that the consideration and condition on which the money was paid was not merely the allotment of shares, but the grant of a concession on the basis of the statutes as they stood. The effect of the alterations introduced by the Government was entirely to alter the condition of the company. There was to be a majority of Austrian directors, the chairman was to be domiciled in Austria, and the board was to be elected there, and the first six directors to be approved by the Imperial Government. The company in reality was to be made entirely Austrian and brought completely under the control of the Government, and the objections on the part of the English shareholders might naturally object to this, and say that it was not the concession they contracted for. They contracted for an Anglo-Austrian concession; they got an Austrian one. They contracted for an authority in the directors to repay themselves preliminary expenses; they got it subject to the condition of an assent by the majority of the first meeting of shareholders. The result might be that they would have to pay the whole out of their own pockets. These alterations were introduced by the arbitrary intervention of sovereign power without the will of either party to the contract. Surely they materially altered, and, indeed, did away with the subject of it. Surely the concession contracted for would no longer be in substance and reality the same; and then the plaintiffs never obtained and never were able to transfer the concession which was contracted for. And even supposing that the defendants were liable, for what damages were they liable? Not for the whole amount, for half was to be paid in shares of the bank, which was never issued, so that such shares were never issued. Ten thousand pounds to be paid in such shares, therefore, came to nothing. The defendants never contracted that the bank should be established. It never was established. If, then, had the plaintiffs lost? The shares surely were nominal and the amount of damages ought only to be £10,000, not £20,000. Mr. Kingdon contended that as the whole was due on the 2nd of November, and the bank did not fail until a fortnight later, the shares could have been resold next day for the full value, and so the plaintiffs were entitled to the whole amount.

The Lord Chief Justice, in the course of the argument, said the question was whether upon the construction of the agreement it meant that the defendants, Lord Fermoy and his friend, contracted for the mere inchoate shares of the plaintiffs, the concessionaires, as they then stood, and taking no chance as to the approval of the statutes in their form as they stood at the time of the agreement, or whether they contracted for a concession on the basis of the statutes as they stood, and so on condition of their approval in that form. That the shares had been allotted within the sense of the agreement, although the bank had not been finally established (the concession not having been accepted and carried out) was clear. It was the agreement used the words "shares in the bank" (or rather "the intended bank"), but it was manifest that the parties meant the shares in the company; and it would be monstrous to construe the agreement in any other sense. As to the alterations in the statutes, their precise effect was not, in some respects, but they were to be distinguished from the concession. It might or might not be that the concession was

to be on the basis of the statutes as they stood. The concession was one thing, the statutes were another. A definite concession—had been obtained. Was it on the basis of the statutes as they stood? That might be a question. Even assuming that if the statutes had been so altered, the object of the concession—the establishment of a company—carried out, the parties would have been discharged. The object of the alterations was not to interfere with the concession, however it might in some degree materially affect the defendants, the assignees? And, again, although they had objected ultimately to one of the alterations, they had not objected until the time for payment had arrived. They had accepted. They had issued prospectuses stating that they had been obtained on statutes sanctioned by the Government. They had allotted the shares a month after receiving the statutes. They had allowed the thirty days after allotment to elapse before they objected to the statutes. Might not all this be evidence that they had accepted the statutes as altered, and thus leave the contract on the basis of the new contract implied from the acceptance of the statutes? Or was it to pay on the basis of the original one? Or was it by mutual assent. Surely there had been an alteration of the statutes. The Baron and Mr. Lever were still bound by the alteration of the statutes, the defendants having accepted the altered. If not, how could the defendants throw

Mr. Justice Crompton likewise observed in the case that the utmost the defendants could contend was that the concession was voidable by them on account of the non-approval of the Government. It was going a great way to concede even that, for the general principle was that a matter could not be deemed a condition precedent to the making of the contract, unless it went to the whole of the contract, so as to raise a defence of total failure of the contract. If that doctrine it must appear that the alteration of the statutes, and the concession wholly valueless. It could not, in that view, that the contract was necessarily nullified. The contract was not nullified as regarded both parties. The Baron and Mr. Lever could not throw it up, and the same was true for Lord Fermoy and his friend was that they were bound in a reasonable time. But they had not done so. They had not, although they had accepted the statutes as altered. They had nothing to show that they rejected them until the time had elapsed or was just about to elapse. A party is bound to reject a contract, supposing it is not to his advantage, in a reasonable time; but here the defendants not only did not reject it in a reasonable time, but actually accepted, or went on with it.

Mr. Justice Shee made several observations to the same effect. The Lord Chief Justice towards the close of the case said that the strongest way of putting the defence was that, on the basis of the statutes the preliminary expenses, including this share of the funds of the company, the Government had been bound to make. That was the strong point of the defence—whether the alteration was such as substantially to change the nature of the constitution of the company and the position of the

must be borne in mind that the agreement was not to the company, nor was it conditional on the money of those funds, but was the personal engagement of the defendants.

Having concluded, Justice said the case was one of very considerable importance and would take time to consider their final judgment.

POST-DATED CHEQUES.—AUSTIN V. BUNYARD.

Presented by the Court of Queen's Bench in banco, on the 26th instant being the Lord Chief Justice and Justices Crompton, and the Justices of the Common Pleas.

On a post-dated cheque for £200. It was made and dated of June, but was dated a month later—the 22nd of July. It was not payable until a month after date, as it was not drawn, and in point of fact it was not taken by the holder (for full value) until after the month had expired. It bore a penny stamp; the stamp fixed by a late Act of Parliament for the amount payable a month after date would have required a higher stamp, and at the trial before the Lord Chief Justice it was taken that by a very early statute, 31st of Henry VIII. imposing duties on bills—it was enacted that any stamp should be invalid and unavailable, and all subsequent Acts imposing the one imposing a penny stamp duty on cheques, and penalties, forfeitures, &c., in previous Acts, and that any such stamp was invalid. Several judges had already allowed the objection. Mr. Justice Hill, lately a judge of this Court; and the Lord Chief Justice, in deference to these authorities, also allowed the objection. The point however, for the final opinion of this Court. The Justices of the Common Pleas, however, in a case of "*Whistler v. Foster*," had allowed the objection, and declared the objection untenable. The Lord Chief Justice of these opposite views was to be upheld and adhered to.

Mr. Laxton argued for the defendant.

He argued for the plaintiff, and admitted that before the Act imposing a stamp duty on cheques, the objection was valid, it was not in a case of "*Field v. Wood*" (7, Adolphus and Ellis's Reports), but was in Lord Denman's time. In the result, the Court was divided in favour of the plaintiff, apparently, by a majority of the Common Pleas.

Justice said, in giving judgment, that it was not necessary to say whether the Legislature intended to make the instrument void. He rather thought that it was so intended, and was satisfied with the reasons given in the case referred to; and that the Court until reversed in error, and, therefore, the judgment entered for the plaintiff.

The Judges concurred.—Judgment for the plaintiff.

The case is now to be taken to be settled, until, at all events, it is carried

**INJURY TO CREDIT BY NON-PAYMENT OF A CHEQUE
ALLIANCE BANK.**

This case was tried before Mr. Justice Mellor, in Bench, on the 6th June.

It was an action to recover damages in consequence of credit having been injured through the non-payment of a cheque. The defendants pleaded that they had no assets applicable to the cheque when it was presented for payment.

Mr. Serjeant Parry and Mr. Harry Palmer were plaintiffs; Mr. Hawkins, Q.C., and Mr. Hannen were defendants.

The plaintiff was a general provision merchant, of Whitechapel. He had had an account at the defendants' bank for two years. On Saturday, the 4th March, he drew a cheque for £25 in favour of Messrs. Hayman, and on the Monday it had been returned unpaid. On the Saturday afternoon for £25 before half-past ten o'clock, and it was cashed as cash, £25. On Monday he gave his father about £25 to pay into the bank for him. This was the first time he dealt with Messrs. Hayman, and in consequence of the non-payment of the cheque, they had not had any further dealings with him. His father's cheque was lent to him about ten o'clock on Monday evening, and he paid it into the bank himself. The cheque was not cashed on Wednesday, but it was not to be presented before the bank on Thursday morning. The cheque was paid about a quarter past one o'clock on Thursday morning.

Mr. Hayman was called. He stated that the cheque was not cashed, and he had endorsed, "Effects not cleared." He presented the cheque to the bank at eleven o'clock on Monday morning, when he was told it was not cashed. He called again about one o'clock, and again in the middle of the day. He called again about one o'clock, when it was paid. He called a third time about one o'clock, when it was paid. He was waiting the return of the collecting clerk.

Mr. Justice Mellor said it was evidently a mistake on the part of the bank, and it was a case that might very well be arranged.

Mr. Hawkins said unfortunately, by some mistake on the part of the bank, the £55 did not find its way into the bank books.

Ultimately a juror was withdrawn, the defence was allowed to withdraw, and the defendant was ordered to indemnify the plaintiff from all taxed costs.

**ALLEGED FRAUDULENT REPRESENTATION WITH REGARD TO
THE CREDIT OF A FIRM—WATTS AND OTHERS V.**

This case was tried in the Court of Queen's Bench, before Mr. Justice, on the 16th May.

Mr. M. Chambers, Q.C., and Mr. Wills appeared for the plaintiffs; Mr. Coleridge, Q.C., Mr. Hance, and Mr. B. T. Williams appeared for the defendant.

The plaintiffs (Sir Samuel Watts and Co.) are warehousemen, and they sued Mr. John Lewis, a partner in the Hampshire Bank, at Haverfordwest, under these circumstances. The young men, Isaac Lewis and Neville Harris, had been employed by a Mr. Warren Carter for some time as assistants.

and woollen draper. On the 12th of September, 1863, an agreement made between Carter and Messrs. Harris and Lewis that they should upon themselves the indebtedness of Mr. Carter, and become the purchasers of the stock, fixtures, furniture, and goodwill at a valuation. It likewise agreed that Messrs. Harris and Lewis should accept two bills for £26. 13s. 4d. each, to the total amount of £1,280, and a lease of the premises; that Mr. Carter should undertake not to go on business within a certain distance; and that, in the event of the stock not being worth £500 more than Mr. Carter's debts, he should bring stock goods to the value of the deficiency. As matters turned out, there was only about £370 of stock over and above the amount of Mr. Carter's debts, and Mr. Carter drew bills to the amount, which were subsequently met and returned to Messrs. Harris and Lewis by the defendant as manager of the bank. Early in October Messrs. Harris and Lewis went to London to purchase goods, and they gave references to Mr. John Lewis, the defendant. On the 6th of October the plaintiffs wrote to Messrs. Walters, of the Pembrokeshire Bank, in these terms: "We are referred to you by Messrs. Harris, and Co., Haverfordwest, and shall feel obliged by the best information in your power as to their means and respectability in business." The defendant, who had been their manager for twenty-two years, wrote in reply: "We have made particular inquiries respecting this firm, and are informed that their capital is £500. Mr. Carter has left £500 in the business in addition, on a bond, payable by instalments of £100 per year after the expiration of eight years, free of interest. They seem very respectable and good men of business." Upon the receipt of this reply Messrs. Watts forwarded goods to the value of about £100, and, as Harris and Lewis subsequently failed, they sought to recover the amount from Mr. Carter. Lewis, the bank manager, upon the ground that in this letter he had been deceived and fraudulently represented that Messrs. Harris and Lewis were worth £500, and that Mr. Carter, to whom they succeeded, had left £500 in the business. In March, 1864, Messrs. Harris and Lewis made a composition with their creditors, and in the following month Mr. Carter was declared bankrupt.

The case for the plaintiffs was that Mr. Carter, who had been in partnership with a Mr. Davis, was owing the bank more than £3,400 in September, 1863, and that by the time Messrs. Harris and Lewis stopped payment the debt had been reduced to £2,500; that the bank kept the new firm in the business for the purpose of obtaining that advantage; and that it was with reference to the manager had written the letter of the 10th of October, well knowing then that the representations were substantially untrue. The case for the defendant was, that he acted in good faith and that he believed the statement in question upon information which he honestly believed to be true and correct. He wished to suppress no material fact. He was to receive one-third of the profits for eight years, but that was in return for his services, as manager of the business. As a proof that he had no fraudulent intention in concealing it, he referred to the fact that the letter to Messrs. Hitchcocks contained it, and alleged that it was omitted from the letter to the plaintiffs by pure accident. At the date of the letter, he supposed Carter to be solvent. His liabilities to the bank were secured not only by himself, but also by the firm of Carter and Davis, who was supposed to be solvent, and by other substantial parties, and that when afterwards Davies (Carter's partner) put in a claim against Carter for £1,000, at that time it appeared, from an account rendered by Davies himself, that Davies owed Carter nearly £1,000. The defendant

relied upon the fact that Lewis and Harris assured him, when he made special inquiries from answering plaintiffs' letter, that the partners brought Carter left £500 represented by stock, on the true value of those statements, and he believes now that and as proof of his belief in the statements made having the capital which they represented to him permitted them to overdraw their account at the bank £125. He said that Lewis had married a woman and that Harris had saved in business, and that £500 were made up. He said the question of the sequent. The date of the letter was October 10th never came to his knowledge before December 10th. The matter of fact they were not in existence before and could not therefore have operated upon when he wrote the letter in question. They were in the following circumstances. Carter was short of money for the one-third of the profits for eight years, capitalised that he might raise some money upon them. The sum was taken as being equivalent to £160 per annum for eight, made £1,280, the sum for which the bills were to run over the eight years. Carter brought in two batches, one in December, and one in January. He was allowed to draw small sums upon them. When on October 10th, the defendant knew nothing of any of the kind. And to show his good faith he opened that day with the young firm, on which the bills were plaintiffs in this case have lost by their failure.

After the examination of several witnesses on behalf of Mr. Coleridge summed up the case for the defendant. Mr. Chambers replied.

The Lord Chief Justice in summing up, said : On the question of proceeding to consider the evidence with reference to you have to pronounce, I need not tell you that it is for you to decide. You should rightly apprehend the nature of the evidence which will have to give your verdict. It does not follow that the effect of the letter written by the defendant is to bind the plaintiffs to part with their goods, whereby they did not get their money, unless other things are proved. The plaintiffs are entitled to the verdict. This is not a case of fraud between them and this defendant. It is not a case of warranty. It takes in the representation that he has made, that it is true, and that he will abide by the result of it. When you state what he knows of another man's solvency, and a party making the inquiry, he, in giving an answer to you, enters into no contract. All he is bound to do is to believe, and if he takes upon himself to make an answer to a party, all that he is called upon is to make what he believes to be true. His presentation. If he does so, however wrong he may be in the correctness of his statement, and however serious the loss on the parties making the inquiry, and receiving the answer, he is bound to do is to take upon himself the office of giving the state of the party faithfully, according to his belief. The question you have to consider here, is whether

by the defendant, Mr. Lewis, were honest, according to his belief, or whether they were fraudulent misrepresentations in this sense, that they were false as regards his knowledge and belief of the subject, and intended to deceive the plaintiffs, because upon that, if the spirit of the representation that was made, and the effect of it, was to deceive them by that, the plaintiffs are entitled to recover. His Lordship then went through the evidence at length, commenting upon it as he proceeded, and said in conclusion, the question is, whether there be fraud first by suppression, then by omission to state facts, and, secondly, was there an intention to deceive. These facts are made out, the plaintiff is entitled to your verdict; if not, the defendant is entitled to your verdict. In order that you may have all the various parts of the case presented to your mind, I have put it on in this form. First, was there any misrepresentation as to the capital of Lewis and Harris being £500, or, secondly, as to Carter having left in the business? If so, did the defendant believe such representation or either of them, to be untrue? And, if so, did the defendant make representations with intent to induce the plaintiffs to trust Lewis and Harris? And were the plaintiffs induced to trust Lewis and Harris by misrepresentations? Was the fact of Lewis and Harris being under a liability to pay Carter £26. 13s. 4d. every two months for eight years a material circumstance which should have been communicated to the plaintiffs as a representation as to Lewis and Harris's means and respectability? If so, was the omission intentional or accidental? If intentional, was the motive of the defendant in omitting it to induce the plaintiffs, from their ignorance of it, to trust Lewis and Harris? And, finally to the fifth question, I ask you to consider whether it may reasonably be presumed that if the plaintiffs had known of the liability in question, they would have declined to trust Lewis and Harris. I have nothing on paper. [Paper handed to the jury.]

Chambers—I am obliged to your lordship for taking that trouble. The jury retired, and after an absence of about half an hour returned [verdict.]

Associate—Gentlemen, have you agreed.

Foreman—Yes, we have. [Handing in the paper.]

Lord Chief Justice—You have answered the questions as to the two points of misrepresentation, both of them in the affirmative. Also that the defendant believed them to be untrue. That the intention was to induce the plaintiffs to trust Lewis and Harris, and that they were induced to trust. And then the fact of Lewis and Harris being under a liability to pay Carter the £26. 13s. 4d. every two months, was a material circumstance to be known. That the omission was intentional; that it was to induce the plaintiffs to trust Lewis and Harris. Therefore, that is a verdict in favour of the issues for the plaintiff.

Chambers—The verdict will be for £122.

Lord Chief Justice—Of course, I stay execution on all points.

Hance—Perhaps it is not very material, but I thought the sum was to be £100. They were entitled to their dividend.

Chambers—Mr. Hance and I can arrange all that.

Hance—It was arranged to be £100, if the dividend had not been received.

Lord Chief Justice—I think that was so.

Chambers—If the dividend has not been received, we will reduce the sum to £100.

Mr. Hance—With a stay of execution
The Lord Chief Justice—Certainly.

On the 20th of May, in banco, before the Lord Justices Crompton, Blackburn, and Shee.

Mr. B. T. Williams, in the absence of Mr. Coleridge, called upon the plaintiffs in the above case to show why a rule should not be granted, on the ground that the weight of evidence. The learned counsel then made several points in the case, when he was stopped by the court.

The Lord Chief Justice said, "I think, Mr. Williams, that you have made a very good case. I was very much startled at the verdict, but I have been much better pleased if it had been the other way. Rule nisi was granted for a new trial."

With reference to this case the following letter was published in the proprietors of the bank to a local journal:—

PEMBROKESHIRE BANK.

Haverfordwest.

(To the Editor.)

SIR,—We feel it due to ourselves and to Mr. Lewis, our manager, to remove any erroneous impressions from the minds of our friends and clients, and also of your readers in general. The "Watts v. Lewis" was a personal one, against Mr. Lewis, directed against the bank, and Mr. Lewis's name appears in the circumstance that, in the absence of our Mr. Watts, we referred to Messrs. Watts & Co., in October, 1863, previous to the trial. We feel assured that all readers of the journal will agree that right and justice are on our side, although we are not sure that we can say that, following the strict decision of the Lord Chief Justice, we have appealed to the public. Our desire in this matter is to place the full facts before the public, in justice to ourselves and our manager. His ability entitles him to our highest respect and our confidence. Our knowledge of him during the last few years. The facts brought out in this action will be a sufficient vindication of him, and we are certain the public, no less than we, will admire his conduct throughout, both in this and other cases.

We are, Sir,
Yours faithfully,

IN THE MATTER OF THE COMPANIES ACT 1862
HINDUSTAN, CHINA AND JAPAN (LIMITED), EX-
LOS.

This case came before the Master of the Rolls on the 23rd June.

Mr. Baggally and Mr. A. G. Marten moved for an order under the Companies Act, 1862, sec. 35, that the register of the bank might be rectified by omitting therefrom the name of a member of the company, holding 102 shares, and

tober, 1864. The case rested principally upon the construction of 161st section of the Act. It appeared that on the 22nd of April, 1864, a stock banking company was registered by the name of the Imperial Bank of China, India, and Japan, Limited, and that Mr. Los became registered holder of 102 shares of £50 each, and paid £5 per share, amounting to £510. In the summer of the year 1864 negotiations were entered into between the board of directors of the Imperial Bank of China, India, and Japan and the board of directors of the Bank of Hindustan, for an amalgamation of the Imperial Bank with the Bank of Hindustan. The Bank of Hindustan was registered in 1862, and its capital was divided into shares of £100 each. On the 28th of July, 1864, the manager of the Imperial Bank forwarded to their shareholders a circular stating that the negotiations for an amalgamation had been brought to a successful issue, and that as early as practicable, in accordance with the articles of association, an extraordinary general meeting of the shareholders of both companies would be convened to confirm the arrangements, previous to which drafts of terms, &c., would be laid before the shareholders. This circular was followed by another, dated the 10th of August, 1864, stating in substance the terms of amalgamation, of which the first was that new shares of £100 each of the Bank of Hindustan were to be issued to the holders of the 20,000 shares of £50 each in the Imperial Bank. The issue was to be at a premium of £6 per share, and the share of the premium to be placed to the reserve fund of the United Bank, and the remaining £1 per share was to be applied to pay off preliminary expenses. On the 25th of August and the 1st of September, 1864, "extraordinary general meetings" of the Imperial Bank were held, at which resolutions were adopted approving an amalgamation of the 24th of August, 1864, between the two banks, for the purpose of amalgamation, and directing that the Imperial Bank be wound up voluntarily and appointing liquidators for the purpose. A further resolution was adopted to the effect:—"That the liquidators be authorised to receive compensation, or part compensation, for the business and property of the Imperial Bank, the Imperial Bank shares in the Bank of Hindustan, upon the terms specified in the agreement; and if any member shall express his dissent from this resolution by a notice in writing to the liquidators not later than seven days after the meeting at which the resolution is passed, the liquidators could require the liquidators to purchase the interest of such dissentient member, the liquidators shall raise the purchase-money to be required of such dissentient member, by the sale of share or shares in the Bank of Hindustan which, under the terms of the agreement, would have been required to such dissentient member." It will be perceived that this resolution was evidently framed in view of the 161st section of the Companies Act, the provisions of which are as follows:—"Where any Company is proposed to be wound up in the course of being wound up altogether voluntarily, and the liquidators or a portion of its business or property is proposed to be transferred to another company, the liquidators of the first-mentioned company shall, with the sanction of a special resolution of the company by whom they were appointed, conferring either a general authority on the liquidators or an authority in respect of any particular arrangements, receive in satisfaction, or part compensation, for such transfer or sale, shares, policies, or other like interests in such other company, for the purpose of distribution among the members of the company being wound up, or may distribute into any other arrangement whereby the members of the company being wound up may, in lieu of receiving cash, shares, policies, or other like

interests, or in addition thereto, participate in any other benefit from the purchasing company arrangements entered into by the liquidators in pursuance of the provisions of the Companies Act, 1862, shall be binding on the members of the company to the proviso that if any member of the company who has not voted in favour of the special resolution by the company of which he is a member, at a meeting held for passing the same, expresses his dissent from the resolution in writing, addressed to the liquidators, at the registered office of the company not later than the date of the meeting at which such special resolution is passed, such dissentient member may require the liquidators to purchase his shares in the company, at a price to be determined by the liquidators, or to carry such resolution into effect, or to purchase such dissentient member at a price to be determined by the liquidators, such purchase money to be paid by the liquidators, and to be raised by the liquidators in such manner as may be determined by special resolution. No special resolution passed in pursuance of this section shall be invalid for the purposes of this section by reason of its being passed antecedently to, or concurrently with, any resolution passed by the company, or for appointing liquidators; but if a resolution is passed by the company for winding up the company by or subject to the order of the court, such resolution shall not be of any validity unless it is confirmed by the court." Mr. Los did not attend either the meeting at which the resolutions were passed, nor did he assent to the resolutions. On the other hand, Mr. Los did dissent within seven days according to the terms of the resolutions. Upon these resolutions being adopted, Mr. Los received from the Bank of Hindustan a circular informing him that he was entitled to 102 shares in the Imperial Bank he was entitled to an allotment of a like number of shares in the Bank of Hindustan at £6 per share, and that the directors had paid on his account to the Bank of Hindustan the sum of £5 per share on account of deposit to be paid by him. "To entitle you to the above option, you must sign the form and transmit the same to this bank on or before the 12th inst." "The form" was a form of application for the purchase of shares, which Mr. Los altered and signed it as altered, but the bank refused to accept the form in its altered state, and returned it to Mr. Los, with a letter, saying, "You may either accept the shares on the terms specified, or decline them altogether. If you decline them, some delay, during which the shares in the Bank of Hindustan will fall from the price of £31 per share to £26 per share, will be the result. If you decline the shares, you will be liable for the loss of £5 per share." In the meantime, and on the 12th of October, Mr. Los was entered on the register of shareholders of the Bank of Hindustan as the holder of 102 shares. Notice of the allotment of shares had been previously sent to Mr. Los on the 26th of September, and the bank afterwards demanded calls on these shares in pursuance of the 35th section of the Companies Act, 1862, which section, as amended, being rectified, "if the name of any person is entered in or omitted from the register, or if default is made in any necessary delay takes place in entering on the register the name of any person having ceased to be a member." A preliminary

Los's case was within the section, inasmuch as, although he had been, as not now entered on the register in respect of the 102 shares, he had ceased by the forfeiture of the shares to be entered in respect of. This objection was overruled, and the motion was heard. In support of the motion it was contended that Mr. Los was entitled to have the register rectified, inasmuch as, although the shares were forfeited, he should appear by the register in its present state to be liable for the calls arrears at the time of forfeiture, and also to be liable as a contributory if the company should be wound up. The 161st section never contemplated that a shareholder in one company should be bound to undertake a liability in another company. If so, a shareholder in a limited company paid-up share might be bound to take in compensation any number of shares of any amount in an unlimited company. The agreement for amalgamation was not in any way binding upon Mr. Los.

Mr. Selwyn, Mr. Jessel, and Mr. Eddis appeared for the Bank of Hindustan, and stated that the question was one of great importance, as there were other shareholders in the position of Mr. Los. They argued that Mr. Los was bound by the resolutions under the 161st section. It was absurd to suppose extreme cases of what might possibly happen under this section; the safeguard was that any resolutions to be binding must be adopted at a general meeting by a majority of three-fourths of the members present in person, or by proxy, and must be confirmed by a subsequent general meeting by a simple majority. At all events, Mr. Los was bound by his contract, and there was no more hardship in holding him bound by it than in making a partner liable to the engagements of his firm to the full extent of his fortune.

Mr. Justice Honour, without calling for a reply, held that Mr. Los was entitled to have the register rectified. Independently of the Act, it was the unqualified law of the country that a company could not bind its members to compel them to become shareholders in another company, and the majority could not bind the minority for that purpose in the absence of a special contract. If the Legislature, by the 161st section, intended to alter the law upon that subject, it would have done so in express words. The question was whether, under the 161st section, a non-assenting shareholder of one company could be compelled to become a shareholder of another with which he had nothing to do, and of which he might strongly disapprove. What would be the result of such a state of things? A man might have taken shares in a limited company where the shares were of a small amount, and was he under this section to be compelled to become a shareholder in an unlimited company where the shares were of large amount? Such a construction would not only be forced and violent in its nature, but also be really unwarranted by anything in the section. It was to be observed that the compensation under this section is given out as a benefit, and you cannot compel a person to take a benefit if he does not choose to accept. There was nothing in the section which compelled a non-assenting shareholder to take shares in another company. Although Mr. Los, as well as all the shareholders, might be included in the arrangement, he was not bound to take advantage of it whether he did or no. This court not only had power, but was bound to entertain the question of the rectification of the registry upon a summary application under the 35th section. Its object was obviously to prevent a quantity of litigation which might otherwise arise.

Banking and Commercial

BILLS AND PROMISSORY

IN *Williams v. Jarrett* (5 Barn. and A. under the 55 Geo. III., cap. 184, sec. 12, bill, the date borne by the bill on the face, the date when it was actually made, is to be taken to mean clear, from what fell from the court in *"Austin v. Bunyard"* (6 New Report 202) had now to be decided *de novo*, it would have been in accordance with *"William v. Jarrett"*; because Cockburn, Chief Justice, when you see the date when the instrument was issued, and the date of it (that is, when a bill is dated—say in fact, in time), are not contemporaneous, you avoid the inference that the intention was to make it a duty, which would be contrary to the policy of the law. However, in *"Austin v. Bunyard"* the authority of *"v. Jarrett"* was held to be binding, especially as the court that they were not sitting in error.

In *"Austin v. Bunyard"* a cheque was issued by —"No. — Cheapside, London; 22nd July 1864, Birmingham and South Staffordshire Bank, to the order of Mr. Garrett or bearer £350." This was the plaintiff's demand and endorsed by Mr. Garrett. The fact, made on the 22nd June, 1864, and signed by Mr. Garrett. It came to the hands of the plaintiff, a convenient holder for value, without any consideration; it was post-dated; it was duly presented on the 22nd July, and was honoured, and the plaintiff thereupon brought an action against the maker of the cheque, the defendant. The cheque had a penny stamp, and at the trial it was held that it could not be admitted in evidence, as it was not a month's date, and ought (under the 17th and 18th sections) to have borne a four shilling stamp. Now, the court, with leave to the plaintiff to set aside the verdict for plaintiff. A rule nisi having been made for that purpose, it now came on before the court for making the rule absolute. On the plaintiff's case it was argued that this was not a demand, being post-dated; but it was in fact a demand, exchange at a month's date. If it was not, it could not be received in evidence, as no

p. On the plaintiff's part, "Williams v. Jarrett," and first section of 21 and 22 Vict., cap. 20, (which makes all bills or orders payable on demand chargeable with a penny discount) were relied on; and it was said that this cheque, being on the face of it dated the 22nd of July, that must be taken to be the date, and it was a draft payable on demand, at least in the hands of an innocent holder; and so the court held, upon the authority of Williams v. Jarrett. We have already noticed that the judges in delivering their judgments expressly stated that they acted on the authority of "Williams v. Jarrett," and expressed, or at least intimated doubts, whether that case was finally decided. The point, therefore, as to whether a note is fully post-dated, but appearing on the face of it to be correctly dated, shall be treated as of the date appearing on the face of it, does not seem to be free from doubt, should the matter come before a court of appeal. At the same time, the injustice of allowing a defendant in such a case as that of "Austin v. Bunyard," himself a party to post dating a bill, to set up the post dating as a defence against an innocent holder, would be so glaring that we should doubt whether a court of law even could permit it; and we feel scarcely any doubt that a court of equity would restrain a defendant from using such defence in such a case. And here we may, not uselessly perhaps, explain to our commercial readers very shortly, that which appears at first sight to be an anomaly, viz., that a court of law should decide one way, and a court of equity the opposite, upon the very same matters. The principle of that contradiction, or apparent contradiction of decision, is this—a court of law is bound to decide upon the facts and positive law. If, therefore, a court of law were to decide that in such a case as "Austin v. Bunyard," a note is held as dated, not of the date on the face of it, but as a note dated of the date of its making, it could have no alternative but to decide for the defendant. But a court of equity has jurisdiction over the conscience of the parties; and if it come to the same conclusion, as we think it would, that for a person to post date a cheque for his own convenience, or for the purpose of defrauding the revenue, and then to set up that fraud as a defence in an action by an innocent holder against the admission of the note in evidence, was a fraud or inequitable transaction; it would restrain, not the court of law from exercising its own jurisdiction, but the fraudulent defendant from presenting to the court of law a fraudulent defence.

On the subject of bills, we notice another case recently decided, "Capman v. Cotterill," (6 New Rep. 237), in which the point

was, whether where a promissory note is signed without the jurisdiction, but delivered by the holder within the jurisdiction of the court, the cause of action is at the place of delivery or at the place of the making of the note. In that case the defendant was jointly and severally indebted to the Union Bank of London, which bank resided at Florence; his brother in London was also indebted to the bank, and that the defendant's brother should pay off the bank £600, and that the defendant should join in the payment of two promissory notes to pay off that balance. Notes were made, signed by the defendant and his brother, and by him to his brother in London; and they were handed over to the bank. In an action brought by the bank against the defendant it was contended on the part of the defendant that the proceedings should be set aside on the ground that the cause of action did not arise in England. But the court held that the cause of action was where the notes were delivered. Martin B. said, "The question is, was the contract in Florence or in London?" and he gave his opinion that no contract arose at all till the notes were handed over to the bank" (and he referred to *C. and Ald.* 474), and Bramwell, B., said "whatever for saying that any interest passed at the time the notes were handed over to the bank. The cause of action is in England."

In another case, "*Maccall v. Taylor*," 6 Q. B. 374, the instrument was made in this form:—

"4 months after date, pay to my order or to the order of the value received.

To Captain Taylor, Ship 'Jasper',
St. Helens, London."

The instrument was accepted by W. T. Taylor, the "Jasper." It was held that this was not a bill, as there was no drawer's name to it; nor a note, as there was no promise to pay any one; it was an inchoate instrument, of being, but not in fact, perfected, and the defence was sustained upon it.

Reports of Joint-Stock Banks.

SCINDE, PUNJAUB, AND DELHI BANK CORPORATION, LIMITED.

At the ordinary half-yearly meeting of the shareholders in this bank was held at the London Tavern, on the 30th May; Mr. W. P. Andrew in the chair. The following report of the directors was read:—"The half-year ending December 31st last has been one of unusual risk and uncertainty to all banks connected with India. The rapid decline in cotton, and depreciation of East India produce generally, rendered it necessary for the directors of our bank to act with extreme caution, and restrict the branches in their operations, especially in the purchase of bills drawn against produce. The rates of discount which prevailed on this side from June to December of the Bank of England minimum having ranged from 6 to 9 per cent.), notwithstanding being accompanied by a corresponding increase in Exchange rates in England, were also severely felt by Indian banks in diminishing their receipts on such transactions. The accounts now presented in the annual statement have been duly audited, and show a gross profit of £1,062. 12s. 7d., including the balance brought forward from last half-year, after deducting interest on current and fixed deposits. From this £14,551. 16s. 3d. has been deducted for current expenses, and £1,008. 4s. 11d. for rebate on bills and commission on acceptances running, £428. 9s. 6d. for 5 per cent. on preliminary expenses, and £366. 8s. 2d. for bank premises redemption fund, leaving a balance of £3,707. 13s. 9d. to the credit of profit and loss. The shareholders will not expect that the bank can have passed through the exceptional period which has proved so disastrous to many houses in the Indian trade, and during which all Indian banks have suffered more or less, without being similarly affected. The actual losses on bills unpaid during the currency of the half-year ending December 31st last amounted to about £4,000. Since the above period, however, losses have been incurred from the suspension of firms, which, it is estimated, absorb the sum at the credit of profit and loss and the reserve fund, leaving £5,238. 8s. 1d. still to be provided for. During the present half-year Mr. Thornton, Mr. Boyd, and Mr. Worms have ceased to be directors. The board recommended that only one of the vacancies so occasioned be filled up, and they are taking steps with a view to a suitable selection. The directors retiring by rotation, Mr. W. P. Andrew, Harry Borradaile, and Mr. W. Dent, jun., being eligible, offer themselves for re-election. The auditors, Mr. W. Dent and Mr. J. E. Anderdon, retire, also offer themselves for re-election."

moving that the report be received and adopted, said means convey the gratifying results which the directors before the shareholders; but he thought the observance had have the honour to submit to them would lead them that if they had to go through the same period again not use more discretion, diligence, or energy, than they putting to a successful issue an institution which was such particularly favourable auspices. Although he gratification from the circumstance, still he could not t they had not incurred losses any thing like so large y some other banks connected with India or the East. hat, he might mention, as a matter of his own know- ells of this company which were now in suspense, put ount to as much as the bills held by one bank on one) He would tell them the causes which had been so progress of the bank arose from gross errors; for he d not mince matters, or to conceal anything from the rs.) He had been through life a most straightforward n, and he felt confident that if the directors retained the ppropriators—and which, if honourable dealing deserved ue to retain—they would be able to retrieve the past, t successful and flourishing institution. (Hear, hear.) s now under the consideration of the directors for ank, for enlarging the scope of its operations, and for d not had hitherto—proper management. He did not aker himself, to be acquainted with the details of the ssessed as much knowledge as any man of the commerce ndia and the East; and he was sure that what had rto were men under him to manage the details. prospect of having efficient managers for working f the bank; and as showing the estimation in d, even in their present adverse position, he might rs had received overtures for arrangements with other ure which must necessarily improve the stability and mpany. He could not at the present moment go into circumstance of his disclosing them might have n negotiations which had only recently been opened. d to receive, as they should test on this occasion, the ce of the shareholders, he had no hesitation in saying o have the honour of calling them together again, and s which they would receive with acclamation. That he desired on this occasion that they would testify they might make, and by the trust they would place

in the statements made to them, that they appreciated directors who, like himself, had adhered to the (Hear, hear). There were three directors whose names were in the report as having left the company. He must mention Mr. Thornton, his excellent and highly esteemed friend, whose resignation was placed in his (the chairman's) hands at the meeting, and had nothing whatever to do with the matter connected with the bank. It was entirely owing to the pressure compelling him to abstain from business, and to pay (Hear, hear). With respect to the other two gentlemen, Mr. Boyd and Mr. George Worms—he would only state that he was surprised, and considered it a matter of great regret that they had chosen such a moment to retire from the board. (Hear, hear.) On this subject, the chairman said the losses up to the end of the year were fairly placed before them in the report; and looking to the future, he felt they would at once say to themselves that the losses not sustained these losses the profit derived is totally sufficient to embark on.” He would state at once that it was his opinion that the state of affairs were likely to last he should be the first to see the concern be put an end to. (Hear, hear.) But the state of affairs were entirely exceptional. The high rate of discount, the increased rivalry in India, not only in the business established when this company was inaugurated, but the schemes, financial and banking companies of all kinds, which had been brought into competition with this bank, were such that the profit to be got out of the business that they did not feel this so much that they had given instructions to the directors as much as possible; in fact they came to a resolution to withdraw from business altogether, to maintain their resources, in the exceptional state of affairs had passed away. They had not been attended to, or if they had been, they would not have been able to meet their losses. He did not think they would have obeyed the instructions had been obeyed. Their managers, their directors, felt resentment, and stated that they must do as other banks did. Consequently they had commanded them, and they threw up their appointments. They had been paying £1,000 and £1,200 a year got out of the business from some of the other companies. The state of affairs had been unprecedented. They had all heard of the fact that £100 shares were worth £1,000 in the market; but the fact that £100 paid had been selling freely at £4,500. This state of affairs had affected not only those who had speculated in the shares, but the managers of banks and other institutions. The first thing that occurred to him was, that the report stated such a state of affairs have been sustained up to the end of the year; and he would say—for he was not going to blink the question—that the report to plaster over an unsound wall—that large loss since that report was made up. At the same time he would remark that the depreciation in the value of the shares was beyond any amount they could make out as a result of the (Hear, hear.) They had narrowly scrutinised the bank within the last few days; and it was his opinion that instead of a loss, as would appear from the value of the shares per share, the loss did not amount to more than

the institution itself. If he had the confidence hoped they would in these matters trust to him, not their confidence he was most willing to occupy the seat he did, as chairman of the bank, not only to be listened to, but to have questions not be derogatory to the position he occupied.

Mr. Minton was thankful for the answer and repeat that he had no intention to mix up speculations, but, as prudent men of business, they of a crisis not to undertake anything which was and he was therefore surprised to find that the last six months undertaken a business which of the reserve fund. As men of business they security. He had also to complain of the inaction by the mildest term, of the directors in setting recent advertisements that the reserve fund £24,000. It would have been much better if altogether left out. He had no wish to throw [A voice—"You could not do it."]—but he did an amount of profits should have attended so.

Mr. Hedgcock said that as men of business to have confidence in the directors, who had a and in their own property. It was an exceed the foundation of a sound and promising business home, and they ought to feel grateful to the accomplished for them that object without in any way. They had now a good working basis, and the bank give them £7,000 in hand. If, like the directors they would soon see their shares at a premium.

Mr. Young had every assurance in the future believed it would yet be a great bank. He gave confidence, but he hoped they would put a check on India by the appointment of an inspector, or

Mr. King was sure they must all go away in the manner in which their questions had been answered sent some misapprehension as regards the Indian but he was gratified to hear that, so far as the losses were not by any means equivalent to the taken place in their market price. That being they were now passing through that stage which tion with which he was acquainted had to encounter greatness. He was sure his friend Mr. Minton motives put his questions to the chairman, and the unprecedented difficulties with which the bank They enjoyed the full confidence of the meeting that they should also enjoy the full confidence shareholders should make it apparent that the Scinde, Punjaub and Delhi bank. If they unanimously, then they would soon see their estimation.

Mr. Conybeare thanked the chairman and their duty by sticking to the ship in stormy weather deny that the present state of things was a disappointment. It was a disappointment to him and the other

And the hon. proprietor forgot that this was an Indian, bank, and that it was that very circumstance of the bank in this country which narrowed the margin, and, of course, the amount of their profits. They had, too, been unfortunate managers, who, however, notwithstanding their mismanagement, were paid up by other banks at much higher salaries. With

these banks, which were numerous in India, they had not by any means an unoccupied field to carry

After some further discussion of a desultory character, the important declaration that several of the directors were increasing their holding in the bank, and that many had purchased as many as 300 shares, the report was adopted by the directors and auditors having been re-elected, the meeting terminated in the usual manner.

BRAZILIAN AND PORTUGUESE BANK

THE second annual general meeting of the proprietors of the bank premises, No. 13, St. Helen's-place, Bristol, took place on the 30th May; Mr. Frederick Rodewald, the chairman, presiding.

The report was taken as read. It stated that the bank had not but owing to losses it was deemed necessary to carry a reserve account £47,000, so that the entire profits of £19,716 had to be provided out of the profits of the year.

The Chairman, in moving the usual resolution of thanks to the directors and auditors, reminded the proprietors that the bank commenced at Rio on the 1st of March last, and that in six months the local directors appeared to have acted with due regard to prudence and in accordance with the instructions committed to them. Making allowance for the difficulties of the establishment of a new bank, the board at home was satisfied with the accounts made up to the end of the year. The interim division of profits was under consideration. The financial crisis at Rio, which commenced on the 1st of March, first it was thought the convulsion would be of a temporary nature; in that opinion they were confirmed by the assurances of the local directors; but it was pointed out in letters by the local directors that the assurances were general, and contained no actual facts of failed firms to the bank. This communication was received by the local directors, and it was found that they had been of the bank by attempting to support one of the local directors. The board at home felt it to be their duty to accept that the local directors also came to light, which showed such a divergence of opinion that the restoration of any harmonious action for the time being was hopeless. Mr. Gallop was therefore sent out to arrange matters for the interest of the bank, and he might be appointed in the local direction and the bank might be interrupted. In carrying out this difficult and delicate task, he displayed as much efficiency as good tact, and the local directors at Rio, being in accordance with the views of the directors at home, it was thoroughly believed, lead to very satisfactory results. It would obviate the risks and losses unavoidable in the management of the bank. The losses at Rio had by no means been confined to this bank. They had resulted from the same cause prevailing there; and the error of the local directors in following public opinion, and disregarding the views of the directors at home, committed to them from England; but although much to be regretted, it was closely the example set by the other banks, he was

Reis, one of the former directors at Rio, who was present, stated through Mr. Yule, to show that the local directors had no favour or affection towards friends. They had simply been mistaken as referred to by the chairman; and having every confidence in the future success of the bank, they should remain large shareholders, and render it all the support in their power. Mr. Yule then asked whether Senor Don Reis thought it would be to the interest of the bank if an amalgamation were effected between the Rio and Brazilian Bank.

asked if the directors considered themselves justified in
 on upon this question.

and was unanimously adopted, and Messrs. Young, Lloyd, auditors, having been re-elected, the proceedings closed thanks to the chairman and directors.

ing of this company was held on the 2nd June, at the
William Fane De Salis, Esq., in the chair.

divisible profit this year was nearly £1,000 larger than they considered these profits had been earned under if not adverse, had certainly not been favourable banking operations and trade, he thought shareholders be satisfied with the result. (Hear, hear.) In the to contend with a very severe competition in the place, the year in which these profits had been earned commerce had been very seriously disturbed world. In England large failures had occurred great fluctuations in the value of money and the other hand, a country with which Australia intimate relations, trade had been and was now strong. Now, although it might be quite correct that Australia in the same way as India or this country—for no had occurred there—it would be quite incorrect to not suffered at all. On the contrary, in this age communication the interests of commerce were so barely possible for one country to suffer without its neighbours, and in this way Australia had suffered indirectly. The great fall that had taken place in sympathy, acted upon the Australian wool market 3d., a pound lower than when they met last year, sound a small sum, it was a serious matter for a country upon its wool growing as Australia; in fact, it was owners all the difference between profit and no producing mining interest, second, if not superior, to wool also suffered. For the last two years India had produced whole of the gold produced by Australia; but, owing of commerce now existing in that country, its production been greatly, but he hoped only temporarily, the quantities of Australian gold were now on their India. It would be readily understood that the gold market was unfavourable to Australian regarded this bank, whose business it was to engage in and gold operations, it would be uncandid in to tell them that it must make a difference in the even temporarily, of so good a market as India. that under these adverse circumstances the year's they would agree with the board that there was a reduction, and also that profit so realised bespoke the success of the business, which could not fail to be gratifying to the shareholders in the institution. As regarded the general company's affairs in the colonies, he need only observe that the accounts received from the colonies spoke of the success of their affairs, and were of an encouraging tenor. they had much improved their position. The result there had not been such as gave the directors satisfaction, they had made arrangements to send there a gentleman with their Melbourne branch, Mr. Machardy, who promote the interests of the company could not do so. He was happy also to say that they had been able to board the services of Mr. Moore, an eminent merchant representative of the Peninsular and Oriental Company, with such assistance the Sydney branch would show the chairman concluded by moving the adoption of the

Mr. Foster Fitzgerald, in seconding the resolution, said he had listened with much satisfaction to the lucid and reassuring remarks which the Chairman had made as to the present state of their property and its future prospects. The earnings of the bank were not to be measured alone by dividend paid, for, in addition to the sums paid in the shape of dividends, the Directors had most judiciously established a reserve fund which now assumed large proportions, and in his opinion the time was not distant when that fund would have reached a sufficient amount, and an additional 1 per cent. might be divided.

Mr. Kintrea considered that the accounts justified the payment of a dividend of 9 per cent., and moved an amendment to that effect. In his opinion a reserve of £90,000 was sufficient for all purposes. He wanted to know whether the addition of £10,000 a year was to be continued after the fund had reached £100,000.

Mr. W. Botly said that having purchased his shares at a high premium, he was one should be very glad to receive an addition to his dividend, but although he concurred in a great deal which had fallen from Mr. Kintrea, he would hesitate to second his amendment unless it had the sanction of the Directors, by whose advice the proprietary body had always hitherto been guided, and in whom they reposed the fullest confidence. As regards the observations of the chairman, he appeared to place the wool and the export of Australia almost on a par, but he (Mr. Botly) inclined to the opinion that the wool export far exceeded that of gold in importance.

The Chairman said the reserve fund had formed the subject of discussion on a previous occasion, and a general feeling was then expressed that when the fund reached £100,000 would be the proper time to consider the augmentation of the dividend. Their competitors in the colony, with capital equal to their own, had established large reserved funds; for instance, the Bank of New South Wales had a reserve fund of £200,000; the Bank of New South Wales had a reserve fund of £250,000; and the Union Bank of Australia had only had established a reserve fund of £200,000, but had last year established a second reserve, in the shape of an insurance fund, which amounted to £5,000. In the face of these facts it was necessary on their part to add to their reserve fund, and when they had reached that point at which further additions could with prudence be dispensed with, the proprietors might rely on the Directors would be the first to propose an increase of dividend. The authorities on banking united in considering the establishment of an adequate reserve fund as a measure of paramount importance, and the prudent course adopted by the board in forming a reserve of a substantial character was, he might observe, one of the reasons why such confidence had been exhibited by the colonists in the bank, as was evidenced by the rapid progress and extension of its business. He trusted the amendment would be withdrawn.

Mr. Minton also urged the withdrawal of the amendment, in order that the question raised by it might be left with the board—the members of which were practically acquainted with banking business, and were entitled to the fullest confidence.

The amendment was withdrawn, and the original motion unanimously carried.

At the motion of Mr. Morrison, seconded by Mr. Gellatly, the Directors and Auditors were re-elected, and a vote of thanks having been accorded to the Directors, and to the executive staff in London and the Colony, the proceedings terminated.

BANK OF BRITISH NORTH

THE 29th yearly general meeting of the prop held on the 6th June, at their house; Mr. Cart lowing report was taken as read:—

“Your directors have pleasure in reporting t noticed in the report presented to the propriet hibited in the returus received from the bran maintained throughout the year, and that the re bank for 1864 is of a more satisfactory character notwithstanding that Canada has again suffered and from unremunerative prices in the United K produce. The business of the branches in No wick has been on the whole of a satisfactory ch at New York, although having to contend with g the derangement of the American currency, has results than for several previous years. On the of the bank continues to make good progress, an encouraged to extend their operations in that steps to open a branch at Cariboo, the seat o British Columbia. This branch, it is expected, business of the Victoria branch, as well as a sou bank. From the annexed statement of accounts providing for all bad and doubtful debts, the ne year 1864 amounted to £72,569. 16s. 3d., and the r profit amounted on the 31st December, 1864, to £ viding for the dividend that was paid on the 5th directors have now declared the usual half-yearly being at the rate of 6 per cent. per annum, and in priated the sum of £10,000 out of the undivided the rate of 10s. per share, both payable on and a free of income tax.”

The Chairman, in moving its adoption, s occasion he had not many observations to make ment of accounts showed rather more favourable meetings. When they observed the very sn which did not extend to as much as the paid obvious that the profits could not amount to the other banks the deposits in which came to five, to twenty times the amount of the capital on whic the last meeting in December the directors in that apparently the profits of the bank were in ment had been fully borne out by subsequent the end of the year obtained more profits than i was happy to state that, looking at their return this year from the various branches, they exh crease on the profits of the corresponding period. The directors hoped that that state of things wo the year. They did not however calculate on n equal to what they were last year, for the sim the rates of interest were exceptionally high in the latter part of the year. Whether that wou not know; but this he did know, that the amount

London was much less than at this time last year, and as the rate of interest at present was extremely low, that of course was advantageous to the company. (Cheers.) Having a smaller amount of money employed at low rates they had of course a larger amount in the colonies at higher rates. When they met last year they would remember that some remarks were made respecting the impolicy of employing money in the colonies at six or seven per cent. when money was at eight or nine per cent. here. But as he then explained, it was impossible to withdraw capital from the branches, from the fact that at the moment the rate of interest here was higher. Their business was established in the colonies, so long as the colonial legislature restricted the interest to six or seven per cent. they must continue to carry on their business at those rates. Of course, whenever money was low here the interest from the colonies would operate favourably, and they would reap the benefit; and, if it was high, advantage might be taken of that circumstance with respect to any capital that might be in this country at the time. He was satisfied by moving the adoption of the report and statement of accounts, and was very happy that he should be most happy to answer any questions which the shareholders present might wish to put.

Mr. McDougall congratulated the directors and the meeting on the satisfactory character of the report, and expressed his hope that the intended dividend now proposed would be kept up. He certainly should have been better pleased had it not encroached on the reserve of £100,000, but it would do, though slightly; and he hoped that in future no dividend would be declared that would touch the reserve. With reference to the rate of interest permitted by the colonial legislature, he expressed his opinion that, on the expiration of the charter four years hence, the shareholders would find themselves under the paramount necessity of turning up the affairs of the bank, and no steps ought to be neglected by the directors to induce the Canadian legislature to abrogate the usury laws and to allow commercial enterprise the same free scope for its extension as in this country. They could not conceal from themselves the fact that unless those laws were altered by the time the charter expired, there would not exist in those colonies sufficient field for banking to make it worth their while to carry on the present concern. Reverting to a matter of account, he observed that he took the liberty last year of alluding to the item in the liabilities of "reserve to meet bad and doubtful debts," and, he thought, ought to have been deducted from bills receivable, and from securities, and he certainly understood from the hon. chairman that the same course would be adopted in future.

The Chairman in reply said, that the statement that the dividend had been paid out of the reserve of £100,000 was erroneous. On the 31st of December last, after setting aside £30,000 to pay the dividend on the 5th of January, the clear actual surplus was £132,000. Of that sum they had appropriated, by way of bonus, £10,000, being 10s. per share, so that the actual reserve of undivided profits was £122,000. The hon. proprietor had intended to think that they now proposed to pay £30,000 out of that specific reserve, but he had forgotten that between December, 1864, and the 30th of January this year, they would have made more than £30,000; therefore, the reserve would be virtually £122,000. He could not at all concur in the opinion that on the expiration of the charter they would have to wind up the concern. (Mr. McDougall: I only meant conditionally.) For his part, he had always found that the majority of the shareholders preferred to have a re-

gular and steady dividend than for it to be the profits at one time being very large, and at all. (Cheers.) With reference to impressing the importance of making some alteration in monetary laws, all he could say was, that during his visit of the Canadian ministers to this country with them, and to urge reasons which must strike this country to induce the members of the Canadian bank to alter the existing usury laws. In reference to the item of a provision to meet bad and doubtful debts, he accounted for in some way or other. It appeared that the hon. proprietor on the item in question was of the mode of stating the accounts, and he could not alter the present system.

Mr. M'Dougall said that the system he recommended of the amount credited on bills received in this mode, because he thought it inadvisable to inform the shareholders of such a large sum to meet bad and doubtful debts.

The Chairman replied that that was certainly the present mode of drawing out the accounts was of the express wish of the shareholders; of course if they kept another way it would make no difference.

A Shareholder inquired what were the prospects of the bank on the Pacific coast.

The Chairman stated that, as mentioned in the report, the bank had a branch at Vancouver's Island, and the agency at San Francisco. They had determined upon expanding their operations by establishing an agency in the mining district.

The report and statement of accounts were then read, and the retiring directors were re-appointed, Mr. Jaffray being unanimously chosen to fill the vacancy at the death of the late Mr. A. W. Jaffray.

A cordial vote of thanks to the chairman and directors of the bank, closed the proceedings.

NEW ZEALAND BANKING CORPORATION

The third half-yearly general meeting was held at the offices, in Cushion Court, Old Broad Street; Mr. Jaffray in the chair.

The report, which was taken as read, gave a dividend of £3,532, and recommended a dividend at the rate of 10 per cent. being £467 to be carried forward.

The Chairman observed that since the last meeting the most important change of name from the New Zealand Bank to the Commercial Bank of New Zealand. This change, however, been carried into effect only in the colonies, by the colonial legislature authorising it not having been done in this country, and until it did the original name was retained. The change of name they had obtained the privilege of was a valuable one, as making the capital of the bank more valuable if their transactions were required in all countries. The appointment of the local board was then discussed in the report. At present that board consisted of five members, partly because the bank was as yet a small one, and

ult to obtain men of such high standing as the two gentlemen who been appointed. In accordance with the wish of the shareholders, the ants had been audited in the colony by Mr. Stevenson, the professional antant at Dunedin, instead of leaving it to the ordinary routine. ything was therefore satisfactory on the other side, and as it was ally so on this, he had very little doubt that they would continue in ame prosperous course as they had hitherto proceeded. He concluded owing the adoption of the report and accounts. e Lord Mayor seconded the motion. e reply to a question, e Chairman stated that the directors in New Zealand were required ld the same share qualification as those on the London board. . Hardwick (a director), answering further questions, said that the ase of profits in the last half-year had been £1,763, which enabled o pay the same rate of dividend upon a larger amount of paid-up al. The available assets of the previous half-year had been increased emiums on shares. e motion was agreed to unanimously, and the dividend at the rate of r cent. per annum declared. e auditors were re-elected, and 25 guineas each awarded for their eration. e usual compliment to the chairman and the other directors closed e proceedings.

LONDON AND BRAZILIAN BANK.

extraordinary general meeting of the shareholders was held on the June, at the London Tavern, Mr. Cater in the chair, for the pur- of considering, with a view to their confirmation, certain resolutions ere agreed to at a meeting held on the 11th of May last. e Secretary having read the resolutions, e Chairman proposed that they be confirmed, and said he should be to answer any question respecting them. e shareholder inquired whether Baron Maua came into the bank on the terms with themselves—that was to say, with a subscribed capital of one million and a half, whilst they subscribed one million: and er he paid £7. 10s. a share in money or negotiable securities as the olders of the bank paid. e Chairman replied that Baron Maua entered as a partner *pari passu* themselves, he and his colleagues having three-fifths, and the share- of the company holding two-fifths of the capital at £7. 10s. per share. e persons were disposed to ask what inducement the baron could have ne into the concern. He had the inducement of placing such a concern in safe custody, and participating in the profits they made. It was a and take arrangement, and he thought it ought to be satisfactory to urties. e reply to further questions, e Chairman said there was no limit to the circulation of the bank, t that for every £750,000 of notes issued they should have £250,000 ecie; but he hoped the circulation would not exceed the wants of ountry. There was no objection to issuing a pamphlet containing the of the agreement, and a report of the last two meetings. e motion was then agreed to and the meeting separated.

NATIONAL PROVINCIAL BANK

A SPECIAL general meeting of proprietors was held at the London Tavern, Mr. Laurie in the chair, to the effect of now authorising the court of directors to employ bankers in London, and at places not exceeding 50 miles from London, soon as they may think fit, and for that purpose to make such advances and to comply with such obligations as may be imposed by Parliament respecting banks of issue, or if the directors think it desirable, for the purpose aforesaid, to discontinue the issue of bank notes, and to pass such resolutions on the subject as they may think proper upon."

The Chairman said—I cannot help feeling very much gratified at the circumstances under which we meet to-day, and the honour of addressing you from this chair, and the probability that a measure of relief which would remove these restrictions, which every one who has disbelieved in, and which I believe, admitted to be most unfairly imposed upon the public, absolutely become law, at all events passed beyond the power of its progress through the legislature, and that may be considered a very pleasant one of congratulating you on our successful exercise of our newly acquired freedom. It is a great step in the causes by which a bill, not obligatory, but permissive, to restore old privileges, but conferring fresh rights—supplied by the Government having received the assent of those who officiate in the House of whom it affected, has been defeated in its very last stage in the Commons, which it had reached without even a dissenting voice. I am glad to say that I think we were fully justified in the course of deliberation which we entertained. In respect to the course of deliberation, your directors have determined to do what they perhaps act wisely if I confined myself to the matter of the bill which I have been instructed to lay before you. At the time at which you will arrive, I do not, after the wishes at the meeting last year, anticipate much change of opinion. Having been now for so many years one of your directors, and on this subject a very anxious consideration, I have been convinced which have convinced me of the very great importance of the necessity, of extending our operations to the whole of the country, which might not be entirely uninteresting to the public. On the question of circulation I must confess that I have been convinced we have very much overrated its importance. It is a good advantage in our operations in the country. It is a good advantage in the money value is in relation to the present growth of the country. Quite, I think, unworthy of consideration. In the establishment it was, of course, a matter of importance. It is grown it. Since the Act of 1844 it is stationary. It is stationary our growth or advance with our progress. When the rate of interest is unusually high it is, of course, more valuable than when it is low. It gives us no such advantages, and indeed the agency and the usual compensation from the public does not very nearly meet the deficiency which the loss of interest on the occasion in your profits. I was more especially anxious to be entirely masters of our own affairs, and independent of the interests might not always coincide with our own.

I am to bear the fullest testimony to the accuracy, courtesy, and integrity with which our present London agents have acted in all the transactions which have been entrusted to their care; but it must be obvious that there must always be inconvenience in introducing our customers to establishments whose very excellencies may make them dangerous rivals. It is also no less certain that the high reputation enjoyed by us already at once brings us an ample accession of business in a more extended field. Amidst the numerous new financial undertakings now arising on all sides around us, we must come at once to the front, if we would not run the risk of seeing others seize the place which should be ours. Such, gentlemen, have been the grounds on which I have arrived at the conclusion that, even at the sacrifice of our circulation, the best interests of the bank require that we should extend our operations to London; and it now remains for you, in the words of our lamented friend, Mr. D. Robertson, to decide upon the adoption of one of two courses—either a policy of prudence suited to the times, which, with good management, must be followed to secure a great accession of banking prosperity or a policy of indifference, under which, in my humble opinion, the bank's onward career would be seriously impeded and its future prospects greatly impaired. I have now to move that the following report be adopted:—

In the report adopted at the annual meeting in 1864, the directors expressed their views in the following paragraph:—‘The directors have arrived at the full conviction that the interests of the bank require that its operations should be extended to London at the earliest possible period, and they trust that measures may be devised to effect that object. There are some technical difficulties which the directors would wish to see removed before calling on the proprietors to sanction such a course, but they have no hesitation in assuring the shareholders that they will allow time to be lost in unnecessary delay.’ And again, in the report adopted on the 11th ult., reference was made to the subject. The technical difficulties alluded to were removed by act of parliament at the instance of her Majesty's government in the session of 1864—acting in compliance with the representations of the directors. The communications then held with the Chancellor of the Exchequer led to the hope that the restrictions now imposed by law upon joint-stock and private banks of issue might be removed during the present session, and the directors resolved to await the decision of parliament upon a measure introduced for that object. The ‘Banks of Issue Bill,’ introduced by the Chancellor of the Exchequer, was carried to a stage when there seemed every prospect that its provisions would have become law; but, prior to the third reading, the united opposition of the London bankers, and of a section of the country banks of the north, proved so strong that the Chancellor of the Exchequer withdrew the bill on the last Thursday evening. Under the provisions of the bill, banks of issue would have been empowered to carry on business in London, or within sixty-five miles, to increase their number of partners beyond six, and to transfer their right of issue to other banks, and, in return, would have been required to pay to the Treasury one per cent. on their issue, and would have been taken a lease terminable at the end of fifteen years, unless parliament should otherwise determine. To such terms the directors gave their assent, and hoped, when they last met the proprietors, to have been able to induce them to give powers to come under the provisions of the bill. By the withdrawal of the bill, and the practical defeat of the attempt to remove the restrictions, the directors are thrown back to the position in which they were when they first expressed their convictions that the interests of

The Chairman said that their note circulation in 1844, and as they were aware, the act of that year made **except** the Bank of England. He apprehended, pulsory, that they would receive as usual, from allowance of one per cent. on at least two-thirds issue when they relinquished it. He hoped, indeed. Then they would save the expense of agency, would be 1 per cent. on the amount of circulation present paid no interest, and the further loss of

which they would have to keep in hand beyond the necessary to keep now.

thought that taking money at 4 or 5 per cent., the value was about 3 per cent.

believed that the advantages arising from increased business expenditure would more than counterbalance any loss

Mr. Paull stated that one of the branch managers had estimated that the withdrawal of the power to issue notes would cost £24,000 per year.

thought that the outside loss, taking money at 5 per cent. on the outside average value, would be £24,000 a year. Coming into consideration the actual loss on the circulation of interest upon the additional sum they would have to reserve; but against this there would be the allowance for the saving of expense in London, and that would of itself be sufficient to make up the entire loss, business, and the deposits which they would have, but not by them.

was carried unanimously.

then moved a resolution empowering the directors to do business in London, or any place within 65 miles thereof, and to discontinue the issuing of bank notes.

and by Mr. Paull, M.P., and carried unanimously; and the chairman and directors concluded the proceedings.

Buenos Ayres, and River Plate Bank, Limited.

A general meeting of the shareholders of this bank was held at the Sea House, City, on the 19th June; Mr. Hackblock in

(Mr. A. E. Smithers) having read the notice convening

stated that this being an extraordinary meeting no other business was done than to declare the *ad interim* dividend. This was called very much against the wish of the directors, who considered it inexpedient to hold one at present, but a letter having been received from a large body of the shareholders, the directors in obedience to the wishes of the subscribers to that letter had resolved on holding the meeting. He had stated to one of the subscribers the reasons why it was inexpedient, and quite contrary to the custom of exclusively holding such meetings in London. The articles of association only required them to hold a meeting when the board published a statement of accounts, but on this occasion it was impossible to do so. The business in the River Plate was transacted in the first half of the financial year, and it would interfere greatly with their audit now, for it really was a very troublesome affair dealing with different currencies which they would have to go through. He trusted that the board hoped that it would not occur again, because they really could afford the shareholders no *ad interim* dividend might just as well be declared by a general meeting of the shareholders as at an extraordinary general meet-

ing. It had been stated to him that the ob-
ing at the present time was not for the purp-
and audited statement of account, but that the
satisfied with knowing something of the affairs of
asked them for their forbearance in not pro-
because he should be sorry to refuse to give them
he did, the opinion that they were at all times er-
tion which could be properly given to them. Of
details which it might not be prudent to enter
present moment; therefore the shareholders were
reasons if he should decline to answer any particu-
be put to the board with respect to their affairs.
that as far as Buenos Ayres was concerned their
continued and uninterrupted success. The rates
the last meeting had been very high, and their cor-
responding amount of profit. There had been no
failures, but he was happy to say that prior to the
acting upon the knowledge it had received of dis-
had deemed it expedient to provide for any such
during the present year, and he was happy to say
made had proved amply sufficient to cover all
time, and that their business, under the care of
manager, had been progressing quite as satisfac-
torily as expected. (Cheers.) With regard to Monte Vi-
deo, under one of the severest calamities that could be-
fall a country, the civil war. Under those circumstances they had
given instructions to their agents to abstain from doing
such as could be transacted with entire safety.
He informed them that, to the great credit of the
instructions had been fully carried into effect,
the banks of issue having suspended specie pay-
ment, suffered some little loss on exchanges, the balance
on the whole, terminated in a profit, and not, as
would be the case, in a loss. (Cheers.) He had
seen their future prosperity in Monte Video, in consequence
of which he had carried on a large business there as
agent, and transferred the business to them.
They had felt it necessary to make a little
adjustment at Monte Video, in consequence of some
differences between that branch and Buenos Ayres, and the board had
settled them. Those differences were now at an end,
and in future the two branches would work harmoniously.
He only further to say that they expected to hear of the
next month, and from his advice, and the personal
relations of the officers of the bank would have with him, the
receiving great advantage from his extended
experience, which could not but be productive of great good
to the shareholders. (Hear, hear.) The board, at
their meeting, declared an interim dividend of 5 per cent., which,
in December last, made the year's dividend at 10 per cent.,
and they had no doubt that not only would they be main-
tained in future, but, without pretending to pre-
dict the future, he thought that from the progress
of their affairs, they would be able to ad-

erve fund, and also to declare a very satisfactory bonus. (Cheers.) In conclusion, he said that he should be happy to answer any questions that could, consistently with his duty, and with the general interest of the shareholders.

Mr. Sichel said, that as one of the persons who had signed the letter to which allusion had been made, and which expressed the opinion of shareholders holding something like 2,000 new shares, he thought the meeting of that day had answered every purpose for which it was intended, because, at a time when their property was depreciated by disturbances in the River Plate, and when the slightest rumour, however unfounded, was calculated to bring the shares down, it had enabled the chairman and the board of directors to give an assurance to the shareholders that the prospects of the bank had been satisfactory, and that they could honestly and fully declare an ad interim dividend. He was sure that the shareholders would be much gratified at the statement they had heard, and he had no wish to press for any detailed explanation on questions which the board thought it would be injurious to the interests of the company to discuss.

The Chairman said he should be most happy to answer any questions, but he certainly did not think, in the present state of affairs, it would be expedient to go too closely into matters. He would take this opportunity of stating that Mr. Ruding, in leaving the service of the bank, carried with him the highest respect of the board, and they felt perfectly satisfied with the care and prudence he had manifested in the late emergency. He was on his own resignation, and it was due to him that the board should make this acknowledgment. They had applied for certain extensions at Monte Video, which might hereafter render an addition to their capital necessary, but the matter was not a pressing one, and he should be glad to hear the views of the shareholders on the subject.

Mr. Sichel reminded the chairman that at the last meeting a pledge was given that if more capital was required it should be raised in the shape of new shares, to avoid the contingency of making a call. He thought the general feeling of the shareholders was, that whenever new capital was issued it should be at such a price as would add to the welfare of the company by increasing the reserve fund. A call on the old shares would only have the effect of lowering the market value, by causing great many sales, and he was afraid that if new capital was at present brought in it would scarcely realise its market value; but one thing was certain, that new shareholders ought not to be allowed to come in at a lower price than the old shareholders. If, therefore, new share capital was issued it ought to be at a premium, which should go to the reserve fund.

The Chairman admitted that such a pledge as that alluded to had been given, but as the question had been raised he had mentioned it for the purpose of ascertaining the views of the shareholders.

A Shareholder said that he understood Mr. Bruce to say at the last meeting that no further issue would be made until £10 was paid up on the old shares, and another £2. 10s. on the new.

The Chairman explained that what Mr. Bruce said was, that there would not be more than £40 paid up on the £100 shares, and £10 upon the £25, which would be equivalent.

The ad interim dividend of £5 per cent. was then declared, and a cordial vote of thanks to the chairman and directors terminated the proceedings.

BRITISH LINEN COMPANY.

SOUTH AUSTRALIAN BANKING.

THE twenty-fourth annual general meeting of South Australian Banking Company was held at bank offices, Old Broad Street; G. Martin, Esq.

Mr. W. Purdy read the following report and s

“The court of directors have the satisfacti Australia continues in a sound and progressive resources of the colony are being developed, and it The agricultural interest has been particularly prices for wheat and flour, and one of the imme bring a greater acreage under cultivation. Wit has enlarged the area of its business. The cour

done so with safety, as operations have, for the most part, been based on the staple productions of the colony, and are always conducted with a regard to the security of the assets. An increase of banking accommodation, however, has been witnessed, which has tended to produce a lower rate of profit than might have been expected; but this bank, it is believed, will be able to meet any undue competition, should such arise, without material prejudice to its resources. Two new branches have been established; one at Moonta, which is an active mining district, and the other at Tanunda, to afford facilities to a German agricultural settlement of much promise. The court have to regret the decease of their late Chairman, Mr. Edward Divett, who for many years presided over their operations, and they feel assured the proprietors will concur in their appreciation of his high character, well-informed judgment, and the excellent services rendered by him during his long connection with the bank. The accounts, duly audited, are annexed, and from the balance of the year the court have the pleasure to recommend a dividend of 10 per cent. per annum, free of income-tax, payable half-yearly."

Balance-sheet, 31st December, 1864.

The Chairman, in moving the adoption of the report and accounts, said, "I regret to say that they had last met they had sustained a great loss by the death of Mr. Edward Divett, whose loss the directors felt as deeply as any body of

men could do. He was a man fully acquainted with the bank, and whose conduct was universally approved by every one who happened to make his acquaintance. During that period no chairman of the company had taken the chair that day at the request of his knowledge was not at all equal, relative to their late chairman. Since they met last, chairman place in some parts of the arrangements of the bank at Adalaide, Mr. Dixon, on account of great business, leave the colony for a short period, and had called on them, and they had great pleasure in inducing Mr. Dixon to stay for a short time. They had also felt great pleasure in Mr. Stirling, who would be the successor of the old chairman. Mr. Stirling was a gentleman who had a considerable banking business in the colonies, and from his great capabilities, it was of great importance to the board, well acquainted as he was, by residence in the colony with the various parties with whom they had to do, no doubt they would derive great benefit from the assistance of him amongst them (hear, hear). With regard to the report stated very fully how that stood. The year was a prosperous year, though they did not think the profits were so large as they ought to be, considering the state of the colony, but they had made, notwithstanding, a profit which would be well satisfied (hear, hear). South Australia was in a prosperous and progressing condition. That was stated in the report in that shape to satisfy anybody that might be inclined to doubt. They had prepared a comparative statement of the year's business which would show how much the colony had increased. In 1863 was 140,000; in 1864 it was 148,000. The imports in 1863 were £2,358,817; in 1864 they were £3,305,546; or an increase of £966,729. The imports in 1863 were £2,028,279; and in 1864, £2,358,817. The revenue in 1863 was £625,000, and in 1864, £635,000. The exports in 1863 were £635,000; in 1864, £612,000. The banking deposits in 1863 were £181,084; in 1863, £269,000. Banking deposits in 1863 were £777,000; and in 1864 they were £1,158,000. The savings in 1863 were £261,000; and in 1864, £327,000; an increase of £66,000. The savings in 1863 were £2,079,000; and in 1864, £2,266,061. The savings in 1863 were £189,063; and in 1864, £231,800; the increase was £42,737. and in 1864, £245,000. So that by every measure the prosperity of the colony was shown to be progressing. The bank last year was extremely favourable. In the year ending 31st December 1864, the balance for division was £2,000 more than this year. This year enabled them to offer a dividend of fully 10 per cent. a great reason to hope that it would go on as for the business the bank did, and that the profits were increasing. At one time anticipated they would be, they were, on the whole, very satisfactory to the directors, and he trusted so by the shareholders. So far as they had any liabilities of the bank, they were all safe. No reason to be disappointed to their expectations during the year, and they were well satisfied. (Hear, hear.) He begged to move the adoption of the accounts.

Mr. Kerr begged to second the motion.

Mr. Morphett asked, of the profits of last year how much was made in the colonies and how much at home. He also wished to know in what securities the reserve fund was invested.

The Chairman thought that these were matters for their discretion.

Mr. Morphett asked whether there were any branches established without authority from the home board.

The Chairman said there was a little complication, but the establishment of new branches was sanctioned, but sometimes they were obliged to establish a branch before they could assent or know of it.

Mr. Morphett asked whether the board in London were aware that in the last balance-sheet the local directors and managers had struck off all the bad debts, and reduced all the securities to their proper value.

The Chairman said they had used every possible precaution, and they were satisfied they were fully covered.

Mr. Morphett said the proprietors ought to come to some decision as to whether the reserve fund was of a sufficient amount. It was fixed at £100,000, or one-fifth of the whole capital, and it then stood at £110,000.

He hoped this would not be allowed to go on, and that it should not be continued for their successors' benefit. A large reserve fund operated to the advantage in the vigilance which in banking affairs ought to be exercised. On the subject of branches, they had established a considerable number.

Mr. Stevens was always opposed to the establishment of branches to any considerable extent. Of course they must meet the wants of a new district where the population increased, but they required great care and vigilance. He believed several of the branches did not pay their expenses. He congratulated them on the appointment of Mr. Stirling, a gentleman of great colonial experience and knowledge.

Mr. Wheeler quite concurred in what had been said about the reserve fund, but he attached very little importance to the opinion of Mr. Stevens on the subject of the branches.

The report was unanimously adopted.

Mr. G. Sillman then moved the adoption of the dividend at the rate of 5 per cent. per annum.

Mr. C. Chippendale seconded the motion, which was also unanimously adopted.

Mr. Alexander Morrison moved the reappointment of James Henry McKie and Fred. C. Wilkins, Esqs., as directors, and of Mr. C. Chippendale and Mr. Jonah S. Wells, as auditors. He also proposed the election of Mr. Stirling in the place of the late Mr. Divett.

Mr. Bedford seconded the motion which met with a unanimous approval.

The Chairman moved that the thanks of the meeting be given to the local managers, for their services during the past year.

This motion was also agreed to.

Mr. Morrison proposed that the best thanks of the meeting be given to Mr. W. Purdy.

This motion was carried by acclamation.

Mr. Stirling briefly returned thanks. He was much obliged for the honour done him in electing him a member of the board. He could assure that any knowledge he possessed would always be at the service of the company.

Mr. Purdy also returned thanks.

On the motion of Mr. Maclaren, seconded by Mr. Richardson, thanks were voted to the chairman, and the proceedings were brought to a close.

LONDON JOINT-STOCK

A MEETING of the proprietors of this bank was at their house, Princes Street; Mr. Blount in the

The Chairman briefly explained that it so happened that the proprietors had resigned at one time; the first, Mr. Delafosse, on account of having to go abroad; Mr. Delafosse, on account of the fact of his having partially liquidated the bank. The holders were called together, therefore to fill up the vacancy. It was proposed that Messrs. F. J. Jordain, G. G. Nicolson, & Co. be directors of the bank.

The motion was agreed to and the meeting was

OTTOMAN BANK (IN LIQUIDATION)

A MEETING of the registered holders of shares in the Ottoman Bank, was held on the 26th June, at the London office of the bank, for the purpose of the liquidation of the remaining assets and the final liquidation of the bank; Sir W. Clay presided.

The following report was taken as read:—"At the meeting that, acting on the authority of the shareholders on the 5th of March, 1863, and in pursuance of the provisions of the Act of Incorporation, they have completed the liquidation of the bank, and they are now enabled to present the balance shown by this account will allow a dividend of 15s. per share on the old shares, and 1s. 6d. per share on the second issue of the late bank. The directors have also made a considerable sum beyond the reserve fund, and have decided to make a total distribution of £5. 5s. per share on the shares of the second issue, the whole of the company's capital. The result has been received with great satisfaction."

*Final Balance-Sheet, 26th June 1865.**Dr.*

January 5th, 1864.	To first distribution (£4 per share)
	8s. per share of the second issue
April 5th, 1865.	To second distribution (10s. per share)
	1s. per share of the second issue
June 26th.	To proposed final distribution (15s. per share on the old shares and 1s. 6d. per share of the second issue)

Cr.

March 5th, 1863.	By balance, after appropriation of profits
	by general meeting of shareholders, on 5th March 1863
June 26th, 1865.	By assets realised in liquidation less expenses of liquidation

The Chairman explained that the meeting was

nation given at the meeting on the 9th of April, which meeting was adjournment from the important meeting of the 5th of March, at which resolutions had been passed for the dissolution of the bank, for giving the formal sanction of the shareholders to the arrangements by which they became shareholders of the new Imperial Ottoman Bank, and for empowering the directors to take the necessary steps for carrying the resolutions into effect, and for winding up the affairs and liquidating the assets of the Ottoman Bank. The meeting of the 9th of April was a precautionary step merely, it having been thought possible that difficulties might arise with regard to some of the contemplated measures. No difficulties, however, had arisen, and in consequence the meeting was adjourned sine die without any resolution having been come to, but an adjournment was given that a final meeting would be held for the liquidation of the remaining assets. It had been found necessary to retain the reserve fund, which was the great bulk of the assets they had to divide, and the assets of the bank were taken over by the Imperial Bank, and could not be done until after certain proceedings and formalities had gone through at Constantinople; and this had occasioned a longer delay than had been anticipated in completing the winding up. It was not until the 5th of January, 1864, that they were able to make the first division of the assets, and they then paid £4 upon the ordinary shares, and 10s. upon the new shares. About a year afterwards a distribution was made of 10s. upon the ordinary shares, and 1s. upon the new shares, and it was proposed to make the final distribution. The sum with which they had to deal was a very large one, consisting of the reserve of £100,000, the profit between the first of January, 1863, and the 10th of January, when the functions of the old bank ceased, and certain amounts of assets and assets, with regard to which at one time it seemed probable that legal proceedings would be required. However, the result was now that they had for division £141,550, which would enable them to make a division of 15s. upon the old shares, and 1s. 6d. upon the new, or a total distribution of assets equivalent to 16s. upon each of the old shares. (Hear, hear.) He could not think that that would be considered as not an inappropriate termination to a career of great success: (Cheers). The bank was established in January, 1856; it was dissolved in March, 1863, and during seven years of its existence, the mean dividend had been rather more than 10 per cent. At the time of the creation of the new bank every proprietor of the old bank was entitled to two shares of the Imperial for every old share of the Ottoman Bank and one share of the Imperial for each new share of the Ottoman Bank, and if any proprietor had then sold he would have realised upon his £20 share a profit of 150 per cent. The shares had risen, in common with every other security, but even at the present price, an original shareholder were to realise his profit it would be 100 per cent. upon his shares, plus the £5. 5s., which was equal to 26½ per cent. of extraordinary success. was due to some little good management, and to great good fortune. The Ottoman Bank had in its constitution some of the greatest elements of success, but something was no doubt, due to the harmonious action of the board, to their vigilant attention to the affairs of the bank, and to the confidence of the shareholders, which enabled the directors to pursue that policy which had proved so advantageous. The present division exhausted the whole of the assets with the exception of £400 which would be given to those who had taken much

trouble in carrying out the liquidation. (Hear) matter of form, the adoption of the report.

Replying to a question,

The Chairman announced that the dividend was of July, but as the Imperial dividend was to there might be some little delay.

The motion was carried, and a very cordial vote of thanks to the chairman and directors.

The Chairman acknowledged the vote, and in a hearty farewell after some years of pleasant intercourse expressed his hope that in other undertakings the bank they would not meet with worse fortune than the Ottoman Bank.

The meeting then separated.

IMPERIAL OTTOMAN BANK

THE second annual general meeting of proprietors was held on June at the London Tavern ; Sir W. Clay in the chair.

The following report was read by the Secretary. The committee have the honour to lay before the shareholders the annual report. The accounts, made up to the 31st December, show a profit for the preceding twelve months, after providing for all the usual and extraordinary expenses, of £336,992. Under ordinary circumstances this would be looked upon as a highly satisfactory result, but when viewed in connexion with the severe commercial depression which prevailed throughout Turkey ; added to the fall in the value of the Ottoman Bank shares, and the reaction after excessive speculation. In the period now under review a considerable portion of the profit arose from the issue of the Turkish Loan of 1864, which loan, two millions sterling, was issued in 1864, and from it a portion of its present profits. It is, however, to be able to state that to the extension of the business and not to any exceptional sources the favourable result of the sheet is mainly due. The profits arising from the commercial business have increased more than 30 per cent. in the year of the bank's existence. There is no reason to suppose the business should not continue to increase, though in the selection of bills fulfilling the conditions of the bank, and especially a bank of issue. The bank has liberally performed its duties to the imperial government in all of its transactions with the government having been established. During the past year agencies have been established at Larnaca (Cyprus), Afium-Kara-Hissar, and Adana. The bank receives revenues on account of the government at Constantinople on terms much less onerous than when the government was formerly obliged to submit. The bank has a considerable increase of business at these places, and deducting from the net profit the interest paid on the addition to the reserve fund, and the per cent. on the statutes, there remains a balance of £135,817 5s. which propose a dividend of £1 per share, which, together with the dividend of January last, makes a total dividend at the rate of £2 per share.

£817 5s. 8d. to be carried forward to the next

moving its adoption, said the report which was laid
 ers twelve months ago, with the observations he
 n submitting it, had placed them in possession of a
 the foundation of the bank, and a full statement of its
 d rights. It would be remembered that the committee
 referred to ventured to anticipate for the institution a
 Those anticipations, he was happy to say, had been
 and he could assure them, on a full consideration of

the affairs of the bank, that its state and condition and its progress for the future, were in a very (Cheers.) It was stated in the report that the past year had arisen from no exceptional sources, a portion of the commission on the Turkish rest arose from the profitable discharge of their banking functions. He had some figures as to transacted in each of the two years with which showing the rate of increase. The mass of the account, the London and Constantinople establishments at Bucharest, Beyrout, Smyrna, Sarajevo, amounted in the year ending December, 1863, to say, for nine months of actual, and, to enable comparison, three months of assumed operations; but three months of assumed business was larger in proportionate period of actual business, and that their impression somewhat more favourable for 1863. The year ending 31st December, 1864, the gross amount was £66,000,000, and he submitted that it was in a small compass more conclusive evidence of the success than this comparison of results of the two years. In this statement, too, was omitted one item, important in amount, viz., the consignment business, which increased rather more than 50 per cent. This was their business, as yielding a great profit, accompanied. They had heard from the report of the increase in business. At the last meeting the committee stated that the bank should take shares in and other institutions of great power and importance at Constantinople, Société Générale Ottoman. He was happy to see with which they entered into that alliance had been successful. That society had been eminently prosperous; and in doing business with it, the bank had obtained a result which prospectively formed the motive for entering into the matter only had not answered the expectations of the issue of promissory or bank notes, payable on demand, for reasons for their disappointment in this respect. It was time to accustom the public to a note circulating, and in Turkey hitherto the course of growth of time, and in Turkey hitherto the course of such as to inspire confidence in paper money, and to be thoroughly assured of the constant convertibility of the notes, naturally hesitate to take them. The second condition of the commercial business of Turkey was carried on generally in small denominations, both native and foreign, and the currency of a known and recognised kind, for which it could be seen at once as the equivalent and substitute. Perhaps they be got over if they had the co-operation of the bank, he hoped that ultimately they would obtain it, and the government must be aware that a well-established and powerful bank would be of the greatest assistance to their own operations. Therefore he was still of opinion that the power of issuing bank notes would become a source of the power of Turkey and of profit to the Imperial Ottoman Bank, which thought would naturally arise from the figures in the report.

ation he had given, viz., that with the growing prosperity of Turkey, prosperity of the bank was intimately mixed up. They had a deep and abiding interest in the welfare and prosperity of Turkey. (Cheers.) Her great resources should be developed, that her financial system should be established on a firm basis, and that her credit should be maintained and advanced in the great European centres of commerce and wealth—these should be the object of the government of Turkey—but they should not be the object of the bank. (Cheers). If they were actuated by no other motive, an enlarged and enlightened view of their own interests would prompt them to lend a willing assistance to that government in the accomplishment of these objects. (Cheers). It would never be worth while to obtain a transitory or temporary profit or advantage by any means, which should not only that should damage but that should not promote the best of the Turkish empire. And the proprietors might rest assured that as these were the principles by which the committee had hitherto been guided, so they would continue to be the principles by which they would continue hereafter to be actuated; and in addition to discharging the functions confided to them by the imperial concession which made the Bank of Turkey, they would always be ready, when it should be the wish of the Turkish government to ask their counsel and assistance, to give a ready and ready assent to any such invitation, and to join with them in the accomplishment of those objects of national interest to which he had alluded. (Cheers.) There was one other matter. The proprietors saw by the figures the vast increase which had taken place, and was taking place, in the legitimate and profitable operations of the institution, and the committee thought it very likely that it might lead to the necessity of a further issue of capital. He was not prepared to say at present what mode it might be thought best to raise such additional capital, when it was resolved upon the shareholders would be called together for a special meeting to consider the subject. The authority of the Turkish government they had already, and it would of course depend upon them what resolutions should be adopted. Although he could not state the terms on which it might be proposed to raise the new capital, the committee desired to follow the example of the old Ottoman Bank in raising it on such terms as would be acceptable to the proprietors. In conclusion he moved that the report and accounts now read be received and adopted, and that the dividend for the year ending 31st December, 1864, be fixed at 30s. per share, and that that dividend, less the 10s. paid on account in January last, be paid on and after the 1st July next.

Rate seconded the resolution.
A shareholder inquired whether the sum stated as profits represented net profits, from which the expenses of management had to be deducted?

Chairman—The profits are gross, from which the whole of the expenses of the London establishment and of our ten branches have to be deducted.

A shareholder asked what amount had been realised in the shape of commission on the Turkish loan? Supposing it to have been as large as in 1863, their ordinary profits did not show such progress as might have been looked for.

Chairman replied that in 1863 the profit obtained from the loan was very large, whereas in 1864 it was very small. The profit shown in the present accounts, therefore, arose for the most part from ordinary banking operations, and not, as in 1863, mainly from the commission upon

the loan. It would not be judicious to state the true sources of profit.

Another Shareholder inquired why it was that was issued through the agency of the General that of the Imperial Ottoman Bank?

The Chairman had almost rather the question he would answer it as unreservedly as he could in the first place, that a large financial operation of the government of Turkey in which the banks were in April they were informed that a commission government was in Paris to make the arrangements tended to offer the bank the opportunity of part. Accordingly, a delegation from the board went as a commissioner. The offer was then formally made to the operations on certain terms and conditions, once to say "aye" or "no." This state of affairs was from much difficulty; for they could have no circumstances, in refusing to take part in an operation of which they had not been consulted, and considered it desirable for them to engage in it, and doubtless would conduce to the interests of the bank, or to the subject, it would promote the financial empire, they did not hesitate to decline the offer.

A Shareholder remarking upon the fall in the price per cent. since last year, inquired whether it was the rumours that had prevailed of heavy losses in the management, and whether there was any foundation for it.

The Chairman knew nothing of any losses; he and his colleagues gave the most unqualified assurance. (Cheers.) With regard to the fall in the price of the kinds had fallen since last year, but he believed a rise in the Imperial Ottoman Bank shares.

The motion was then put and carried unanimously. The Chairman and his colleagues received

EUROPEAN ASSURANCE

The annual general meeting of the shareholders was held on June 1st, at St. James's Hall, Mr. Wickham, Mr. Cleland, secretary, read the report. It stated that the new life and guarantee policies issued during the year amounted to £23,149. 16s. 6d. In accordance with the resolution of the shareholders at the last annual general meeting, the business of fire insurance in June last. The department amounted to £13,259. 17s. 11d. The amount received in premiums during the year was £1,000,000 and guarantee claims paid during the year, amounted to £86,717. 4s. 10d. The increase in the business during the year had been £52,925. 18s. 10d. and the British Nation Life Assurance Association recommended the recommendation of Mr. Finlaison, the Governor, to be completed. The results of the union the directors

shareholders with great satisfaction. The subscribed capital is raised upwards of £700,000, the number of shareholders to more than 1,200, and the annual income to upwards of £300,000, while the new premium income of the united companies for the year 1864, amounts to £46,507. The progress of the societies since the union had been highly satisfactory. The premium income derived from new business during the last two months was at the rate of more than £50,000 a year, an amount considerably in excess of that effected by the two societies in their separate condition, and the directors fully anticipated that this rate would be still further increased. The various agencies were brought into a greater degree of efficiency. The Chairman, in moving the adoption of the report, referred to the various operations of the society during the past year, and congratulated the shareholders on the results that had accrued. At the previous meeting he had the pleasure of congratulating them on the position in which the society then stood, but he now felt more strongly justified in congratulating them, for he never met the proprietors under such advantageous circumstances as at the present time. With respect to the amalgamation of this company with the British Nation Life Assurance Association and the Mercantile Union Fire Company mentioned in the report, he believed that that amalgamation would be of great benefit, and he congratulated the company on having obtained so much increased and good business. Their premium now amounted to £1,000 a day, and their new business to £1,000 a week. This was quite enough to show the prosperous condition of the society. Mr. J. E. McConnel seconded the motion, and it was agreed unanimously. Dr. Watts moved a vote of thanks to the chairman and board of directors for their attention to the interests of the society, and for the highly satisfactory report of its condition and prospects which had been presented. The motion was most cordially agreed to, and the chairman returned thanks. The retiring directors were unanimously re-elected; Mr. J. Parker was elected auditor.

ATLANTIC AND GREAT WESTERN RAILWAY.

The accompanying letter and report received from Mr. Moseley, who has recently visited the United States and minutely inspected the Atlantic and Great Western Railroad, will, we think, prove interesting to holders of this company's securities, showing as it does of the great variety of the sources from which traffic will be derived, and the vast amount which will immediately accrue and will ultimately swell into an aggregate equal to, if not greater than, that of any railroad of similar length in any part of the world.—

“New York, May 29th, 1865.

Edw. F. Satterthwaite, Esq., London.

“DEAR SIR,—In accordance with your instructions, I have made a careful examination of the Atlantic and Great Western Railway, and also the lines connecting with it at Dayton, and on to St. Louis.

“The main line commences at Salamanca, on the Erie Railway, 414 miles from New York, in the State of New York, and passes through the States of Pennsylvania and Ohio, terminating at Dayton, a total distance of 386 miles.

"The broad gauge lines in direct communication with the Great Western are :

The Erie Railway, New York to Salamanca
 The Cincinnati Hamilton and Dayton Railway
 The Ohio and Mississippi Railway

"The railroad crossings and connection of the

"It affords me much pleasure to be able to report that the Great Western line is in most excellent order, the exception of some 20 miles of metal west of Springfield, in first-rate condition. These 20 miles are now being replaced. The rails taken up will be used for additional sidings at the important points on the line, and which, when completed, will be about 15 miles in length.

"It is also most satisfactory to be able to confirm the report made in March last, that during the great floods the amount of damage done to the permanent way was trifling, and that all repairs were executed with the aid of a staff of "track layers." The stations on the line are more or less of a temporary character, with the exception of the head quarters of the Company, a very fine building for the various departments, refreshment-rooms

st class hotel (admirably managed), but still far too small to accommodate the greatly increasing business. In due time great alterations and additions will be made to all the stations, but at present they are well adapted to the traffic, and it is policy to thoroughly develop the traffic before expending large sums upon improvements, that in the course of a year or two are sure to prove inadequate. There are in course of construction at Meadville large workshops and engine-sheds, which, with the houses belonging to the Company and rented by employes, cover an area of about 60 acres. At the Kent station there are also large works being erected, consisting of car and smiths' shops, and engine-sheds, all being built in a most substantial manner.

'All the heavy works now in hand are being pushed on with vigour, more especially the engine-sheds which will be completed before the coming winter.

'The rolling stock consists of—

- 91 Locomotives on line.
- 35 Ditto building.
- 51 Passenger cars (to carry 60 persons).
- 40 Ditto building.
- 16 Baggage and Mail cars.
- 2,566 Freight cars.

'It is all in splendid order, the engines being of a particularly fine description.

'From Dayton to Cincinnati the line belongs to the Cincinnati, Hamilton, and Dayton Railway Company. This Company expended \$1,500,000 in laying a broad gauge "straddle" track (rails on either side of narrow gauge rails), and building passenger stations and freight houses to accommodate the Atlantic and Great Western traffic. The passenger station at Cincinnati is one of the best and most convenient in the States, containing arrangements for the comfort of passengers not usually to be met with on American lines. A fine suite of offices are nearly completed for the use of the Atlantic and Great Western Company. The freight houses adjoin the station and are rented by firms who take the freights from the Railway Company, charging for storage, and assuming all the responsibility of delivery; an excellent arrangement that relieves the Company of a vast amount of risk. The line from Dayton to Cincinnati is in perfect order, well ballasted and maintained, the stations are good, and there is every facility for conducting a very large traffic with regularity. The junction with the Ohio and the Mississippi Railway is about half a mile from the main station. Arrangements are contemplated by which the two lines will unite at the main station. The line to St. Louis, considering the severe winter and the floods, is in very good condition. The track is being carefully repaired, and a large amount of iron is being re-rolled and re-laid. It is the intention of the Directors to re-roll nearly all the metal now worn. The line is broad gauge throughout.

'The Franklin Branch has been extended from Franklin to Oil City, 84 miles, a very important addition to the line. From Meadville to Franklin the rails originally laid are very light, but from the fact of the joints being bedded they have worn most surprisingly well, and would last for years to come. However, it is intended to replace them with the same description of rail used on the main line. The light rails will be kept in stock in all probability for sidings. The track is well maintained, and the enormous traffic over this branch is admirably managed.

"The Cleveland Extension runs over the Mahoning track; the narrow gauge cars and engines belong to the Cleveland Extension, and are therefore used in common with the broad gauge cars, the gauges being run with the greatest safety. The traffic is heavy and the traffic over it immense.

"The works of the Buffalo Extension and New York Extension will be energetically carried on. Those on the Erie Extension are nearly complete.

"Having thoroughly satisfied myself that the Erie Extension in proper order, I have devoted considerable time to the traffic prospects for the future. I append a list of the villages within a radius of about 20 miles from the Erie Extension. It will be seen that the railway passes through some of the best tracts. In fact, from Saegar Town, (97 miles from Buffalo) the country is as highly cultivated as any part of the State.

"I am prepared for somewhat lower traffic in the next few months of this year, and believe that they will be lower than the present period, for the following reason: The heavy demand for gold (consequent upon the large fall in gold) in the West, and the exports, such as tobacco, grain, hemp, and hogs, to the seaboard, holders generally hoping for a rise in prices, and, as a rule, being unwilling to face a sudden fall in the west, and sooner or later must come east to sell their harvest there will be an immense pressure of freight, and be enabled to advance their rates.

"The connections with the various cross-roads, and when arrangements are completed for additional cross-roads, and when arrangements are completed for additional cross-roads, will open up to the Atlantic and Great Western the following: Corry, Clarkesville, Mansfield, and Galion, for example, are now in existence, and in addition a class of traffic is being sought after—I mean the stock traffic. Dull as the present time, a neighbouring line for instance, is carrying 50 cars per diem. This, at 30 dols. (a minimum) is worth 1,500 dols.

"I anticipate that the Atlantic and Great Western will carry the same traffic in dull times from Cleveland to Saegar Town, stock, however, to be conveyed from Cleveland to Saegar Town, which will be forthcoming from Mansfield, Galion, and The States of Kentucky, Southern Illinois, and Indiana, and stock-producing States, and the Atlantic and Great Western at these points (arrived at by the Ohio and Mississippi and Dayton, and Cincinnati and Indianapolis), and stock producers an unbroken broad-gauge line to the seaboard, calculation to estimate the stock traffic over the Erie Extension the road at from 50 to 100 cars per diem. Taking an average of 50 dols. to 75 dols. per car, and the local traffic, which, added to the Cleveland estimate of 3,700 dols. per diem, or 22,200 dols. per week, would be a traffic alone.

"A great source of traffic at present is, and will be, the oil from the Pennsylvania wells. Notwithstanding the fact that for the last three years, the supply shows no sign of diminishing, and sequence fresh adventurers are daily arriving and

oil." The large number of companies formed of late, has added to an enormous extent, and materially added to the Franklin Branch. It is estimated that nearly 2,000 have started this season; the pumping engines for these new wells are scattered in all directions,—200 were on the Franklin line last week. The extension of the line to Oil City will be an immense amount of oil traffic, that last year was carried by other routes. A large plot of land has been presented in the neighbourhood of Oil City, on the river bank, upon which houses and sheds will be built exclusively for Petroleum. Oil will be sent direct from the wells on the creek to these houses, saving of some seven miles of road hauling will be required to suppose that a large amount of traffic that has hitherto been carried by other routes will be diverted to the rail. The number of barrels transported on the Atlantic and Great Western line last year amounted to the sum of 675,028.

The course of a very short time, will form one of the largest. The facilities for shipment at Cleveland are so great (the line has been 3,000 and 4,000 feet of river frontage) for the West and for the railroads, that it is impossible to estimate what the value will be. At present it is only beginning to be developed. In the future, western shipments, there will be an enormous demand for the Buffalo Extension, and Erie and Niagara line. Cheapening a large number of manufactories to the towns in the neighbourhood of the coal fields. It is a satisfactory feature that the Mahoning Youngstown (the southern terminus of the Mahoning line) of the coal district) to Cleveland, return with iron ore. The "Mahoning Works," at Youngstown, consume 240 tons of coal, and turn out in bars, sheets, and castings of iron per day. The freight business of these works in the future, and manufactured iron to different parts, is worth an enormous amount. Two other firms here contribute 75,000 dols. and others from 50,000 dols. to 60,000 dols.

As the sources of revenue alluded to, there is a very large amount of freight traffic at present derived from dairy produce, and a higher rate for transport than any other description of

freight being fully open to Cincinnati and St. Louis for through traffic, no doubt that the most sanguine expectations will be realized.

At present, owing to the want of rolling stock, no through trains have not been canvassed for. One through train is now running to run on the 8th instant, another will be placed on the middle of June, and a third by the middle of July. The opening of the through line for passengers will, however, be a great stimulus to freights, and as new cars are added to the line, energetic measures will be taken to secure a class of freight traffic not competed for, viz., general merchandise bound west. A large amount of goods traffic to be obtained from the Cleveland and Michigan lines running from Michigan to Chicago. The Atlantic and Great Western will be in a position to give more than double the amount of freight carriage east compared with the total now carried for the Atlantic and Great Western. The relations between these two lines are of a very friendly nature, and the evident anxiety on the part of the managers to assist in

developing the Atlantic traffic. It is also gratifying that both at Cincinnati and St. Louis, all the pleasure of meeting spoke in the most encouraging traffic prospects, and expressed themselves highly in the early opening of the through route. Apart from the opening of through traffic, I am convinced that the local traffic at the present time has been the great source of revenue for the management and development will yield a revenue more than sufficient to the requirements of the bondholders. No other line in the United States passes through more highly cultivated and fertile tracts, which from the very first have thrown an advantage upon the line.

"When it is considered that this great railway has been in operation five years ago, during a period of civil war, with wages higher, than ever remembered; I think it is fair to say that it may fairly congratulate themselves upon the progress made at the present time. To the amazing energy of Mr. L'Houssaye, Chief, in the face of every possible opposition, is due.

"Under the active presidency of Mr. L'Houssaye, the management of Mr. McLaren, the General Superintendent, has effected vast improvements in the conduct of the traffic. Indeed, already important savings have been effected in the expenses of the road. Both these gentlemen speak of the success of the undertaking, and of the large increase in traffic must follow upon the perfect equipment of the line.

"The following are the stations on the Atlantic and Great Western with the towns and villages alluded to.

"I am, dear Sir,

"Yours faithfully,

The number of miles, after the name of the station, and of each place from Salamanca, which is the connecting way and transfer station, situated in Cattaraugus County, population of the county is 43,735.

Steamburg (12 miles). A small place; lumber business derived from this station.

Randolph (18 miles), population 1,500; Railroad station, population 500.

Kennedy (25 miles), population 1,200; Ellington, population 1,200.

Jamestown (34 miles), population 5,000; important manufacturing and shipping point. Towns tributary thereto are: 400; Frewsbury, 600; Ellery, 400; Fentonville, 400; Russelburg, 600; Sugar Grove, 1,000; Geary, 500; Stockton, 700; Maysville, 1,500. These towns are all in Chautauqua County, the population of which is 10,000. The line passes through south part of county; Lake Shore, 10 miles. There is a pleasant route to the Lake Shore, 10 miles east of Buffalo, via steamboat on the Chautauqua and thence by coach, 7 miles to the railway; this is the case in the summer months.

Ashville (41 miles), population 1,000.

panama (48 miles). Town of same name distant 2 miles; population 100.

Columbus (57 miles), population 800; in Warren County, Pennsylvania, population of which is 19,190.

Corry (61 miles). This town is five years old, population 4,000. Cross-
of the Philadelphia and Erie Railroad, and Junction with the Oil
ek Railroad, an important point for forwarding oil, and receiving
chandise and machinery for the oil regions. Here are the Downer Oil
nery Works, containing iron tanks which hold 10,000 barrels of oil.
860 the site of Corry was a forest, not a house to be seen.

Concord (66 miles). A small village.

Mill Village (79 miles). Only a station, no village of any consequence,
erford, 4 miles, population 4,000. Philadelphia and Erie Railroad
directly alongside Atlantic and Great Western Road from this station
Corry.

Millers (85 miles). Small places.

Cambridge (88 miles), population 2,000. Edenboro, 6 miles, popula-
600.

Eger Town (97 miles), population 500. From this station, west, a
ked change is visible in the country; up to this point there is much
st land, and the resources of the country are undeveloped. Still,
h has been done during the last years, and a daily improvement may
pected.

Meadvile (103 miles), population 8,000; important commercial and
ufacturing town. General offices of the railway are at this place, and
rge and admirably managed hotel, the "McHenry House," where
engers dine, &c.,—indeed, if it were twice the size, it would always
Eight distinct table d'hôte dinners are served here for the conve-
ce of persons living in the house, and passengers arriving by the trains.
company's workshops are in a forward state, and will be of great
ce when completed. Tributary towns—Riceville, 18 miles, population
0; Cooley, 12 miles, population 500; Conneout Lake, 7 miles, popu-
600; Cochran, Utica, Evansbridge, Sugar Creek, small villages
Franklin Branch, which joins the main line at Meadville, in Crawford
nty, the population of which is 48,755.

Franklin (131 miles), on the branch from Meadville, population 5,000;
t point for the shipment of oil. This station is at the junction of
ch Creek and Allegheny River.

l City (8½ miles from Franklin) furnishes a great amount of traffic
ssengers and freight to the road, population 10,000; situated at the
tion of Oil Creek with the Allegheny River. In the spring and fall, when
water is high, but before the opening of the line to Oil City, most of
oil went down the Allegheny to Pittsburgh, and thence east. In the
mer when the water is low, and all through the winter, all the oil
es over the Franklin branch.

utton (110 miles.) No village, but a good lumbering point.

Evansburg (115 miles.) Town of same name is 4 miles from station,
lation 800. Hackstown, 5 miles, population, 500; Georgetown,
miles, population 700.

lamsville (121 miles). Population 500.

ugar Grove (124 miles). Small station.

reenville (129 miles). Population 4,000. Tributary towns—Miner,
miles, population 2,000; New Hamburg, 7 miles, population 600;
ware Grove, 9 miles, population 100; Centreville, 28 miles, population

200; Balm, 25 miles, population 100; New
population 100 each; Shackleyville, 10 miles,
Crossing on Erie and Pittsburgh Railroad,
Clarksville (136 miles.) Population 1000.

runs parallel with Atlantic and Great Western
towns—Newcastle, 17 miles, population, 3,500
tion, 809; West Middlesex, 20 miles, population
population 1,500; Jamestown, 10 miles, popu-
population 300; Lindenville, population 200;

Crawfords (139 miles.) Large coal fields at

Orangeville, Ohio (141 miles). Population
Sharon, 7 miles, population 5,000; Hartford, 4
Kinsman, 4½ miles; Maysville, 5 miles; Shar-
The above-mentioned towns have a popul-
each.

Burghill (145 miles). Tributary to this sta-
stations, under head of Orangeville.

Large dairy farms are along the line of the
and Akron, and consequently large shipments
made from these points. The amount varies
annum from each station.

Johnson's Summit (149 miles). Fowler, 5
tion 700.

The remarks appended to Burghill station a-
as well.

Baconsburg (154 miles). Population 500;
1,000; Johnson's, 6 miles, population 500;
tion 500; Williamsfield, 20 miles, population

This is called the Mecca oil region; and pro-
rate quantities.

Warren (162 miles). Population 4,000; en-
power, furnished by the Mahoning River, which
power in mills, &c., &c. Tributary towns—Gu-
600; Bristol, 9 miles, population, 500; Farm-
600; Southington, 10 miles, population 500;
population, 800.

Above towns are in Trumbull County, Ohio
30,813.

Leavittsburgh (164 miles). Crossing of Cle-
here, but is an important transfer point, both
and west. Towns on this branch between Leav-

Great Western Railways, and the Cleveland
Large quantities of iron ore pass through on its

affording a lucrative business to the Atlantic and Great Company.

An increasing town of 4,000 inhabitants, at the southern end of the branch, and in the centre of the cold fields of Ohio. The works supplied via the Cleveland Branch, with ore from the Lake.

Very rich in coal, and the traffic derived from it from the Lake, and elsewhere, cannot but prove a lasting source of employment.

However, in consequence of a strike amongst the coal miners, has suffered much. The miners belong to a trade's union, and demand higher wages, but being now badly off for money, will not work in two or three weeks.

Towns to Youngstown are—Sharon, Pa., which has also an Erie canal to Erie; New Castle, Lowell, and Mahoning, manufacturing towns, the business of which is largely in coal banks underlie nearly all this region, to which the coal is transported for smelting.

(miles). Situated between the main line and Cleveland is Youngstown, population 1,500. Tributary towns—Sellington, 5 miles, population 1,000; Messopotamia, 15 miles, population 1,000; Lordstown and Windsor, 20 miles, population 800; dairy farms supply the region.

(miles). Small town, but country in the vicinity is densely settled. Articles of freight are butter and cheese, for New York and St. Louis.

(miles), population 1,000. Tributary towns—Painesville, 10 miles, population 800; Palmyra, 10 miles, population 500, freights, and all the region from Akron, eastward to Grangeville, is largely in dairy; although small towns, some of them furnish thousands of cheese and butter per annum; it is desirable for the country being paid for its transportation than for any other.

(miles), population 4,000; in Portage County, population of 1,500. Crossing of Cleveland and Pittsburgh Railroad. Towns—Akron, 4½ miles; Randolph, 12 miles, population 500; Shalersville, population 600; Streetsburg, 5 miles; Shalersville, population 600. The Cleveland and Pittsburgh road is a good central portion of Atlantic and Great Western Railway.

(miles). Lately called Franklin Mills, is a midway station 196 miles from Dayton, and in consequence of its situation for the workshops, &c., of the Company. The site is of white sandstone found on the spot, and are substantial. They consist of two large car sheds, one of which is now under construction, a 60-horse engine working some valuable machinery, a smith's shop and engine shed with room for eighteen workmen, and a blacksmith's shop, the latter, when completed, being designed for the use of the engine. The foundations are laid for a fine machine shop, a house and paint shop; these, together with a tank for the use of the engine, will complete a very perfect system, and prove of great service to the Company.

(miles), small town, population 500; Cuyahoga Falls, population 1,500.

Akron (202 miles), population 7,000; the most important point in the State, capacity of mills being 1,500,000 bushels on the Ohio Canal, and on the Cleveland and Toledo Railroad; has the best water power of any town in the State; large agricultural implement shops here. Toledo, 11 miles, population 400; East Liberty, 11 miles, population 400; Town, 13 miles, population 800; Manchester, 13 miles, population 800; Middlebury, 2 miles, population 1,000.

New Portage (207 miles.) On canal from Toledo to Akron, from which much business may be secured. The country is fertile valleys of the Scioto and Muskingum. Cities of Newark, Chillicothe, Circleville, &c. Circleville, 10 miles, population 2,000; Hinckley, 5 miles, population 1,000; Liverpool, 15 miles, population 1,000; Albion, 25 miles, population 2,500; Albion, 25 miles, population 600. Large earthenware works at

Wadsworth (215 miles), population 500, on the River Styx, to the north; Doylestown and Circleville villages with a population of 500 to 800; divide of Silver Creek branch of the Atlantic and Great Western, long, being the first coal field reached on the line. Mining, now 200 tons per diem; two more mines soon be opened. It is expected to supply the State with the coal, which is of the celebrated Chipewagon gas purposes, situated in Summit Country; population 500.

Seville (226 miles), population 1,200. Triadelphia, 10 miles, population 500; Medina, 9 miles, population 1,000; Lafayette, 7 miles, population 1,500.

Bridgeport (232 miles), population 800; Leipsic, 6 miles, population 400.

West Salem (238 miles), population 1,000; population 22,700. Tributary towns—Perry, 300; Converse, 3 miles, population 800; Honover, 3 miles, population 400.

Polk (244 miles). Population 400. Tributary towns—Rousburg, 8 miles, population 500; Ashland (252 miles), population 3,000; Ashland, 21,693. Product principally wheat. Tributary towns—Jeromesville, 8 miles, population 1,000; Savannah, 7 miles, population 500; Windsor (261 miles). Population 300. Triadelphia and Mifflin, 4 to 6 miles.

Mausfield (269 miles). Richland County. Population of county, 31,121. The road crosses Fort Wayne, Sandusky and Newark, with both of which it connects at this station for Pittsburg and Chicago. The Company have agreed to share equally the cost of the station here.

Ontario (277 miles). Population 500.

Galion, Ohio (283 miles). Population 2,500. Columbus and Cincinnati Railroad, eastern terminus at Indiana Railroad in Crawford County, population 21 miles run side by side with the Railroad.

(miles). Population 600.

(s). Population 3,000; county population, 15,891.

(es). Population 700. From hence to North Lewis-
s, the country is new and thinly settled. The woods
le timber. From Marion, east, the country is highly

(miles). Population 800. Bryant, 4 miles; Carey, 7
6 miles. 500 to 800 each in population.

(es). No town on line; small village 1 mile distant;
mber (timber) sent from this station to Dayton and

(338 miles). Population 1,000; Bellefontaine, popula-
erty, 12 miles, population 2,000; Woodstock, popula-
rg, 6 miles; East Liberty, 8½ miles; Maysville, 10
miles; Middletown, 4 miles; Pickerstown, 8 miles;
. These towns, from 500 to 2,000 inhabitants. Rail-
he centre of the county.

(43 miles). No village here.

(miles). No town; small village north of it of 300

(es). Population 5,000, in Champaign County, Ohio;
y, 16,591. To this point from Dayton the line runs
andusky, Dayton, and Cincinnati Railroad, and here
om Indianapolis, Indiana, to Columbus. A fair business
road. A large live stock trade from the States of
s will strike here.

(miles). A small village; population, 300. The road
on runs near Mad River. This valley is not excelled
agricultural resources by any portion of the West.
k County (366 miles, population 8,000; a large manu-
lling capacity 130,000 barrels per annum; town is 1½
a very enterprising place.

(es). No town here.

, population 1,000; town one mile from station; popu-
445. Road traverses centre of county east and west.

County (378 miles), population 1,200; of county
airfield 2 miles, population 1,000; Carlisle 4 miles,

(miles). No village, 6½ miles from a station; a large
barrels flour per diem, and an extensive distillery.

emery County (387 miles), population of city 22,000, of
a manufacturing town, largest item of production being
of 150,000 to 200,000 barrels per annum; the tonnage
y statements from books of various railroads to New
hiladelphia and Baltimore, was 24,699 tons; it is
nus of the Cincinnati, Hamilton, and Dayton Railroad
eastern terminus of the Dayton and Western Railroad
terminus of the Greenville and Miami Railroad 42
minus of the Little Miami Railroad 70 miles from
of the State). The southern terminus of the Dayton
ilroad 140 miles; also of the Sandusky Dayton and
d 154 miles. Not much trade will be drawn from the
antic and Great Western Railway, but a large amount
e south and west. A large manufacturing and mer-

cantile jobbing business is carried on here. The road traverses the centre of the county, connecting Cincinnati, Hamilton, and Dayton Railroad with the largest commercial and manufacturing city of the West, with a population of 200,000.

In the above report the population has been taken from the census of 1860, since which time it has considerably increased.

POST-DATED CHEQUES—ARE THEY VALID?

[From a Correspondent]

A CASE of great commercial importance, and of great legal world of Westminster Hall in a state of suspense for some time, has just been decided. The result to the mind of the public, and especially the mercantile mind, have been relieved by the decision just come. It is that a post-dated cheque is not illegal, and that nothing illegal in drawing a cheque on, and signing and dating it on the first of the succeeding month. It will indeed be a relief to many of our readers to know that the court had been otherwise than it has been. The objection has been very serious indeed: for nothing more serious than the great commercial London than for mercantile purposes. And, therefore, if it had been decided that post-dated cheques cannot sue upon them, and that the purposes null, void, and ineffectual, and that the unscrupulous and unprincipled drawer of such a cheque has a fatal objection that it is post-dated, and that the claim of *bonâ fide* holders who may have taken such cheques for the cheques.

The main facts of the case which has just been decided are the same as occur in this city every day of our lives. On the 24th of June last year, the defendant drew a cheque for £350, dated, however, on the 24th July. The plaintiff, who knew that the cheque was not to be presented on the mentioned date. A endorsed it to B, a friend of the plaintiff in the action on the day it bore date. The plaintiff had no intimation whatever of the fact that the cheque was post-dated. The plaintiff having sued the defendant for the cheque, the objection was taken, (first) that, being post-dated, it was illegal, and so void; and (secondly) that, being post-dated it was in effect a bill of exchange, and was therefore liable to a stamp duty of four shillings and one penny chargeable on cheques in general.

ly stamped document, and on that account inadmissible in any court of law or equity. These objections were learnedly argued before the Court of Queen's Bench, and will be seen from our short report of the case elsewhere. The Lordships have pronounced an unanimous decision against these objections; and the plaintiff thus recovers.

This decision will give the greatest satisfaction to the bankers, indeed, to all commercial people, into whose hands cheques are every day liable to come, and who, if this decision were the other way, would be continually exposed to the objections incident to post-dating, it would be well that this decision is subject to appeal to the Court of Appeal, and that in all probability it will be taken into consideration can hardly be considered as having finally and settled the question, until it has gone through the trying ordeal of error." Our bankers and merchants would, meantime, do well still to be chary of accepting cheques which have reason to suspect are post-dated.

It is only if the decision stands unreversed, that the Legislature might bring in a Bill specifically prohibiting and preventing post-dating of cheques: because, they will say, such a measure is necessary for the protection of the revenue, which would be invaded, or, at least, deprived of the difference between the value of a post-dated cheque, and the stamp duty on a bill for the same amount as the cheque. There can certainly be no objection if the decision just pronounced remains law, post-dating will become the rule and not the exception, and bills will be drawn by exception and not the rule. For who will be lavish of four shillings, to Government, when one penny will do? In the case we are referring to, for instance, a man who had clearly lost a sum of three shillings and eleven pence, and the drawer of the cheque has cleverly saved himself that

sum, however, may eventually be the law on the subject. It is very much to be hoped that *bona fide* holders of cheques of value and without any knowledge of the fraud will be allowed to recover as against the drawer of the cheque, and not against holders antecedently to himself.

DEATH OF SIR J. W. LUBBOCK.

SIR JAMES LUBBOCK, Bart., of the well-known banking firm of Messrs. Lubbock, and Co., a gentleman who devoted much of his time to philosophical and scientific pursuits, died at his residence, Elms, near Farnborough, on the 20th June.

The late Sir J. W. Lubbock, who was the son of the late Sir J. Lubbock, was educated at Eton, and at Trinity College, Dublin, where he graduated in 1825, being first class in mathematics. He was many years Treasurer and Vice-President of the Royal Society, Vice-Chancellor of the University of London, and President of most of the principal scientific societies, including the American Academy of Arts and Sciences, the Royal Society of Turin and Palermo. He spent much labour and time on the study of the Moon, which is thus referred to in Grant's "History of the Moon":—

"Sir John Lubbock has investigated the lunar theory, and has published valuable papers which have appeared in the volumes of the Philosophical Transactions, and also in a special treatise on the subject. The method of variation which he has introduced into his researches, for determining the mean longitude of the moon as the independent variable, is a practice which has always been pursued in the lunar theory, but the lunar it had been hitherto deemed more convenient to express the longitude in terms of the true, considered as the independent variable, and then by the reversion of series to obtain the longitude in terms of the mean. The eminent geometer Laplace perceives, however, that the use of the mean longitude as the independent variable conduces to greater simplicity in practice, and relates to the lunar perturbations. His example was followed by Poisson, who introduced another method into the lunar theory, by employing in his researches the method of variation of elements. The only difficulty which has attended the lunar theory arose from the errors in the tables, which have occasioned so much fruitless discussion since the beginning of the nineteenth century. Although the inequality of the action of the sun, which Laplace suggested, was generally believed to be the cause of these anomalies, no attempt had been made to calculate its real value, and the inadequacy to account for the errors of the tables was in doubt. Poisson, having examined this point, discovered the important fact that the disturbing action of the sun produces an inequality in the moon's mean longitude, which was first pointed out by Laplace. He then considered the inequality of the action of the sun in the compression of the two hemispheres, and found, as already done, that it was quite insensible. Sir John Lubbock, at the same time, very simply arrived at a similar conclusion by his own formula."

Sir John also did much to improve the tables of the Moon, which he received one of the Royal Medals for his services. The "Nautical Almanack" were for some time revised by him. The Nautical Almanack for 1841 was the last published on this subject:—

"It is to Mr. Lubbock that we are indebted for the improvement of the theory of the tides as given by Laplace in the "Du Flux et Reflux de la Mer," with the results of his observations from a period of nineteen years in the port of Liverpool. The results which was published in our transactions for 1831, and the elaborate discussion by Mr. Depion, under Mr. Lubbock's direction, are also due to his labours."

more than 13,000 observations, and the results were of great importance, not merely as furnishing the materials and the general rules for the construction of tide tables, but also for the general accordance which they exhibited with the equilibrium theory of Bernouilli, particularly with respect to the semi-menstrual inequality. This agreement was the more important, as affording the indication of the real existence of a physical connexion between the theory and observation, and as consequently justifying such a further examination of its consequences as might lead to the discovery or suggestion of such modifications of it as would lead to its general accordance with the laws of all the facts observed."

And on the same subject, Grant's History of Astronomy says :—

The important question of the tides has recently attracted considerable attention in this country. The 'Encyclopædia Metropolitana' contains a valuable essay on the mathematical part of the subject, by Mr. Brewster, founded on the theory of undulations. Sir John Lubbock and Dr. Brewster have been engaged during many years in determining the laws of the tides by observation, and in tracing their connexion with the places of the sun and moon. The results to which they have been conducted by their researches, are contained in a series of admirable papers, which continue to be published from time to time, in the volumes of the Royal Society. These distinguished philosophers are now endeavouring to do for the theory of the tides what astronomers had done for the lunar theory previous to the establishment of the theory of gravitation."

In conjunction with Mr. Drinkwater Bethune, he wrote an Essay on Probabilities, for the Society for the Diffusion of Useful Knowledge. This was subsequently reprinted, but owing to some mistake in the binder, it was described as "De Morgan on Probabilities." This extraordinary mistake was not discovered until the work had been in circulation for some years. His treatise on "Astronomical Refractions," originally published, we believe, in 1840, was also reprinted. Annexed is a list of the titles of some of Sir John's principal publications :—

On the Theory of the Moon, and on the Perturbations of the Planets." Parts.

Account of the 'Traite sur le Flux et Reflux de la Mer' of Daniel Bernouilli."

An Elementary Treatise on the Computation of Eclipses and Occultations."

Remarks on the Classification of the different Branches of Human Knowledge."

An Elementary Treatise on the Tides."

On the Heat of Vapours and on Astronomical Refractions.

On Currency."

On the determination of the numerical Values of the Co-efficients in series consisting of Sines and Cosines of Multiples of a variable angle."

On Shooting Stars."

On the Attraction of Ellipsoids."

On Cask Gauging."

Note on the Calculation of the Distance of a Comet from the Earth."

"On the Limits upon the Earth's Surface within which a Star or Planet by the Moon is visible."

"On the Divergence of the numerical Co-efficients of Longitude in the Lunar Theory."

"On the Census."

"On some Elementary Applications of Abel's Theorem."

"On the Double Achromatic Object Glass."

"On some Problems in Analytical Geometry."

"On a Property of the Parabola."

"On a Property of the Conic Sections."

"On the Wave Surface in the Theory of Double Refraction."

"On the Variation of the Arbitrary Constants in the Solution of Problems."

"On the Arabic Names of the Stars."

"On the Stability of the Solar System."

"Proceedings of the Excise Committee, relative to the Duties on Spirits."

"Table of the Sines and Tangents (natural and logarithmic) for the Quadrant."

"Table of the Logarithms of the Sines and Tangents for the Quadrant."

"On the general Solution of Algebraical Equations."

"On the Wave Surface in the Theory of Double Refraction."

"On the Vapours of Æther, Alcohol, Petroleum, &c."

"On the Conditions of the Atmosphere, and on the Use of the Barometer."

"On Astronomical Refractions."

"On the Gnomonic Projection of the Sphere."

"The Stars," in six maps, on the gnomonic projection, presented to the Society for the Diffusion of Useful Knowledge."

The following are extracts from the address of Sir John Lubbock, the Duke of Sussex, President of the Royal Society, Nov. 30, 1837 :—

"It is now three years since the Royal Society conferred on Sir John Lubbock for his researches on the tides, and on the nature of the tides, and on themselves of the first opportunity which was afforded of the cycle of the subjects, which are successively the subjects of the medals, to make a similar award to his colleagues. This very interesting and important series of inquiries has led me to attempt to balance the relative claims of the two subjects on this subject of these two very eminent philosophers. I have endeavoured to remark that the first who ventured to approach this neglected inquiry was the first also who was the first to have long noticed with equal pride and satisfaction the progress with which they have carried on their co-ordinating inquiries, different to every object but the attainment of truth, superior to those jealousies which too frequently prevail amongst rival and contemporaneous labourers in science."

Sir John Lubbock was one of the treasurers of the Society from the year 1851, and was a member of several other learned societies."

may mention that for determining the standard, and
intended to investigate the question of weights and
for many years senior partner in his bank, and
of importance was one on the Clearing of the
which he appended as a motto the well-known
saying:—

Equidem, extremo ni jam sub fine laborum,
Graham, et terris festinem advertere proram."

much time to agricultural pursuits, and was a suc-
cessful stockholder, his South downs and Shorthorns having carried

his daughter of Colonel Hotham, by whom he
has a son.

COMMERCIAL PERMANENT BENEFIT BUILDING SOCIETY.

A Society has been established under favourable auspices, for
the benefit of clerks and others. The shares are £20 shares, and
the shares will be at the rate of 5s. per month. The
Society is respectable, and associated as the whole working staff
of interest of London it must be successful. The offices
are in Threadneedle Street, and we should advise
our members to look into the objects of the society and participate

WITHDRAWAL OF THE BANK NOTES ISSUE BILL.

This Bill was announced in the House of Commons on
the 10th inst. by the Chancellor of the Exchequer, who said, in reply to a
question by Mr. Bentineck,
"The Bill, in the view of the government, contains conces-
sions of private notes which they would not be justified in
making, but for the hope of producing the advantage
to the public. But recent proceedings out of doors have shown
that the Bill does not exist, and consequently it is not their inten-
tion to pass that bill. (Cheers.) I must explain that they do not
mean of prosecuting the subject; and in the absence of
any Bill have referred to, it may be their duty to take it upon
themselves (hear)—and they reserve to themselves to consider
whether it would not be right at the first convenient opportunity,
if it will not occur this session, to invite the assistance of
the House of Commons in an inquiry before a committee."
The third reading of the bill was then read and discharged.

DEATH OF MR. ANDREW DRUMMOND

WE deeply regret to announce the death of Mr. Andrew Drummond, of Cadland, and head of the eminent banking firm of Drummond & Co., which took place on the 19th June. Mr. Drummond was surrounded by a large circle of attached personal friends, to whose popular qualities had rendered him very dear. Andrew Berkeley, eldest son of the Hon. Robert Berkeley, of the fourth Viscount Strathallan, by Lady Mary Berkeley, the second Earl of Egmont. The late Mr. Drummond was married to Elizabeth, second daughter of John Henry, fifth Earl of Scarborough and Mr. Ba-

DEATH OF MR. RICHARD THORNTON

THE death of Mr. Richard Thornton, of the firm of Thornton & Co., and West, of Old Swan Wharf, and Lloyd's, took place on the 19th June, at the advanced age of 89. Mr. Thornton was a man of great energy and his principal operations were in the days when the City and other leviathan bankers and merchants made their money. It is computed that he will at least leave £2,500,000, a proportion of which is, no doubt, bequeathed to his family. For many years he had been associated with him in his business, and in recent period he attended the City, and was present at all that was going forward, though he did not take an active part in financial life as he did five or six years ago. Mr. Thornton had a world-wide reputation, and its transactions were of great magnitude. Mr. Thornton, throughout all his life, and privately he disposed of a large amount in his business, and in many years since, schools and almshouses in his neighbourhood, the assistance thus afforded being

SWISS LAW WITH REGARD TO BILLS OF EXCHANGE

A JUDGMENT has recently been pronounced by the Swiss Federal Tribunal, republic and canton of Neuchâtel, which, as is generally received notion of the common law of Switzerland, is of great importance to the commerce of the country. The facts are as follows:—A London banker, at the time of the failure of a certain Swiss house, held two of their drafts upon the bank in London. The latter were unable to meet their obligations, and consequently sent back to Switzerland for presentation. The bills, of course, were not taken up, and a meeting of the Swiss creditors of the firm in question had been held some time previously, and it was decided that no claim should be allowed to rank on the bills until a certain date, which date happened to be before the bills matured. The London creditor appealed to the Swiss Federal Tribunal, which decision, which excluded him from all claim on the bills, the judgment of the highest court has been given against him.

REDUCTION IN THE BANK RATE OF DISCOUNT.

THERE have been two reductions in the rate of discount this month—the first on the 1st of June, and the second on the 15th of June. When these alterations were made it was remarked as follows :—

The Bank court met at an early hour, and after a short deliberation reduced the rate of discount from 4 per cent., at which it was placed a short time ago, to $3\frac{1}{2}$ per cent. until further notice. Before the close of business telegrams from Paris arrived announcing that the Council of the Bank of France had reduced their rate of discount from $3\frac{1}{2}$ to 3 per cent. These movements show that the value of money is rapidly cheapening, and the general impression prevails that we may even yet see the quotation lower. Before the Bank directors separated there was very little discount business transacted; later a moderate degree of activity was noticeable, at the official rate of $3\frac{1}{2}$ per cent., but a scarcity of bills was still said to be experienced. Indeed, some mercantile houses in consequence made investments in securities in preference to allowing their money to be placed out in the open market. In the course of a day or two the rates will become more settled, and again indicate the tendency of quotations. The favourable weather for the harvest is exercising a beneficial effect, and with the present low terms of accommodation, trade should readily improve. The joint-stock banks worked at $3\frac{3}{8}$ per cent., and were enabled to employ the chief portion of their resources.

On the occasion of the second alteration it was observed—

The directors of the Bank of England, at their weekly court to-day, reduced the rate of discount from $3\frac{1}{2}$ to 3 per cent. until further notice. Although the alteration was not generally looked for, the rate of the account, when published this afternoon, showed that the Governor and his colleagues are thoroughly consistent in the course they have pursued, some parties even thinking that the official rate may descend another half per cent. The favourable condition of the weather, the quiet state of trade, and the presumption that the next two months will pass over without any special activity, are circumstances which create much firmness in prices, and lead the public to renew their operations in their various classes of securities. It is highly probable that, with the allowance of 2 per cent. only for deposits at the joint-stock banks, there will be withdrawals for investments, and should the official *minimum* again decline, a greater incentive than ever will be offered to take out money for employment in the manner described. The accounts of the harvest are, on the whole, satisfactory, but it must be remembered that we have a doubtful period still to pass through before the actual result is ascertained. The tone of the different markets was exceedingly satisfactory this afternoon, and though the prices were not in every instance maintained at the extreme advance, the prospects of steadiness are considered to be thoroughly assured.

BARNED'S BANKING CO.

It is intimated that the banking business of the Barked's Banking Co., of Liverpool, is about to be transferred to a new company, under the title of Barked's Banking Co., with a capital of £2,000,000, in 40,000 shares of £50 each, not intended to call up more than £20 per share. The prospectus with regard to directors are not quite complete, but the price to be paid for the business is fixed at £100 per share, in instalments spread over two years, as stipulated. Encouraging promises of support have been received from Liverpool and London, and the present partners are to be directors for five years, retaining at the same time the undertaking. Annexed is a circular addressed to friends and connections:—

"Bank, I

"Dear Sir,—We beg to inform you that we are about to transfer of our business to a joint-stock company, the Barked's Banking Company (Limited), in which we shall have a considerable interest, but continue our personal subscription.

"The prospectus of the company and the name of the company published immediately, but we think it only proper that our friend and respected friend, should first hear of the alteration through any extraneous channel.

"We trust that the confidence which has been reposed in us for more than half a century may be continued. —We are, dear sir, yours faithfully,

CAPE OF GOOD HOPE DEBENTURES.

THE Cape of Good Hope Six per Cent. Debentures, to complete the improvements of the harbour of Algoa Bay, on the 6th June, by the Crown agents for the colony, rose from 100 to 107. The total amount applied for was £1,000,000. The quotation was 100.

Communications.

To the Editor of the "Bankers' Magazine."
MR. GOSCHEN, AND MR. ENDERBY.

SIR,—Your number (255) for June of the present year contains a letter dated at the Royal Institution which is affected because he receives no reply from Mr. Goschen's definition of a "pound." Mr. Enderby remarks that it is a "very simple" one. Mr. Enderby also quotes a statement which does not intend to enter into any discussion with Mr. Goschen, but imputing to Mr. Goschen an inferiority which would

an encounter with Mr. Enderby. He says :—"Mr. Goschen is a young man having a reputation for great talent," and Mr. Enderby supposes that Mr. Goschen "considers himself equal to a disputation with those under whom he has studied, &c." Mr. E. tells Mr. Goschen how many words he can define a "pound" in—"five, or at most eight"—not a hair more. This calls to mind the acumen of Shylock.

Mr. Enderby "entertains very decided opinions on these matters," so, unless Mr. Goschen wishes to engage in an economically political conflict with the Royal Institution ad infinitum he is very wise not to answer this simple question."

If these questions have commanded Mr. Enderby's attention for years, we are surprised that he should fancy his notoriety will become inflated by being small shot from an unknown gun at a public man who has fairly won his position by good sound knowledge, and more particularly from his knowing what a "pound" is, and the difficulty of getting it.

Mr. Enderby says Sir Robert Peel shunned the universities as regards information upon political economy or currency. This we cannot vouch for; the probabilities are immensely in its favour. Sir Robert knew very little about it himself, and we can quite believe the good people from whom he learnt were left far behind at an early stage of the tuition. Political economy and currency questions are subjects the least understood at universities, and can never be thoroughly so until their practical application has been studied also. A university lecture dilating upon a few of the leading theorems of political economy does extremely well to be set down as an ornamental part of a student's education; but is there one student in any university in England who cares, or is interested to know, whether rent forms an element in production or not? Whenever information has been required respecting commercial changes of great magnitude, alterations in bank acts, or note issues, or taxation, recourse has always been had to men whose daily occupation has been the practical investigation of such subjects; such men as Tooke, Ricardo, Lord Overstone, and Gilbart, are the persons who have enlightened parliamentary committees, who sit puzzling their brains until they are obliged to give an answer, and confess they know nothing about it. Who ever heard of sending a university to know whether the Bank of England should continue to be the only issuer of notes in London?

Mr. Goschen, whom our friend pretends to have instructed, has had experience upon the field itself, and, consequently, has produced a book upon foreign exchanges, which he never would have written had he remained at the university, and has consequently secured the chaplet Mr. Enderby looks upon with such unconcealed envy.

A very superior intelligence, such as Mr. Mill's, will drive its way very far through the difficulties which ordinary minds cannot grapple with at all without the assistance of a practical experience. Mr. Mill's book, we must be remembered, is a very clear exposition of the conclusions arrived at by commercial men—men who have passed years in the study of commerce. Mr. Mill could never have raised such a fine-looking fabric as his two volumes on the principles of political economy, had he not commenced the structure on the solid foundations laid by Adam Smith, Fullarton, Ricardo, &c.; and the very slow progress which is made in this science, proves how few are the minds which find a pleasure in its study.

We sincerely hope, in the cause of science, Mr. Enderby may throw some light upon the subject in his forthcoming work; but we must remark

that he does not pave the way to a favourable view of a public man, from whom we are at present under great obligations in a manner savouring of contumely.

Stockholm.

BANKING QUERIES.

SIR,—I should be much obliged if you would answer the following questions.

I am,
Yours faithfully,

20th June, 1865.

1st. It appears by your answer to a note in your Magazine, that a banker may hold, until a cheque is cashed, a cheque remitted to him by another banker, which he may return unpaid. May a cheque which reaches a banker in London, having been passed through his London agents, having been passed through his London agents, having been passed through his London agents, likewise held a day, or is it affected by the law which requires it to be sent it?

2nd. May not a cheque which arrives in the country, be treated as if it had been received through the post?

3rd. Are all forms of deposit receipts and currency notes subject to stamp duty?

[1st. The banker receiving a cheque has the right to retain it for its presentment, and must not, therefore, transmit it to the place of payment. The time required for transmission through the post is provided for.—See case "Hare v. Henty," 12 Q. B. 361, 1861.]

2nd. We think it may.

3rd. They are not liable to stamp duty, provided they are not issued under the terms of exemption.—16 and 17 Vict., c. 59.

MATURITY OF NOTES FALLING DUE.

SIR,—Will you kindly answer the following questions in your valuable periodical.

Does a bill drawn in the following terms become due at the month?—

"On the First of August I promise to pay J. H. 100 Pounds."

Yours faithfully,

[On the 4th August.]

FURTHER BANKING QUERIES.

SIR,—I am obliged for your reply to my communication on page 532.

1st. On referring to your report, page 550, year 1864, it is stated that the Court above for plaintiffs.

any further steps were taken, and also state whether you consider this on, approving endorsements per pro, or the opinion of your correspondent at page 518, 1860, the safer to act upon?

d. I must trouble you again on cheques crossed to a particular bank. Do consider it necessary for such to bear the endorsement of the bank in the name the crossing is made, or is a payment to any clerk from the bank sufficient?
Most respectfully yours,

A SUBSCRIBER.

e. We believe no steps have been taken to reverse the decision then; the opinion of our correspondent is of a prior date to the judgment, and, of course, over-ruled by it.

f. Cheques specially crossed to a banker do not require his endorsement; payment to his clerk is sufficient.]

MR. GOSCHEN AND 7 PER CENT.

Blackburn, June 22, 1865.

g.—In your last impression is a letter by Charles Enderby on Mr. Goschen on "Seven per Cent.," &c., in which the writer says that the value of gold a sovereign must contain is fixed by the Act of 1819 at 123 grains, is it not 123-274 grains?

h. Will you kindly explain why Australian sovereigns are not a legal tender in England, seeing that there has been an Act passed to make them

i. In your magazine for this month your correspondents, "Old Subscribers," ask if the endorsement of a cheque is a "sufficient and legal" receipt for payment of a debt, which question I do not think that you can answer by saying that it is usual to accept the endorsement as a receipt. Should such endorsement be admissible as a legal receipt in a court of law?

Kindly excuse the number of questions.

Your obedient Servant,

T.

j. 1st and 2nd. We have no immediate means of reference to these matters. 3rd. We do not think the endorsement on a cheque is a sufficient and legal receipt for payment of a debt, but only for the amount of the cheque. 4th. The connection between such amount and the debt is a matter of fact.

Estates of Failed Firms.

THE ESTATE OF MESSRS. DIROM, DAVIDSON, & CO.

The creditors of Messrs. Dirom, Davidson, and Co., of Liverpool, who recently failed in the East India trade, met on the 15th June, when it was resolved to accept a composition of 10s. in the pound. The unsecured liabilities ranged from £140,000 to £150,000.

THE ESTATE OF MESSRS. WOODHO

A MEETING of creditors was held on the 23rd house, Kerrich, and Co., of Abchurch Chan announced on the 27th May, when a statement Messrs. Hart, Brothers and Co., showing total with assets stated approximately at £253,932 fully the various matters connected with the mously resolved to liquidate the affairs of the

June 1.—The directors of the Bank of Eng rate of discount from 4 to $3\frac{1}{2}$ per cent.

The directors of the Bank of France reduc $3\frac{1}{2}$ to 3 per cent.

Suspension announced of Messrs. Fulcher, in the East India trade, with about £400,000

2.—Failure of Messrs. Bryon, Hughes & C provision trade, with liabilities to the extent

14.—Suspension of Messrs. Levick & Co., & Simpson, of Blaina, Monmouthshire, in the reaching to between £350,000 and £400,000.

15.—The directors of the Bank of England discount from $3\frac{1}{2}$ to 3 per cent.

15.—Failure of Messrs. A. G. Eumorfopulo chiefly in the Levant trade, with about £35,000

26.—Suspension reported of Messrs. Ernst silk agents, with debts reaching to about £15

BANKING OBITU

On the 28th May, at Tallymore, near Hen Corbould, late of the Bank of England, in h

On the 12th June, at his residence, Falcon Nichols, of the London and Westminster Bank

On the 17th of June, at Clent, near Stourbridge Adams, of the Stourbridge and Kidderminster bridge, aged 54.

On the 18th of June, at Park Walk, Chelsea, Mr. Walter Powell, formerly of Lombard-street, banker, in the 95th year of his age.
 On the 20th June, at High Elms, Kent, Sir John William Lubbock, Bart., of Lombard-street, banker, in the 93rd year of his age.
 On the 20th June, at Bryanstone-square, Andrew Robert Drummond, Esq., of Charing Cross, banker, and of Cadland, Hants, in the 71st year of his age.

BANK MOVEMENTS.

The directors of the Chartered Mercantile Bank of India, London, and China, have announced a dividend of eight and a half per cent., free of income-tax, for the current half-year, payable to the proprietors on the London register on and after the 1st of July.

The retirement of Mr. Bassett Smith as the manager of the Birmingham Town District Bank has been announced, and he is succeeded by Mr. T. Barney, late manager of the Stamford, Spalding, and Boston Banking Company.

Mr. William James Youell, of the Commercial Bank Corporation of India and Ceylon, has been appointed general manager of "The London and Bombay General Financial and Insurance Agency Corporation, Limited."

The directors of the Bank of Delhi have opened offices in London, and a registration of shares is to be arranged in this country.

A branch of the Anglo-Italian Bank at Naples has just been opened.

The East India Financial Association, Limited, have received their certificate of title to the East India Land Credit and Finance Company, Limited.

TRADE OF THE UNITED KINGDOM.

The Board of Trade returns for the month and four months ended the 31st April were issued on the 31st May, and again show a rather considerable decline in the value of exports, which is to be attributed chiefly to a falling off in wool and woollen manufactures, but as regards other articles the changes are not of much importance. The total declared value of exports for the month last past was £12,071,111, against £13,225,039 in 1864, and £11,897,177 in 1863, being a decrease on the first-named year of £1,153,928, but an increase over the latter of £173,934. For the four months of the present year the total was £47,706,818; for 1864, £52,420; and for 1863, £39,458,381, showing a decline of £2,185,602 compared with 1864, but an increase of £8,248,437 as contrasted with 1863.

The chief variations as regards exports have been an increase in iron and steel, and ale, coals and culm, cotton manufactures, haberdashery and linen manufactures, machinery and seed oil; but a decrease in cotton yarn, earthenware, linen yarn, metals, silk manufactures, wool, woollen and worsted yarn, and woollen manufactures. As regards imports an increase is exhibited in clocks and watches, guano, raw cotton, tallow, wool, woollen manufactures, tea, and tobacco. On the other hand there has been a falling off in raw cotton, flax and hemp, leather

manufactures, flaxseed and linseed, cocoa, wine. In the case of cereals, there has been a decline of barley, oats, and beans, but a decline in wheat-meal, and flour. As respects provisions and lard, show an increase, but salt beef a decline. The annexed tables will exhibit the results referred to :—

Monetary Intelligence.

MONETARY REVIEW FOR THE MONTH OF JUNE.

There cannot be said to have been any great alteration in the position of financial and commercial affairs during the month just concluded. A reduction has occurred in the Bank rate of discount to 3 per cent., it having previously stood at $3\frac{1}{2}$ per cent. The condition of the Bank of England and the Bank of France show that both establishments possess a large amount of resources. The terms of accommodation would not have gone lower but for the expectation that there would be a strain at the end of the half-year and quarter, which would tell upon the general market. The average quotation out of doors for first-class paper is now to 3 per cent.; and a great deal of business has been done at 3 and 4 per cent., with a disposition to turn business away and send it to the bank. The effect of this has been to create a heavy pressure there, and between the present date and the fourth the inquiry will, in all probability, be maintained. The bankers and brokers generally complain of the deposits being short, a circumstance always the case at the present season, when agricultural operations are setting in with vigour. The value of money on the continent is generally becoming easier, and with the present state of things there can be no immediate important rise.

The market for English securities has drooped, although the engagements have not been very extensive. The government broker has just concluded his purchases of Reduced and New for the sinking fund, and, therefore, this portion of support has been withdrawn. At the same time a heavy speculative account for the rise has been closed, showing prices in a weak situation. Consols were rather firm on the 29th at 90 to $\frac{1}{4}$ for the day, and the account exchequer bills exhibit steadiness.

No movement of interest has been apparent in foreign stocks. Mexican has been a little firmer; Turkish, after fluctuating, has again been dull; Greek and Spanish exhibit heaviness. The Confederate loan is nearly a failure, and the quotation remains perfectly stationary at 6 to 8.

General stocks and railway shares have latterly improved. The railway market, after having been buoyant and good in the early part of the month, has latterly presented weakness. Though the traffics have been well sustained, the operators do not seem inclined to go for the present, preferring to wait till the elections and the harvest have passed.

Bank finance and credit shares manifest little revival. A moderate amount of business only is transacted, and the public are not likely to be active buyers while an absence of confidence continues general. The Bank of England lends will be satisfactory, and so will those of the finance and credit companies. In the course of the next fortnight we shall be able to ascertain the prospects of many of the establishments.

The produce markets are still very heavy. The accounts from India continue to appear discouraging, and with the exception of cotton there has been no general recovery in prices. The state of credit in Bombay still remains very doubtful.

THE GRAIN TRADE.

In the early part of last month the corn markets had a tightening appearance, and there was a slight advance in prices, but the continuation of a very favourable weather for the growing crops had the effect of stopping

any further rise, and quotations for the lower, but before the close of the month, rain, and some apprehensions that the long have a prejudicial effect upon the yield of an upward tendency. The demand for wheat but the supplies continue abundant, both descriptions. Barley and oats have not but prices remain steady. The latest official quotations per qr.; barley, 27s. 3d., and oats, 23s. 8d.

STATE OF TRADE

THE state of business in the provinces is rather that the approaching elections will interfere with the harvest in some districts will occasion nevertheless, it is expected the year will in a better manner.

NOTICES TO CORRESPONDENTS

We have arranged in future to issue a double number of the *Bankers' Magazine* formerly in May and November. This has been rendered necessary by the Meetings of the Banks and Discount Companies, which are now being held in the pages of the *Bankers' Magazine*. We shall also issue a double number of the *Credit and Finance Companies* as they are more numerous than the former, and our subscribers and readers can refer to them for the latest news. We will please forward communications addressed to the Editors of the *Bankers' Magazine* and orders as usual to Messrs. Groombridge and Sons, Waterlow and Sons, Carpenters' Hall, London. Anecdotes.—It will be perceived from notice elsewhere that the *Bankers' Magazine* is collecting and arranging a series of Bank Anecdotes from subscribers and readers of the *Bankers' Magazine*, particularly if the subject-matter shall not have previously appeared in any personal or offensive will receive publicity. The receipt of such communications is acknowledged.

SUMMARY OF WEEKLY RETURNS OF BANKS OF ISSUE.

	Fixed Issues.	May 6.	May 13.	May 20.	May 27.
Private Banks	£4,189,091	£3,042,442	£3,035,981	£2,994,894	£2,928,868
Joint-Stock Banks ...	3,226,357	2,915,357	2,907,519	2,831,892	2,786,716
Totals.....	7,415,448	5,957,799	5,943,500	5,876,786	5,715,584

Weekly Circulation of these Banks for month ending May 27th:—

Private Banks	£3,000,546
Joint-Stock Banks	2,847,871

Weekly Circulation of Private Joint-Stock Banks ending as above £5,848,417

On comparison of the above with the Returns for month ending April 29th last, it shows:—

Decrease in the notes of Private Banks, of	£39,935
Decrease in the notes of Joint-Stock Banks, of	48,039
Total decrease on the month... ..	£88,024

And as compared with the month ending May 28th, 1864, it shows:—

A decrease in the notes of Private Banks, of	£217,673
A decrease in the notes of Joint-Stock Banks, of	148,755

Total decrease, as compared with the same period of last year £366,428

The following is the comparative state of the circulation as regards the fixed issues:—

The Private Banks are below their fixed issues	£1,188,545
The Joint-Stock Banks are below their fixed issues	379,486

Total below their fixed issues ... £1,567,031

SUMMARY OF IRISH & SCOTCH RETURNS TO MAY 27, 1865.

Returns of Circulation of the Irish and Scotch Banks for the four weeks ending May 27th, 1865, when added together, give the following average weekly circulation of these Banks for the past month, viz.:

Average Circulation of the Irish Banks £5,930,449

Average Circulation of the Scotch Banks 4,596,951

Average Circulation of these banks for the past month £10,527,400

On comparing these amounts with the Returns for month ending 29th April last, they show:—

Decrease in the Circulation of Irish Banks £72,352

Decrease in the Circulation of Scotch Banks 445,795

Total decrease on the month £518,147

As compared with the month ending May 28th, 1864, they show:—

Decrease in the Circulation of Irish Banks £138,981

Decrease in the Circulation of Scotch Banks 64,411

Total decrease on the year £203,392

The fixed issues of the Irish and Scotch Banks at the present time are given in the *Banking Almanac*, as follows:—

6 Banks in Ireland, allowed to issue... £6,354,494

12 Banks in Scotland, allowed to issue 2,749,271

18 Banks in all, allowed to issue £9,103,765

The following appears, therefore, to be the comparative state of the circulation:—

Irish Banks are below their fixed issue £424,045

Scotch Banks are above their fixed issue 1,847,680

Total above the fixed issue £1,423,635

The amounts of Gold and Silver held at the head offices of the several banks, during the past month, have been as follows:—

Gold and Silver held by the Irish Banks £2,104,816

Gold and Silver held by the Scotch Banks 2,495,198

Total of Gold and Silver Coin..... £4,600,014

Being a decrease of £19,083 on the part of the Irish Banks, and an increase of £177,039 on the part of the Scotch Banks, on the several amounts held by them during the preceding month.

CIRCULATION OF THE UNITED KINGDOM TO MAY 27, 1865.

The following is the state of the Note Circulation of the United Kingdom for the month ending May 27th, 1865:—

Circulation of Notes for the Month ending 27th May, as compared with the previous month:—

	April 29.	May 27.	Increase.	Decrease.
Bank of England (month ending May 24)	£21,051,670	£21,251,547	199,977	—
Private Banks	3,040,531	3,000,546	—	39,985
Joint-Stock Banks	2,895,910	2,847,871	—	48,039
Bank of England	26,988,011	27,099,964	199,977	88,024
Private Banks	4,151,156	4,596,951	445,795	—
Joint-Stock Banks	5,859,097	5,930,449	72,352	—
United Kingdom.....	£36,997,264	£37,627,364	£718,124	88,024

On comparison of the month ending May 28th, 1864, with the month ending May 27th, 1865, it shows an increase in the Bank of England circulation of £331,687, a decrease in Private Banks of £39,985, and a decrease in Joint-Stock Banks of £48,039; being a total decrease in England of £34,741; and in Scotland there is an increase of £64,411; and in Ireland an increase of £138,981. Thus the total for the month ending 27th May, as compared with the same period last year, presents a total increase of £34,741 in England, and an increase of £163,651 in the United Kingdom.

The return of Bullion in the Bank of England, for the month ending May 24th, gives an amount in both departments of £14,966,314. On a comparison of this with the Return for month ending April 26th, there appears to be a decrease of £14,080; and an increase of £1,831,093 compared with the same period last year.

The stock of specie held by the Banks in Scotland and Ireland during the month ending 27th May, 1865, was £4,600,014; being an increase of £177,043 as compared with the Return of the previous month, and an increase of £203,459 as compared with the corresponding period last year.

THE BANKERS' MAGAZINE,

AND

Journal of the Money Market.

AUGUST, 1865.

OVEREND, GURNEY AND CO., LIMITED.

THE transformation of Overend, Gurney and Co.'s far-famed discount establishment into a joint-stock company, marks another era in the history of limited liability. The progress of the lately naturalised principle towards universal adoption has indeed been little short of marvellous. Only four years ago it was introduced to the commercial world as a doubtful experiment. Its failure was prophesied by enemies, numerous and confident, and its most earnest advocates did not venture to anticipate for it more than a qualified success. That "limited" concerns might, perhaps, be able to hold their own in competition with private firms and companies with unrestricted partnership responsibilities, was what only a few very sanguine spirits ventured to hope. A formidable band of financial magnates arrayed themselves against it, and, with few exceptions, the representatives of the moneyed interest looked upon it with unconcealed dislike and apprehension; and yet, so completely was the experiment succeeded, that all these vaticinations have already passed out of memory. Limited liability is the one grand resource of every one with a business to sell, an idea to develop, a trade to create, or a fortune-making scheme to propound. From £100,000,000 in 1863, the limited liability companies rose to over £188,000,000 in 1864, and during the present year they have gone on increasing at a still more rapid rate. Like the fabled Sphynx, limited liability threatens to devour everything that cannot fulfil its conditions; or, to change the figure, it may be regarded as a tree which has had no sapling growth, but has passed at once from the condition of a tender

and fragile shoot to that of a sturdy and of the forest. Not only has it taken root, but has sent out its feeders deep and wide into the rounding soil. Not only has it raised its branches far and near, and has borne an extent that, before long, half the produce be borne upon it.

It may be taken as a conclusive proof of principle, that, within so short a period, bitter opponents into fast friends and converts of the benefits they had once decried. Our country how coolly it was looked upon by the business community, many thought that public confidence could be established in establishments whose every shareholder was a witness which actually overtook the unfortunate Royal British, the Northumberland and Western of Scotland, and sundry other corporations. When the directors of these companies resolved to reconstitute their companies, there were many who shook their heads at the coming of some great disaster to the bold course so unusual, and when one or two followed suit, the course they took was with and no little astonishment.

A glance down the share list will show these apprehensions. The share list of Masterman's, a "limited" establishment, a private bank with a joint-stock concern of The Albion Bank has swallowed up the Challis, and the London and Westminster Co. It is true that in this last instance, at the old footing, but it is well known that Loyd and Co. with the London and Westminster the merging of Hankey's and Kennard's Consolidated Bank, Limited. Going in among many others, that Loyd, Entwistle have gone into one limited company, and Birmingham into another. Barnard's of London in its new dress, while in the small town Stock Bank has absorbed concerns of credit and respectability as Days, of Margate; Deedes, of Canterbury; and

After the successful adoption of the establishments of long established reputation, surprising to find an increasing disposition

commercial enterprise. Already, we have almost all manufacturing business conducted by limited companies. Some of our largest ship-building and engineering have passed from the hands of private firms. Three great corporations are competing for business which have been in the hands of commercial mammoths. Conveyance companies, limited, are numerous. Companies on the new principle have sunk iron mines, struck oil wells in Trinidad, planted tea in Assam, opened Canada as a field for investment. Limited companies have undertaken to teach the Egyptians the principles of agriculture, and the Russians the practice of ship-building; to improve South American cities, to construct railways at the antipodes. Of financial companies, nothing, as they may be called the creatures of the modern age, has called into existence, but if we may judge by the progress, we are as yet only at the beginning of the career. All that limited liability has done is but an indication of what it is destined to do.

As we have already enumerated, many have always been peculiarly within the province of joint-stock companies. With their recent legislation has wrought no greater change than has been effected by diminishing the power of the individual speculator. But it had become a fact that some branches of commerce as fitted only for companies. Companies, it was said, could only manufacture when they went into those exceptional cases which required capital beyond individual means. Confined to mere buying and selling, we were told they could never compete with concerns of which some man of business was the head. But though there is an appearance of plausibility in all this, it is an appearance only. The shares of the Great Eastern Dock and Warehouse stand at a premium of 70 per cent. The success has brought competitors of the company into the market already, and others, we believe, will appear. Some of our most celebrated printing and publishing establishments are now doing business as limited companies. The multiplication of hotels owned by similar organizations is a simplification of the principle which has tended to the improvement of towns, and which promises greatly to benefit the general public. Only the other day, three first-class companies coalesced that they might carry on the business of merchants in conjunction with £100 shareholders. This is the latest, and probably the greatest triumph

which limited liability has yet achieved, is the Messrs. Gurney have followed the extensive establishment into a similar and Co., limited, will henceforth be a stock official lists, side by side with the Consols, the National, and other discount establishments. any claim to the gift of prophecy, we must see that the position of the new company will be as the standing of the house to whose business is indeed one feature in the prospectus, room for great difference of opinion. Valued at half a million for the goodwill of the firm, it is seen that this sum amounts to one-third of the capital is proposed to call up at present, so that the of future profits will be absorbed in paying dividends which has ceased to be actively productive, however, that the consideration is excessive. I assume that the eminent gentlemen who are members of the board, have carefully calculated the value of buying. It is said that the sum fixed for the profits realised during the last three years is also that the house has always possessed a high and that its connexions have been of a high character, the wealth of the Gurneys is a proverb. Under these circumstances, it would not be too large a sum for the vendors to receive. However, is a question of detail which interests the firm to settle for themselves, and into which I do not enter minutely. The great fact remains that the modern practice of mercantile enterprise, first carried to a great pitch of success, has abandoned its old traditions. Not even the old firms, as Jones, Loyd, or Loyd Brothers, or the old banks, has been proof against the inducements of limited liability which limited liability holds out. In so far as the transition may awaken a sentiment of regret on the whole, every one has reason to be gratified that the members of the firm, if they lose some of their good deal in pocket, and something also in the division of their responsibility, especially in the difficulty. To depositors and discounters, it is an advantage to have the unpaid capital in the hands of holders, as a practically inexhaustible resource. And to the political economist it is a source of satisfaction to see the mass of small capitalists admitted to the same

profits which result from great commercial undertakings. A few years ago, it seemed as if all who lived by trade would have to separate into two classes—the large capitalists and their employés. The small trader, who, in the days of our forefathers began with a few hundreds, or as many thousands, was in danger of being improved off the face of the earth. Like the petty German princes, he was to lose the advantage of a separate existence, and to become the paid servant of some commercial giant, who ground his gold out of other people's bones. His tendency to make the rich richer and the poor poorer, has, we are glad to say, received a check. By joint-stock associations with limited liability, every one who has a few pounds to invest can become a partner in some great trading concern. Even after making great allowance for errors, failures, and frauds, the system works well for the shareholders, every one knows; and the conversion of Gurney and Overend's business into a corporation on the new principle, is only an additional illustration of its soundness, and of the confidence with which it may be regarded by every class of investors.

THE NEW LAW OF PARTNERSHIP.

THE Act to amend the Law of Partnership, can hardly be considered as a triumph of commercial legislation. Its enactment may be considered as yet another tribute to the power of limited liability; a principle which has already done much to facilitate commercial operations, and to bring a share of the profits of trade within the reach of every man. The success of companies formed upon this basis, has been so decided as to awaken a desire for private partnerships of a similar character, to which traders might enter without making their entire property liable for the debts of the firm; and to this feeling we owe the present measure, which attempts, but not very satisfactorily attempts, to supply the *desideratum*.

We are far from saying that joint-stock companies are the only commercial organizations to which limited liability can properly be applied. On the contrary, we believe that it may very advantageously be adopted in ordinary trading concerns, and that the opposite rule has, in some instances, been pushed rather too far. Perhaps we ought to be thankful for the new Act as the first step in the right direction, but, nevertheless, we must confess that we cannot regard it without grave dissatisfaction. It is a piece of legislative patchwork; an experiment

whose success is more than doubtful; a persons, who up to this time would have contemplated of law, at the expense remain or become creditors in fact. provision whatever for enabling a creditor between a limited and an unlimited company or more persons interested in the same is responsible only for what he has advanced remains liable for the debts of any and the Act is simply, a tribute to the argument. Because the application of the legal principle of partnership involves, has been attended with some hardships, the Act has produced certain apparent hardships, the Act have prevailed upon the legislature, not on principles erroneous, but to declare by statute that in such instances, they shall not apply. Such a measure and never can be satisfactory. It is as erroneous as a quack doctor who tries to make local applications of curative medicines, or as the attempts to define the extent to which nature abhors.

The provisions of the Act, though very numerous. In half-a-dozen clauses to settle off-hand some of the nicest questions that arise in commercial transactions. The Act provides that the loan of money to a person who engages in any undertaking, upon a contract receiving interest varying with the profits, shall not of itself make the lender a partner. We should imagine that every legal practitioner, on this clause, with the liveliest satisfaction, would raise some issues out of this," we once heard of a case to some professional brethren, with whom we were testing the rights of their respective courts. With equal satisfaction, sharp points were raised upon the new Partnership Act in general, and in particular. In the first place, the Act requires "writing." But will a mere memorandum satisfy the requirements of the Statute of Frauds? The wording of the statute would certainly be so, but on the other hand, will not every contract of necessity be in the nature of "an agreement under seal"? Is a stamp necessary? *Ex abundanti cautela*. We leave our readers not to give themselves the trouble of arguing when considering this point. But the Act does contain a much grander element of

though the loan of money *of itself* is not to make a partner of a man who takes part of the profits, yet the loan taken in conjunction with other acts may do so. Therefore if the lender would be safe, if he would not have the Act to amend the law of partnership lure him on to destruction, he must take especial care how he buys goods, makes contracts, visits the premises, or does anything else that may be tortured into "holding himself out to the world" as a partner. Let him fail in his precautions, let him relinquish his reserve, and he may be sure that each ambiguity in the written contract will be closely scanned by astute attorneys and clever counsel; each doubtful act of lender or borrower will be scrutinized and magnified, and the question of fact, whether he has or has not impliedly made himself responsible, will have to be tried before a jury of traders, whose instinct and interest alike will lean towards the plaintiff. On the other hand, the struggle will, in most cases, be for very existence, for escape from utter ruin. So that we confidently look for rules *nisi* and absolute, new trials, points reserved, appeals to the court *in banco*, proceedings in error and in the House of Lords, to an extent which we have no doubt will be highly gratifying to dwellers in the Temple and Lincoln's Inn, but not near so satisfactory to those who congregate on 'Change or do business in Threadneedle Street.

The second clause provides that a contract for remunerating a servant or agent by a share of the profits shall not, *of itself*, make the servant a partner; a provision which after the decision in "*Harrington v. Churchward*"* seems hardly necessary. The third clause gives a similar exemption to widows and children of deceased partners, who receive, by way of annuity, a portion of the profits of a business; and the fourth clause provides that no person receiving by way of annuity, *or otherwise*, a portion of the profits of any business, in payment for the goodwill thereof, shall be deemed a partner by reason only of such receipt. This is a very singular section. It gives an advantage to the vendor of a goodwill on credit, which it withholds from the vendor of stock-in-trade. Let A B sell his stock-in-trade for £5,000, and his goodwill for £2,000. If he lets the £2,000 stand over on arrangement to pay it out of a specified portion of the profits, he is a creditor, but if he gives the purchaser credit on the same terms, for any portion of the stock, he becomes a partner, for what reason we cannot for the life of us divine.

Another element of ambiguity is to be found in the use of the term "portion of the profits," in the third and fourth clauses.

* 29, Law Journal, N.S., ch. 521.

No widow or child of a deceased partner who of the profits" by way of annuity, is to be that account alone. But how will such persons receive their annuities, though no profits be made to them in any particular year, so as to be below their claim? And if the trader comes within the third or fourth section with the partner bankrupt, how will matters stand between the creditors? The fifth section provides that if a partner becomes bankrupt, or takes the benefit of a law of insolvent debtors (this proviso having been introduced through a happy forgetfulness of the abolition of the law by Lord Westbury's Bankruptcy Statute), his creditors, the money lender or goods creditor, shall be postponed to other creditors, and shall not be paid until their debts are satisfied. It may be doubted whether the interests of creditors are sufficiently secured by these provisions. Cases may arise in which money is paid on account of these annuities, at a time when the trader is insolvent. Nay more, it may be proved that the insolvency of such creditors, has arisen from the non-payment. It will then be a question whether the trader is entitled to retain the moneys paid, or whether he is to refund what he has thus improperly received. Without these defects, we are not influenced by the principle of limited liability, as applied to partnerships. We believe that a measure with this object might beneficially be passed, and that it would be supported by the great body of the mercantile community. The subject to the Act as it stands, as a halting place, is like a new piece put into an old garment, as a stopper in old bottles. The true test of partnership is the English law, was well laid down in the case of *Hickman*.* A firm of iron merchants gave to a partner executed a deed of arrangement. They gave the property to five trustees (the defendants), who were to carry on the business and divide the profits among themselves included. They did so, and as the deed was in expectation, a creditor whose debt had been secured by the deed of arrangement had been excluded from the deed to make the trustees personally liable, on the ground that they had participated in the profits, and were therefore liable for losses. It was very properly held that

* 8, House of Lords Cases, 2

ient; that, as stated by the present Lord Chancellor, "the real ground of partnership liability, is that the trade has been carried on *by persons acting on the defendants' behalf*," for, as Lord Wensleydale added, "the principle is that of principal and agent." Our great objection to the new measure is that it ignores this principle. The man who puts money into a concern that another may use it for his profit, seems to authorize that person to act on his behalf, and therefore it would seem that he ought to be liable for what happens. But the Act says no to all this. It gives advantages to certain classes of *quasi* partners, at the expense of *bonâ fide* creditors. The capitalist who lends his money to a trader; the successful merchant who sells his business and leaves the price of his goodwill to be paid for out of future profits; and even the widow or child of a deceased trader, may go on, with the reputation of "having something to do with the concern," and in the actual receipt of money from its funds, while ordinary creditors have no satisfactory means of ascertaining what their relations to the concern really are. There need be no difficulty in remedying this, or in framing a measure which shall secure the end proposed, without jeopardizing the interests involved. Let registration be made compulsory in limited partnerships, as well as on limited companies, and let the former, like the latter, be compelled to adopt some addition to the style of the firm, that shall at once let the world know the position of the house. There will then be no cause of complaint on the part of creditors, and but little room for evasion on the side of debtors. If an agreement stamp be held unnecessary, it will be in the power of any two persons who may agree so to act, to get rid of partnership liability by a document bearing date at the commencement of the partnership, though really written long afterwards. Annuitants of certain favoured classes, may draw upon the partnership funds, and ruin the partnership prospects, without taking any share of the partnership liabilities; and from the sense of injustice which this state of things will infallibly engender, we may confidently augur a succession of hard fights at the bar, irreconcilable verdicts from the jury box, and anomalous decisions from the bench.

REVIEW OF THE INDIA

ONE of the most important discussions in the House of Commons was engaged took place at the end of June in a thin house, and by a sickly minister. In the position under which Sir Charles Wood came down at the end of June to meet the Indian Budget, much sympathy was felt for him. He made such a gallant struggle against the opposition, triumphing over and bending to its powers. But the question remains: will the affairs of India be delayed to so late a date? Now that Parliament has become directly responsible to the good government of that teeming population, it is an annual survey of its condition—its social and financial state so deeply embedded in its financial policy, that when the session counts the remainder of the year in weeks but by days, when the members are seeing there can be no further adjournment, the minister might deprive Parliament of the budget for a whole twelvemonth. This has been asked before, and no satisfactory result has been obtained. Some slight attempt at an improvement was made on occasion by Sir Charles Wood, which was very far from cheering to sanguine expectations. It appears that the Indian minister has fallen into the inconvenience and the discredit of the present state of affairs, and has made repeated journeys home from India so that he cannot bring them to the House of Commons at a period when there would be time and men to discuss them. He has ever, have invariably been thwarted by the entanglement into which the Indian Minister after minister has striven to clear, but hitherto in vain. Mr. Wilson did not do much still more. Sir Charles Trevelyan was full of marvellous energy; active official substance came from England; but in spite of all, the task of the finances remains still to be accomplished. We can only hope that Mr. Massey, working hard, carrying out the reforms begun by his predecessors, will complete the work they have left unfinished. There is no hope of an inquiry thorough, searching discussion on India.

Yet the necessity for such a discussion

apparent than at the present time. The condition to which Indian finance has been brought by the combined action of the Indian minister and the secretary of state, is perhaps unparalleled in the history of nations. Here we see an ever-growing revenue side by side with a deficit—a minister obliged to confess his need of a loan in time of peace, and at the same time remitting taxes which only enhance the deficit the loan was meant to cover; while the minister at home dissents from all the proposals, scolds his subordinate for giving up the tax while he refuses his assent to others, and winds up by insisting that if there is to be a loan at all it shall be raised in India, where money is dear, instead of in England where it is cheap. This is a muddle at least as puzzling as any that the condition of Indian accounts can present. As for the revenue, it is gratifying to see that upon the whole it is in a prosperous state; with one exception, all the great sources of taxation are increasing, showing that the prosperity is based on a broad foundation, and that the material resources of the people are greatly improved. The one exception to which we refer is that of opium, and all who are acquainted with the condition of India know that opium has been a precarious—it might almost be called a gambling—source of revenue. But in point of fact it is not to the fickleness of the trade, but to the unwise measures taken by the Indian government that the recent extraordinary deficit in the opium revenue is due. A few years ago there was a great demand for the drug, which consequently fetched a high price, and the gains of the Indian government were proportionately increased. The conclusion was hastily formed that this high price, which was really the exceptional, had become the normal condition of things, and that to fill the treasury there was nothing better to be done than to increase the supply of opium, and sell it at the price at which it then ruled in the market. But how to increase the supply was the difficulty. The price allowed to the poppy growers was complained of as too low, and the Indian husbandman manifested a growing reluctance to cultivate a crop which yielded him a less return than any other in which he could engage. The government undertook to remove this objection by increasing the allowance to the grower, and this they did so effectually that in a short time the supply greatly exceeded the demand. The price of opium fell at once far below the estimate which the minister had calculated on, and the government found itself in the double inconvenience of having to pay more to the producer for the production of the opium, while they realised less from the consumer by its sale. The double working of that loss made the actual state of things worse than the

estimated revenue by more than a million happened, too, at a time when the public attention has been aroused of late to improvement in India. The police, the courts of justice to be improved, the help for in the construction of new barracks; forward with accelerated step; and, last, some Bhootan war to be provided for. These are essential to the material improvement and to the development of its internal life. It can be looked upon therefore, in the light of the capital which is sure to yield a good return from which the investment was expected, the question was forced upon the Indian rulers, What was to be the course to men uninstructed in India? It was fast at any rate to those sources of income which remained and which showed no signs of decay. The course was too simple and straightforward in the ingenuity of Sir Charles Trevelyan. There had been enforced like our own for a term of years had come to an end; when, the deficit staring him full in the face, he determined not to renew it. His reason was curious. It was an unpopular tax; it caused dissatisfaction, though no one denied it; it was pretty regularly and was yearly rising; and all, the Indian Government had come to the express or implied, that it would cease at the first term of years for which it had been levied. These were the ostensible reasons which the minister for India, deliberately to increase the revenue at the moment that another was in his grasp. But to those who remember the former connexion with this tax, another and more cogent personal reason will present itself. It is forgotten that Sir Charles Trevelyan was the man when the income-tax was first proposed in India. He resisted its imposition, made public opinion, had been resolved on, and conducted the discussion in a temperate manner that Sir Charles Wood was to recall him. It may be supposed that there was a personal antipathy to the tax outweighing all other considerations which are so elaborately set forth.

Having by thus getting rid of the income-tax

efficiency it was his business to fill up, the minister naturally turned to other sources. These were two in number. He proposed a tax on the exportation from the country of the articles of jute and tea; and he proposed that the temporary difficulties should be met by a loan, which, ostensibly raised for the purpose of being spent in reproductive works, would in reality cover the deficit thus created. These projects Sir Charles Wood put his veto upon; and we apprehend that so far as the disallowing of the new taxes was concerned few persons will find fault with the reasons he assigned to the House of Commons. Taxes on the exportation of a country's products are always bad, especially when those products are the raw materials of industry. We do not say that they are never justifiable, but at least they are always suspicious, and the justification offered for them must be narrowly looked at. In the case of Sir Charles Trevelyan's taxes, no justification could be found. They were not only laid on the exportation of raw products, but the articles selected were, by a curious infelicity of purpose, exactly those where India already had to endure a competition with other countries, and where the imposition of a tax was therefore like to turn the scale against the exportation altogether. The cultivation of tea is a new article of industry in India, and has already made great progress there, but of course has to contend with a powerful rival in the neighbouring country of China, and if it is ever to be brought into general use in Europe, no artificial shackles, no financial burdens must be imposed on its exportation. The same thing may be said of the tax on jute, which is also supplied from other countries, and has at all times a powerful rival in the article of Peruvian hemp. Sir Charles Wood therefore carried the sympathies of the House of Commons with him when he announced that he had disallowed the imposition of taxes, which, however they were intended, were likely to have the effect of ruining the industries on which they were imposed. There remained, therefore, only the question of the loan to be disposed of; and one would have supposed that as all the other means of supplying the wants of the Government were taken away, or the income tax had been struck down, and the export duties were disallowed, there was all the more need for holding by, if not for increasing the loan which the finance minister had recommended. But here again the secretary of state differed from and thwarted the finance minister. The project of a loan shared the fate of the export taxes, and a difficult task has therefore been imposed on Mr. Massey, Sir Charles Trevelyan's successor.

On the whole, the state of India, as thus sketched out by its

minister in the House of Commons, is. The flattering prospects which it presents after years of Lord Canning's administration at Elgin, appear to be fading away. The annually increasing surplus, which for our eyes, has already faded away, and years was India's normal condition—though confessed, this is rather disheartening, and no immediate prospect of improvement. Looking to the figures presented by Sir Charles Trevelyan, it is every year increasing, showing that the condition of the people is improving, and that prosperity are everywhere visible; but as the revenues increase, the expenditure increases in a corresponding manner. The employment of 80,000 European troops is an enormous drain on its resources, such as cannot be endured. It is sometimes said that the British army has been got rid of; but, in point of fact, there is still a large native force employed. There is still a large native force employed in the new police force which is kept up, and we apprehend it will be found that the numbers the new force does not greatly exceed the old. Then there are the expenses arising out of the condition of the barracks for the military, the cost of their maintenance, the improvements in the system of law and justice, the re-organization of the police, the support of schools, and all the changes and improvements of the claims of humanity and civilization.

It may be said that the expenditure will repay itself: and so it will indirectly, through its development; and while the revenue does not. The principal source of income is land tax, and that is naturally inelastic; and never increases. All these considerations show that the government requires to be closely looked at, and to be managed with an unflinching and unsparing hand. One of the most important questions to be considered, is whether India really requires soldiers for its government. England can supply men, as India can afford the means. If India cannot be held without them, it will be said; but looking to the handful of troops that were actually put down, and to the improvements which have been made since in railroads and other works, which danger at one part of the empire, and assistance sent from another, we are

reduction can be effected in this department ; and it is only this department, as we believe, that any material lightening the Indian expenditure can for some time to come be effected.

BANKING AND FINANCIAL ANECDOTES.

No. IX.

THE BANKER AND THE LADY FAYRE.

One morning a very elegantly dressed female entered the banking house of ———, and presented a cheque for payment, at the same time requesting that she might have gold in exchange. The lady was not only well dressed, but she was very beautiful, so much so that the attention of the cashier was riveted upon her. He weighed fifty sovereigns, which he handed to the lady ; and, supposing that she could count them one by one, he anticipated that the pleasure he enjoyed in looking upon her would thereby be prolonged ; but he was mistaken, for to his surprise, instead of counting them she huddled them all up together, and put them in a white pocket-handkerchief. The cashier, observing this unusual mode, said, " You had better count them, madam ; " but the lady, looking at him with a most gracious smile, said, " I am quite satisfied, sir, that you are right ; " and, with another bewitching look, wished him good day, and walked leisurely out of the bank.

The cashier was so overpowered with the beauty of his customer that immediately on her retiring he went a few paces to a fellow cashier, and asked him if he had ever seen such a lovely creature. " What a bewitching woman ! " said he ; " what a sparkling brilliancy in her eye ! I wonder who she is ? " This caused him to look at the cheque, which, on first receiving, he had placed on his book without entering ; when he discovered, to his utter astonishment, that it was for £5 instead of £50. Uttering an exclamation, he jumped over the counter, and was in the street in a second. He looked to the right and the left, but could distinguish no trace of the beautiful lady. Ultimately it was thought best that he should apply to the drawer of the cheque for the name and address of the party to whom he paid it, the cheque simply bearing the words, " house expenses or bearer."

The drawer of the cheque, on being asked by the cashier, to furnish him with the desired information, expressed his surprise at what he

called his impertinent curiosity ; but on the mistake that had been made, he immediately gave his address, "Miss Thompson, Bury Street, and begged you will not utter a word of this affair lest it should come to the ears of Mrs. P—— I fear the consequence would result from my indiscretion, for the person was only too celebrated."

The cashier, anxious to catch the lady, assured the gentleman of his silence, and proceeded on his expedition to Bury Street. The door was opened by a looking girl, who, on being asked if Miss Thompson was at home, replied with great simplicity, "No, sir, she is not at home, and I don't think she will come back."

It ultimately came out that the morning after she returned from the city, she packed up her trunk and returned of course without leaving her address ; enjoying satisfaction of having proved the truth of the story, for she had by a judicious exercise of her craft secured the eyes of a city banker, that he could not disavow the £50. On his return, he was ashamed to go to the house, and it was arranged that the cashier should, by way of purchasing the silence of the lady, pay the amount, and the cashier the other, which was kept a profound secret for some time.

THE BANKER V. THE BAKER

It is scarcely to be expected that a banker should be ignorant of all his customers, and a rather ludicrous evidence of the ignorance of a Lombard Street banker of his own clients, a baker. The latter, who had so recently just paid another £500 in to it, and was still at the bank, gathering his scattered thoughts, and wondering in which way he should go. He was in a brown frock, and his cheeks were white with flour, and the head of the cashier at the moment essayed to enter his own establishment without an unpleasant contact between the head of the cashier and the floury habiliments of a man who was a baker. "Move away, fellow," said the banker. S

* Lawson's History of Bank

any circumstances to a tradesman would probably move his ire ; but the baker, possibly inflated with his recent monetary transaction, not only refused to budge an inch, but applied irritating language to the banker. The latter, all unused to disrespectful language, and nettled finding a difficulty in getting into his own house, again authoritatively ordered the baker to move, "or," said the banker, "I'll soon let you know who I am." The conflict then grew as fierce as an episode in that familiar pictorial representation of contrariety of views on the part of a baker and another personage not a banker ; and, in fact, the baker knocked the banker down. Foaming with rage, he dashed into the asylum of his own bank, followed by the baker. A constable was being sent for, that the offending baker might be given to custody, when a clerk whispered to the irate and insulted but humbled banker, "That is Mr. such-a-one, our customer." Mutual explanations ensued, and preliminaries of peace were entered into, which were afterwards ratified.

A BANK CLERK OF THE OLD SCHOOL.

The banking house of Barclays required the aid only of three clerks during many years of its earlier history. A clerk who had been upwards of fifty years in the bank (says Mr. Lawson), used to tell an amusing story of the first appearance of a new clerk. There were but two, and on the first occasion of the third clerk coming to the office he was dressed in the following fashion. He wore a long-flapped coat with large pockets ; the sleeves had broad cuffs with three large buttons, somewhat like the coats worn by the Greenwich pensioners of the present day ; an embroidered waistcoat, reaching nearly down his knees, with an enormous bouquet in the button-hole ; a cocked hat ; powdered hair with pig-tail and bag-wig ; and gold-headed cane, similar to those of the present day carried by the footmen of ladies' rank. The gentleman who cut so curious a figure remained in the office many years, and died a few years ago at a very advanced age, much respected by his employers.

THE BANK OF ENGLAND REPUDIATES A GOOD NOTE.

In 1819 an action for false imprisonment was brought against the Bank of England by a gentleman who had paid away a £1 note which the Bank declared to be forged. The Bank at that time kept forged

notes, but by some means or other the plaintiff got possession of this note, and, refusing to give it before a police magistrate on the charge of forgery, the note knowing it to be forged. An inspecting officer bore witness that the note was counterfeit, and the holder of it was committed to prison. The plaintiff was released on bail, being bound over to appear at the next assizes. Having been called on for a year, he then appeared at the Bank for false imprisonment. The note was this being clearly substantiated the plaintiff

A WILLING SLAVE TO BANKRUPTCY

Mr. Rippon, chief cashier of the Bank of England, who devoted himself most assiduously to his all-absorbing pursuit. He was precise and businesslike throughout his life, the Bank of England. For fifty years he pursued his business unintermittently, and never asked for a holiday, except when a medical adviser insisted on change of air. He at last made up his mind to have a fortnight's rest from London with that object. But he was apparently of the same opinion as Dr. Johnson, who, when he had seen one green field had seen all green fields. He gave three days to his figures, declaring that could do for him. No wonder perhaps that such a man should have £60,000.

THE BANKER AND THE TWO GENTLEMEN

A country banker, in 1825, had occasion to go to town with a large amount of property in boxes, which he procured from his London agent. The boxes were put in the mail coach, so that he might be sure of them, and, to make doubly sure, he placed them in a seat, and locked them in. Two very young gentlemen got into the coach soon after the banker was seated. The coach rolled onwards. When arrived at the coach usually put up while the passengers were getting out, the gentlemen invited the banker to take a seat.

g to quit his treasure, even to satisfy the cravings of his inner
lined the invitation. A second application, however, from
quarter—the picture of a nice roast fowl, just done to a
g taken up for supper, being rapidly sketched—was more
, and the banker left his seat, fully convinced that the notes
vertheless be safe, locked in as they were, and, so far as he
eir existence not being known to his fellow-passengers.
nded, one of the gentlemen returned, and the coach sped
the banker's inquiry after the other passenger being answered
ady remark, that the latter had changed his mind, and
to stay at the inn at which the roast fowl had been discussed.
xt stage the banker's companion got out and bade him good
left alone the banker, not suspecting anything wrong,
ss just examined the seat under which he had deposited
of notes. They were gone, like his fellow-travellers, and
agency. The robbery had been planned in London, and
two gentlemanly men had, in company with the banker,
ing on the roast fowl, confederates had been quietly forcing
d abstracting the notes.

WILL OF THE LATE MR. RICHARD THORNTON, THE MILLIONAIRE OF THE CITY.

of this gentleman, so well known at Lloyd's, Jerusalem, and
ry commercial establishment in the City, and who died a few
leaving the enormous wealth of £3,700,000, has just been proved
Commons. Mr. Thornton's career as a merchant in the City
extraordinary. He was the son of a north-country gentleman,
rn in 1776, at Burton, a village in Lonsdale, Yorkshire. The
hat sequestered region will find a handsome monument of Mr.
Thornton's attachment to his birthplace in the charity school,
uilt at a cost of £40,000, and endowed for the lodging, board-
aching of poor children in the parishes of Burton and Thornton.
educated at Christ's Hospital, and on leaving school he
o business in Southwark. But very few of the oldest City
member Mr. Thornton's first start in his commercial career.
stances of that time were very different to our conditions in

It was during our great war with the French empire, when
as excluded from the markets of Europe, and when the Conti-
e was of immensely greater importance to us, that Mr. Thornton,
en carrying on business in partnership with his brother as a
erchant and ship broker, devoted himself with fearless resolution
rough the prohibition of English trade with the Continent.
ad made the most desperate efforts to destroy the whole of our
merce. To enforce his decrees an entire division of the
ny, under the command of General Rapp, was stationed
e, and every port in Northern Germany was jealously

guarded. The Messrs. Thornton were among bold and adventurous spirit. On one occasion board a vessel of his own, entering the Baltic by a Danish gunboat, and the story goes that gun or two of his own, as was not unusual days, refused the summons to surrender, and beating off the Dane, after a vigorous cannonade.

In that year, 1810, he got a commission from as much hemp as could be procured from Russia fleet. This errand was, of course, attended with since all the English had fled from or had been at St. Petersburg. But Richard Thornton was not such risks. He landed at Memel, and succeeded in getting to England many thousands of tons of hemp for the government, in spite of difficulties which would have deterred any other man. A splendid recompense, however, awaited him. An express communication reached him from the government in that country at the time of the French invasion, apprised of the fact of Napoleon's retreat from Russia, and was known either to our ministers or to any other person who profited by it to something over £200,000. Shortly after, after a short interval, in the kingdom of Portugal, excited Mr. Thornton's sympathy. He saw the Miguelite pretensions in Portugal, as well as the state of Spain, and he judged that by subscribing to the cause, he might do a good thing and make a fortune. Large quantities of military munitions were laid up in the Azores, and he saw the use of Don Pedro's adherents—either to replace or to support the Portuguese throne. It was Mr. Thornton who provided the money for these preparations, and who, when the time came, in the field, contracted for its equipment, and for the transport required. That enterprise was successfully carried out, and the friendly intervention of the English government secured the young *protégé* got safely seated on the throne, and he assisted another infant queen against another pretender, and not hesitate to take the odds in favour of the English, and the Portuguese. He contributed much to the success of the cause, on her behalf, and what with his claims as a bondholder, and the money they owed him, &c., he was a creditor of the young queen of not less than two millions sterling. With the failure of the cause among the Peninsular bondholders to the disadvantage of those governments would ultimately redeem the cause.

Mr. Thornton's personal services to the Portuguese government were acknowledged by conferring on him the rank of Knight of the Order of the Tower and Sword. Mr. Thornton was an underwriter at Lloyd's from the year 1798. He was one of the ordinary underwriters, who are in the habit of insuring the cargo of ships, and their responsibilities with one another, so that the loss of the cargo would fall perhaps on twenty or thirty underwriters. If one man taken a leonine share of the most tempting offer, no other man would be disposed, even for a premium, to take the insurance of £100,000 on one bottom. Mr. Thornton's retirement from that scene of action, was beyond dispute, a man at Lloyd's, and though single-handed, his services to the great marine insurance companies which existed in those days. Previously to the late war with

sure for the Imperial government such a thing as a steam frigate built in the English dockyards; and once, it is said, having entered into a similar agreement towards that or another foreign state, on being asked by a friend how he could insure the fleets of the different European kingdoms, he replied, "Oh; if they lose the men-of-war that I've insured, I can pay for them in their own bonds." Besides being the largest holder of Consols in England, Mr. Thornton was also one of the largest holders of foreign securities; he was noted for the extent and multiplicity of his investments, as well as for his dexterous use of such opportunities as have frequently been presented by the variable moods and opinions of the Stock Exchange. But ordinary trade has not been Mr. Thornton's only resource. He sometimes won largely on the affairs of the turf, and at other times has taken considerable bets on the result of a military campaign or a ministerial crisis. During our war with Russia it is said he laid the sum of £10,000 against £500 with a well-known Greek merchant that the price of Consols, which was of course somewhat declining, would not fall below 85 until the conclusion of peace. One dark morning in the winter, which found him in a shocking mess at Sevastopol and Balaclava, the price actually came down to 85½, and those who had envied Mr. Thornton's invariable luck were rubbing their hands at the prospect of his defeat. But Consols fell lower, and Mr. Thornton pocketed the modest stake of his antagonist, having risked such odds against it.

Before closing we should refer to his acts of charity and beneficence as a fitting accompaniment of such extraordinary good fortune. The schools which he founded in his native village, far away in the Yorkshire dales, have already been noticed. But there is another pleasing proof of his liberality—a double row of almshouses, neatly built, and situated in a very pretty open garden, at the edge of Barnet Common, just outside that neighbourly little town. The Leathersellers' Company, which boasted in him as its father or senior member, selected one block of these houses in 1838, with money given by him when he filled the office of master in that worshipful guild. A second donation of his in 1850 enabled them to build a new range of these comfortable lodgings, in which altogether thirteen aged men and women enjoy a stipend each of 10s. weekly, with coals and candles. Every year he used to go to Barnet with the worshipful master and wardens, in the last week in May, to shake hands with the poor old pensioners, to compare their length of years with his own, and then to dine in good old English fashion with his colleagues in that ancient corporation. Such was the dignity and recreation of a London merchant of the old school. Mr. Thornton in his will makes the following bequests:—£1,000,000 to Mr. Thomas Thornton, who likewise is to inherit the deceased's estates; £1,000,000 to Mr. Richard Thornton West; £500,000 to be divided among his relations and friends; a handsome provision for Mr. Neil, and other of the deceased's clerks; £100,000 to be divided among all the charities, hospitals, asylums, and benevolent institutions in London, &c., the sums being duly proportioned in each bequest; £15,000 to Christ's Hospital (where deceased was educated); £10,000 left in trust for the benefit of the schools in Merton, in Surrey; £10,000 left in trust for the schools in Mr. Thornton's native village, Burton, in Yorkshire; £1,000 left for the benefit of the aged poor at Burton; £500 left for the poor at Merton. There are many other bequests contained in the will. The executors are Mr. Thomas Thornton, Mr. R. T. West, Mr. Pulford, and Mr. Lea. It is presented that the probate duty of the whole cost £42,000, and the legacy duty will amount to upwards of £100,000.

Legal Miscellany

THE WINDING UP OF THE EAST OF ENGLAND BANK.
ISAAC BUGG.

THIS case was decided in Chancery by Vice-Chancellor B. 24th June.

It was a summons on the question whether to be placed upon the list of contributories in the winding up of the company. About a year since Mr. Bugg was desired to join this company; but, being already the solicitor for Gurney and Co., and Harvey and Hudsons, that he had become a shareholder in a joint-stock company. Mr. John Bugg, his brother, at Norwich, to purchase shares, and he accordingly bought 135 shares, 50 old shares of Mr. John Bugg, and in that of Mr. Stevens. The transfer was accepted by the board of directors as transfer of the bank, when the official liquidators, refused to accept it, then known that Mr. Isaac Bugg's money had been misapplied. A very brief period elapsed between the time of the bank, when the official liquidators, refused to accept it, then known that Mr. Isaac Bugg's money had been misapplied. A very brief period elapsed between the time of the bank, when the official liquidators, refused to accept it, then known that Mr. Isaac Bugg's money had been misapplied.

Mr. Baily and Mr. Swanston appeared for the official liquidators; Mr. Lawrence and Mr. John Bugg and Mr. Stevens; and the Attorney General for Mr. John Cutler for Mr. Isaac Bugg.

The Vice-Chancellor said that by the deed of the bank that no person should be considered a proprietor in equity whose name did not appear on the register, and that no transfer or sale should take place without the sanction of the liquidators. It was well established that a person might profess an object of escaping liability, but that in a winding-up sale, and if it was only in such a manner that the selling might still get benefit, but escape liability. Here there was no doubt that it was a bona fide sale. Bugg or Mr. Stevens had disclosed that they were not the company would have said, "We have nothing to do with the parties we look to." Therefore, the case of a bona fide transfer did not apply here; there was no doubt that it must be refused with costs.

THE AUSTRIAN BANK CONCESSION.—THE BARON DE TESSIER
V. LORD FERMOY AND ANOTHER.

JUDGMENT was delivered in this case in the Court of Chancery on the 4th July; there being present the Lord Chancellor, Lord Blackburn and Shee.

This was the action by the Baron de Tessier against Lord Fermoy, and another gentleman, the object of which was to enforce a contract contained in a memorandum of agreement entered into in 1863, by which the plaintiff, who had obtained from the Austrian Government a preliminary concession for the establishment of a limited liability bank at Vienna, subject to approval by the Government.

tion (or, as they were called, "statutes") by the Austrian government, agreed to transfer all their present rights, under that preliminary concession to the defendants (Lord Fermoy and a friend of his), and to assign them the definitive concession so soon as it should be obtained, the defendants agreeing to do all things necessary on their parts to obtain the definitive concession with the least possible delay, and to pay to the plaintiffs £20,000 (half in cash and half in shares of the bank) for such concession, the payment to be within 30 days after the allotment of shares in the bank; and, further, to accept the "statutes" as they stood, and to pay all expenses.

Such being the agreement between the parties, it appeared that the definitive concession was granted by the Austrian government on the 2nd September, 1863, and that the allotment of shares was completed on the 2nd of October in that year. And the 30 days specified in the contract having expired, the plaintiffs claimed fulfilment of the contract and demanded the money and shares stipulated for in the agreement; but the defendants refused to accept the definitive concession or to pay the cash and hand over the shares, and hence the present action by the plaintiffs for compensation. The defendants, in answer to the action, contended that the agreement had been entered into on the basis of the statutes, and that these had been altered by the government in certain important particulars, whereby the position of the defendants was materially altered, and the carrying out the agreement as it was originally contemplated was rendered impossible; and that, in consequence, the defendants were relieved from their obligations to fulfil their part of the contract.

The arguments were reported at length in the *Bankers' Magazine* for July. Mr. Bovill, Q.C., Mr. Mellish, Q.C., and Mr. Kingdon argued for the plaintiffs; Mr. Lush, Q.C., Mr. Hawkins, Q.C., and Mr. Garth argued for the defendants.

The Lord Chief Justice now delivered a written judgment, embodying the unanimous judgment of the Court in favour of the plaintiffs. Having stated the material facts his Lordship proceeded thus:—The defendants contended that by the conversion of the absolute power originally vested in the directors, of providing for the payment of the price of the concession and the other preliminary expenses out of the funds of the company, into a power conditional upon ratification by a general meeting, and by requiring the board to be located at Vienna, their position was entirely altered; that it was never contemplated that they, the assignees of the concession, should bear these expenses out of their own pockets; that they had been induced to enter into the agreement from their knowledge that the London capitalists with whom they were associated, and by whom the future company was intended to be formed, would at once exercise their powers for the purpose of appropriating the necessary funds to the discharge of their liabilities; that thus their position became substantially different; and that in this state of things, which neither they nor the concessionaires had contemplated, they were released from their part of the contract, which they had entered into only on the basis of the statutes as they stood, and the adoption of which by the government was expected by both parties. It was an undoubted fact that the alteration of the statutes materially altered the position of the defendants, and in the end seriously damaged them. The board of directors having been appointed at Vienna, declined to act unless relieved from the responsibility of exercising the powers vested in them, subject to confirmation by a general meeting of the shareholders, of resolving to appropriate the funds of the company to the purpose of satisfying the claims of the concessionaires under the agreement, or

the preliminary expenses, and they broke up the company. In answer to this defence, it was contended—that the company was formed in no respect conditional upon the adoption of the statutes of the government in their original form; that the spirit of the concession was that the defendants should take the benefit of the concessionaires in the preliminary “contract,” according to established practice, to an engagement with the government, on the approval of the statutes, to grant a definitive concession, and that these defendants, having transferred by the concessionaires, then, providing their obligation of transferring the definitive concession, parties were not affected by the alteration of the statutes. It was understood that it was only inchoate rights which were reserved by the Austrian government reserved to itself the right of ratification in the statutes as a condition of the final concession. It was contended for the plaintiffs, that, even supposing the concession in such material respects that the concession contract could not be avoided unless it was still less if adopted and acted upon; and that the defendants, with full knowledge of the alteration of the statutes upon the agreement, and had thereby precluded themselves from objecting, even if there was not a lapse of a considerable time, election to abandon. After stating the material facts, of delay, in substance as above mentioned. Two questions present themselves on the fact of the alterations made in the statutes by the defendants. The first question is whether the defendants were relieved from the obligations under the contract, whether, if so, they were precluded from taking advantage of the alterations, and from annulling the contract by reason of the alterations, or omitted to be done by them after these alterations. The first question is one of considerable importance, necessary to determine it, because, upon the other hand, it is necessary that our judgment must be for the plaintiffs’ purpose, that the alterations in the statutes were to the detriment of the interests of the defendants, and displaced the defendants, who were acting to such an extent as to authorise the contract, the effect of these alterations was nullity. The plaintiffs could not have treated the defendants could have insisted upon its fulfilment, if the directors had not refused to act, and if the company had ratified the application of funds to the company, the plaintiffs could have insisted upon the transfer of the company to the plaintiffs would have been compelled to do so. The company, then, was subsisting, and one which, if the company was avoided, they might also have adopted and insisted upon it. It is to us that the defendants, so far from repudiating the alterations, adopted and acted on the alterations, and the plaintiffs to transfer to them the concession contract. Besides this there was an actual alteration of the statutes. All these acts are in violation of the contract by the defendants, and a waiver of the contract on the ground of an alteration of the statutes. And the option, they were bound to exercise it in a reasonable time, aware of the alteration of the statutes early after the formation of the company to go on.

case without any objection, and they took no exception until after the withdrawal of the Austrian directors at the end of October; and we think that six weeks was an unreasonable time to take to decide upon adopting or rejecting the contract. It is obvious that such delay must have been materially injurious to the concessionaires, as it deprived them for so long a time of the opportunity of securing other capitalists to whom to transfer their rights. We are of opinion, therefore, that our judgment must be for the plaintiffs. All that remains is to consider the question of damages, as to which it is to be considered that the plaintiffs lost all benefit to be derived from their concession. We may fairly take the value of the concession to have been what the defendants had agreed to give for it—that £10,000 in cash and £10,000 in shares of the bank. The plaintiffs, therefore, are entitled to recover £10,000 and the value of the shares. As to the value of the shares it is difficult to form an estimate. There is nothing to bind the defendants to go on with the company; they were at liberty to throw up the scheme, and return the deposits, and dissolve the company; and such, in fact, was the ultimate result. It is impossible, under these circumstances, to assign any real value to the shares which might have been handed over to the plaintiffs as performance of the contract. We do not, therefore, feel warranted in awarding substantial damages to the plaintiffs in respect of the value of the shares, as it would be merely nominal. In effect, therefore, our judgment is for the plaintiffs for the sum of £10,000, and also for the expenses, the amount of which was to be determined by arbitration. It was stated to be the intention of the defendants to take the case, by appeal, to the House of Lords.

THE COMPANIES ACT.—THE CASE OF MR. JAMES B. HIGGS.—RE THE BANK OF HINDUSTAN, CHINA, AND JAPAN, LIMITED.

THIS case was decided in Chancery by Vice-Chancellor Sir W. P. Wood, on the 29th June.

It was a motion under section 35 of the Companies Act, 1862, that the register of members of this bank might be rectified by striking out therefrom the name of the applicant, Mr. James Brooksbank Higgs.

In a similar application before the Master of the Rolls a Mr. Los succeeded in getting his name moved from the register, and as his case, which was made upon the same state of facts with the present, was fully reported in the *Bankers' Magazine* for July, a short statement only of the circumstances on which the application was based will be sufficient.

It appeared that on the 22nd of April, 1864, a joint-stock banking company was registered by the name of the Imperial Bank of China, India, and Japan, Limited, and in July of that year Mr. Higgs became the registered holder of 50 shares in the company. About this time negotiations were entered into between the board of directors of the Imperial Bank of China, India, and Japan and the board of directors of the Bank of Hindustan for an amalgamation of the Imperial Bank with the Bank of Hindustan. The latter bank was registered in 1862, and its capital was divided into shares of £100 each. On the 24th July, 1864, the manager of the Imperial Bank forwarded to their shareholders a circular stating that the negotiations for an amalgamation had been brought to a successful issue, and that as early as practicable, in accordance with the articles of association, an extraordinary general meeting of

the shareholders of both companies would be arrangements, previous to which all details of before the shareholders. This circular was forwarded on the 10th of August, 1864, stating in substance that of which the first was that 20,000 new shares of Hindustan were to be issued to the holders of each in the Imperial Bank. The issue was to be at £5 per share, and £5 per share of the premium to be paid of the united bank, and the remaining £1 per share to pay off the preliminary expenses. On the 25th of September, 1864, extraordinary general meetings of the Bank were held, at which resolutions were adopted in pursuance of the arrangement of the 24th of August, 1864, between the companies, and directing that the Imperial Bank should be liquidated, and appointing liquidators for the purpose. The resolutions adopted to the effect following—"That the liquidators receive in compensation, or part compensation, the interest and property of this company (the Imperial Bank of Hindustan) upon the terms specified in the arrangement, and if any member shall express his dissent, he may, by a notice in writing to the liquidators, require that he be allowed, after the meeting at which the resolution is passed, to sell his share or shares to the liquidator to purchase the interest of such dissentient member. The liquidators shall raise the purchase-money to be paid to the dissentient member by the sale of the share or shares of the company, which, under the terms of the agreement, would have been paid to the dissentient member." Mr. Higgs went abroad on the Continent until the 24th of September, and did not attend the meetings nor give a proxy, and on his return he received in his office a circular from the secretary of the Imperial Bank of Hindustan, in which he was informed that in right of his 50 shares in the Imperial Bank of Hindustan, under the terms of arrangement to an allotment of 20,000 shares in the Bank of Hindustan at £6 per share, he was entitled to the above option you must transmit the same to this bank on or before the 24th of September, at once called at the offices of the Hindustan Bank, and there whom he believed to be the secretary of the Imperial Bank of Hindustan, whatever to do with the Bank of Hindustan, and the arrangement entirely. In the meantime the Imperial Bank of Hindustan entered on the register of shareholders in the name of the holder of 50 shares, and in May last these shares were sold for non-payment of calls. Mr. Higgs now applied to the Companies Act, 1862, to have his name removed from the register on ground that he was a shareholder in the Imperial Bank of Hindustan, in which company he had not bought any shares, nor in any way acted as a shareholder. Mr. Rolt, Q.C., and Mr. J. N. Higgins, in support of the contention, contended that the arrangement was *ultra vires* the Companies Act, 1862, and also under the articles of association of the Imperial Bank, and was in no way binding upon Mr. Higgs. They also contended that it was also unreasonable in its provisions, inasmuch as it compelled the shareholders, and compelled them to pay a premium upon the new shares, of which £1 per share, and the balance to be devoted to "preliminary expenses."

Mr. Giffard, Q.C., Mr. Jessel, Q.C., and Mr.

Bank of Hindustan, contended that Mr. Higgs, by executing the articles of association in the Imperial Bank, had authorised the directors to amalgamate and made them his agents for the purchase of shares in another company. If the directors had power by the articles of association and sec. 161 of the Companies Act, 1862, to declare him a shareholder in the Bank of Hindustan, and it was submitted that they were so authorised, then they had fully exercised that power. But in any case Mr. Higgs was bound by acquiescence. If he disapproved this arrangement, which was carried out on terms that had been sanctioned by the directors of both companies, he ought to have taken some formal steps to repudiate it within the time limited by the circular; and it was his answer to say that he was abroad at the time, as if he went on the continent and left no one to look after his affairs, that was his own fault. He had retained the shares for nearly a whole year, and now when they had fallen in the market he had sought for the first time to escape from his liability. Assuming that he had been anxious to retain these shares the directors could not have deprived him of them on the strength of that casual conversation in the office of the bank on the 24th of September, 1864, which certainly did not amount to a repudiation of the shares.

The Vice-Chancellor (without hearing a reply) said that he had no doubt as to the order that he ought to make upon the present occasion. The argument on behalf of the bank proceeded on two grounds—namely, first, upon sec. 161 of the Companies Act, 1862; and, second, upon the provisions of the articles of association of the Imperial Bank, which were, in course, binding upon the shareholders of that company. It was also urged on behalf of the bank that the present applicant had full notice of everything that was being done, while the arrangement was in course of being carried out, and that he had barred himself from disputing the validity of the arrangement by his acquiescence and delay. As to sec. 161, he was of opinion that its provisions did not authorise any such arrangement, and that the Bank of Hindustan could not thereunder compel the applicant to become, or treat him as having become, a member of that company. By the articles of association the directors were, no doubt, authorised to “amalgamate” the Imperial Bank with another company of similar character. He might observe that no legal or technical definition was to be found of the term “amalgamate,” and it was very difficult to say what was its exact meaning. But whatever meaning might be given to the term, it certainly did not imply an authority from a shareholder to his directors for them to execute the deed of another company in his name, and make him liable for all the engagements of that company. If the articles of association were identical in both companies, as might possibly be the case, then no new obligations would be incurred, and the difficulty would be less. The proper notion, perhaps, of an amalgamation would be where two companies coalesced, and, each abandoning their original articles of association, proceeded thenceforth under a new deed of settlement or new articles. With respect to acquiescence and alleged laches, he was equally in favour of the applicant. His evidence was uncontradicted as to his having in no way accepted or complied with the allotment of shares in the Bank of Hindustan, or any part of the arrangement. On the contrary, he called at the bank immediately on his return from abroad and distinctly repudiated the arrangement. It was remarkable that the circular put forth by the Bank of Hindustan required the shareholders of the Imperial Bank to exercise their option, and sign the enclosed form to be transmitted to the bank by a certain day. Failing to comply with this they were not to have the shares. Mr. Higgs did not do so, and he took

no notice whatever of the circulars, except to action. How, then, in the face of their own Hindustan insist upon treating as a shareholder comply with its terms? But independently of the licence and laches, on the higher grounds already bound by the arrangement, and was entitled to be removed from the register. The bank must pay the cost.

**SINGULAR ACTION AGAINST A BANK CLERK FOR THEFT
THE MERCANTILE BANK OF NEW YORK**

THIS case was tried in the Court of Queen's Bench, on the 13th July.

It was an action to recover certain money lent to and for the use of the plaintiffs. The defendant admitted the debt; payment; that the cause of action lay many years; that the plaintiffs had accepted certain interest on the amount claimed; and lastly, that the plaintiffs were entitled to sue—but the latter plea was withdrawn.

Mr. Karslake, Q.C., Mr. J. Brown, Q.C., and Mr. Clarke were counsel for the plaintiffs; Mr. Clarke was counsel for the defendant.

The case involved an inquiry into very minute details of the evidence comprised depositions taken in Germany already been twice before the public under the name of the Bow Street and afterwards in the Queen's Bench. The plaintiffs are a banking association, established in this country. They resemble in some respects a joint-stock company. The defendant up to 1864 was what was then the bank, and he had charge of the money of the bank. As first paying teller it was the defendant's duty to take the first teller's proofs, into which he had to enter the sums received and the sums he had paid out on account. On the 28th October, 1864, the defendant professed to have returned to the practice of the bank, whereby he showed that he had dollars 65 cents in his possession in the coffers of the bank. On the day the defendant informed Mr. Hind, of the day the defendant informed Mr. Hind, that he felt unwell, and as it was probable he would not be able to attend the following day, he asked that gentleman to attend. Afterwards, however, transpired that on the following day the defendant left New York by the Teutonia, which in course of time arrived in this country. The defendant had absconded from New York on the 2nd November, and then an investigation was made of the accounts, when it was discovered there was a shortage of currency notes to the value of 207,028 dollars. The defendant followed to this country, and afterwards arrested under the extradition treaty; and on an application to the Bench, that court held that the local act of New York was not binding on him, and he was released. The defendant was then about to leave this country for Germany, and when required bail he had had to remain in prison until his claim against the defendant was between £100,000 and £200,000, estimated according to the value of the currency.

raction of the money. The money in defendant's possession was kept in strong room under lock and key, the key being kept by him. The defendant had on a former occasion expressed his extreme annoyance at a supposed discrepancy in one of the customer's accounts, but it was afterwards found to be correct. Just, however, before the defendant left New York, Mr. Black, one of the managers of the bank, had expressed his intention of examining the currency in the defendant's possession, and it was asserted, on the part of the plaintiffs, that the defendant had excused his leaving for England because he felt so much insulted at the proposed examination of his accounts, and, further, that he had described the directors as a set of "old fogies," and that, as he did not wish them to know anything about his speculations, he had desired certain parties not to give them any information respecting them. The suggestion on the part of the defendant was that as the directors allowed customers to enter the strong room and examine their securities and remove them, if they thought proper, it was probable that some other person had taken the money. To that the directors replied that, although one or two customers might have been allowed to enter the strong room, no one could go there and come out with anything, without being seen by the president, who commanded a view of the strong room from his desk.

Mr. Clarke, in addressing the jury for the defendant, asked their forbearance in the absence of one learned serjeant and two Queen's counsel, who had been retained, and it had devolved upon him to conduct the case, which was one of considerable importance to his client. The charge was the more of a criminal character than a civil one, and there could be no doubt that if their verdict was against the defendant it would brand him with embezzlement. By an indiscretion in absconding himself from New York, after it was intimated that an examination of the currency in his possession would take place, he had laid himself open to the criminal charge; but it by no means necessarily implied guilt. The learned counsel remarked on the lax manner in which the plaintiffs conducted their business, and to the especial fact that three or four persons had keys to the safe door, but not the defendant, who was most interested in the safety of the money, though he kept the key of the compartment where the money was kept. It was contended that sufficient proof had not been given to show that the defendant had abstracted the money, but rather that it led to the supposition that it was taken by some other person. It would also appear that the business of the bank was so large, and the pressure was so great on the few clerks kept, that it was impossible to accurately count the specie or the currency daily, and no doubt the deficiency might have arisen wholly or in part from that circumstance. He should call the defendant before them, and he would inform them how the business was conducted in New York. The currency had not been counted or checked for two years, and there was even now a disinclination on the part of the bank to count their assets and really ascertain whether or not there was the alleged deficiency. It was a mere question of presumption, and he felt certain the jury would not give a verdict upon such unsatisfactory evidence. The cashier had a duplicate key of the defendant's compartment, and as it was kept in his drawer it was accessible to others, and might have been used without his or the defendant's knowledge. In fact, it was missed for some time; and might not the person who took it have helped himself to some of the money?

Charles Windsor, the defendant, was called. He deposed—I have been for fourteen years paying clerk in the plaintiffs' bank. I kept the keys to my compartment in the safe, but not of the iron doors. The latter

were always open when I came in the morning evening. The lock of the iron doors was a one and there was no key to it. I attended the business to half-past three o'clock. The same description of the compartment where the money was kept, and also of the boxes were kept over the compartments. The clerks, and porters, were in the habit of going to the boxes contained securities placed with them. Many of them were taken away every morning at night. The president's seat was near the door and was away from the bank two hours every day for meetings of the directors. The currency was made up of paper round them, and the amount marked on the packages generally handed to me about middle day. I took them from the receiving-teller as they were brought in. It had been impossible for me to have counted them, so I took two or three assistants to make up the currency. It remained on the counter until I had made up the currency. I placed them in the vault; the packages were in the drawers were only eight or nine inches deep. I took them away until the evening; they were made up of cash of the bank had not been counted for two days. It was then counted by the president and the cashier. I complained that the vault was not safe, but the president said the old bank I had the combination of the lock of the vault, but I had not that at the new bank. I had the key of the compartments. On one occasion I left the bank. I asked Mr. Blake, the cashier for his, he counted the currency about four months before I left the bank. On one occasion I was in the bank which fitted the locks. I have paid for the currency. I gave 9,000 dollars for my estate on Staten Island. I paid for it out of 14,000 dollars left me by a friend. For the last 18 months I have kept two hundred dollars. The only change I have made in my establishment was the Odisville Copper Company, and I held one-third of the stock. The total was 500,000 dollars, but only 5,000 dollars' worth of stock was taken, and that had been used in developing the mine. The currency was proposed by the cashier, I was not in the deficiency. Mr. Blake had examined the specie and found it was about eight or nine days before I left. I went to the bank at three o'clock and said he wanted to count the currency. I told him it was an unnecessary thing to examine the cash alone, that I thought he should do it and that if it must be done it must be done in the presence of the president and the directors. Presuming that the currency would be counted, but it was not, however, was not done), I determined to strain it ready should the directors be disposed to complain. I was surprised that there was a deficiency in three packages. I was in the bank for some time, amounting in the whole to about three hours. The next morning when I came to the bank it was found that the currency was not counted. I mentioned it to the officials of the bank, but I did not know what was in the power of the bank, and that the

against me which would not allow me the means of defence or explanation. I never appropriated any of the specie or currency to my own use.

Cross-examined by Mr. Karslake.—I sold my property to my brother-in-law two or three weeks previous to my discovering the deficiency in the currency. The deed conveying the property was executed between the 10th and 25th October. My brother-in-law had practised as a dentist for three or four years in New York, and he had lived during that time in my house as a guest. Part of that time he was studying as well as practising dentistry. Before that he was engaged in a business in Chicago; that was five or six years ago. There was a 5,000 dollar mortgage upon my property. My brother-in-law gave me 20,000 dollars for the land. I left my wife and daughter there when I came to England in the Teutonia, and I understand they have been living there with him ever since. He bought everything I possessed. He gave me 5,000 dollars for the personal property. The deed was executed on or about the 23rd October, and I left on the 30th. No money passed when I sold my property to Jacob Bodeen, my brother-in-law. I had two building plots of ground in New York, but I do not know what has become of them. I have heard that the bank has attached them. I had speculated with Bodeen's money in purchasing gold and stock for him. I was to hold his money and give him notes from time to time; and I had given him 14,000 dollars currency, and I owed him 5,000 dollars in cash. There was some profit. I kept memoranda, but they have been destroyed. When I discovered the deficiency I entered it in my book as chargeable to the vault, it being the reserved money of the bank. I remained in the bank seven days after I discovered the deficiency. It would appear from my book that there was the proper amount in the vault. The practice was to keep the specie in 5,000 dollar bags. My private memorandum book does not show the deficiency of the 17,000 dollars. I purposely omitted it. My brother-in-law met me at the steamer with my carpet bag. I had a cloak and a bundle of things I could not get into my bag; that was all the luggage I had to come to England. I entered my name as Wilson in the steamer's book. About a fortnight or a month before I left I asked the messenger to get me two bags of gold, each containing 5,000 dollars, and to bring them into the other entrance of the bank—that is through the cellar. The bank's gold, which was brought at the same time, was brought in the usual way. My two bags of gold were put in a cupboard in the cellar. He brought me gold for me from a broker in Wall Street, in exchange for notes. I told the messenger, as I always did in reference to my own affairs, not to mention it to the officers of the bank. He had fetched gold for me on former occasions that had been got in exchange for notes. I afterwards put the two bags in one of my compartments in the vaults, where they remained a few days, and then I sold them to a broker in Wall Street. I sent one bag by a messenger, and the other by a clerk in the bank. I received payment for them in cheques, which I cashed into notes, with which I bought some stock. The broker has still the stock. I made 100 or 300 dollars by the transaction. I frequently turned over money in that way. My salary at the bank was 2,500 dollars a year. I had a brother-in-law (another Bodeen) in the bank; he was not my assistant. He was appointed and retained in the bank at my solicitation. He was the clerk who took one of the bags of gold for me.

Re-examined: In August last Mr. Hyde, one of the clerks, discovered during my vacation a deficiency of 10,000 dollars, but we neither reported it, thinking it would be made right some time or other. The deficiency was in Mr. Hyde's daily cash accounts, and not money had from the vault.

Albert Bodeen, the former clerk in the bank, was left, the gold and currency were between one counting and the other a 5 missed. Mr. Arnold, the president, said he have stolen it, as they only had had to wit

Mr. Edward Clarke then reviewed the evidence and ability that there was not the slightest doubt of the defendant with having abstracted this money.

The Lord Chief Justice, in summing up, counsel for the defendant that the real issue had stolen the gold and the notes. If, he concluded, although the defendant could not prove he was, however, civilly responsible for the last counting took place in 1862 every thing the defendant left New York a large deficiency of gold and in the currency notes. After all the evidence given by the defendant and that of the bank, which give a very different complexion to the evidence given by the defendant—referring to the discovery of the deficiency of 197,000,000, he said that the course a man should adopt was to say if he knew he was honest and was not in any way as honest men seldom entertain, he need not have been to have at once called the attention of such grave importance, with reference to the bank, but also to his own personal character, making a communication to the bank authorities in his book daily, as if the amount was actually absconded, but before doing that he must have when he was apprehended in England he had no chance. The whole proceeding was one of a very co-extensive with the money deficient, or that he had increased proportionately, or that he had no relations.

The verdict was entered for the plaintiff.
This terminated the sittings.

Reports of Joint-Stock Banks.

BANK OF NEW SOUTH WALES.

THE half-yearly general meeting of the shareholders of the Bank of New South Wales was held in Sidney on the 26th day of April last.

The Hon. G. Allen, M.L.C., in the chair.

The Secretary read the following report and balance-sheet :—

The directors have the pleasure to report a steady progress in the business of the bank during the past half-year, and to submit herewith a statement of its assets and liabilities on the 31st ultimo :—

net profits for that period, after deducting rebate on current bills, interest on deposits, providing for bad and doubtful debts, and reducing valuation of bank premises and office furniture, amount to	£86,551	8	10
---	---------	---	----

which is to be added—

recoveries from debts previously written off as bad or doubtful	1,483	11	0
undivided balance from last half-year	2,809	19	8

Giving for distribution	£90,844	19	6
-------------------------	---------	----	---

which the directors appropriate as follows :—

payment of dividend at the rate of 15 per cent. per annum on old stock for six months, £69,846 ; on new ditto for 5 months, £2,800...	£72,646	0	0
bonus at the rate of 3 per cent. per annum on capital paid up	14,529	4	0
balance carried to "Profit and Loss," new account	3,669	15	6
	£90,844	19	6

By the final payments, due this day, on account of the new capital, the bank stock account will be increased to £1,000,000, and the reserve fund £333,333. 6s. 8d., the limits fixed by the act of incorporation and the act of settlement.

During the past half-year new branches of the bank have been established in this colony at Gundagai and Wagga Wagga.

Since the last half-yearly meeting the bank has sustained a loss in the death of its late general manager, Mr. Robert Woodhouse, in recognition of whose long and faithful services, the directors have presented to him the sum of £1,000.

The vacancy created at the board by the resignation of Mr. James Anderson, on his departure for England in February last, was temporarily filled by the appointment of Mr. Joseph Scaife Willis, who now offers himself for election, and is the only candidate.

The dividend will be payable at the head office to-morrow, and at the branches on receipt of advice.

For and on behalf of the board of directors,

GEORGE ALLEN, President.

The report was adopted, Mr. Joseph Scaife in the place of Mr. James Henderson, and the same given to the president and board of directors in the management of the affairs of the bank.

BANK OF NEW ZEALAND.

early general meeting of the proprietors of this bank was held on the 1st of April last, at the banking-house in the colony, for the purpose of receiving the report of the directors for the half-year ending the 30th September, 1864.

Mr. J. Williamson, president of the board of directors, took the chair, and called upon the secretary to read the advertisement convening the meeting.

After this, the secretary read the minutes of the last meeting, which were confirmed, and then proceeded to read the half-yearly report,

The directors have much satisfaction in again laying before the proprietors the result of another half-year's operations, which affords very evidence of the continued success of the bank. The state of the colony throughout the past six months, combined with the high rate of money in England, has led to increased caution throughout the colony, and the directors are glad to be able to assure the proprietors that every doubtful dependency has been provided for, and a reserve allowed for prospective losses. It is in contemplation to initiate a new bank on 1st January, 1866, a guarantee and provident fund for the benefit of the establishment, to which the directors recommend the proprietors should now contribute £1,500 as a free donation; and that this should be supplemented hereafter by further donations of £500 each for every succeeding half-years. The net profit for the half-year ending 30th September, 1864, after providing for all debts supposed to be bad or doubtful, and making a liberal reduction in bank premises and furniture amounts to £50,668. 15s. 10d. To which is to be added, undivided profit from last half-year, £2,207. 18s. 9d.; making a total available profit of £52,876. 14s. 7d. Of the above profits, the directors recommend the following appropriation: to payment of dividend at the rate of 5 per cent. per annum, £22,456. 10s. 2d.; to bonus equal to 5 per cent. per annum, £11,228. 5s.; to addition to reserve fund, £15,000; to contribution towards starting guarantee and provident fund, £1,500; to be carried to profit and loss "new account," £2,691. 19s. 5d. Total £52,876. 14s. 7d. The dividend and bonus will be payable at head office on Monday, the 1st proximo, and at the branches on receipt of the same.

The Chairman, in proposing the adoption of the report, felt it would not be necessary for him to say anything to the shareholders that the prosperity of the bank was still the same. Nothing different in this report from any the directors had produced was the intention—if they found that the directors had found that the officers had seconded the institution to a successful issue, and that something had been done for them that their efforts had been appreciated. He need say anything further, as the report said everything that was necessary. He had much pleasure in proposing the report.

Mr. W. Williams seconded the adoption of the report, having been put to the meeting, was carried nearly unanimously.

The Chairman then said that there was no business to be done at the meeting, with the exception of reading the report. If any gentleman wished to ask a question, or had any business to bring forward, he might do so now.

The rough minutes were read, and

Mr. T. Macfarlane said that it would be well to have a separate meeting without recording their sense of the services of the officers of the bank. He would, therefore, move that the next meeting be given to those gentlemen, and would be glad to say that he most cordially concurred in the proposal. He proposed guarantee and provident society among the shareholders, that it would secure the services of honest and

Mr. D. Burn seconded the motion, which was carried.

The Chairman said that he had much pleasure in returning thanks for the vote that had been just recorded. In fact, seeing, or rather believing, that they were going to retire without making any motion of this kind, he still felt perfectly satisfied that the meeting acquiesced in the conduct of the directors, as there had been no questions asked or observations made. But he had now much pleasure in returning thanks for the vote that had been proposed by Mr. Macfarlane.

The meeting then separated.

LONDON AND COLONIAL BANK, LIMITED.

AN extraordinary meeting of the shareholders was held on the 3rd July, at the London Tavern, Bishopsgate Street, to consider an agreement for the sale of the assets of this bank to the International Bank, Limited; and also to consider as to the winding up of this company voluntarily, if such agreement for the sale of the assets be confirmed, and to pass special resolutions for giving effect to the opinions of the meeting on the above subjects. Mr. John Geary in the chair. The notice convening the meeting and the minutes of the meeting held a month since were read and confirmed.

The Chairman said that, in conformity with the resolutions carried at the meeting held a month ago, the committee had met, he might almost say, *de die in diem*, and the result was the agreement which he called upon Mr. Grillier, the clerk, to read.

The agreement set forth that the International Bank proposed to take over the whole of the assets of the company, on the payment of a sum equal to a distribution of £7. 10s. on the old shares, and of £3. 15s. on the new shares, the International Bank taking a warranty from the Colonial Bank against proceedings past and present.

The Chairman proceeded to explain the case, and the circumstances under which the agreement was submitted. Much discussion had arisen between the directors and the committee as to the terms proposed by the International Bank, and the result was, after a very lengthened correspondence with the directors of the International Bank, finding no impression could be made on them, the committee and directors of the bank resolved to bring the whole subject before the shareholders, and to leave it in their hands. Now, with regard to the warranty, that which the International Bank required was, that in the event of any of the shareholders succeeding in establishing their right under the former agreement of amalgamation, to exchange their shares for International shares, the Colonial Bank should indemnify them against any damage resulting from their refusal to exchange their shares. The principle or question of a warranty thus demanded was very unwillingly admitted by the directors of this company, but as the proposed agreement gave to the shareholders a guarantee of £7. 10s., it could not be expected that the International should be debarred from recovering that sum in case the shares on which it was paid should be exchanged in consequence of individual shareholders proving their legal right to insist upon the exchange. The warranty, indeed, demanded by the International Bank went much further, inasmuch as that in case such right of exchange should be established, the International Bank should deduct from the sum to be paid to the Colonial Bank the sum of £20 from each share so exchanged. To this

the directors would not give their assent. The International Bank should have the control of the proceedings in the event of the shareholders exercising their legal right under the amalgamation; but, as in the event of the advantage of the International Bank, while, on the other hand, it was their duty to protect the shareholders, the International directors had agreed of that condition to the effect that the directors should act jointly with the Colonial Bank. As to the subject, the directors determined to bring the matter before the shareholders, and to ask their views upon it.

Several shareholders here called upon the speaker to explain more fully what the position of the company was.

Mr. Morris said that by the original agreement the old shares were to be exchanged share for share, but that owing to the action of the International directors, a resolution was passed to exchange any more, in consequence of which the old shares were struck out of the quotations at the Stock Exchange. The position of the Colonial Bank warranted the fact that the old shares came out right £7. 10s. would represent the value of the shares. A voluntary winding-up would render the shareholders' difficulties, which would be sure to arise, if each should propose to work out its strict rights. It was suggested that the difficulties should be avoided by the Company paying a sum equal to what the shareholders would receive if a voluntary winding-up were to take place, to the new shares, which were not exchanged. No difficulties would arise in the event of the shareholders who had exchanged both the old and new shares. By accident or design, 565 new shares remained unexchanged. The International Bank now refused to exchange the old shares, a great injury; but inasmuch as the principal shareholders offered an amount of £3. 15s. for new shares on which the bank had admitted, he considered that an arrangement might be made between the old and new shareholders of this bank, might be made whereby the old shares would be worth a little less than £7. 10s., the new at a little more. That difficulty might be removed. Other directors were of opinion. Now, really the only alternative they had was to refuse to exchange, and they could then show the International Bank a rope of sand, but were resolved to carry out their duty, for he must in all candour confess that he had no objection if the directors would consent to any modification of the original agreement.

The Rev. Mr. Robinson objected in strong terms to the proposed resolution to the effect that the proposal should be moved with the omission of the warranty, and the fact that the old shares were set down as bad and doubtful debts.

Mr. Taylor seconded the motion.

Mr. Morris urged the withdrawal of the resolution, which was agreed to.

Mr. Balster referred at some length to the fact that the assets which might be fairly counted on amounted to £30,000. It was an insult on the part of the International Bank to offer £30,000.

Mr. Morris explained that that sum would not

those shareholders who had exchanged their shares, and if they were to be taken into account, the offer of the International Bank would amount to somewhere about £50,000.

In reply to inquiries as to the exchange of some and the refusal to exchange other shares, the Chairman explained that a circular was sent out in December last by the International board, calling upon both the old and new shareholders of the Colonial Bank to exchange their shares. Many did so, but others neglected to come in, and, subsequently, on the 27th January, the International board, mainly through the instrumentality of the Liverpool directors, passed a resolution, against which the Colonial board protested at the time, refusing to exchange any more. After some discussion the Chairman put the resolution, which was carried by 15 to 7.

Mr. Balster made an objection to some of the persons who had voted, who he declared had not paid their calls, and handed in a protest signed by himself and other shareholders against the resolution.

A second resolution was passed, on the motion of Mr. Balster, seconded by Dr. Cooke, to the effect that in the event of the International Bank not agreeing to the modification of the agreement, the directors should be requested forthwith to take steps to complete the share list, and to enforce the terms of the original amalgamation with that bank.

Mr. Morris having again impressed upon the shareholders the necessity of completing the share list in order to place the directors in a position to enforce the amalgamation, several added their names to the list for an increased number, and the proceedings, which lasted nearly three hours, were brought to a close.

COLONIAL BANK.

The half-yearly general meeting of the proprietors of this bank was held on the 5th July, at the London Tavern, to receive the report, C. Marryat, Esq., in the chair.

Mr. Calvert, the secretary, read the following report:—

"Pursuant to the provisions of the charter the directors present to the proprietors the following statement of the debts and assets of the corporation on the 31st December, 1864, and of the net profit of the half-year terminating at that date:—

DEBTS.

"The directors have the pleasure to report the possession from the branches, the business of the bank satisfactorily. They, therefore, feel warranted in again dividing the net profit, which amounts, as per above statement, to £129,000, after deducting for the payment of bad and doubtful debts and for income-tax, to £129,000. An ordinary dividend be made of 6 per cent. for the half-year ending the 31st December, 1864, being at the rate of 6 per cent. per annum on the paid-up capital of the bank, which will require And an extraordinary dividend of 1 per cent., which will require

Leaving
To which add balance brought forward from last year

Together
From this amount the directors propose to carry forward to the reserve fund

Increased into £129,000, and the balance of £129,000, carried forward to the next half-year."

The Chairman, in moving that this report be adopted, was a very short one, but as it was very satisfactory for that. As to the future, he was happy to say that the half-year ending 30th June, were perfectly satisfactory in all the branches.

Mr. G. Hoare seconded the motion.

A Shareholder asked if any portion of the profits of Jamaica, which had been taken over since the 1st January, were included in the present balance-sheet.

The Chairman—About two months of the profits were included.

The motion was carried unanimously.

The dividend, as recommended in the report, was payable on and after the 13th July, was the last dividend terminated with the usual vote of the directors.

UNION BANK OF AUSTRALIA

THE twenty-seventh annual meeting of the directors was held on the 10th July at the offices, Old Broad Street, London, and on other business; J. J. Cummins, Esq., Chairman.

Mr. H. W. D. Saunders, having read the report, read the following report:—

"It is again the pleasure of the directors to report that the statement of the bank's affairs, embodying the results of the year, is highly satisfactory. The course of business has been more than ordinary circumspection; affairs have not been disturbed and progress arrested by the natural causes, while in some of the Australian markets there has been considerable depression, of no material effect on the bank, owing to the sound judgment and

ment has been conducted, and for which the colonial staff are indebted to the commendation of the proprietors. The directors have had the advantage of conferring with Mr. M'Mullen, their inspector and general manager, now in this country on leave of absence, upon all the important interests of the bank; these interviews have fully sustained their appreciation of his character, and have enabled them to make and receive suggestions which cannot fail to prove beneficial. The latest advices, although indicating continued depression in some of the colonies, and the danger of its extending by reason of a severe drought, which affected pastoral and mining interests, are satisfactory with respect to the bank's position, and its affairs were being so administered as, whilst fully meeting the wants of its customers, to keep its resources under proper control. William Fanning, Esq., and Charles Henry Mills, Esq., are the directors who retire on this occasion, in accordance with the provisions of the deed, and now offer themselves for re-election. The subjoined statement of accounts presents a net profit of £113,882. 5s. 3d. available for division. The directors have, therefore, determined to apply the sum of £112,500 as a dividend of £2. 5s. per share for the half-year, payable in London, free of income tax, on 18th July, and in the colonies as soon as the inspector shall fix after receipt of advices."

Statement of Liabilities and Assets at the Branches on the 31st December, 1864, and at the London Office on the 30th June, 1865.

The Chairman then said—Gentlemen, I believe I can best give you the exact views of the board of directors by making but a few observations on the report gives to you the exact views of the board of directors on the affairs of the bank generally, and I may be able to say more than I should if the report was not prepared for your acceptance and investigation had been made into the affairs of the bank with the aid of the council and the information of the general manager. (Hear, hear.) I say speaking of the manner in which the accounts have been audited and investigated, because, from circumstances connected with the foundation of the bank, to give that attention always previously given, and which I hope still to be given, (hear, hear.) It is very gratifying to me to find that a full and complete investigation has been made for all bad debts we are now carrying, and an amount of profit on a business carried on on a banking propriety in every respect. (Hear, hear.) Apart from our banking business at our branches, we have no financial operations in any direction. We have no result of our banking business carried on with legitimate principles. (Hear, hear.) It is very gratifying to be able to express these sentiments in the management of the bank, and I believe there are many gentlemen in the room who, perhaps, are interested in other banks, and who can testify, as well as I can, that a business carried on with a greater degree of prudence and soundness in Australia. (Hear, hear.) I should be sorry to find that there was any exception of an opposite nature to that which I have noticed in our report a subject on which we possess that information which we ourselves possess—last mail of the continuance of the drought, and the effect of the war in New Zealand on business, and possibly affect your general interests for a time. These are incidents that only tend to make it more and

business should be kept within strict bounds, so that it may not be materially affected by any minor changes caused by events of that description. (Hear, hear.) And it has been the study of our administration abroad so to manage our affairs that we feel no alarm even at any such events as those to which I have alluded. (Hear, hear.) We believe they may for a time produce some interruption of our profits in the colonies, but we are satisfied that there is nothing to prevent those great colonies from being the field of commercial enterprise and banking business most satisfactory to all those who are engaged in such undertakings. (Hear, hear.) I have nothing more to say than that I shall be most happy to give any explanation that may be required, and will now conclude by moving that the report be received and printed for the use of the proprietors. (Hear.)

Mr. Botley expressed his entire satisfaction with the report, and begged to second the motion for its adoption. (Hear.)

A Proprietor inquired what was the amount of the reserve fund against bad and doubtful debts.

The Chairman said the amount reserved for bad debts had been carefully considered and was abundantly sufficient to meet every possible liability. It had not been the custom to state the exact amount. The portion that had fallen on the bank this year was comparatively small, and the question was not one that affected the interests of the bank. Up to the present time there had not been any large amount of deduction from the profits.

Another Proprietor, referring to the item "local bills, bills receivable, and other securities," thought it would be satisfactory to the meeting to know the nature of these securities.

The Chairman said he thought the statement which he had previously made, that the directors were not engaged in any speculations of a varied or uncertain character, and that their operations were strictly banking operations, would naturally lead any gentleman to believe that the securities referred to were merely those which belonged to legitimate advances made for carrying on a business which was yielding a profit of 18 per cent. (Hear, hear.) If they had not that means of employing their money they would be unable to realise such a profit. He repeated that all the transactions of the bank were legitimate banking—that every security was worth the amount attached to it—that the directors had written off every penny that was doubtful. If the nature of such securities was required from any bank their accounts might as well be posted on the Royal Exchange, and he was confident that such a course of proceeding would operate injuriously both at home and abroad. (Hear, hear.)

Mr. Dalgety (a director) said that some of the securities consisted of colonial debentures. As there were twenty-five branches, a considerable time must elapse before the accounts could be made up in this country, and it would be scarcely possible to give them in detail. Indeed, if that were done, he believed it would be of no real service.

Mr. Jephson urged on the directors the propriety of observing the strictest economy in the management of the affairs of the institution.

Mr. Campbell (a director) assured the hon. proprietor that the subject had at all times received the closest attention from the board.

Mr. Dalgety remarked that since the increase of capital nearly £500,000 more had been employed, with a moderate increase in the annual expenditure.

Another Proprietor expressed strongly his discouragement of what often proved to be false economy.

The motion for the adoption of the report was unanimously.

The Chairman said the directors had decided that in January next the dividend warrants would be sent to the address of every proprietor, unless they received notice from the proprietor to pay the amount into any bank to the order of the directors, which was very convenient to many proprietors. They also considered the convenience of proprietors, and their collection of dividends, and receive deposits in London for fixed periods, which had been ascertained on application at the office.

The retiring directors, Messrs. Fanning and

The Secretary then announced that the directors would meet on the 18th July.

Mr. Botley proposed, and Mr. Driscoll seconded, a resolution that the chairman, which having been briefly acknow-

ENGLISH AND FOREIGN CREDIT

An extraordinary general meeting of the shareholders was held on the 10th July, at the London Tavern, under the chair.

The Secretary (Mr. Derry) read the report of the directors, and a realised balance to the credit of profit and loss, and it was proposed to treat in the following manner the payment of a dividend of 7s. 1d. per share, and the rate of 10 per cent. per annum; £5,000 was proposed to invest and not to employ in the purchase of the balance, £1,686. 5s. 11d., it was intended to be a profit and loss account. A sum of £2,258. 5s. 5d. was proposed to be a rebate on transactions now carried on.

The Chairman, in moving the adoption of the report, said that he recollected why the board had called an extraordinary meeting, and that in the recollection of the shareholders, that at the time of the meeting he took that opportunity of stating what was the position of the company, and they desired to do that as frequently as possible, and it was found by the articles of the association that the shareholders should hold a meeting once a year only. Now, he was averse to declaring an interim dividend without the accounts of the shareholders being first obtained, and, therefore, in the articles of association, they had called an extraordinary meeting, and had been induced to make this explanation by the word "extraordinary." The shareholders had seen the accounts of the company, and they were satisfied except that those accounts were certified by the servants of the shareholders, and he hoped that the genuineness of the accounts; and here he mentioned the circumstance that a gentleman—a shareholder—had addressed the body of shareholders by an address and called for resolutions. Mr. Harrison had a right, no doubt, to take his own view of the position of the company, and the first resolution which he understood the hon-

he begged distinctly to state that, if carried, the directors would regard it as a vote of want of confidence in the board, who would act accordingly. In conclusion, he moved that the report and statement of accounts be received and adopted.

Mr. Thomas Stenhouse, the deputy-chairman, seconded the motion.

Mr. W. G. Harrison expressed his regret that he should have been called upon to bring forward the resolutions which he should submit for the adoption of the shareholders. In adopting this course he did not desire to make any imputation on the directors, but he thought that when the results of 18 months' trading had been so unsatisfactory, they had a right to ask the directors whether they deemed it advisable for the interests of the company to continue their business or suspend it. They knew that a credit company was, to a certain extent, of a speculative character, but, at the same time, he considered that 10 per cent. was a paltry dividend, and when, as he had been informed, they had narrowly escaped a compulsory winding-up, he thought there was every reason for inquiry and apprehension. He wished to know if it was true that bills for £3,000 were dishonoured. If the directors were not in a position to give a negative reply, he could not be surprised at the miserable rate of discount at which their stock stood. There was a large number of rich shareholders in the company who could wait until the shares got up to par, but the poor man who wanted to sell was placed in a very embarrassing position. Every shareholder should have his portion of the realised capital. He wished to know from the directors whether the state of the affairs warranted them in continuing or not, and whether it was likely the shares would go up in the market. He would move the following resolution as a substantive amendment:—"That a committee be appointed to confer with the directors on the financial position and prospects of the company, and as to the most advisable course to be taken in the interest of the shareholders with reference to the future proceedings, having regard to the present condition of the money market and the depreciation of the company's shares."

Mr. Goodyear seconded the amendment.

Mr. Legett inquired whether they could feel secure in regard to the sum £106,912 which was on bills receivable. He believed their money under that head was jeopardised, and he could not help thinking that the statement of accounts was barren in every respect.

Mr. Mowitt expressed his surprise at the entire absence of proof to substantiate the very serious allegations made against the company. It was desirable that companies should be explicit in dealing with details, but he thought the case was different with their company. He had no hesitation in saying that the accounts were scanty, and the items referred to contained sums upon which they should be solicitous. However, as far as he was concerned, he was thankful to the management for having placed them in such a good position. He thought it was a mistake to have issued £50 shares, and as other companies had reduced theirs to £20, he thought they might act in the same way. He believed the capital was small, and he would suggest the advisability of increasing it by amalgamation or otherwise.

Mr. Holland, Mr. Gusher, and other shareholders having expressed themselves adversely to the amendment proposed by Mr. Harrison,

The Chairman proceeded to reply *seriatim* to the questions put to him. He said they held no bill which was not covered with collateral security. The current expenses were light when compared with other companies, being only 2½ per cent. The question of the diminution in the value of

satisfaction that, in pursuance of the provisions of the deed of settlement, they have filled that vacancy by electing Mr. Scrimgeour a director of the bank. It was with great pleasure the directors learnt that their offer would be accepted by Mr. Scrimgeour, as a recognition of their strong personal regard for a valued friend and officer; and they feel assured that the proprietary will, with equal pleasure, confirm an election which, in some degree, marks their approbation of twenty-six years of arduous service, characterised by ability, zeal, and disinterestedness which cannot be exceeded. The following directors retire by rotation, under the provisions of the deed of settlement, viz.:—Archibald Boyd, Esq., Charles Lyall, Esq., and Peter Northall Laurie, Esq., who, being eligible, offer themselves, and are recommended by the court of directors for re-election.”

The Chairman having declared the dividend with the report, and announced that both on Thursday, the 20th July, proceeded to move. He explained that the reason the meeting was was, that the new room at the bank did not afford and while this circumstance was in one so satisfactory to know that the necessity of moving from the increased number of proprietors, and in the affairs of the bank. (Hear, hear.) Well, there would be no regret at being obliged to assemble, and he hoped that by next year inadequate to their reception. (Hear, hear.) The directors had been received in a manner highly gratifying, and he hoped that by next year they had they ever been able to lay before the proprietors account for the whole year. (Hear, hear.) He used some words of warning with reference to the profit which they might make in the six months, six months were, as they would all recollect, in January the rate was falling, and as the dividend continuance fall for a very considerable time (this point), he and his colleagues had thought that they might be thrown out that shareholders might not be able to get the amount of profit was not so large at the period dealing as it had been during the exceptional time, it would now be admitted that in that they had taken a prudent course. (Cheers.) At the same time the directors were rather to moderate than overrate anything, and he felt a greater pain than to attempt to mislead or mislead, but he hopes that they had not the fullest anticipation of the result. They did not, therefore, divide the whole of the profit, and though he knew a different course would have been taken by the proprietors, he thought the general body would have been dividing the whole was at the end of the year, and they had taken a prudent course. (Cheers.) They were carried forward from the last half-year, able to give a satisfactory account. Undoubtedly, there was a temptation to have as large a dividend as possible, but the directors saw more of the working of the establishment, and they appeared a little more prudent than those who had not the opportunity of ascertaining the exact state of affairs, and the directors. No directors had ever been treated with more consideration at this bank; for, from the commencement, the directors had taken the prudent course of not dividing the whole of the profit, and they were now in the proud position of having a reserve of £300,000. The proprietors had been told that the reserve had been increased one effect would be

to be made, and that had been done. The directors had as great an interest as any one in dividing as large an amount as possible, and on this point he hoped the same confidence would be reposed in them as heretofore. During the last six months the average rate of the Bank of England had been $4\frac{1}{2}$ per cent.; in the preceding six months it had been over 8 per cent.; notwithstanding which the board were able to show by their report that this year they had made a profit of £145,000 against £180,000, which was reported as the profit of an exceptional period. (Hear.) This was accounted for in a satisfactory way by increase of business in every department. Taking the two reports of the year, it appeared that they had paid to customers on current and deposit accounts the enormous sum of £278,000, that they had appropriated out of the profits of the last half-year £5,000 to their building investment account, and that they paid £300,000 for the year in dividend and bonus; for though the divided profits of the last half-year were properly stated at 30 per cent., the actual payment for the year was 25 per cent.; in point of fact, they received one-fourth of their paid-up capital back again. (Cheers.) This was no boast, but a plain unvarnished tale—a simple repetition of the figures of the account. The anticipations for the coming six months were highly satisfactory; they had every reason to hope for a full average harvest, they might anticipate greater commercial activity, and he hoped at their next meeting to have as satisfactory a statement to make as on the present occasion. The bank premises in Chaucery-lane were not in so forward a state as had been expected, but they were proceeding towards completion, and he hoped that before the end of the year they would take possession of them, and so afford adequate accommodation to the largely increased business at that end of the town. (Hear, hear.) The business of the branches generally was in the highest degree satisfactory and profitable. During the last half-year, which had been a period of great anxiety, they had enjoyed almost an immunity from bad debts, and he could say with confidence that they had not a bad or doubtful debt on their books which was not in the most ample manner provided for. (Cheers.) Referring to the paragraph with reference to the appointment to the board of Mr. Scrimgeour, he said that no proprietor had ever had a more faithful or more competent officer, and no director a more fearless, independent, or disinterested counsellor. Differences had, of course, arisen in the 26 years of service between Mr. Scrimgeour and the board, but when his views had not been carried out, that gentleman had always been ready to carry out the opinions of the board as fully, as heartily, and as loyally as if they had been his own. (Hear, hear.) On no fewer than three occasions in the earlier stages of the bank had Mr. Scrimgeour refused additional remuneration, which the shareholders considered his services entitled him to. Mr. J. A. Barton, who came to the bank as a young man from the Bank of England, who had always devoted himself to the interests of the bank, and in whom the directors had the greatest confidence, had been appointed to the office of general manager, and he thought it a matter of satisfaction that they were not obliged to go out of the bank to supply any vacancies.

Mr. James Farquhar seconded the motion.

Mr. Hodgkinson, on the part of the shareholders, expressed approval of the manner in which Mr. Scrimgeour's eminent services had been rewarded, and satisfaction that that gentleman's high qualifications would not be lost to the bank.

The report was adopted, and the retiring directors, Messrs. Archibald

Boyd, Charles Lyall, and Peter Northall L. elected.

Mr. Stewart proposed that a sum of 1,000 to Mr. Laurie for his exertions on behalf of the bank.

The Chairman expressed his thanks for the motion would not be pressed, as he was devoted to the interests of the bank, not one reward than the approbation of the shareholders.

Mr. Graham observed that when they were Pullinger affair the proprietors supported them and that was in his opinion a reward beyond measure.

The motion having been withdrawn,

Mr. Graham moved the thanks of the meeting.

Mr. Huggins moved, and Mr. James Bull seconded, that the directors be empowered to make arrangements for Mr. Scrimgeour, to be placed where the board may think fit.

Carried unanimously.

Mr. Nottage moved, and Mr. Hislop seconded, that the chairman and directors, and also to the branches, which was carried with acclamation.

The Chairman returned thanks, and the meeting closed.

THE IMPERIAL BANK.

THE sixth ordinary general meeting of the bank was held at the London Tavern, on the 30th June, 1880, Mr. M. P., in the chair.

The following report for the half-year ended 30th June 1880, was read:—

"The accounts which the directors have now to lay before the shareholders show the result of the operations of the bank for the past half-year to have been very satisfactory. No commercial depression has existed for some time, and the bank continues steadily progressive. No great amount of money which has prevailed during a great part of the last year, and that the dividend will have to be paid in full, which previously only carried interest at 5 per cent. per annum, your directors are able to recommend a dividend of 10 per cent. per annum, free of income-tax. After deducting all charges of the bank, together with interest on loans, discounted, bad and doubtful debts, there remains a balance of £6,897. 18s. 2d., which the directors recommend to be divided as follows, viz.:—£3,000 to the reserve fund, £3,897. 18s. 2d. to the new account."

We have examined the above accounts and find them to be correct,

GEORGE BROOM, } Auditors.
PETER BROAD, }

The Chairman, in rising to move that the report just read be received, adopted, and entered upon the minutes, said that after three years experience of the working of the bank he had to congratulate the shareholders upon its success, and upon the fact that it was stronger and more prosperous at the end of the last six months than it was at any time before. (Hear, hear). The directors were satisfied that the progress which the bank had made would bear favourable comparison with that of any one of the great joint-stock banks founded during the last twenty-five years after the third year of its establishment. The low rate of interest within the last six months had, however, militated against the profits of the bank; nevertheless, they were able to divide 8 per cent. per annum amongst the shareholders. (Hear, hear). It might be thought by some that the dividend should be raised to 10 per cent., but the directors preferred that the difference should be handed over to the reserve fund. The preliminary charges would amount to only about £1,000, which would be much more than covered by the shares in hand. They might now rest satisfied with the fact that the Imperial Bank was an accomplished fact. A large amount of capital was employed. The most complete organisation of the bank was established, and it had secured a safe and sound business which was growing every week. (Hear, hear). In conclusion, he reminded the shareholders that

they might contribute to its further prosperity deposit accounts, observing that as all their projected any further business might be considered the shareholders uniting together in their efforts might be made one of the largest institutions. Their achievements might be equal to their aspirations. Moved that the report be received and adopted.

The motion having been seconded,

The Chairman was about to put the question.

Mr. Kintrea rose and said he hoped that it would proceed so fast, but would allow a little more time to express their opinions. He wished to ask the directors intended to do with the reserved shares. The Chairman said that when their prospects were so flourishing he would like for the board to give to the shareholders, to relieve the burden of the day, an interest in those shares. He thought that it was intended to apply those shares towards the amalgamation. Now, he thought, any sum of money made to stand upon its own merits. He referred to the thousand and odd shares that were unsold. He thought why an increased capital should not be taken into consideration. He hoped that the board would give a policy in respect to those reserved shares.

The Chairman said he could not give a definite answer. The board did not as yet know what to do. He had never thought of the matter, and therefore could not say upon it. The directors had not certainly considered the reserved shares. They had as much capital as they then, should they think of issuing more shares.

Mr. Kintrea: Do I understand the chairman to say that the directors could not profitably employ more capital?

The Chairman: They could not, at the present time.

Mr. Kintrea did not suppose for a moment that the directors concealed any important fact from the shareholders. He thought it would be interesting to the shareholders to know the matter of the reserved shares clearly understood. He thought that this was one of the most successful, as well as the most banking institutions in the country. (Hear, hear.)

Mr. Michel said that no doubt Mr. Kintrea had asked his question. He thought, however, that it was left to the decision of the board, namely, to decide how they should deal with those reserved shares. He thought the existing interests of the proprietors would be protected by the directors.

The Chairman might say once for all that he would consult the interests of the proprietors generally, but what was for the general good. They had no more than they wanted, and need not ask for any more.

The resolution was then unanimously agreed to.

The Chairman then put the next resolution, that the dividend at the rate of 8 per cent. per annum, free of income tax, ending the 30th of June, be paid to the shareholders on the 1st day of August.

Carried unanimously.

A resolution of thanks to the directors having been passed.

The Chairman returned thanks on the part of the directors.

Mr. Kintrea said he was happy to say he heartily concurred in the resolution just passed. He entertained also sentiments of the highest respect for the secretary and officers generally of the institution. He was induced by the faith and confidence he felt in the secretary, as well as in his great ability, to take shares in the bank. He trusted that the chairman, however elated he might feel at the prosperous state of the establishment, would see the propriety hereafter of giving a little more attention to the wishes of the shareholders, and of avoiding that hasty and impatient style which he (Mr. Kintrea) thought he had displayed that day. (Cries of "No, no.")

The Chairman :—I deny that I displayed any haste or impatience, I invited the shareholders to put any questions they pleased. You are, therefore, wrong, my fine fellow.

Mr. Kintrea wished that the chairman would not be quite so friendly with him. He did not desire that the chairman should be on such familiar terms with him. He then moved a resolution of thanks to the secretary, which was also unanimously assented to.

Mr. Michel next moved, and Mr. Flight seconded, a resolution of thanks to the manager of the Imperial Bank, for the valuable services he had rendered to the institution.

Mr. Bensham having acknowledged the compliment paid him,

Mr. Michel moved the special thanks of the meeting to their chairman, Mr. Alderman Lusk, for his fair and impartial conduct. He was quite sure that nothing was more remote from the disposition of that gentleman than a feeling of discourtesy towards any man. He thought that the shareholders generally might congratulate their respected chairman on being placed in a position where he would have an opportunity of expressing his opinions upon the commercial legislation of the country in the British House of Commons. (Hear, hear.) He hoped that the worthy alderman might long live to bear his "blushing honours thick upon him."

The motion having been agreed to *nem. con.*

Mr. Alderman Lusk thanked the shareholders for their great kindness, and pledged himself to co-operate with his brother directors in every measure having for its object the progress of this institution, and the making of it a thoroughly good, prosperous, and successful bank.

The proceedings then terminated.

LONDON FINANCIAL ASSOCIATION.

THE fourth half-yearly ordinary general meeting of the shareholders in this company was held at the South Sea House, Threadneedle-street, on the 17th July; Mr. J. Hackblock in the chair.

The Secretary (Mr. Kock) having read the notice convening the meeting, and also the minutes of the previous meeting, the following report was taken as read :—

"The annexed statement of accounts, made up to the 30th June last, shows, after deducting expenses of every kind, and rebate of interest, calculated at the rate of 5 per cent. per annum, a total of £108,943. 1s. to the credit of profit and loss. The above sum includes the balance of £40,663. 8s. 6d. brought forward from last half-year. The directors recommend the payment of a dividend at the rate of 5 per cent. per annum, and a bonus of 10 per cent. per annum, free of income-tax, which together will absorb £45,000 and leave a balance of £62,660.1s. to be carried forward

to next half-year. The dividend and bonus amount per share, and will be payable on and after the

The Chairman, in introducing the business accounts was extremely clear, and required little explanation, but, inasmuch as the number of proprietors had increased from 500 and 600, at which number they stood this

1900, and as they were spread over the whole of the United Kingdom some few observations from him on the position of the association might not be unacceptable—at all events, to the absent shareholders. In the statement of accounts before them, the first thing to which he attracted all the attention of the shareholders was the item of liabilities, which amounted to £649,187. That was an apparent decrease upon the last year, but in reality there was no decrease, because it so happened that several large loans fell due shortly before the closing of the year, the sum of £50,000 falling due on the 30th of June, consequently, the shareholders would see, there was no falling off in the business. As to the credit side of the account, he wished, for the benefit of the absent shareholders, to repeat what he stated on the last and previous years, that the loans, securities, and current accounts, which were put in the balance-sheet at £1,383,681, did not represent the value of the securities deposited with the association; it merely represented the advances. The securities they received for loans and advances were very much larger in amount, because they took care to have a very comfortable margin. (Hear, hear.) It did not, of course, signify to the shareholders how they were valued, and he merely named the circumstance for the purpose of pointing out that it was the amount of advances for which the securities were given that was put down in the balance-sheet; the value of the securities themselves being much nearer £2,000,000 than £1,500,000. The securities they held were taken at a very low price, certainly far below the current market price. (Hear, hear.) The result of the half-year's business would be, as compared with the last half-year, as follows:—In the year ending 31st December, 1864, after paying all expenses, making a reduction of interest, and making an allowance for everything, the net profit was £630. 17s. 9d., while in the half-year ending 30th of June last it was £68,879. 12s. 6d., being an increase of £7,248. 14s. 9d., and was a highly satisfactory state of things. (Cheers.) Then again, in the year they added £18,654 to the undivided profits, making the total £663. 8s. 6d., while this half-year they had added £22,596. 11s. 6d., and the total amount of reserve £62,660. (Cheers.) That again was very satisfactory. (Hear, hear.) During the last half-year and the half-year before they did not bring out a single company. The whole of these profits consequently had been earned in regular, true, and legitimate business. (Cheers.) He was not aware that he had anything to state, but should be happy to answer any questions that hon. members might put to him. With the permission of the meeting, he proposed to move that the report and accounts now before the meeting be read and adopted.

Mr. Morrison seconded the motion. The chairman called attention to the increase of the current expenses, which amounted to this half-year to £13,924.

The chairman explained that a portion of the increase was on account of capital not being all paid up last half-year, which rendered the amount on to the directors less in amount, and that the extension of the business necessitating a larger staff and better offices, accounted for the increase. The expenditure on this item during the previous half-year was £12,823, and during the last-year £13,924, so that in fact the increase was not very large.

A shareholder inquired what amount of deposits was included in the account.

The chairman replied that the whole item, comprising deposits, interests, and current accounts, was £649,187, and probably out of that

£640,000 were on deposit. (Hear, hear.) increase that item, because it was mainly deposits that they were able to work the as to give such good dividends. (Cheers.)

In reply to a further question,

The Chairman said they did not anticipate present there was not the remotest chance entered into their thoughts. (Hear.)

The report and statement of accounts were and a dividend and bonus, amounting together were declared, being at the rate of £15 per c

A cordial vote of thanks to the directors seconded by Mr. W. Read, and carried by acceedings.

THE CITY BANK

THE ordinary half-yearly general meeting of the bank was held on the 18th July at the London port of the directors and declaration of the ending the 30th of June. Mr. Jones, in the chair of Mr. Bell, presided.

Mr. Worth, the secretary, having read the report, the usual formalities were gone through.

The following report and balance-sheet were presented.

"The directors beg to submit to the shareholders of accounts to the 30th June, showing a gross profit of £65,315. 9s. This result enables the directors to pay interest on bills discounted not yet due, to the rate of £6 per cent. per annum on £500,000, the profit of £2. 5s. per share on 10,000 shares, together with an annuity, and to carry forward £1,293. 13s. 3d. to the account. The following gentlemen retire from office, viz.—Mr. East, Mr. Henriques, and Mr. Young. They themselves for re-election. It is with deep regret that, from circumstances which have arisen, Mr. Bell has deemed it necessary to tender his resignation of the institution; they cannot, however, allow this to affect the institution; acknowledging the important services rendered by him to its formation, and the high honour which he has brought to its relations with it. The business of the Bank has afforded highly satisfactory results. The dividend (after income tax) will be payable on and after Tuesday next."

Dr. Liabilities and Assets, June 30th 1891.

	<u>£65,315</u>	<u>9</u>	<u>0</u>

The Chairman, who had stated previously that he occupied the chair in consequence of the resignation of Mr. Peter Bell, said that the figures in the report elucidated so clearly the position of the bank, that it was not necessary for him to make any comments upon them. He would therefore content himself with simply moving the reception and adoption of the report and accounts. At the same time he should be happy to answer judiciously any questions which hon. proprietors might put, or to supply any information which they were desirous of receiving. Before putting the resolution, it was his duty to declare a dividend of 6 per cent. per annum on £500,000, the paid-up capital, together with a bonus of £2. 5s. per share on 10,000 shares, which, together, was equal to 15 per cent. per annum. (Cheers.)

Mr. Hackblock seconded the resolution.

Mr. H. S. Brown inquired how it was that the current expenses, which last half-year amounted to £14,000, were put down at £20,938.

The Chairman explained that the increase under this head did not arise from any large addition to the working expenses, but from its being necessary to make a larger allowance than ordinary for bad and doubtful debts.

Mr. Brown inquired whether the £30,000 set aside last half year to meet the bad and doubtful debts had been exceeded, and this additional amount rendered necessary.

The Chairman replied that he had already explained that the deficiency arose from bad debts exceeding in amount the ordinary sum set apart on that account.

Mr. Rushfield said that it would be in the recollection of the meeting that on the last occasion he called attention to the necessity of appointing auditors who should be alike independent of the proprietors and the directors. He should wish to see first-rate accountants quite unconnected with the bank appointed. He was satisfied that that was a wholesome rule, and he felt so strongly upon the point that he was of opinion that at no distant day the Government would take the matter up, and compel a public and independent audit, not only of banks, but of all joint-stock companies. Such a proceeding, so far from being injurious to the bank, would increase the confidence of shareholders, and prevent the possibility of a recurrence of such disasters as had taken place in respect to several commercial undertakings of a similar character. He was quite aware that it might be said that he was casting censure on the present auditors by bringing forward such a subject. He did not say one word against either of the auditors, of both of whom he had the highest possible opinion, but he did say that it was but human nature that auditors should wish to become directors, and if he himself were an auditor who wanted to become a director he should feel that it would be quite impossible for him to attain his object if he always set himself in opposition to the board, and refused to accept the accounts as stated by them. Now the very question that had been raised about the increase of the expenses must have come under the attention of the auditors, because it appeared by the statement that they were not expenses but bad debts, and had there been auditors unconnected with the bank everything would have been under its proper head.

The Chairman said that the item in question included bad debts.

Mr. Rushfield understood that the reason for putting the expenses down at the increased amount of £20,938 was on account of an increase in bad debts. He knew very well that there were some banks that had no auditors at all. For his part he should be sorry to have anything to do with such institutions, and thought nothing could be more to the advantage of proprietors generally than that there should be a thoroughly independent audit, and he pointed to the beneficial working of the public audit of the gas companies of the metropolis, which had been insisted on by the Government, alike for the benefit of the gas consumers and the proprietors, as a reason for the introduction of some such system into banks and commercial companies. He was quite sure that by its adoption they would secure a course of prosperity which they could obtain in no other way.

Mr. Billing thought that the questions which had been asked would have been rendered unnecessary had the chairman made a detailed statement of the position of the bank. No information, however, was given as to the sum required for bad debts, and at the time it was stated that the amount reserved for that purpose was ample to cover all the losses. The natural question to ask was, had it done so, and if not, whether it had been necessary to take a portion of the profit, as well as the sum reserved to meet the losses. What he wished to know was, whether it was proposed to set aside a further sum as a reserve, to meet future losses, as well as to defray those which had been incurred. As reference had been made to the appointment of auditors, he wished to observe that he considered it highly desirable that the shareholders should have some voice in the appointment of directors whenever a vacancy arose. Up to the present time it had

been usual for the board to fill up all vacancies, and then to submit a mere formal motion to the shareholders confirming the appointment. He recommended that when vacancies arose the directors should submit a list of the shareholders eligible to be on the board, and those whom they recommended, leaving the actual election to the general body of the proprietors. Above all, he hoped that they would establish a reserve fund for the purpose of meeting current losses, which reserve might come out of interest, and need not materially effect the dividend.

The Chairman, in reply to the observations made respecting an audit by persons wholly unconnected with the bank, said that the board promised on the last occasion to take the matter into consideration. They had done so, and, after giving due weight to the arguments brought forward by the hon. proprietor, they had come to the conclusion, unanimously, that it was not desirable or for the interests of the company to appoint a paid accountant to investigate the affairs of the bank, which were conducted prudently and discreetly, being known only to the officials and the directors. When accountants were introduced from without, the work was not usually done by the accountant himself, but gentlemen deputed by him were sent to the office, who saw all the arrangements of the bank and the nature of each account, and a principle of vast importance—that of secrecy—was immediately upset. In addition to this, he might say that they were bound in this matter to act in accordance with the terms of their charter, which was drawn up under the authority of the Government and had been strictly scrutinised. That charter declared that two of the shareholders chosen at the meeting should be the persons appointed to audit the accounts. It had been alleged that shareholders appointed in that way naturally desired to become directors, and would pass the accounts submitted by the directors without much examination. He was not there to discuss the reasons why gas companies should have public auditors; but they all knew that the Bank of England and several of the chief banks of London, including the London and Westminster, the Union, and other joint-stock banks, had no auditors at all, and yet were most flourishing institutions. With regard to the observation about the auditors wishing to become directors, he could only say that no gentleman who had ever sat at the board of this bank had been an auditor. Mr. Billing had referred to the circumstance that it was stated last year that an ample reserve had been set aside for losses, but the fact was that the losses of last year were rather more disastrous than had been anticipated, and exceeded the amount which the board thought would be sufficient. Everyone who was connected with the sale of produce knew that the market for many sorts of produce, instead of responding, had declined with the declension of the interest of money. They took the valuations at the current rate of the day, which proved insufficient, which was the reason why a considerable sum had been added to the present half-year's account. The bank had not suffered in the present half-year, for a very small sum was sufficient to cover their losses upon it, and they were able to pay a very handsome dividend, which dividend he assured them had been earned. (Cheers.) He hoped that explanation would be satisfactory, and he had endeavoured to make it as clear as possible.

Mr. Perry inquired whether they intended to fill up the vacancy on the board occasioned by the resignation of Mr. Bell.

The Chairman stated that the retirement of that gentleman had reduced the number of directors to twelve, and it was proposed to retain it at that number. (Hear, hear.) If the board considered it was judicious at any future time to recommend the addition of any particular gentle-

man, the shareholders would have full opportunity of expressing their concurrence or otherwise in the recommendation of the directors.

The retiring directors, Messrs. East, Henriques, and Young, were then unanimously re-elected.

Mr. Rushfield moved and Mr. Perry seconded, the re-election of Messrs. Owen, Lewis, and J. Curry as auditors, which was unanimously agreed to, a vote of thanks being given to them for their past services.

On the motion of Mr. Alderman Abbiss, a cordial vote of thanks was given to the chairman and directors, and a similar compliment to the manager terminated the proceedings.

IMPERIAL MERCANTILE CREDIT ASSOCIATION, LIMITED.

THE second ordinary general meeting of this company was held at the London Tavern, on the 13th July; Mr. P. D. Hadow in the chair.

The Secretary (Mr. Winterbottom) having read the advertisement convening the meeting, also read the following report and statement of accounts:—

"The directors have the satisfaction of submitting the annexed statement of accounts, made up to the conclusion of the past half-year, from which it will be seen that, after discharging all expenses of the establishment, and providing for rebate of interest on loans and bills not yet matured, writing off all losses and making ample provision for every contingency, there remains for disposal the sum of £103,975. 1s. 8d. This amount the directors recommend to be appropriated as follows:—To dividend of 10s. per share or 20 per cent. per annum, free of income-tax, £50,000; to income-tax, £833. 6s. 8d.; to balance of profit unappropriated, £53,141. 15s. The operations of the amalgamated Company have now extended over a period of thirteen months. The amount of profits distributed in January last, added to that now exhibited, shows a total of £153,975. 1s. 8d. The directors consider they are justified in congratulating the proprietors upon a result which, bearing in mind the difficulties which almost invariably attend new undertakings, and the exceptionally unfavourable condition of all monetary affairs during a considerable portion of the time, cannot be regarded as otherwise than satisfactory for the past, and encouraging for the future."

Balance-sheet, 30th June, 1865.

The Chairman, in moving the adoption of the report, accounted for the absence of several of the directors who were down in the country as candidates at the general election. Whatever report they might make of themselves to the electors, he doubted whether it would be so entirely satisfactory as the report made to the shareholders of this company that day, and which was a report that he confidently predicted would meet with general approbation. He need not dwell on the peculiarity of the business, the care, experience, and vigilance required to be possessed by the directors, or the amount of careful discrimination which must be exercised by the managers. Looking to results, he thought all that might be taken for granted, inasmuch as at a time when there had been a most exceptional rate of interest, and when the recent speculative mania had been succeeded by a period of dullness and reaction, they had still been able to present to the shareholders a most favourable balance-sheet. (Hear, hear). He was happy also to say that the business had improved not only in quantity but in quality. (Cheers). They had gained experience, and now stood in a position much more independent of the speculations of the stock market or the changes, rapid and unexpected as they were, in commercial affairs. Whether things were in a state of depression or elation, this company was in a position to do a comfortable business, and the fact that their deposits during the last half-year had increased by more than £1,000,000 was a proof of public confidence in their security to an extent far beyond anything that could be expected by a young association of this kind. Their worthy chairman dilated most eloquently upon the character of their securities at the last meeting, but as a plain business-man he would simply content himself with saying that they were good, and he believed entirely sound. The directors were largely interested in the success of the undertaking, and they felt that while they were watching over the interests of the shareholders they were watching over their own. (Hear, hear). He concluded by moving the adoption of the report.

Mr. M'Pherson seconded the motion.

Mr. Beckford called the attention of the last balance-sheet there was a balance of betw appropriated; he wished to know what had had been amalgamated with the net profit ap of £103,000.

The Chairman replied that it was in the su of profits unappropriated, £53,141.

Mr. Beckford expressed an opinion that i separate item in the accounts, because as the sion was created that the net profits of the £103,000, whereas in point of fact they did n half that sum.

Mr. King also took the same view, and better to have at once placed the earning making them appear 40 per cent., as was done accounts.

The Chairman explained that it was expr the operations of the amalgamated company h of thirteen months, and that the amount of last added to that now exhibited showed a tot So that it was perfectly clear what was mean it would be better to have a separate item the account, but it was the opinion of men o that the present form of the accounts was a

Mr. King called the attention of the board Humber Iron Works Company, which was Mercantile Credit Association. It was stat company that a profit of 20 per cent. might remunerative contracts, to the extent of £3 the fact being, that instead of being remuner contracts involved a loss of £40,000. The o Works declared that they were not respons prospectus, and the ultimate result was that were not now worth 5s. a piece. It was the like the present, scrupulously to investigat a prospectus, because it was on the faith of s were subscribed for, and it could not be den out schemes in which all the promises in would, in the end, be most injurious to th brought them out.

The Chairman explained that the Humber not really brought out by this association in the old Mercantile Company, who were de made to them by those who proposed to brin be satisfactory to the meeting to know that n which had been sustained, part of which w the amplest allowance had been made in (Cheers.) The present account was rather b because they then carried over £53,000, wit the loss sustained through the Humber Iron applicable to that year, although its amount They now carried over £103,000 with a b shareholders might be well assured that a sin Works would not again occur.

A Shareholder thought that, even taking into account what had been brought forward, there was great reason to be satisfied.

Mr. Cope was also of opinion that the shareholders ought to be grateful to the directors for having pulled them through the difficulty so manfully. He was very glad the question had been brought forward, because it had elicited the very satisfactory information that they were now quite clear of this miserable concern. (Hear, hear.)

The Chairman observed that the bringing out of new companies was a class of business which in most cases was very successful, but it was of course attended with a considerable degree of risk. He was happy to inform the meeting that the proportion of profit earned this year by bringing out new companies was very small as compared with that derived from other and a more legitimate description of business. (Cheers.)

The motion for the adoption of the report and statement of accounts was then put and carried unanimously; and a dividend of 10s. per share, equal to 20 per cent. per annum, was declared.

The Chairman then proposed a special resolution to the effect that the directors might, from time to time, make calls on the members in respect to the unpaid capital to the amount of £5 per share, payable in not less than three months after the previous call, twenty-one days' notice being given of the intention of the directors to make such call. He explained that the effect of the alteration was to limit the power of the directors in making calls to £5, whereas at present they had power to call £10 or £15 if they liked. In point of fact, to put an extra case, they were empowered, under the present articles of association, to call up £45 upon every share.

The resolution having been seconded,

Mr. King suggested that the limit should be £2. 10s. A call of £5 produced a half a million, and he did not think it would be found necessary at any time to make a call to such an extent, especially as the shares were held in hundreds and fifties. He thought it was much better that they should limit the power of the directors to calling up a quarter of a million at a time, and moved an amendment to that effect, which was seconded by a shareholder.

The Chairman explained that although it was proposed to retain power to make a call of £5 at once, the directors had no idea or intention whatever to make a call. It was not necessary that, even with such power, the directors should make a call exceeding £1 or £2, nor, indeed, with continually increasing deposits, was it likely they would require to make any further calls. At the same time, he thought more confidence would be felt in the company if the directors were empowered to make a call to the extent proposed, though such power were never exercised, and he hoped the meeting would support the views of the directors upon this subject.

The amendment was then put to the meeting and lost, only about twenty hands being held up for it, and the original motion was agreed to.

The Chairman stated that an extraordinary general meeting, of which due notice would be given, would be held at the office to confirm the last resolution.

In reply to a question from Mr. B. Scott,

The Chairman stated that four vacancies had taken place on the board, three during the past half-year, and one in that preceding; but, in accordance with the wishes of the shareholders, it was not intended to fill them up, and if a person of great commercial standing and experience, one who could bring a great deal of business to the company, offered himself, the board would think it right to submit the matter to the meeting. (Cheers.)

A cordial vote of thanks was given to the chairman and directors, and a similar compliment to Mr. Barker, Mr. Sandeman, and the officers of the bank, for their able management of its business, terminated the proceedings.

LONDON AND WESTMINSTER BANK.

A GENERAL meeting of the proprietors was held on the 19th July, at the bank in Lothbury, for the purpose of receiving a half-yearly report from the directors, and declaring a dividend; Mr. Alderman Salomons, M.P., presided.

Mr. Shipp, having read the advertisement convening the meeting, read the following report and statement of accounts:—

"The directors have to report that—after making provision for all bad and doubtful debts, paying the income-tax, and setting apart £2,000 towards the buildings of the bank—the net profits of the bank for the last half year amount to £151,498. 7s. 8d. This sum, added to £9,357. 1s. 5d., the unappropriated balance of the preceding half-year, will amount to £160,855. 9s. 1d. Out of this amount interest on the rest, or surplus fund, at the rate of 5 per cent. per annum (£8,250) has been added to that fund, which now amounts to £338,250. The directors now declare a dividend to the shareholders at the rate of 6 per cent. per annum, and by way of further dividend out of the profits, a bonus of 10 per cent. on the paid-up capital. After these payments are made there will remain a balance of £22,605. 9s. 1d. to be carried to the profit and loss account for the current half-year.

“The dividend and bonus (without deduction of income-tax, which is paid by the bank) will be payable on Monday, the 24th July.”

The Chairman, in moving the usual resolution, said: Gentlemen, the report which you have just heard read, and a copy of which you have in your hands, contains a true and accurate statement of the affairs of the bank. I do not think that I can add anything in the way of elucidation, and I shall therefore have to trouble you with but very few words. This, as you are aware, is the interim half-year, when we lay before you a statement of the results of the first half-year's operations. The only observation I have to make is, that the deposits are a good deal in advance of what they were at this time last year, and amount at this time to nearly £11,000,000, but the rate of discount has been considerably lower during the past half-year than it was in the corresponding period of last year, which to a certain extent has militated against our profits. At the interim meeting last year you will remember that we paid you at the rate of 14 per cent., whereas now we propose to pay you at the rate of 13 per cent. on the entire paid-up capital, carrying forward £22,605 to be accounted for at the end of the year. (Hear, hear.) During the first half of last year the average value of money was $6\frac{1}{2}$ per cent., which is very high, and now it is somewhat below the usual average rate in a healthy state of business, so that we do not obtain the same rate of profit from the money we lend out. The deposits, which are the great source of our profits, are, as I have said, looking very well, and we have every reason to hope that they will continue to do so to the end of the year, when, notwithstanding the low value of money, we trust we shall be able to offer you a dividend that you will consider satisfactory. (Hear, hear.) But whatever the rate of dividend may be, you may depend upon it that it will be a true divi-

dend, based upon the net profits after deduction and making every allowance for bad and doubtful charges. (Hear, hear.) I beg to move the resolution perhaps some gentleman on the other side of the house will hear.)

Mr. Hill, a proprietor, responding to the motion.

A Proprietor suggested that it would be better to circulate amongst the proprietors a few days before done in the case of several other joint-stock banks.

Mr. Horne concurred in this suggestion, and the subject under the notice of the directors on the next day.

The Chairman remarked that the question of the accounts was frequently considered by the board, but the old practice which had worked well, unless it was likely to arise from it. He thought it very desirable that the shareholders should attend and meet them such explanations as might be considered. He much doubted whether if they were to circulate containing a full statement of their affairs, the shareholders now attended would think it worth while to be at the election at Oxford. It had been there found that so satisfactory or certain a process as persons to introduce politics, but he still thought that the proprietors coming to the office, meeting them as co-proprietors in the same concern, how things were going on. The accounts were inspected of any proprietor who pleased to make up, which was generally about a week. He thought that was sufficient. Still, if any proprietors wished it, the board would again take into consideration, although, for his own part, he thought it better to adhere to a practice which had hitherto answered. The Bank of England did not publish their accounts, should the London and Westminster? (He thought not like some of those ephemeral money matters springing up around them, and in respect to the report and accounts before the meeting in January. Another point. The London and Westminster Bank held their meetings each half-year, that was the third Wednesday in January. Sometimes when it fell on the first of the month, there was only one day for the closing of the account for the half-year and only for the making the accounts up, and people have made up their minds as to the dividend. Under all the circumstances, and looking at the present, he thought it would be better to adhere to the practice which had answered so well. Let them keep the Westminster line of rails, upon which they had been running, and not go off upon some other line of which he was not sure. (Cheers.)

A Proprietor observed that there was a question of the profits, which the chairman, as he understood, was to rate of interest. The first half of the year

000, in the next half-year they were £238,000; whereas in the half-
embraced in the accounts now before them they were £150,000. This
very large falling off, and he wished to know whether it all arose
the reduced rate of interest, or from the partial failure of any other
of profit? At the last meeting it was stated that £20,000 was set
for the improvement of the building—where was there any statement
real value of the buildings belonging to the establishment? He saw
assets bills discounted, loans, and other securities, £16,900,000;
it include the buildings also? He wished to put another question
the money paid for Jones Lloyd's business. He understood that
00 was the amount to be paid for the purchase; £80,000 he believed
d at first, and a further sum afterwards of £27,000; he wished to
now much was still due?

Chairman—With regard to the net profits, the rules of multiplica-
reduction, and addition would easily explain the diminution as
ed with the two previous half-years. When you had £18,000,000
bits to lend out with money at $6\frac{1}{2}$ per cent., it necessarily yielded
larger return than when the rate of discount was only 4 per cent.
therefore, upon the whole the present was a very favourable account
ared with that of last year. (Cheers.)

proprietor—But you reduce the interest you allow to the depositors in
on.

Chairman—No doubt we do, but we have a great deal of other
to deal with besides the deposits, and last year we had a larger
between the price at which we took in money and that at which
it out than we have this year. Again, last year we sustained very
s indeed; this time we have have had to write off something which
in reduction of the general profit account. With regard to the
here, the hon. proprietor says truly that £20,000 was written off
unt, and the building is now, I am happy to say, nearly completed.
banking house will be one of the handsomest and most com-
in London. It will contain plenty of space for the clerks and
breathing room, and when complete it will have cost us about

The entire value of the property, including what we have pur-
written off, is from £105,000 to £110,000, and, as I have said,
have the most handsome and convenient banking house in
The building itself, when we get into it, will have cost £65,000,
will contain double the area of the present bank. The premises
belonging to Jones Lloyd stand now as an asset of £80,000; and
it into the market we could get a great deal more for it, or we
it, I believe, at £6,000 a year. So far as we can at present see,
not require to occupy those premises for our own purposes, and I
doubt we shall be able to let them profitably.

dford suggested that it would tend to increase the amount deposited
bank if they relaxed the rule which allowed interest only on sums
and upwards.

Chairman—We have £19,500,000 in deposits and other moneys
to our keeping by the public, and I do not think we ought to go
r way to make it larger. (Cheers.) Our deposits and our divi-
l compare favourably with any other bank, and I think we had
ve the matter of the interest to be allowed to customers where it
s, with the directors. (Cheers.)

olution was put and carried unanimously.

Chairman, in declaring the dividend and bonus, as recommended in

the report, stated that in consequence of a wish of the holders, a circular would be issued to the proprietors at the next meeting, with the view of taking their views on the subject, whether they would prefer the dividends to be paid, as they were now, or by signing the book, or by dividend warrants.

A Proprietor—Do you not intend to pay off the purchase?

The Chairman—When we can afford it. The house, which is freehold, stands as an asset.

A Proprietor—What is the amount of bad debts?

The Chairman—It is rather above the average. I do not think it necessary to say more.

On the motion of Mr. Edenborough, a vote of thanks was given to the chairman and directors for their able administration of the company during the past half-year.

The Chairman—On behalf of my brother directors, I thank you for this expression of your good opinion. On former occasions, I take it as an indication of your confidence—(hear, hear)—and that we have presented to you are honest and just. It is for granted as to the bad debts that all is well. It is worth while to revive the subject, as the only details on the subject would be to gratify curiosity.

The Proprietor who asked the question—I directed the directors. I merely asked the question upon any reason why it should not be answered.

The Chairman—I have no objection to answering the question. About £10,000 in the half-year, and in the last half-year to £13,500. (Cheers and laughter.) This great improvement I am glad of it. (Hear, and a laugh.) I suppose it was nearer £150,000. We only maintain a respectable balance because we think it better to wash our dirty linen in public than not very dirty after all. (Hear, hear.) I have to perform to the general manager, the branch managers, and the bank. (Hear.) You who are proprietors are in constant intercourse with them, and admit that not only here in the city, but where business is conducted in a manner which reflects credit on the gentlemen. (Hear.) They have the entire confidence of the public. I have therefore great pleasure in moving that thanks be given to Mr. Ewings (the general manager), Mr. Shipp, our secretary, who is an exceedingly capable man, and other officers of the establishment, for their excellent services during the year. (Hear, hear.)

Mr. Esdaile seconded the motion, which was carried.

Mr. Ewings, who was much cheered, said—The directors are very sincerely for this renewal of their confidence towards my colleagues and myself, and I beg to thank the proprietors for the very kind manner in which they have received me. I have to acknowledge on the part of myself and the directors our periodical recognitions of our services. (Cheers.) It has been, as you are aware, gentlemen, an eventful year in the commercial circles, but we have adhered to the good old principles, and all," in carrying out the business of this institution.

our efforts have been successful, and are appreciated by you
 To you, Mr. Chairman, our gratitude is especially due for
 terms in which you have been pleased to call the attention
 to our services in proposing this vote of thanks. (Cheers.)
 Thanks to the chairman concluded the proceedings.

CONSOLIDATED DISCOUNT COMPANY.

Ordinary meeting of shareholders was held on the 19th July,
 Tavern; Mr. T. S. Richardson in the chair.
 The report was read by Mr. Vokes the secretary:—

Regarding the annexed balance-sheet the directors have much
 to bring the attention of the shareholders to the result of the last
 operations, which they trust will be considered satisfactory.
 The results for the six months ending June 30, are £13,261. 2s. 11d.,
 deducting current expenses, and rebate of bills not yet due, there
 is a profit of £6,620. 2s. 6d. Agreeably with the wishes expressed
 in the report, the rebate of bills not due on 31st December, amounting
 to £9d., has been introduced into the present statement, and with
 this brought down leaves £1,978. 4s. 1d. to the debit of next
 year, considering the limited amount of capital which the manager
 has to command the directors think this a good result; and while ex-
 confidence in the ultimate success of the company, would
 encourage the holders to co-operate with them in influencing, as far as pos-
 sible, the opening of deposit accounts."

Balance-sheet, 30th June, 1865.

 forward per contra
 Balance carried to the debit of profit and loss new

The Chairman in moving the adoption of a different task that day to fulfil from that which they had set themselves. In their first year of business they had met with a period of almost unexampled losses. He remembered a shareholder asking (whether we could continue to put confidence in the chairman), however, felt confident that it would be a prosperous company if it were conducted in the times were more propitious. He did not think their prospects by that adverse and exceptional year they had made good profits, and although even houses of high standing had failed right and left half-year up to the 30th June lost a single shilling. He did not say the company would never lose, but with great caution, and, considering what small funds he had at his disposal, it was really surprising that they had realised a gross profit of £13,261, and a net profit of £10,000. He regretted to say that the losses of the previous year had added a sum to their debit that this did not wipe it out. In the management he believed they would by the end of the year pay a good dividend. (Cheers.) He must, he thought, give them all satisfaction, and confidence in the success of the company. There was much which he wished to refer. They would see that they had chased the business of Messrs. Sandeman, Sandeman & Co. be paid so much in money and so much in shares, which in the market, much lower than their actual value. of his colleagues he proposed to Messrs. Sandeman shares at 50 per cent. discount, the effect of which was a portion of the purchase-money, and reduce it to 25 per cent. And as the directors did not want the account of the transaction was so stated in the balance sheet, added to profit and loss, which it might fairly be said was one which he had been particularly anxious to mention, and that was the promoter's matter how small, which would enable the company

concluded by moving the adoption of the report and (Cheers.)

seconded the motion. The negotiation with Messrs. Co., which had resulted in a gain to their capital account due primarily and entirely to their chairman (cheers), their directors concurred in carrying out that fortunate (Cheers.)

Cleave said that he found at the bottom of the balance-sheet "Examined and found correct, James Cooper and W. & Co." He wished to know what those gentlemen "found" it was the addition he could add it up for himself. They had £85,000, and their assets were £1,973,000, and he should wind up, with the view of winding up the company, whether all good.

He said the auditors had examined the books and had seen the house—nothing had been hidden from them.

The auditor, said they had balanced the accounts and found all right and with regard to other accounts, they had gone through and had satisfied themselves that what they had certified was correct to be. (Cheers.)

He said that was no answer to his question. The chairman made no bad debts; but the balance-sheet showed that they had a great deal of paper, and he wished to know what proportion of those were considered as bad or doubtful.

He replied they had some bills held over from 1864, on which he had been paid, and beyond those they had not, on the other hand, any dishonoured bills. Was that satisfactory?

Certainly not. His question was whether, out of the many bad or doubtful debts were anticipated. (Cries of yes.) He had it on creditable authority that they had discounted a great many bills for a house that had failed, and he wished to know the fact. (Oh, oh, and cheers.)

He said: The hon. gentleman wishes to know if the directors were prophesying. (Cheers.)

The directors were administrators of his property, and he thought he had a right to ask. They stated they had assets to the value of £1,973,000, and all he wanted to know was whether they were all good.

He said he was anxious to answer every question put to him, but a shareholder said his questions were to lead to winding-up, it behooved him to be careful. He would, however, do his best for the hon. gentleman. Of course no one could tell with positive certainty the result of a large amount of bills like £1,900,000; indeed, he was not certain that there would be some loss, larger or smaller, might be; but when he saw that in the last six months they had losses at all, he had a right to anticipate the next six months might be equally successful, because their business had been conducted with the same prudence and care. There was every reason to expect that the bills became due they would be properly met. He hoped the result would be satisfactory. (Cheers.)

He remarked that Mr. Cleave's questions in themselves were not bad, but they appeared to be dictated by a bad spirit when he put them with a view to winding up the company. He had been a customer, and had often had his paper returned, and he could find fault with that, as it only showed that the manager

exercised discretion and ability in the discharge of what had been said about winding up would go to the single shareholder only. (Cheers.)

Mr. Cleave said the directors were all persons who he did not wish to cast the slightest imputation upon. They did their duty as well as they could under the circumstances at the matter as a man of business.

The Chairman was anxious to tell them what he knew. If they asked whether he anticipated any further failures from failures which had happened since the 30th of the negative. (Cheers.) There was one house which had held some of its paper, but a good deal of that paper was by the indorsers, and on what other paper the directors anticipated any loss. (Cheers.)

Mr. Cleave rejoined that it was asserted that the £45,000 of acceptances from a house that had failed had been heard of. (Cheers.)

The Chairman did not exactly know what had happened. He had discounted £70,000 worth of bills for one house, and a bit of it was bankers' paper. (Cheers.) If Messrs. Bell and Co., it was true they had been large holders of paper, and sent them a great deal of "beautiful paper," but some acceptances now, but they had all been paid. He did not anticipate the loss of a shilling on that paper. The directors came there with a clean balance-sheet, and meeting if it was right to demand names of the public. No shareholder had ever been refused at the office for it. (Cheers.)

Mr. Cleave rose again, upon which a shareholder, meeting, in indignant tones, moved that he be asked to leave the room. (Laughter.)

Mr. Filder remarked that the capital of the company was £85,000, and on that they had made in the last six months £6,620, or about 12 per cent., and he thought they were satisfied.

Mr. Levy did not think the company could have been so successful. He had refused unimpeachable bankers' paper for the capital. He did not expect the directors to be able to carry on an expensive establishment. It was impossible to carry on an expensive establishment. (Cries of "Sell your shares.")

Mr. Pixton was astonished that "large shareholders" should have their object was to destroy the value of their shares. He had bought his shares because he knew they had been refused bankers' paper when it was joined in. (Cheers.)

The question was then put and carried by a large majority, hands being held up against it.

Mr. Pixton said that, as the directors had not done anything in the last six months, it would be wrong to make a motion. He moved (in order to show his confidence in the directors) that Messrs. Constable and Denny, who had retired, be re-elected. (Cheers.)

The motion was carried unanimously, amidst much applause.

On the motion of Mr. King the auditors were elected for the former occasion, with twenty guineas each.

The Chairman moved a vote of thanks to Mr. Baker, the managing director (cheers)—whose caution, discretion, sagacity, and courtesy, he warmly eulogised.

Mr. Sichel seconded the motion. Mr. Baker had always acted towards him with the greatest courtesy even when he had to say "No" (laughter).

Mr. Baker briefly acknowledged the compliment. He said the policy of the directors was to exercise the greatest caution. Undoubtedly paper had been refused, but if their profits were thereby smaller they were safer. (Cheers.) Good business, however, was steadily increasing, and he had no doubt they would be able to show a better result next year. (Cheers.)

Mr. Charles Wright, in moving a vote of thanks to the chairman, wished to remark that as, according to Mr. Levy's statement, the company was short of capital, they had an easy remedy. The shares were £20, but £10 only was paid up. If, then, they wanted more capital, let them make an additional call. (Cheers and laughter.) He should be happy to respond to a call of that kind, as the results of the past six months and the ability and zeal displayed by the directors entitled them to expect even better things. (Cheers.)

Mr. Levy, amidst laughter and cheers, seconded the resolution, which, being carried unanimously, was briefly acknowledged, and the meeting dispersed.

LONDON JOINT-STOCK BANK.

THE half-yearly general meeting of the shareholders of this company was held on the 20th July, in the board room of the bank, Princes-street, Mr. George Pollard in the chair, to receive the report of the directors and declare a dividend.

Mr. Scrivener (the secretary) having read the notice convening the meeting, read the following report and statement of accounts:—

"The accounts which the directors have now the pleasure of submitting to the shareholders show that the net profits of the bank, for the half-year ending on the 30th ultimo, amount to £123,125. 15s. 3d. This result enables the directors to declare a dividend at the rate of 12½ per centum per annum, and a bonus of 8s. 3d. per share, together £1. 7s. per share, equivalent to 18 per cent. per annum on the paid-up capital of the bank, now amounting to £1,080,000, and to carry forward a balance of £25,925. 15s. 3d. for division at the end of the year. In conformity with the resolution passed at the general meeting in January last, the Consols and New Three per Cents. have been taken at 90, and the Exchequer Bills at par. The difference between these rates and the valuation of those stocks on the 31st December last amounts to £7,075, and this sum has been carried to the credit of the guarantee fund, which, with the addition of six months' interest, according to the provisions of the deed of settlement, now amounts to £309,615. 7s. 9d. It is with deep regret that the directors have to announce the death of their much-esteemed colleague, Mr. Henry Christy. To fill up the vacancy thus occasioned at the board an extraordinary general meeting will be convened for Thursday, the 7th September next; and any qualified shareholder intending to become a candidate for the office of director must give notice in writing of such intention, at this office, at least thirty clear days previous to the said day of election. The directors have to report that owing to impaired health Mr. Fleming Hewett has retired from the management of the bank; and the directors consider that after a zealous and faithful discharge of his duties in various depart-

ments during a period of twenty-six years, they have not appreciated those services too highly in awarding him a retiring allowance of £1,000 per annum, and which they trust will meet with the full concurrence of the shareholders. The dividend and bonus, free from income-tax, will be payable on and after Friday, the 28th instant."

Difference in the valuation of Exchequer Bills and Government					
Stock as above	7,075	0	0		
					£309,615	7	9		

The Chairman stated that by the authority of the board he had to declare a dividend for the half-year ending the 30th June at the rate of 12. 10s. per centum per annum on £1,080,000, the amount of capital paid up, and a bonus of 8s. 3d. per share out of the profits of the half-year. He then moved that the report be received and printed for the use of the shareholders.

Mr. P. W. Flower (the deputy chairman) seconded the motion.

A Proprietor, referring to the item, "Add difference in the valuation of exchequer bills and government stock on the 31st December, 1864, and the present valuation," said he had been under the impression that there would be no more uncertainty with respect to the reserve account. The price having been fixed he was in hopes that the amount of the guarantee fund would be settled, but there was a difference in the valuation, and the old system was repeated. He wished to know if that system was to be continued?

The Chairman replied that the present was the winding-up of the old system, and that the item referred to now appeared for the last time.

A Proprietor inquired if an amendment on the amount of the dividend was not open to the meeting. (Cries of "No, no.") He did not think it was usual for the chairman to declare the dividend in that manner.

Mr. Flower replied that at every meeting that had been held the dividend had been declared in that manner, in conformity with the provisions of the deed of settlement.

A Proprietor remarked that the profits had not increased in proportion to the additional capital, and wished to know if that was owing to any heavy losses.

The Chairman observed that the accounts were made up in the usual form, and the statements contained in the report were very plain. It was quite evident from the result that the course which had been pursued was satisfactory. Seeing that the value of money had become lower, he considered the transaction of the affairs of the bank had been very well carried through.

One of the Directors, in reply to a question relative to the increase of capital, said that the proprietors had sanctioned the issue of 12,000 new shares, and a reserve of 8,000; but it was understood that nothing was to be done by the directors with respect to the 8,000 shares, without the sanction of the shareholders. As nothing on the subject was stated in the report, it was quite clear that no steps had been taken relative to those shares.

The motion for the adoption of the report was then agreed to, and the proceedings terminated with the usual vote of thanks to the chairman and directors.

ALLIANCE BANK.

The sixth ordinary general meeting of shareholders was held at the London Tavern, on the 21st July; Mr. Stenhouse in the chair. The following report was taken as read:—

"The directors have to report that the net profits of the bank, after deducting interest on current and deposit accounts, current expenses, provision for bad debts, and rebate on bills discounted but not yet due, amount to £27,653. 17s. 6d., which they propose to dispose of as follows, viz.:—£22,168. 2s., in payment of a dividend; £1,000 in reduction of preliminary expenses; £4,485. 15s. 6d. to profit and loss account of the current half-year. The above sum of £22,168. 2s., enables the directors to recommend a dividend of 12s. 6d. per share on the 30,000 shares upon which £25 per share is paid, and 7s. per share on the 9,766 shares upon which £20 per share is paid, being at the rate of £5 per cent. per annum. It is satisfactory to the directors to be able to state that the condition of the bank has materially improved since the last half-yearly meeting. With respect to the account specially referred to in their last report, the directors do not feel themselves in a position to determine the amount which will be required from the reserve fund to meet the loss that may arise thereon, as further time must elapse before the value of the securities and estates affecting it can be ascertained. In accordance with the wish expressed at the last meeting, the directors have increased their board by the election, subject to confirmation by the shareholders, of Christopher Atkinson, Esq., of Liverpool, and Matthew Hutton Chaytor, Esq., of London. The directors who retire by rotation, in accordance with the provisions of the articles of association, are John Paterson, Esq., James Nugent Daniell, Esq., John Torrance, Esq., Alfred Castellain, Esq., and, being eligible, they offer themselves for re-election. The auditors, Messrs. G. H. Jay and H. W. Banner, retire at this meeting. Mr. Banner offers himself for re-election, and Messrs. Quilter, Ball, and Co., of whose firm Mr. G. H. Jay was a partner, offer themselves for election in his place."

The Chairman, in proposing the adoption of the report, said that the accounts spoke for themselves, and presented such a detailed statement of the affairs of the company, that he did not see he could add anything to what had been laid before the shareholders in the report. He should be happy, however, to answer to the best of his ability, any questions that might be put to him. The directors had elected Mr. Atkinson and Mr. Chaytor to seats at the board. The name of Mr. Atkinson would be submitted to the shareholders that day for confirmation, but in regard to Mr. Chaytor, as he had not held his shares for half a year, it would be necessary to call a formal meeting for a future day in order to confirm his election. At the last meeting the directors were not in a position to declare a dividend, but on this occasion, although for the last six months there was a severe pressure on the commercial world, they were able to give a dividend. It was not so large a one as they desired to give, but it was a step in the right direction, and he hoped it would so far be deemed satisfactory.

Mr. Atkinson seconded the motion.

Mr. Major said that the report was a most laconic one, and the observations of the chairman were still more so. He wished to know what reason the directors had for stating in the report that the "condition of the bank had materially improved since the last half-yearly meeting?"

The Chairman said that last year there was no dividend; this year there was; their bad debts were smaller, and the bank was altogether in a more satisfactory position.

Mr. Major said that at the last meeting it was announced that there were bad debts amounting to £160,000, but Mr. Quilter estimated at that time that the loss would be covered by £61,000, and that probably there would not be a loss of sixpence. He wished to know if that was the fact,

and if so he thought it ought to have been stated to the shareholders. (Hear, hear.) On the contrary, the directors in their report made a second allusion to that matter, and the result of keeping this bugbear before the public was that the shares fell £2. (Hear, hear.)

The Chairman said that it was difficult to get the old accounts speedily closed, as the bulk of the securities to which the paragraph alluded to were abroad. There was no reason for altering the estimate which had been made at the last meeting, and he could assure them that by the next meeting this matter would be brought to a point, and the amount, whatever it was, would be written off.

Mr. Major asked if any money had been received since the last meeting.

The Chairman said that £4,000 had been received out of the £160,000, but they possessed for the remainder the security of a large property in Australia, and the dividend from two valuable estates near London.

Mr. Major asked how much of the sum of £32,290, set down in the accounts for current expenses, directors' remuneration and provision for bad debts, was for bad debts.

The Chairman said that £13,750 was put aside for bad debts, but these bad debts arose from business entered into previous to the last half-year. (Hear, hear.)

Mr. Major wished to know from Mr. Quilter whether it was his opinion now that there would not be a loss of 6d. on the £160,000.

The Chairman said he believed Mr. Quilter was not present. But the property had been carefully estimated, and he did not think there was any reason for altering the opinion which had been given.

Mr. Major—Then why put it into the report? It acted as a bugbear, and people said there must be some speculators behind the scenes.

The Chairman said that it would not appear again in the report. The amount would be written off. One of the securities was that of a Spanish railway. If completed it would be a valuable security, but not otherwise. It was on that security that they got the £4,000.

Mr. Patterson, a director, for whom there were loud calls, said that Mr. Quilter had never stated there would not be a loss of 6d. on the securities for the £160,000. He said that the securities might probably be realised without the loss of a shilling to the company, but that £60,000 would at all events cover the loss. (Hear, hear.) He (Mr. Patterson) stated that he believed the securities in hand were more than double the amount of the debt, and he repeated that statement now. (Hear, hear.) The debt was £160,000, for which they held the security of property in Australia, the prospective dividend from valuable estates near London, and from a railway in Spain. They had taken every step to get a correct estimate of the value of these securities. They had no reason to disparage the value of the Australian security. There was no reason to believe that the securities of the London estate would be depreciated at all. With regard to the value of the security in Spain, on which they had realised £4,000, he was not disposed individually to put a high value upon it. With regard to one of the properties in London, they had been promised a dividend of 10s. in the pound. Diligent inquiry had been made in Australia, but it took six months to send out and receive information from that quarter; their solicitor had been twice in Spain to look after the security there, and in six months' time the amount of loss, whatever it was, would be written off. He did not think he could say any more, and he trusted that what he had said would be deemed satisfactory. (Hear, hear.)

The Chairman, in reply to a shareholder, said that there was a good profit on the four branches of the bank with the exception of that of

which had not paid its expenses. The amount of the debt on estate, on which 10s. in the pound had been promised,

for the adoption of the report was then put, and carried

an then declared a dividend of 12s. 6d. per share on the sh £25 had been paid, and 7s. per share on the shares on share had been paid, being at the rate of 5 per cent. per income-tax. The Chairman also proposed the confirmation of Mr. Atkinson as a member of the Liverpool board. Mr. been 34 years in business, he was a man of great experience, ed would be a valuable accession to the board. (Hear,

n seconded the motion, which was carried.

n, one of the outgoing directors, was unanimously re-elected. e of Mr. Daniell being put for re-election,

s said he wished to say a few words with regard to the re- Daniell. The shareholders were aware that Mr. Thompson, er of the bank, had gone to manage a bank in India, of which s the chairman, and it was reported that Mr. Thompson out of the way lest he should make disclosures which alatable to some of the directors. He understood that had received a larger salary than he could have expected, he might be the creature of the directors. (Oh! oh!) He usation, but stated rumours which had been circulated.

said that the accusation was absolutely and totally incompre- and, and was entirely false. (Hear.) It was idle to suppose that r fifteen gentlemen who acted on that board would have any collusion of the kind indicated with their manager.

With regard to the appointment of Mr. Thompson, who was honourable and an upright man, to the Bank of Hindustan, himself and by other of the directors that in his anxiety e interests of this bank he had not taken sufficient pre- at adverse and difficult times, and that, consequently, the confi- shareholders was temporarily, if not considerably taken from mpson had at the same time written engagements with the position was therefore a difficult one to deal with. Mr. f that he had an opportunity of going to Hindustan if the object, and under these circumstances he went out to India, managing a bank with great discretion. But to think that a scapegoat was quite absurd.

ss said that he felt quite satisfied with the explanations of

s solicitor to the company, bore testimony to the character son, than whom there could not be a more honourable or d man. He had the means of rebutting all the vague landers which had been circulated against Mr. Thompson. a was far too honourable to be made the tool or scapegoat of ear, hear.)

was then re-elected a director, as were the other directors, and Mr. Castellain.

100 for the half-year was voted to each of the auditors; as re-elected auditor for Liverpool; and on the motion of um of £2,500 was voted as a remuneration to the directors ear.

The Chairman proposed a vote of thanks to the manager, Mr. Miller, and the other officers of the bank and its branches, for their services during the half-year. (Hear, hear.) He had no fear as to the future of the Alliance Bank. (Hear, hear.) They had a million of paid-up capital, and if they only minded their own business and paid less attention to outside rumours, he had no doubt they would be able to show good results. (Cheers.)

The motion having been unanimously adopted,

Mr. Miller, on behalf of himself and the other officers of the establishment, returned thanks. It was always gratifying to persons in their position to receive the approbation of the shareholders, but on this occasion it was particularly so, as during the past six months their duties were neither easy nor pleasant. They had devoted their utmost energies to promote the interests of the bank, and the results, he thought, were as favourable as, under the circumstances, could be expected. They would continue to devote the same energies to the bank, and he hoped that year by year its prosperity would increase. (Hear.)

On the motion of Mr. Major, a vote of thanks was passed to the chairman and directors, which terminated the proceedings.

BANK OF LONDON.

THE nineteenth ordinary general meeting of the shareholders of this bank was held on the 21st July, at the London Tavern, Bishopsgate Street, for the purpose of receiving the report of the directors, and for the declaration of a dividend; Sir John Shelley presided.

Mr. C. J. H. Allen, the secretary, having read the advertisement convening the meeting, read the following report:—

“The statement of accounts, which the directors now submit, shows that the balance of profit at the termination of the past half-year amounts to £67,547. 11s. 4d. This result, after providing for current expenses, bad and doubtful debts, and rebate of interest on bills discounted not yet due, enables the directors to declare a dividend at the usual rate of £10 per cent. per annum, and a bonus of £2. 10s. per share, amounting together to 20 per cent. per annum, both free of income-tax. The balance, viz., £2,324. 5s. 2d., is transferred to the reserve fund, which, by such addition, is increased to £302,324. 5s. 2d. The directors retiring upon the present occasion are, John Edmund Anderdon, Esq., Henry Astle, Esq., and Thomas Dakin, Esq., who, being duly qualified, offer themselves for re-election. The dividend and bonus will be payable on and after Wednesday, July 26.”

The Chairman—Gentlemen, it now becomes my duty to move that the report be received and adopted; and in doing so you will allow me to say that it gives me much pleasure again to meet the shareholders at this half-yearly meeting. The accounts require, I think, but little explanation from me, as they speak for themselves. At our last meeting I stated that the half-year we had then gone through must be considered entirely exceptional, as well as the half-year previous. At that time the rate of money was very high, and trade and business were excessively buoyant. Now, the rate of discount is very low, and things are not in that flourishing and buoyant state we could wish. But I cannot help thinking that we have now got through the wet day, and may look forward to a brighter time. Notwithstanding the difficulties of the period and the numerous failures which have occurred in commercial circles, we are happy to be able to

declare the same rate of dividend as before. (Hear, hear.) This shows, I think, that the business of the bank has been placed upon a sound foundation; and although we, like other banks, may not have made such large profits as we did in the previous year, yet, looking at the state of monetary affairs in general, it is satisfactory to know that the business has been so conducted that, notwithstanding the altered state of affairs, we have gone steadily on, and are able to declare the same amount of dividend. To prove the satisfactory manner in which our business progresses, I have here some figures to which I would call your attention. I find that in the year previous to this we appropriated in dividend and reserve, £82,000. In this year we have paid in the same way, £102,324. In 1861 we paid £15,000 in dividends, or equal to 5 per cent., on a capital of £300,000. We now pay £80,000, which is equal to 20 per cent., upon a capital of £400,000. We have, as you know, now made our capital up to £400,000, and the reserve to £300,000. It may be well also to refer to the profits of each year, as showing how we go steadily on. Deducting the profits brought on each occasion from previous years, the figures stand thus:—For the year ending 30th June, 1860, the profits were £53,843, and the amount paid in dividend was £15,000; for the year ending June 30, 1861, the profit made was £60,603, and the amount paid in dividend £15,000; in 1862 the profits were £70,907, and the amount paid in dividend £21,000; in 1863, the profits were £88,297, and the amount paid in dividend £30,000; in 1864, the profits were £131,183, and we paid in dividends £52,500; and you will see, notwithstanding the unpropitious state of commercial and monetary affairs, that for the year ending 30th June, 1865, we have made a profit of £133,776, and we pay in dividends £70,000. (Cheers.) This statement shows the progressive character of our business, and it must be, I think, satisfactory to every man of business connected with the bank that the increase has been thus gradual and progressive, inasmuch as it affords the best possible proof of the soundness of the basis upon which the institution is founded. Having gone through so satisfactorily the difficult year which has just passed, we have, I think, a right to conclude that we shall continue to progress in the same gratifying manner, and that we shall continue to have, what I have before more than once ventured to prophesy in this room, a business increasing gradually but steadily, which in its result must establish the Bank of London as one of the great financial institutions of the city of London. (Cheers.)

Mr. Frith (deputy-chairman) seconded the motion.

A Shareholder asked to what amount it was intended to carry the reserve fund. He considered that the reserve was now sufficient, and that the whole of the net profits ought to be divided amongst the proprietors.

The Chairman replied that the board proposed to leave the reserve as it was, only placing to its credit any odd sums that might remain over, as in the present case, when the small balance of £2,300 was thus appropriated. If they kept the reserve at £300,000, or any other fixed sum, without alteration, the public were apt to suppose that the whole thing was a myth; but, as he had stated on former occasions, he considered that with a paid-up capital of £400,000, a reserve of £300,000 in round numbers was sufficient to give confidence to the public, and the placing of the £2,300 to it was merely an indication that they intended to alter it merely by the addition of such small balances as might remain over from time to time after payment of the dividend. (Hear, hear.)

The resolution was put and carried unanimously.

The Chairman then declared the dividend at the rate of £10 per cent.

with a bonus of £2. 10s. per share, amounting together to £. per annum, free of income tax, payable on and after the 26th inst.

Directors retiring by rotation, viz., Messrs. J. E. Anderdon, H. Alderman Dakin, were re-elected, and Alderman Dakin returned

Mr. Trell understood that there was a vacancy in the board of directors consequent upon the resignation of Mr. Joyce, and he believed Mr. Allen competent for that meeting to fill it up. ("Hear, hear," Mr. Chairman.) Then he wished to ask whether it was true, as Mr. Allen informed, that Mr. Allen, their able secretary and deputy-secretary, owing to his affairs being in such a prosperous state, the carrying on of his office was no longer an object to him, resigned?

Mr. Allen—Much to my regret, Mr. Allen did state to me and to the directors recently that by-and-bye he proposed to resign the office of secretary, so long and so ably filled in this institution, and that he wished to hold it until it would suit our convenience to release him from his duties.

Mr. Trell would then propose, if it was entirely in accordance with the wishes of the shareholders and of the directors, that Mr. C. J. H. Allen should offer himself for the vacant seat in the direction. (General applause.) He did not make this proposition on personal but on public grounds, in the interest of the shareholders. They all knew that Mr. Allen's services to the bank had been invaluable. He knew that the bank's auditors, and all connected with the establishment would be able to do as well as he could say as to the eminent and valuable services which that gentleman had rendered to the establishment. Mr. Allen had acted successfully with Mr. Marshall, the manager, in promoting the interests of the bank, and the result they saw in the report they had just received. Mr. Allen had happily now attained a position when he felt perfectly suited to him to remain a salaried officer, and therefore he did not intend to resign; but as it would obviously be a disadvantage to the bank if they were deprived altogether of the benefit of Mr. Allen's assistance and advice, considering his great experience and knowledge of the affairs of the institution, he proposed that they should elect him to the vacant seat at the board. He had thought that the directors might feel some difficulty and delicacy in making such a proposal, but he believed they would feel no difficulty whatever in cordially electing Mr. Allen as a colleague if he were elected by the spontaneous vote of the shareholders themselves. (Cheers.) They had precedents for Mr. Allen's position, or nearly so, to the direction in the case of Mr. Gilbert, of the London and Westminster; Mr. Pollard, of the Joint Stock; and Mr. Scrimgeour, of the Union Bank of England. (Cheers.) He moved that Mr. C. J. H. Allen be appointed to the place of Mr. C. Joyce, resigned. (Cheers.)

Mr. Trell seconded the motion. He had belonged to the bank from the first, and held a considerable interest in it, and could speak from personal experience in very many instances to the great value of Mr. Allen's

Mr. Allen—It has been my good fortune, as chairman, to be associated with Mr. Allen from the first, and I can conscientiously say that Mr. Allen had fallen from the mover and the seconder of the motion could possibly have exceeded, the praise that was due to that gentleman for his zeal, his assiduity, his ability, and the value of the advice he was ready to give to the directors. Necessarily, Mr. Allen and

I have been thrown very much together, and I do not remember a single instance in which any difference of opinion has arisen between us. Personally, therefore, and generally, I am glad that this proposition has been made. My only regret is that the intention was not communicated to the directors, and that no opportunity was afforded of the proposal being made through us. The first I heard of the intention to propose Mr. Allen was the circular which I, in common with the shareholders, received yesterday. I shall welcome Mr. Allen most cordially among us as a member of the board, and I know the same feeling animates all my colleagues.

Mr. Scott, in explanation, said he thought the proposition came more appropriately from a shareholder than from the directors, and that was the reason he had not consulted the chairman or the other members of the board.

The resolution was then put and carried unanimously, and by acclamation.

Mr. Allen, in returning thanks, said: I sincerely thank Sir John Shelley, Mr. Scott, and Mr. Tyrrell for the kind things they have said of me, and I feel that I should thank also as warmly the gentlemen who have signed the requisition inviting me to become a candidate for the vacant seat at the board—an invitation which to me was as unexpected as gratifying. Having been associated with the bank from its formation, and identified as I have been with its progress and its prosperity, to be placed in the position of a director under such circumstances is a distinction of which I cannot fail to be proud. Gentlemen, in again thanking you, all I can say further is, that the same attention to the business of the bank, the same zealous regard for your interests which has won for me this mark of your good opinion, shall be given to the faithful discharge of the duties of the office to which you have now been good enough to elect me, and I hope and trust with equal success. (Loud cheers.)

The auditors, Messrs. G. Thomson, G. Bone, and F. Nalder, were re-elected.

Mr. Bone returned thanks, and proposed a cordial vote of thanks to the chairman and directors, which was seconded by Mr. Scott, and carried.

The Chairman briefly acknowledged it, and moved a vote of thanks to Mr. Marshall and the other officers of the establishment.

Mr. Frith seconded this, and it having been carried,

Mr. Marshall, in a few appropriate sentences, expressed, on behalf of himself and the officers generally, their gratification that their services were appreciated, adding his cordial congratulations to Mr. Allen, with whom he had worked so harmoniously hitherto, and who was about to take his seat as a member of the board.

The proceedings then terminated.

METROPOLITAN AND PROVINCIAL BANK, LIMITED.

THE seventh ordinary general meeting of shareholders was held at the London Tavern, on the 20th July; Mr. C. Gilpin, M.P., in the chair.

Mr. J. Pope Cox (the secretary) read the following report:—

“In accordance with the views expressed by the proprietors at the meeting in January last, a change of management was effected in March, and the progress of the business has since been satisfactory; many new and valuable accounts having been secured for the bank. The compensa-

tion of £2,500 paid to Mr. John Burton, the late manager, for the unexpired term of his engagement, has been charged to the reserved fund. The profits for the past six months have been absorbed by losses incurred previously to, but not ascertained at last audit; and the directors regret that no dividend can therefore be paid on this occasion. They have, however, full confidence that a more encouraging result will be exhibited in next account. Mr. Thomas Masters Usborne, of Cork and London, having been appointed a director by the board on the 6th ultimo, such appointment will be submitted for the approval of the proprietors."

Balance-sheet, 30th June, 1865.

Mr. Hodges—I am quite willing to mak them to-day, or this day twelve months, mises. (Loud cheers.)

The report was adopted unanimously, and

The Chairman formally moved the co appointment to the board, and mentioned owed their present excellent management question, he did not believe there was o to place his resignation at the disposal of t would benefit the bank. (Cheers.) A nur rily placed in his hands their resignation, b that if the board would work together as th were enabled, as he had no doubt they wou to a certain extent during the next six mor satisfactory to the shareholders. (Cheers.)

Mr. Fogarty seconded the motion.

Mr. Osborne fully concurred with those

of the bank that there should be an entire reconstruction of (Cheers.) It was essential that this should be done in order to have the confidence of the public, and that it should be done in the moderate, judicious, and able manner. The balance-sheet was a congratulation, and the best proof of the value of the new services was to be found in the fact that the bad debts of the bank had only amounted to £230, and even that sum he believed to be more problematical than real. He could not agree with the chairman that the directors of past years they would have made 5 per cent., as the profit had been £17,761, and the expense of earning that profit having only £3,761, but with public confidence and the support of the shareholders their profits would go on increasing, and would not be less than 10 per cent. With such a balance-sheet, and the shares on which had been paid standing at £15, it was clear that the direction of the bank had the confidence of the public, and to facilitate the reconstruction necessary, six members of the board had placed their resignations in the chairman's hands.

Mr. Boyd did not see why a number of gentlemen should be displaced by a comparative stranger.

Mr. Boyd hoped that nothing would be done which could be considered a vote of want of confidence in the directors, who had really managed the bank well, or which would carry reform to the extent of revolution. He questioned the legality of Mr. Osborne's appointment by the shareholders.

Mr. Boyd was anxious that any reconstruction should be left in the hands of the chairman.

Mr. Boyd considered that if it were necessary to add, through the influence of the bank, it would be better to make the reconstruction in quality rather than in quantity. (Hear, hear.)

Mr. Boyd, at the request of Mr. Osborne, read a letter tendering the resignation of six members of the board, including that gentleman, and placing themselves in the hands of the shareholders for re-appointment or otherwise.

Mr. Boyd suggested that the whole of the directors should resign, and that the reconstruction should be left to the shareholders.

Mr. Boyd, in his discussion,

Mr. Boyd, replying to a question, said he believed the board could be re-elected without the shareholders taking the extreme course—and without a balance-sheet—of requiring the resignation of the whole body of directors. His suggestion was, that the board should be left to themselves from time to time as opportunities offered.

Mr. Boyd wished the withdrawal of the resolution confirming his suggestion to be referred to the direction.

Mr. Boyd (the solicitor) gave it as his opinion that Mr. Osborne's resignation, having been made prior to the last meeting, could not be confirmed on the present occasion.

Mr. Boyd moved and Mr. Fogarty seconded a resolution calling on the directors to place their resignations in the hands of the shareholders; the seconder attributing the unsatisfactory position of the bank in the market to the conduct of three of the directors.

Mr. Boyd further proposed, as an amendment, that the strengthening of the position of the board should be left to the chairman and the shareholders themselves.

Mr. Boyd said he had not taken lightly the position of manager. He satisfied himself that the bank was worth 20s. in the pound.

Speaking as a proprietor holding 35 shares, he the resignation of the whole of the board.

The Chairman was taken quite by surprise at the recommendation, and could only say that it was a course which the manager to take such a course. (Cheers, and applause.)

Mr. Nash, as one of the directors who had denied that it was from any fear that he had his retirement would come round at the next then properly come before the shareholders, confidence to re-election. (Cheers.)

Mr. Edwards (another director) was perfectly in accordance with the wish of his colleagues, but could not induce the other men to sign an offer to resign and press upon them to adopt the same course.

A Shareholder recommended that the resignation be taken from the hands of the board, and pointed to the fact that on that occasion as a sufficient explanation of the position of the bank. (Hear, hear.)

Mr. Boyd withdrew his resolution, and the matter was carried unanimously, a result which was greatly appreciated.

Mr. Usborne: I hope it is now thoroughly settled.

The Chairman: Yes.

A vote of thanks passed to the chairman for his able proceedings, which had occupied more than an hour, and which had been wasted in personal and irregular discussion.

ANGLO-EGYPTIAN

AN extraordinary general meeting of this bank was held on the 3rd July, for the purpose of confirming the resolution passed at an extraordinary general meeting on the 3rd June:—

“That clause 32 of the articles of association be amended so that the month of November for the month of January at the ordinary general meetings of the company.”

Mr. G. G. M'Pherson was in the chair. The above special resolution was unanimously carried.

ENGLISH, SCOTTISH, AND AUSTRALIAN

THE following is the report of the directors of the bank at the fourth ordinary meeting on the 31st July:

“The accounts of the bank for the half-year ending on the 31st March, and in London on the 31st June, which are annexed, show a balance of profit of £100,000. Making provision for bad and doubtful debts, and for the loss from failures referred to in the last report, the result of the operation of the bank for the half-year review less favourable than had been anticipated.”

however, to regard as exceptional the present reduction in the amount available for distribution, and have confidence in the expectation that the future profits of the bank will admit of an increased dividend being maintained. They therefore recommend that out of the balance of £22,538. 17s. 7d., a dividend be paid at the rate of seven per cent. per annum, free of income tax, on £600,000, the paid-up capital of the bank, which will require £21,000; that the premises and furniture accounts be reduced by £1,000, and that £538. 17s. 7d. be brought forward to the current half-year."

CLYDESDALE BANKING COMPANY.

The following is the report presented to the twenty-seventh annual general meeting of the partners, held at the bank in Glasgow, on the 12th July:—

"In terms of the contract of copartnery, the directors have now to submit to the partners the annual statement of the affairs of the bank for the year ending 14th June last. The period in question has been one of more than usual anxiety in banking affairs, arising from the great fluctuations in the value of money, as well as of goods and produce, and the

mercantile failures consequent thereon. for the last three months has been low, has exceeded that of late years, and the p satisfactory. After making ample allowance the balance of profit and loss account for the year the balance brought forward from the previous year together £121,658. 12s. 7d., which is now Representations have been made to the directors the contract for the annual balance of the second Wednesday of June, is inconvenient would be desirable if the balance day were December, a period when many of the correspondents of the bank close their accounts views, and a motion to carry the change alterations in the contract, will now be submitted this motion be approved of, it will be necessary to call a special meeting of the partners, a motion, and a meeting for the purpose was Wednesday, the 16th day of August next change in the balance day being adopted the directors time recommend that out of the last year's dividend, at the same rate as last year's dividend and amounting to £40,500, be paid to the shareholders of income tax), on Wednesday, 2nd August, added to the reserved surplus fund, £235,000, and £5,000 written off the cost of the balance of £61,158. 12s. 7d. shall be carried forward which shall accrue between 14th June and 14th July at the disposal of the partners, at the meeting of the 7th February, 1866, when a whole year's report the directors had occasion in last year's report their colleagues: they have now to lament the loss of Mr. Esq., one of the ordinary directors, and also the fact that was last year elected an extraordinary director. The gentlemen had long been associated in the bank, and the directors take this opportunity of acknowledging their services. The directors appointed James Hastie to fill the vacancy occasioned by Mr. Hastie's death. At the present time, along with Mr. John Mitchell, who's term expired. The board unanimously recommended Mr. engineer, and Arch. G. Kidston, Esq., merchant, as ordinary directors, in room of Mr. Merry and

BANK OF OTAGO.

THE second ordinary general meeting of shareholders of this bank was held on the 24th July, at the London Tavern, Bishopsgate Street; Alexander Morrison, Esq., in the chair.

The following report was read:—

“The directors, in submitting to the shareholders the annexed statement of accounts for the year ending 31st March last, have the pleasure to announce that the hopes expressed in their circular of the 5th January last have been realized. The bank has received numerous offers of business, a portion only of which, however, it was deemed proper to accept, and the directors are happy to state that the business is in a very satisfactory position, there being every prospect of a continuance of its increase from the growing confidence of the public. A branch has been established at Queenstown, which is the centre of a promising gold field, and it is hoped that this step will be attended with advantageous results. The shareholders are already aware of the large amount of the capital locked up in advances to the Southland Provincial Government upon their debentures. The agent of that Government is in London, and the directors are empowered to offer the debentures at such a price as will ensure a sale; but it has not been considered advisable to bring them forward at present, because there is now good reason to believe that their value will soon be enhanced by the guarantee of the general Government of New Zealand. Unfortunately for the bank, the crisis so long prevailing in the money market in London during 1864, rendered it necessary to pay a high rate of interest for the advances absolutely required here in consequence of that loan; and this accounts for the heavy item of £6,145. 5s. 11d. paid for interest, as stated in the accounts now presented. The gross profits for the year, after allowing for bad and doubtful debts, amount to £29,490. 4s. 8d., from which it is necessary to deduct £1,080. 0s. 10d., the balance carried from last account; £13,623. 3s. for the expenses of management in London and New Zealand; and £6,145. 5s. 11d. for interest paid for money during the high rates ruling in 1864, leaving a net profit of £8,641. 7s. 11d., which the directors recommend shall be appropriated as follows, viz.:—£500 in reduction of preliminary expenses, £600 in payment of travelling expenses to New Zealand, and £7,334. 15s. 11d. towards a dividend at the rate of 5 per cent. on the capital called up to 31st December last, free of income tax, and that the remainder, £206. 12s., be carried forward to profit and loss new account.”

The Chairman then said, in moving the address of thanks, that he did not have to trouble the meeting with more than a few words. The bank was established at Dunedin in December, 1862, and they had 400 current and deposit accounts. Since its establishment, and their aggregate customers had increased, and the interval the bank had passed through a crisis was again. The manager of the bank, Mr. Bathurst, had been influential in the provinces, which could not be said of the bank. From the careful way in which the bank was managed, and the wishes and views of the directors, they had to expect that the bank would be a remuneration to the position of the province of Otago, he mentioned the figures extracted from the latest return he had received from the exports of the province for the year 1863 were £3,424,349. The debt of the province was £1,469,794. The total revenue for the year £469,794. The province was 23,000 square miles, and the province was far from being at perfect peace. The natives there were sent to him as only 150 in number, but which was certainly an excessive estimate. He thought nothing could interfere with the progress of the province, and with it the progress of the bank.

any question that might be put to him, and would conclude the adoption of the report. Mr. Elder seconded the motion. In reply to shareholders, in the course of a conversation, he said, the £6,145 paid for interest was for loans in London at rates were very high, but any loans required by the bank obtained on very much more advantageous terms, being about the same as the bank rate. It was not thought necessary to state what charges had been incurred in London and what in New Zealand. He might state that every care was taken to keep down the interest to the lowest possible figure. As an instance of the anxiety of the directors on that subject, he might state that, although they had now been in business two years, they had not taken a farthing of remuneration for their services, when the bank was in a position to pay this dividend, when they had been paid £1,600 for their services, which had been considerable, and they had given a personal guarantee for a large amount during the year 1864. The sum due by the Southland government was £100,000, of which £53,000 was secured by debentures for £110,000, secured by 68,000 acres of first-class land, and the balance due out of the ordinary revenue of the province, the agreement with the government being, that if the latter was not paid at the end of the year, debentures were to be given, to be repaid by the proceeds of land sales. The directors at present held by the bank had not yet been advertised.

The resolution was then adopted. The directors then moved a resolution to the effect that a dividend of 5 per cent. be declared, payable on and after the 1st of August, and in doing so, he referred to the loan to the Southland government, the facts of which were these:—The Southland authorities undertook the making of roads and railways, and at the time a crisis occurred, and the government could not pay its debts. They handed the bank over a certain number of debentures, the remainder standing as a book debt, and the balance of the loan of the government which the chairman had described as the loan for that and its other debts. It was understood a proposal was made of being made that the general government should guarantee the loan, and there was no doubt it would be acceded to, and he had no doubt that they would get cash from the Southland government. The directors raised the bulk of the money on their own credit, and at a time last year that they had paid the high rates of interest. The government originally agreed to pay 7 per cent., that was what they now paid 9, and would probably pay more if they did not do so. The position of the bank was improving every day, and by the time of the next meeting all cause of anxiety would be removed, and that the directors would be in a position to declare a larger dividend.

Mr. Elder seconded the resolution, and it was carried unanimously.

D. Thomson moved the re-appointment of Messrs. South, C. H. Robinson as auditors, and that their remuneration for the year should be thirty guineas each. In moving the resolution he expressed great confidence in the future of this bank.

Mr. Ewan seconded the motion, and, as an old colonist, assured the proprietors that there was indeed a bright future for the bank. The bank was progressing most favourably in every respect, and the directors assured him that Mr. Bathgate, their manager, was most

highly appreciated in Otago, and that by making a fine business for the bank.

The resolution was put and carried unani-

Mr. J. B. Robinson moved a vote of directors for the able manner in which they the bank.

Mr. Hewat and Mr. Bury rose together, which was carried by acclamation.

The Chairman thanked the proprietors for and the proceedings terminated.

NORTH AND SOUTH WALES

THE following is the report presented to the South Wales Bank, at their twenty-ninth annual meeting of the Liverpool Law Association, Liverpool, Ravenscroft in the chair :—

"In accordance with the recommendation at last annual meeting, and approved by the shareholders (pro rata) at a premium of whole of the instalments payable thereon, the paid-up capital of the bank has thus been added to the reserve fund to £150,000. During the year the minimum rate of discount at the Bank of England was 3 per cent., and some of the leading banks have experienced great vicissitudes. Heavy losses have been sustained in Liverpool and elsewhere, but the directors have endeavoured to enable the bank to escape them. The dividend of 10 per cent. per annum for that year, and they have declared a similar dividend and bonus for the year, however, they consider that it will be prudent to declare a bonus only once in every year, namely, at the date the financial year of the bank closes, and the directors have usually been meeting of the proprietors likewise would be the case of the bank for the year ended 30th June, 1864, £6,504. 3s. 6d. from last account, after deduction of interest on bills, salaries, and all other expenses, making full provision for losses, amounted to £13,698. 4s. 11d.; half-year ended 30th June, 1865, £14,700. 10s. 6d.; income tax paid thereon, £575. 18s. 6d.; balance of salaries of officers, as voted at last annual meeting, £30,313. 8s. 6d.; leaving £41,130. 19s. 8d., of which 10 per cent. per annum, free of income tax, has been set aside for the half-year ended 31st December, 1864, £14,700. 10s. 6d.; the half-year ended 30th June, 1865, £14,700. 10s. 6d. thereon, £575. 18s. 6d.—£28,982. 14s.; leaving £11,848. 5s. 6d. which the directors propose to carry forward."

directors have again to report that the large increase in the business of the bank, both in Liverpool and at the branches, during the last two years, is still continuous. The work thus thrown upon the general manager, Mr. Rae, has become excessive. With the view of relieving him from a portion of the detail of the business, and at the same time retaining his most valuable services, the directors propose, with the sanction of the shareholders, to appoint him managing director, with efficient heads of departments immediately under him. The directors who go out by rotation are Mr. Joseph Betteley and Mr. Edward Thompson. Mr. Betteley retires from the board in consequence of declining health, and carries with him the sincere respect and esteem of his colleagues. The directors recommend that Mr. Rae be appointed a director in succession to Mr. Betteley. Mr. Thompson is eligible for re-election, and offers himself accordingly. The directors have again to remind the shareholders that by individually exercising their influence they can greatly assist the directors and managers in extending the business and promoting the interests of the bank."

The Chairman moved that the report be adopted, printed, and circulated amongst the proprietors, which was seconded by Mr. John Bigham, and carried unanimously.

The motions after-mentioned were then made and carried unanimously:—

Moved by the Chairman, and seconded by Mr. H. K. Aspinall—"That Mr. George Rae be appointed a director of the bank, to act during his term of office as managing director, at a salary of £1,500 a year."

Moved by Mr. H. K. Aspinall, and seconded by Mr. Edward Thompson—"That the sum of £1,000 be presented to Mr. Rae in recognition of the services rendered by him to the bank as general manager."

Moved by Mr. Thomas Ridley, and seconded by Mr. Richard Nicholson—"That Mr. Edward Thompson be re-elected a director of this bank."

Moved by Mr. W. J. Griffith, and seconded by Mr. Thomas Fisher—"That the sum of £1,000 be placed at the disposal of the directors, as a remuneration for their services during the ensuing year, and that an additional sum of £900 be paid to the daily committee."

On the motion of Mr. William Hind, a vote of thanks to the chairman was carried unanimously.

SHEFFIELD AND HALLAMSHIRE BANK.

THE twenty-ninth annual general meeting of the shareholders of this bank was held in the Outlers' Hall, Sheffield, on the 21st July; John Bower Brown, Esq., in the chair.

The following report was read:—

"Your directors have pleasure in stating that both the business of the bank and its profits during the past year have been larger than those of any year since the bank was formed in 1836. After payment of all the expenses of the bank, and making suitable allowances for doubtful accounts, the net profits are £25,950. 3s. 8d. Out of this sum the following amounts have been appropriated, viz.:—£9,147. 10s. for the dividend, after the rate of 10 per cent. per annum for the half-year ending 31st December last; £421. 9s. 7d. for income-tax; and £1,298. 7s. for bad debts, leaving a balance of £15,082. 17s. 1d. unappropriated. Your directors now declare a dividend after the rate of 10 per cent. per annum for the half-year ending 30th June last, amounting to £9,160,

together with a bonus of $2\frac{1}{2}$ per cent., amount to £1,342. 17s. 6d. The foregoing may be summarised thus:

Income-tax
Bad debts
Dividend for half-year ending 31st December
paid
Ditto	ditto	...	30th June last,	...
Bonus $2\frac{1}{2}$ per cent.
Added to surplus fund
Total

"The dividend and bonus now declared were £1,342. 17s. 6d. in addition to the dividend for income-tax, on or after 25th July in the year 1864, issued to customers during the past year. The premium on the surplus fund capital by the sum of £250. The premium on the surplus fund to £100, have been added to surplus fund. During the past year the sum of £104. 15s. 6d. of the surplus fund debts previously written off as bad. This added to the surplus fund.

Surplus fund on 30th June, 1864, was	...
Added this year premiums on ten shares	...
Ditto debts written off and since recovered	...
Ditto balance of this year's profit	...

Present amount of surplus fund

"The shareholders will observe with satisfaction that the surplus fund, which has been called upon for a long period of cheap money, have been replenished during the previous year, with a considerable addition to the surplus fund, now larger than at any former period.

"Your capital account stands thus:—

7,328 shares £25, paid up, amount to	...
Surplus fund, as above	...

Thus making a total working capital of £187,000.

Comparing the capital and resources of the bank with those of other banks, we have solid grounds for congratulation on a state of affairs rarely surpassed by any bank, and this, too, in the face of a dividend as 10 per cent., which is ordinarily considered a high dividend. I think it right to remind you that a large proportion of the surplus fund this year was made during the first half of the year, when it was high. They need scarcely suggest to you that you should expect bonuses, when the special causes of the present state of the money market is one of the causes which is considered that the Hallamshire Bank has a large surplus in its profits, the result of the past year's operations. I have by you with satisfaction, as it is so viewed by the shareholders, have been informed by circular that on the

Wm. Waterfall resigned the situation of manager of the Sheffield and Hallamshire Bank, and that Mr. Albert Holdsworth was appointed to fill that position. As far as it is possible to be accomplished your directors endeavour to make their direction a substantiality, and not a mere name, by carefully supervising the movements of the bank, and yet leaving ample scope for the free action of the executive officers of the bank. To combine these satisfactorily, so as to produce the best results for your interest, is the constant and untiring effort of your directors. Your directors feel it to be both a duty and a pleasure to express their satisfaction with the marked ability, zeal, and industry which Mr. Holdsworth has displayed since his appointment as manager. Following the plan which all experience shows to be best for inspiring emulation and zeal in any staff of officers (the requisite talents and conduct being present), your directors filled up the situations of sub-manager and third officer by appointing Mr. Henry Jollie Wells to the former and Mr. Samuel Smith to the latter position, both old and trusted officers of your bank. The steady and harmonious action of the bank through all its officers has given entire satisfaction to your directors. Viewing the past year as an exceptional one in regard to profits, your directors have deemed it proper to present to all the officers of the bank a gratuity of 10 per cent. on their respective salaries. This gift, as growing out of a year of exceptional profits, will be considerably viewed as exceptional. Francis Bookby Appleby, Esq., of Renishaw, retires from the board, his term of office having expired, and the directors nominate William Cockayne, Esq., of Thorpe House, Norton Lees, gentleman, as incoming director. As usual, the balance sheet has been carefully audited by all your directors and found correct, and everything connected with your books is most satisfactory. In conclusion your directors congratulate you on the growing strength, importance, and prosperity of your bank. From its ample resources your directors are prepared to meet all the legitimate demands of commerce, and to support especially, as far as prudence will permit, their numerous clients."

"That the report and statement of the directors for the year ending 30th June, 1904, which have been read, be approved and the same be printed, and a copy thereof sent to the shareholders."

"That William Cockayne, Esq., of Thorpe, Lincolnshire, be elected a director in the place of F. J. Renishaw, who this day retires from office."

"That the thanks of this meeting be given to the directors for their valuable services; and that the sum of £500 be paid to them from the funds of the company."

"That the thanks of this meeting be given to the other officers of the bank, for the able and efficient manner in which they have discharged their duties."

"That the thanks of this meeting be given to the auditors."

NATIONAL DISCOUNT COMPANY

THE usual half-yearly or extraordinary general meeting of the company was held on the 26th July, at the London Hotel, London, W., in the chair.

The Secretary (Mr. R. Price) read the following resolutions:

"The directors, in presenting the annexed statement of the half-year ending 30th June last, feel assured that the shareholders will participate in the pleasure they have in the evidence of the steady progress of the business of the company. The profits for the last half-year have amounted to £36,500, deducting the current expenditure, directors' salaries, and other charges, writing off, in their entirety, all bad and doubtful debts, and a rebate of interest on bills not yet due £36,500."

sum of £65,339. 0s. 1d., which, with the addition of the balance brought forward from the 31st December last, will then amount to £70,092. 0s. 5d. These satisfactory results will enable the directors, after appropriating £60,000 to the payment of a dividend at the rate of twenty per cent. per annum, free of income-tax, to carry forward to the next half-year's profit and loss account the sum of £10,092. 0s. 5d. The dividend will be payable on and after the 1st of August.

The Chairman said—Gentlemen, in moving that this report, together with the accounts, be received and adopted, I am happy to say I shall not have occasion to trespass any length of time upon your attention, and it is perhaps the best proof of the highly satisfactory position the company occupies that I shall have to use very few words in asking your assent to this resolution. The report speaks for itself, and I think a more satisfactory statement could scarcely be laid before you. (Hear, hear.) And I assure you it makes us, your directors, particularly proud that we are the

body to which you have entrusted the management has been attended with such successful results. We proceed as you have hitherto done to insure a continuance. We have gone through in the past six months a period, when large houses, one after another, influential and well-established concerns were obliged to have, however, passed through the crisis unscathed. The amount of bad debts made during the half-year, considering the business done, is so small in proportion to the business done, that it is almost naming. (Hear, hear.) I trust, gentlemen, you will have that confidence which you have hitherto reposed in the management we have, we shall be able to produce a good report, and, at all events, I hope to do so now. (Cheers.)

Mr. Chaytor, deputy-chairman, seconded the motion.

Mr. S. Barber, after personally congratulating the directors on their re-election for Limerick, congratulated the directors upon the flourishing state of affairs of the company, a well-managed concern. (Hear, hear.) Alluding to the period of peril the company had passed through, considering the risk of such a time and the almost world-wide reputation which had succeeded, it would have been surprising if the directors had been able to have an amount of bad debts, or at least that they had been as torily as before; but it appeared that they had been able to do nothing by bad debts, but that they had made good. The profit realised was larger than during the previous year (hear)—and that after paying the splendid dividend they carried forward a larger balance to the credit. When he commenced the last half-year's account with the directors, rumours of negotiations for an amalgamation of the concern, but no positive information on the subject, he thought, however, if any such negotiations had been going on with the firm that had just come out in the shape of a new company, they might now rest perfectly satisfied with the result. (Hear, hear.) Considering the large amount of that concern, while this company had no item of that account under that head, the only item of original capital in the balance-sheet being £40,000 for premises and preliminary expenses, he thought the directors had done very well enough alone. He could only say that he wished the result as satisfactory as his investment in the National Discount Company. (Cheers.)

Mr. Slater inquired, had the directors considered it advisable, having regard to the competition they were surrounded, to make a further issue of capital, their business, and place the company in a position to meet the respect?

Mr. Chaytor replied that the subject had been discussed during the chairman's absence. At the instance of the directors did consider whether it would be advisable to issue a second to none, as Mr. Slater said, in respect of credit already second to none in point of credit; but it was not the capital they would be placing a burden round the shoulders of the holders. To pay an equal dividend upon the last

require a considerable increase of business, which the directors did not see their way to obtaining at once, and they therefore decided that it was better to wait until such an increase arose as would justify it before calling upon the shareholders for more capital. At present he believed they had as much business as they would have if they had a larger capital, without the burden of paying the dividend upon a larger capital out of the same amount of profit.

The resolution adopting the report was then put and carried unanimously.

The Chairman moved a resolution that a dividend be declared on the paid-up capital of £600,000 at the rate of 20 per cent. per annum, free of income-tax, payable on and after 1st August; and that the balance (£10,092. 0s. 5d.) be carried to the credit of profit and loss new account.

Mr. Harrison Watson urged that when the capital was increased by the issue of new shares at £5 premium, it was stated by the chairman that when the £600,000 was paid up and the reserve fund was established at £300,000, the full profits should be divided amongst the shareholders without any deduction; he therefore moved as an amendment that instead of carrying over £10,000 to the new account, the dividend should be at the rate of 11s. 8d. a share, which would leave a balance of £92 to carry over.

The Chairman reminded Mr. Watson that this was only an ad interim dividend, and that it would be better to leave the matter to the end of the year, and to settle at the annual meeting in January what should be done with the balance.

The amendment was not seconded; and Mr. Watson having expressed his concurrence in the chairman's view, the resolution declaring the dividend was agreed to unanimously.

Mr. L. Simpson, in proposing a vote of thanks to the chairman and directors, eulogised their vigilance and successful management during the critical period just passed through, and suggested that, instead of the mere formal and barren vote of thanks, the shareholders should mark their appreciation of the directors' services by voting them £5,000 instead of the usual £3,000. He observed that, in the new company which had been referred to, the directors received £500 a year each; and if they were as successful as this company, the management would, under the arrangement, receive a fabulous sum, something like £30,000 a year, he believed.

Mr. Watson would have much pleasure in seconding the proposition.

Mr. Slater, while expressing a general concurrence with the proposal, suggested that it should be brought forward in a more regular course, after notice given.

The Chairman, in expressing the acknowledgments of himself and his colleagues for the compliment, and especially for the good feeling which had prompted the suggestion which accompanied it, stated his concurrence with the last speaker, that it would be more regular to leave the matter of increasing the directors' remuneration until the annual meeting.

Mr. Simpson thought there was so much propriety in Mr. Slater's recommendation that he at once adopted it, and gave notice of moving the £2,000 increase at the next meeting.

The Chairman had a duty to perform, which was especially pleasing to him, to move that the thanks of the shareholders be given to the manager, Mr. Webber, for the very efficient and able manner in which he had conducted the very responsible duties that had fallen upon him during the past half-year. The mental anxiety which must have fallen upon that gentleman during the period referred to was far greater than he (the chairman) could describe. Dealing as he had to do with such large sums of

money, and having to judge on the instant of the company and at the same time fair to the public, the difficulties were greater than could be readily overcome. He so carried out his duties that not only had the bank but had realised a profit which gave to the shareholders (Hear.)

The motion having been carried,

Mr. L. Simpson proposed a vote of thanks to the manager; Mr. R. Price, the secretary; and the motion was unanimously carried; and after a brief acknowledgment the proceedings terminated.

UNION BANK OF IRELAND

THE fifth general meeting of this bank was held at the London Tavern; Mr. E. W. Wingrove, the

The Secretary read the report, from which it appeared that the profits of the bank for the half-year were £1,972. 19s. 3d., and from this sum there had to be added £1,972. 19s. 3d., from the last account: making a total of £3,944. 18s. 6d. amount had to be deducted for expenses of £6,850. 17s. 2d. for interest on current account, so that there remained a balance of £4,111. 1s. 4d. proposed to carry to the new account.

The result of the half-year had not realised what they attributed the check in the progress of the business, which they believed had already been assured that as the establishment was placed in the future contained abundant promises of its success.

The Chairman, in moving the adoption of the report, stated that the result of their operations during the half-year was as satisfactory as they had anticipated. But he was able to show that that disappointment had arisen, and that the directors had no control, and from exceptional causes, which they hoped would not again occur. One of the greatest sources of interest which had ruled throughout the half-year was the banking operations very unremunerative. Banks also had more or less suffered. As the Chairman, in their want of success, he should particularly mention a distillery firm in Limerick early in the year, which had given rise to a number of very exaggerated reports, which had been very injurious to the bank itself. He stated that they were thus likely to incur a loss of £50,000; but the shareholders would be glad to hear that in reality reach any considerable amount. The bank had an overdraft of £10,706; but the bank had a reserve of £8,600; leaving a balance of £2,106 upon which debt itself a dividend would be paid. The bills held by the bank for the firm to the amount of £10,000 had been reported as bad. The result of the half-year losses by the bank which had been so severely operated very prejudicially, and had compelled the bank to stand hand for several weeks, for the purpose of meeting the demand for sum of money which might otherwise have been available.

That mode of proceeding, he believed, was perfectly judicious under the circumstances, and would tend to strengthen their credit by showing that money was safe in their hands. There had been a falling off in their deposits during the last six months, and that circumstance had given rise to some unfavourable comments among their shareholders in Ireland. But he was glad to be able to state that the actual diminution in their deposits in Ireland had amounted to only £2,000 during the half-year, and that diminution had taken place in the spring time, when farmers usually withdrew their capital from banks for the purpose of carrying on their agricultural operations. It was true that the falling off in their deposits in London had amounted to about £40,000; but that money had been withdrawn in the ordinary course of business, and not from any want of confidence in the bank. He was glad to be able to add that since the accounts had been made up the deposits in Ireland had increased, and that they were at present larger than they had been in the month of April last. He should further observe that during the same half-year there had been a general falling off of deposits in the London banks, and in one large establishment the diminution had amounted to not less than £1,500,000. The directors would that day have to ask the shareholders to confirm the election of certain gentlemen as members of the board. They had always expressed their desire to have associated with them men of position and influence in Ireland, and the gentlemen whose names were then to be submitted to the meeting would perfectly fulfil that condition. (Hear, hear.) The number of Irish shareholders in the bank had considerably increased since last December. They at that time amounted to 248, and they were at present 308, thus showing an increase of 60; and that fact afforded a welcome proof that they were commanding increased confidence among capitalists in Ireland. He believed that the future contained for them brighter promises of success than the past. The prospects of the harvest in Ireland were very encouraging; and he confidently hoped that the directors would meet the shareholders under more prosperous circumstances at the close of another half-year. With these explanations he begged leave to move the adoption of the report. (Hear, hear.)

Mr. J. Q. Henriques seconded the motion.

Mr. Huggins drew attention to the comparatively small amount of the paid-up capital, and expressed his opinion that a paid-up capital of £220,000 was not sufficient. He should prefer the capital being raised to £500,000.

Colonel Western thought the remarks of the hon. proprietor originated in a fallacy. It was not the paid-up capital the bank made its money on, but the sums placed in it by the depositors and customers. The capital was ample for the business they did, and to increase it would only cast upon the directors the necessity of devoting a large sum in the payment of even a small dividend.

Mr. Straker inquired whether there was any particular reason assigned for the resignation of two of the directors, Mr. J. B. Elin and Mr. L. Fraser.

The Chairman, in reply, said that at present the amount of capital in the hands of the board was quite sufficient to carry on their business. If their transactions largely increased, and it was found necessary to establish a branch in London, the question of calling up more capital might come before them very properly, but at the present moment the board were decidedly of opinion that it was not advisable to make a further call. (Hear, hear.) With respect to the resignation of two directors, he could only say

that Mr. Elin, whose great commercial skill and influence had been of much service to the bank, had been obliged to retire from illness, which had prevented him from attending to any business for some months; and Mr. Fraser had resigned because he found himself unable to attend the very frequent meetings of the board.

In reply to a question from a Shareholder,

The Chairman stated that the bank would not lose a farthing by its transactions with Mr. Morrison, and that the total loss on the Hall estate eighteen months ago was £800, which had all been written off in former accounts.

A shareholder inquired whether the directors were satisfied with the business done at the branches.

The Chairman replied that the branches were young at present, and the board were not in a position to come to a satisfactory conclusion as to the amount of the profits which would be derived at each branch. The Irish board had visited one branch which they thought was not doing well, but after making an investigation they determined to give it a further trial. He assured the meeting that in the event of any branch not paying it would be done away with without the least delicacy.

The report and statement of accounts were then adopted unanimously.

The election of Mr. Haughton, Mr. Shaw, and Mr. Nixon having been confirmed, the retiring directors were re-elected.

The auditors, Mr. Barnett, M.P., and Mr. Miller, were also re-elected, and a vote of thanks to the chairman and directors, and to the managers and officers of the bank, concluded the proceedings.

EAST LONDON BANK, LIMITED.

THE third ordinary meeting of the shareholders was held on the 27th July, at the London Tavern, Charles Capper, Esq., in the chair.

Mr. H. Daniell, the secretary, read the following report:—

“The directors, in submitting their third report, congratulate the shareholders on the continued progress and prosperity of the bank. Since the last half-yearly meeting the head-office of the bank has been removed to, and the business is now carried on at, the premises in Cornhill. The profits of the half-year ending 30th June, 1865, as shown by the accounts appended to this report, and certified by the auditors, after providing for all bad and doubtful debts, deducting rebate of interest on current bills, and writing off an adequate proportion of the amounts standing to the debit of bank premises and preliminary expenses, enable the directors to recommend a dividend at the rate of 5 per cent. per annum, free of income-tax. The directors think it right to add that the number of current accounts, both at the head office and at the branches, have been and are steadily increasing, and the amount of money deposited is much larger than heretofore. The directors believe that the undertaking is now recognised in the city of London and elsewhere as one of the solid and matured joint-stock banks.

The Chairman regretted the absence of Mr. Butler, whose labours during the late election had necessitated a tour in Scotland, and said it was his duty to move that the report and statement of accounts be received and adopted. It afforded him very great pleasure, on the presentation of the third half-yearly report and accounts, which had been placed in their hands, to think they would afford the shareholders every satisfaction. He must repeat that it would have been far more satisfactory if their worthy chairman had been able to preside, but he found himself "done up," and was obliged to seek relaxation. With regard to the progress of the business of the bank, everything was going on in a solid, satisfactory,

and steady way. Their business was increasing every day, and if they continued in the same course, instead of offering them 5 per cent. they should be able to give them a much larger dividend. It should be borne in mind, however, that a very low rate of interest had recently prevailed, and the consequence was the profits of that bank, and of all kindred establishments, had been very small. He would give them the history of the progress of the bank. In the first half-year, the amount due on current and deposit accounts was £209,000. In December in the same year it was £346,169, being an increase of nearly £140,000. And in the present half-year the amount was £386,370, showing a very large increase. All this had been done without undue or rash speculation at all. If the board had erred at all on any point, it was on the point of caution and prudence. The greatest temptations existed to do a larger amount of business to give them a larger dividend. But they hesitated to do so, for they had in all their dealings regard for one thing, and that was the safety of the bank, and the course they had pursued had placed that establishment in a higher position than any other establishment of the same age in the city of London held as regarded the prudence with which they conducted their business. If he wished to give them a further proof of the way in which their business progressed, the bills discounted, loans, &c., in June, 1864, were £235,000, and in December, 1864, £271,000, being an increase of £36,000. In the half-year ending June, 1865, they amounted to £327,844. That showed they had increased their business to that extent, and they had been supplied with funds from other sources to increase their profits. If the proof were needed, he could mention the fact that from January to the 6th of June, in this year, there was an increase on their current and deposit accounts of 33 per cent.; and to show them the very good, substantial, and extensive business they were doing, he would tell them the transactions of the bank over the counter during the last six months amounted to £27,000,000 of money. (Hear, hear.) These were great results, and this had been arrived at by the great confidence which had been placed in the management of the bank. That had been the policy of their board, and this would be policy of the shareholders. Although they only paid 5 per cent., under the circumstances explained to them, he thought they would consider that very satisfactory. (Hear, hear.) They should have had no difficulty in doing a much larger business, possibly it might have been doubled, but they had declined to do anything speculative; Mr. Butler, M.P., the chairman, thought 5 per cent. dividend very satisfactory, looking at the circumstance of the past half-year, and the way in which they had transacted their business. He believed the bank was destined, at no distant day, to become a great bank, because he was sure with the confidence they were daily and hourly acquiring, with the increased deposit and current accounts, they would be enabled to increase the profitable operations of the bank. (Hear, hear.) Their balance-sheet was one signed by three directors, and two of them who were auditors, and Mr. Youngs of the firm of Coleman, Turquand, and Youngs. Every security, every document, in the bank had been inspected by those gentlemen. Every item of doubt had been written off. They had taken credit for nothing that was not really tangible and substantial. (Hear, hear.) That was the policy of the board, and he hoped it would meet with their approval. (Hear, hear.) Their manager, if he erred, erred on the side of caution; he erred on the right side; and if they were to continue to be successful, their manager, deputy-manager, and secretary should be supported, and would be supported; and he hoped, with the confidence reposed

in the board and officers, they would be much better off, and better able to pay a larger dividend than they were at present. (Hear, hear.)

Mr. Fennings seconded the motion, which was unanimously adopted without discussion.

Mr. White moved the declaration of a dividend at the rate of 5 per cent., free of income-tax, payable on the 28th of July. There was very little to say, after what had been stated by the chairman. But this he would say, so far as he had been concerned, he had used his best endeavours for the promotion of the best interests of the bank. (Hear, hear.) He was ready to resign if any other respectable gentleman would occupy his place, and employ his interest with his friends for the benefit of the bank as he had done. But he claimed no credit for it. Their large property was in the hands of a few directors, and it was for the shareholders to see how far their property was properly cared for whilst under their management. He had risen to say, although he was one of the largest shareholders in the bank, he would remain so, and if they gave him their kind co-operation he would return the same. (Hear, hear.)

Dr. Collum seconded the motion, which was unanimously carried.

A sum of £50 was voted to the auditors.

Thanks were voted to C. S. Butler, Esq., M.P., as chairman; to the directors; to the general manager (Mr. Latter), the deputy-manager, the secretary (Mr. Daniell), and the other officers of the bank.

A vote of thanks to Mr. Capper, who presided in the absence of the chairman, brought the business of the meeting to a close.

ORIENTAL FINANCIAL CORPORATION.

THE second ordinary meeting of the members of the above corporation was held at the London Tavern, on the 28th July; Mr. John Brown in the chair.

The following report and circular were presented:—

“The directors beg to submit to the shareholders the report of the proceedings since the last general meeting, held on the 27th January, as also the accounts up to the 30th June, duly audited. In the circular issued by the directors on the 12th May, mention was made of their inability, from the want of unanimity in favour of the measure on the part of the shareholders, to carry out the suggestion as to the reduction of the nominal amount of each share. The directors have further to report that none of the proposals for amalgamation which they have had under consideration have, as yet, come to a successful issue. With reference to the accounts, the directors have to mention that as against the item of £191,570. 9s. 8d. under the heading of “Advances on Securities,” the corporation holds collateral security to the nominal value of £333,585. It will be noticed that it has been deemed advisable to write off a further amount of £1,000 from the preliminary expenses, and this reduces the amount at the credit of profit and loss on the 30th ult. to £11,372. Unless otherwise desired by the shareholders, the directors do not intend declaring an ad interim dividend for the past half-year. As mentioned in the circular above alluded to, the directors have been enabled to place the securities of the corporation on a more satisfactory footing, but from want of capital

BANK OF EGYPT.

The half-yearly meeting of the shareholders was held on the 28th July ; Mr. Tite, M.P., in the chair.

The following report was taken as read :—

“ The directors have the pleasure to lay before the shareholders the annexed statement of accounts for the half-year which ended on the 30th June last, by which it will be seen that the net profits, including a balance of £4,819. 6s. 5d. brought forward from the previous half-year, amount to £16,966. 18s. 3d. This enables the directors to recommend a dividend for the half-year, as on the last occasion, at the rate of 10 per cent. per annum (£12,500), free of income-tax, leaving £4,466. 18s. 3d. to be carried forward to the next account.”

Balance Sheet 30th June, 1865.

	<u>£16,966</u>	<u>18</u>	<u>3</u>

The Chairman moved the adoption of the report. He said although the state of affairs in Egypt had at times assumed a serious aspect, they had escaped such heavy losses as were incurred by some other companies,

and including a balance of £4,819 brought to £16,966. The great cotton crisis struck the houses in Egypt, and it was estimated that £2,000,000. To that difficulty was added the fact that the agent had informed them that the losses in Alexandria 4,000, in Cairo 5,000, in Damietta 6,000, and that the total number of deaths within the last year that cholera had raged in Egypt was 19,250. The disease was now abating, and trade might be revived.

The report was adopted, and a dividend of 10 per cent. annum was declared.

The meeting terminated with the customary business of the man and the other directors.

[We shall give a more extended report in the next issue.]

WESTERN BANK OF

The judges of the first division of the Court of Common Pleas gave their verdict in favour of Mr. Addie, who claimed that the Western Bank re-payment of his shares, was not due on what he alleged to be false accounts. Their lordships did so on the same grounds as the verdict obtained in similar circumstances in the case of the Kentish Bank, as being contrary to evidence. The result is reserved.

STOPPAGE OF THE CANTERBURY

On the evening of the 26th June, but not before it was known that something was wrong in connection with the Saving's Bank, an institution which has long enjoyed the fullest confidence of the labouring classes, it need only be said that the deposits amounted to £150,000. On the following morning the bank had stopped, and for some time considerable excitement could be no doubt of the fact, for the announcement was in The Kentish Gazette, but the alarm was not so great as the excitement by the assurance that the trustees at a meeting convened to consider the position of the bank had been closed to the depositors in full. The bank had been closed since the defalcations of the secretary and secretary had many years been held in great esteem and respect in position and influence in East Kent. It was against the secretary, who has made over his share in the bank. On the morning of the 27th the trustees of the depositors' pass-books, and the trustees of the bank with the concurrence of the authorities of the county they would immediately be in a position to pay the amount of their respective amounts, with interest.

THE NEW LAW OF PARTNERSHIP.

CAP. LXXXVI. AN ACT TO AMEND THE LAW OF PARTNERSHIP,
5TH JULY, 1865.

Whereas it is expedient to amend the law relating to partnership: be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the lords spiritual and temporal, and commons, in this present parliament assembled, and by the authority of the same, as follows:

The advance of money on contract to receive a share of profits not to constitute the lender a partner.

1. The advance of money by way of loan to a person engaged or about to engage in any trade or undertaking upon a contract in writing with such person that the lender shall receive a rate of interest varying with the profits, or shall receive a share of the profits arising from carrying on such trade or undertaking, shall not, of itself, constitute the lender a partner with the person or the persons carrying on such trade or undertaking, or render him responsible as such.

The remuneration of agents, &c., by share of profits not to make them partners.

2. No contract for the remuneration of a servant or agent of any person engaged in any trade or undertaking by a share of the profits of such trade or undertaking shall, of itself, render such servant or agent responsible as a partner therein, nor give him the rights of a partner.

Certain annuitants not to be deemed partners.

3. No person being the widow or child of the deceased partner of a trader, and receiving by way of annuity a portion of the profits made by such trader in his business, shall, by reason only of such receipt, be deemed to be a partner of or to be subject to any liabilities incurred by such trader.

Receipt of profits in consideration of sale of goodwill not to make the seller a partner.

4. No person receiving, by way of annuity or otherwise, a portion of the profits of any business, in consideration of the sale by him of the goodwill of such business, shall, by reason only of such receipt, be deemed to be a partner of or be subject to the liabilities of the person carrying on such business.

In case of bankruptcy, &c., lender not to rank with other creditors.

5. In the event of any such trader as aforesaid being adjudged a bankrupt, or taking the benefit of any act for the relief of insolvent debtors, or entering into an arrangement to pay his creditors less than 20 shillings in the pound, or dying in insolvent circumstances, the lender of any such loan as aforesaid shall not be entitled to recover any portion of his principal, or of the profits or interest payable in respect of such loan, nor shall any such vendor of a goodwill as aforesaid be entitled to recover any such profits as aforesaid until the claims of the other creditors of the said trader for valuable consideration in money or money's worth have been satisfied.

Interpretation of "person."

6. In the construction of this Act, the word "person" shall include a partnership firm, a joint-stock company, and a corporation.

INSURANCE CORPORATION

THE Insurance Corporation of Great Britain and Marine, seek to raise £4,000,000 capital, the deposit to be £1 on application, £1 in 10 months. It is announced that 20,000 shares of which 10,000 shares are now offered, shares being reserved for the transfer and fire, life, and marine insurance companies on the success of limited liability, and the principal elements of insurance will, it is developed under our management. In the requisite arrangements for vigorous and the corporation will commence its commanding a foremost place in this branch.

OVEREND, GURNEY

THE announcement of the conversion of Co.'s into a limited liability company, with surprise, but on the whole with capital is to be £5,000,000, in 100,000 £15 per share is to be called up by a deposit, £5 per share on allotment, £4 per share, and £4 per share on the 15th include Mr. Henry Edmund Gurney, Mr. Robert Birkbeck, all members of the gentlemen are Mr. H. F. Barclay, Mr. Thomas Gordon, chairman of the Oriental Bank, Rennie, of Messrs. Cavan, Lubbock, and the goodwill is £500,000, one-half remainder in shares of the company, thereon, terms which, in the opinion of ensure a highly remunerative return. Ward Chapman retires from the firm and hereafter be engaged in other important business will be handed over to the new vendors guaranteeing the company and liabilities transferred. Three members consented to join the board of the new also retain a large pecuniary interest. interesting volume, written by one of the Parisian school onomy. Mr. Coulet is a clever reasoner and a sound e deals with his subject in a straightforward manner. All e watching the course of the discussion on banking and should consult his elaborate essay. The statistics con- nking in France and Belgium are especially valuable.

Communications

To the Editor of the "Banking in Australia"

BANKING IN AUSTRALIA

SIR—In communicating a few items of interest to your journal, I have to inform your readers of the formation of a new local bank under the designation of the Ballaarat Banking Company Limited. The capital is £200,000 in 20,000 shares of £10 each, the issue not to exceed 10,000. The prospectus, which was applied for, and as yet has not been issued, is pretty well to do, individuals employed in a remunerative business may be done in a number of ways; it does not intend to enter into the business of issue notes; it does not intend to enter into the business of deposits at call or fixed for a period. The management of the bank means and large experience in commercial banking, will have no difficulty in bringing the bank to be managed economically and profitably. The Ballaarat Company will, I trust, have many flattering offers of business from Ballaarat has so much increased of late years; the banks have been so successfully established; the banks are being so thoroughly developed with the agricultural interests so rapidly extending. The local body of directors was much needed. The banking institutions in Ballaarat, both English and Colonial, that assistance to mining companies, mines, and the labour by the establishment of a new industrial mine, or the character of the miner or trader, all danger of loss arising to a bank making a mistake at Ballaarat have to act up to the instructions of the colony, and the chief in the colony is under the supervision of London, who are most likely men of the colony and commerce, and most anxious to promote the interests of the establishments; but what knowledge is it to have regarding the mining and agricultural and constantly improving district? I have, some time ago, a series of instructions from the office is in London, to the managers of the colony regarding mining advances, which, if acted upon, will be the eyes of these worthy men by a speedily decided.

It is well known mining is the grand industry of the colony and bustling community lives and prospering by the immense quantities of gold, and giving steady employment to men. The bank having one or two large shareholders, fortunate, and so highly is a connexion of the bank managers pay personal visits to the colonies for inducements for their accounts. In order to be entertained of a good mining account, I have, of a bank, whose head office is in London, and hearing that a company determined to

to another institution, went in person to the mine and begged in the most humiliating manner to continue to transact their banking affairs at his bank. This conduct deserves to be exposed, it is not fair and manly competition, and altogether unworthy the high character a bank manager ought always to bear. The success of our local banks depends to a large extent upon the development of the auriferous wealth of our mines. A bank making advances to companies on the security of the machinery need not expect to escape losses occasionally. In the event of a company proving unproductive, or a want of means to prosecute the search for gold arising, the security against which an advance was made falls into the hands of the bank, and seldom realizes a fifth part of the original outlay, and not unfrequently the property is quite unsaleable. I do not think, however, that any bank in Ballaarat has as yet sustained a heavy loss by mining companies becoming insolvent, whereas, on the other hand, the connexion has proved most valuable by extending very largely the circulation of notes, increasing the deposits, and spreading discounts over a wide area. There are seven branch banks in this town, whose circulation of notes may be put down at £200,000; deposits of various kinds over £500,000; and amount of bills under discount probably not less than £300,000. Now, of these amounts the miners ought to receive credit for one-half, at all events, showing very plainly the mining community deserves the support the banks can render individually or collectively. That great caution and prudence are required by bank managers in dealing with mining companies and such individuals as solicit assistance on mining security can be readily seen, only I would venture to say to directors in London interested in Australian banks that there is a splendid outlet in the gold fields for capital, which, if well invested, could not fail of turning out most remunerative. The financial operations of Ballaarat are assuming almost gigantic magnitude compared with what they were a few years back. The banks are doing well, and, by still further extending assistance, great strides of progress and improvement will occur within the coming years as have already so greatly distinguished this pushing town and district. Banking is still in its infancy; there is a daily widening arena opening up; resources are being yearly developed to an amazing extent, and picture the fact of seven banks, with upwards of fifty officers, doing business in a town whereon only a dozen years ago sheep depastured, and the emu and kangaroo walked monarchs of all around.

I remain, Sir,

Yours truly,

BANK CLERK.

BANKERS AND ASSURANCE POLICIES.

SIR—The present bankruptcy law is so very different from the former in reference to the above, that I think you would do a very considerable service if you would afford some space for the discussion of this subject. An ordinary assignment of a policy would run thus :—

“Know all men by these presents, that I of in the county of in consideration that I am or may become indebted or liable to the Banking Company upon account current, bill, note, or otherwise, do grant and assign to in the county of in the same county, and of in the same county, esquires, (the trustees of the said banking company), their executors, administrators, and assigns, a policy

or instrument of assurance effected by me or Assurance Society, for the sum of po day of 18 , and numbered to accrue due on the said policy, and all my full power in the name or names and as the tors or administrators, to demand, recover, and the said assigned moneys and premises ever same unto the said trustees, their executors by way of mortgage for securing to the sment of all moneys in which I am or may them upon account current, bill, note, or said Assurance Society to pay to the said assigned, and when as the same shall become and empower the said trustees, at any time owing from me to the said banking company render the said assigned policy to the said and assign the same to any other person or price or consideration in money, and in such tees shall see fit, and to apply the moneys Assurance Society, and the proceeds of such (after deducting the costs of and incident payment and satisfaction of the moneys and be secured, rendering the overplus (if any) tistrators. And I covenant with the said truce Society the premiums, fines, and other said policy, and to produce to the said trustee voucher, for every such payment, and to And if I shall at any time fail to pay such moneys, or any of them, within the first spectively shall have become payable, I authorize the same, and then and in that case I further tees to repay the same to them with interest the rate of £5 per centum per annum; and the payment thereof. And I declare that the said trustees, or any of them, for any sum or or in respect of the said policy, or upon any aforesaid, shall be effectual discharges for the relieve the said Assurance Society, purchaser paying the same, from all liability to see the such Assurance Society, purchaser, or other person bound or entitled to inquire whether any come to the said banking company. And I declare the trusts hereby given to or reposed in the said the trustees or trustee for the time being of In witness whereof I have hereto set my hand of 18 .

Signed, sealed, and delivered in the presence Now, under the former bankruptcy law, the the amount deducted from the proof; so it but in the assignment above there are two distinct assignment of the policy with its then value valuable covenant—viz., the provision for the main point in the value of a life policy as it comes more and more valuable. Under the and clear, because the then value of the policy

the proof, and the future premiums became a new and continuing sum which bankruptcy did not release him. For instance, sup-annual premium became due even the very next day after, he could be sued for it, and so on from year to year; but the 1861 bars such proceedings, and thus far, at first sight, would do considerable damage to life policies as securities—and thus the important subject under discussion. The clause to which I refer is (Act of 1861, s. 154) and runs thus :—"If any bankrupt shall at the time of his bankruptcy be liable by reason of any contract or promise to pay premium on any policy of assurance, or any other sums of money, whether or not the same are due, or otherwise, or to repay to or indemnify any person against any loss or damage, the person entitled to the benefit of such contract or promise, if he think fit, apply to the court to set a value upon his interest in such contract or promise, and the court is hereby required to do so, and to admit such person to prove the value thereof, and to receive dividends thereon." This clause may be construed as must; at any rate, you will find it so in the Act. Now, this would have a very important effect upon the proof. We will take an ordinary office valuation of a policy. Say, a policy has paid in £100 in premiums, the policyholder is now aged fifty, the office value would be something like £40, the value of the future premiums would be, say, £250. Now, if the policy is not due, the proof would stand thus :—

Balance due at bankruptcy	£584
Deduct value of policy, say	40
				<hr/>
				544
Add actuary's valuation of future premiums, say	250
				<hr/>
Amount of proof	<u>£794</u>

proofs made in this way passed by three or four, and objected to; but on explanation all have acceded to it. But it is a question worthy of consideration, as it makes a life policy, even if a young man, a very valuable security in case of bankruptcy, by increasing the value of the policy, and on consideration, taking the assigned value, it appears to be both fair and reasonable, because if you take the present value of the policy, that is all that can be demanded. The charge for future premiums is also a distinct, but valuable security, and as the new law takes away your power to sue for future premiums, it is right that you should take a dividend on that value of the policy. I shall be glad to see this matter fully discussed in the pages of your journal.

Your very truly,

H. S. C.

AUSTRALIAN SOVEREIGNS.

In reply to your correspondent "T," I beg to say that the Act relating to these coins makes them legal tender in England, after the proclamation by her Majesty declaring them to be so. This

proclamation has not yet been published, in consequence, I believe, of some difference as to alloy between the authorities at the Tower and the Sydney Mint.

I am, Sir,
Your obedient servant,
J. PLAZA.

5th July.

FOREIGN BILL OF EXCHANGE.

SIR—Will you kindly favour me with your opinion on the following point:—

A bill drawn from Hamburg on London, on the 26th May, at three months after date, is accepted by the drawee thus—"pr. ultimo Sept., accepted at—A. B." Is it legally due on the 29th August according to tenor, or can payment only be demanded on the 30th Sept. (or 3rd October with the grace), according to the acceptance?

Yours truly,
W. M. N

July 12, 1865.

[We apprehend the acceptor would have the right to vary the tenor of the bill, unless the holder refused and so protested it.]

THE PARTNERSHIP ACT.

SIR—1. Please state what is the liability of a person who has a small sum of money in a business concern, and who receives his share of the profits?

2. Is he liable for his proportion, or all, of the debts of the concern so far as his private property would go in covering same?

3. In the event of bankruptcy of the firm, would this party lose all the money he has in the firm, or would he be considered a creditor?

Truly yours,
A SUBSCRIBER.

July 13th, 1865.

[The Act of Parliament, 28 and 29 Vic. c. 86, passed during the late session, will fully answer all those questions. It is a short Act and is published elsewhere at length.]

CROSSED CHEQUE.

21st, July, 1865.

SIR—Will you inform me whether a crossed cheque which has not the words "& Co." written between the double lines, may be paid to a private party presenting it, or whether it is necessary that it come through a bank.

I am, Sir,
Yours, &c.,
CHEQUE CLERK.

[Yes: the holder can demand payment.]

Estates of Failed Firms.

THE ESTATE OF MESSRS. J. T. BELL & CO.

of the creditors of Messrs. J. T. Bell and Co., of London, was held on the 10th July, when an approximate statement of affairs, prepared by Messrs Coleman, Turquand, Youngs and Co., was presented, showing general debts and liabilities of £34,998, and assets, £34,998. There are special liabilities on account of Nowrojee Ardaseer, amounting to £280,250, but the property of this native banker is placed at a much higher total, and it is expected he will meet all his liabilities. The creditors having expressed entire confidence in Mr. Bell, the partner on this side, resolutions were passed at the meeting until further information was received from him. In the meantime it has been arranged that Mr. Bell shall superintend the liquidation with the assistance of Messrs. Coleman, Turquand, and Co., two of the creditors giving at the same time the benefit of their experience.

MERCANTILE SUSPENSIONS.

During the past month the following suspensions have been announced during the past month :—
 Messrs. Thomas Moore & Sons Manchester, Iron Merchants.
 Messrs. Frederick Osterroth & Co., London, General Merchants.
 Messrs. J. T. Bell & Co., London, East India Trade.
 Messrs. Nasmyth & Co., London, East India Trade.
 Messrs. Scott, Bell, & Co., London, East India Trade.
 Messrs. Jarvie, Thorburn, & Co., Shanghai, Merchants.

MONTHLY CHRONOLOGY.

—Suspension announced of Messrs. Thomas Moore and Sons, Manchester, iron merchants, with liabilities to about £35,000.
 —Stoppage of Messrs. Frederick Osterroth and Co., of Upper Street, described as general merchants.
 —Suspension of Messrs. J. T. Bell and Co., of Billiter Square, in the East India trade, with about £35,000 liabilities.
 —Suspension of Messrs. C. I. Nasmyth, and Co., of Great St. Helen's, in the East India trade, with debts amounting to £70,000.
 —Parliament prorogued by commission, the Queen's message having been read by Earl Granville, and on the same day the dissolution of Parliament announced, by royal proclamation, in the London Gazette.
 —Suspension of Messrs. Scott, Bell, and Co., of London, in the East India trade, with £800,000 liabilities.
 —General elections for the representatives in the new Parliament commenced.
 —Intelligence received of the suspension of Messrs. Jarvie, Thorburn,

and Co., of Shanghai, agents to Messrs. Bue failed in London, in April.

27.—The directors of the Bank of England discount from 3 to 3½ per cent.

BANK MOVEMENTS

Mr. W. W. Scrimgeour, retires from the post of Bank of London, and joins the board, giving the excellent advice. Mr. J. A. Barton succeeds to the

Mr. C. J. H. Allen, late secretary and deputy manager of the Union Bank of London, Mr. John H. have been appointed deputy-managers of the bank, and Mr. Allen has been appointed secretary.

In consequence of the elevation of Mr. J. A. Barton to the post of manager of the Union Bank of London, Mr. G. W. has been appointed manager. Mr. W. has been appointed secretary in the place of Mr. Newmarch, who has retired on ill-health.

Notes of the M

THE LAW ON THE NOTES OF STOPPED BANKS.—A case of a note of the late bank of Messrs. Spooner & Co. was brought before Judge Welford in the Birmingham County Court, before Judge Welford. Mr. Wilkes had a table knocked down to him for auction rooms on the 10th of March. The same day he presented to one of plaintiffs' clerks a £10 note of the bank, which he received in exchange £3, and took away the table. The bank stopped payment. The note was paid in by Ludlow and Daniell to their bankers, and on the same day Mr. Wilkes informed him of the stoppage of the bank. The case was argued before Judge Welford on Tuesday, and on Thursday his honour gave judgment deciding that the defendant could not be held responsible for the value which the note had undergone after it left his hands.

RIGHTS OF BANK SHAREHOLDERS.—A case of a shareholder and intending borrowers came on for hearing at the Birmingham County Court on the 15th July. It was an appeal from a decision of the court in the following circumstances:—A gentleman obtained a loan from the Bank, for which he paid a deposit of £6. He then called on the directors upon inquiry declined to grant, with

damages and for the £6 deposit. The chairman ruled that he had no right to damages, but that he was entitled to have the deposit refunded. Against this decision the company appealed, and Judge Christian gave judgment in their favour, holding it to be clear that the respondent was not entitled to get a loan merely because he held shares, and that he was equally not entitled to get back the deposit. The shares were his property, and he was entitled to dividends upon them, but could only relieve himself of the liability respecting them by transferring them in proper form.

TENDERS FOR BILLS ON INDIA.

THE biddings for 25,00,000 rupees in bills on India took place on the 5th July at the Bank of England. The proportions allotted were to Calcutta, 17,41,000 rupees; to Madras, 35,000 rupees, and to Bombay, 6,60,000 rupees. The *minimum* price was, as before, 1s. 10½d. on Calcutta and Madras, and 1s. 10¾d. on Bombay. Tenders on Calcutta and Madras at and above 1s. 11½d. and on Bombay at and above 2s., will receive in full. Further biddings for 25,00,000 rupees in bills on India took place on the 19th July. The proportions allotted were—to Calcutta, 17,76,000 rupees; to Madras, 2,24,000 rupees, and to Bombay 5,50,000 rupees. The *minimum* price was as before, 1s. 10½d. on Calcutta and Madras, and 1s. 10¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11½d. will receive about 54 per cent., and on Bombay, at 2s. in full.

TRADE OF THE UNITED KINGDOM.

THE Board of Trade returns for the month and five months ended the 31st May, were issued on the 29th June, and on the whole may be regarded as more favourable than those presented for the two or three previous months. Although there is again a falling off in the value of the exports, still it is less in amount than several of the preceding returns, and shows a steady revival in trade. The total declared values of exports for the month of the present year was £13,194,758 against £14,176,640 in 1864, and £11,281,289 in 1863, which is a decrease as compared with the former period of £981,882, but an increase over the latter of £1,913,469. For the five months of the present year the total was £60,901,576, against £64,060,060 in 1864 and £50,742,670 in 1863, showing a decline of £3,167,484 as contrasted with 1864, but an increase of no less than £10,158,906 over 1863. As regards exports, there has been an increase in alkali, beer and ale, coals and culm, cotton yarn, cotton manufactures, machinery, seed oil, silk manufactures, and woollen worsted yarns. On the other hand, there has been a decrease in apparel and slope, haberdashery and millinery, hardware and cutlery, linen yarn, linen manufactures, metals, thrown silk and woollen and worsted manufactures. With respect to imports, there has been an increase in animals, guano, raw silk, tallow, wool, cocoa, and coffee, but a falling off in clocks and watches, raw cotton, flax and hemp, saltpetre, flax seed and linseed, woollen manufac-

tures, spirits, sugar, tea, tobacco, and wine. has been a large increase in the importation regards provisions an increase is exhibited lard, but a decline in bacon and hams, salt p tables exhibit the changes in the several art

Monetary Intelligence.

MONETARY REVIEW FOR THE MONTH OF JULY.

FINANCIAL and commercial affairs have not experienced any great change during the past month, still there has latterly been a tendency to increase in the value, and the rate has, at the last moment, the 27th July, been placed at $3\frac{1}{2}$ per cent. This is a rise of $\frac{1}{2}$ per cent.; from the character of the temporary pressure the last few days, some parties expected that an advance of 1 per cent. would be made. It is satisfactory to find that the Bank directors do not consider it necessary to proceed further in the adverse direction at present, seeing that the next day, the 28th, £133,000 bar gold was sent into the Bank, and that the Bank of France return has once more improved. The course pursued by the governor and the court appears exceedingly proper. Exceptional circumstances are for the moment notably influencing the money market, and though as the season advances, the terms may become dearer, it is not supposed the rise will be immediate. The only drawback at present to the existence of a sound state of things is the introduction of public companies, the majority of which can never last. The prospects of the harvest are favourable, and it is now said the returns will prove an average which is quite as much as was anticipated. If the Bank directors had carried the rate to 4 per cent. it would have been essential for the Bank of France to have followed to some extent. As it is, it is not supposed they will resort to any such step, particularly as the decrease in their bullion has been checked. The supply of capital, both in the discount market and at the Stock Exchange, has augmented since the Bank alteration, showing that the effect of the event has been anticipated. At the same time, a great number of the operators have over-provided themselves, and finding the Bank minimum not as onerous as imagined, have re-loaned a portion of the sums they borrowed. Another month will show whether we are likely to have full quotations in October, November, and December.

The range in Consols has been exceedingly limited. Only moderate transactions have taken place throughout the month. Speculation is quite at a stand. After dullness in the early part of August, there is now increased firmness. The government broker is expected shortly to re-invest an account of the sinking fund. No especial movement has occurred in exchequer bills.

Foreign stocks have not greatly varied. The market has been quiet, and scarcely anything has been done in the shape of business. For the majority of cases prices have been heavy. Spanish receded greatly at the commencement of the month; latterly a rather better feeling has prevailed, the price having recovered. Mexican, Turkish, and other classes continue to manifest dullness.

The railway market has suddenly become languid, and prices generally exhibit a decline through the unfavourable prospects of dividends, and the termination of outstanding speculative accounts. The traffics have been tolerably good, but there is an apprehension that the average of expenditure is again increasing.

The produce markets continue dull, and till after the season for recreation is over we are not likely to have much animation. When relief is experienced here, there will be a corresponding revival in other trade departments.

THE GRAIN TRADE.

As is usual at this period of the year, the state of the weather and the progress of the harvest have had some little influence upon the price of grain. In the early part of the month quotations for nearly all descriptions advanced from 1s. to 2s. per quarter, but towards the close there was a decline to about the same extent. Wheat has not been in great demand, and the supplies of both home grown and foreign have been ample. Barley has been in moderate request for the season, and oats have changed hands pretty freely. The latest official quotations were—Wheat, 42s. 6d. per qr.; barley, 27s. 10d.; and oats, 21s. 7d. per qr.

The *Gazette* returns for England and Wales have been :—

Week ending, 1865.	Wheat. Qrs. sold.	Weekly Average.	Duty.	Corresponding Weeks Last Year.
		s. d.	s. d.	s. d.
June 24	51,039 ...	41 3	1 0	40 3
July 1	52,540 ...	41 6	1 0	40 0
" 8	56,954 ...	42 5	1 0	40 9
" 15	50,048 ...	43 1	1 0	41 9
" 22	52,131 ...	43 0	1 0	42 6

The importations since the harvest of 1864 have been :—

	Wheat. Cwts.	Other Grain. Cwts.	Total. Cwts.
Forty-eight weeks ended 17th June ...	16,291,628	22,658,378	38,950,006
Five weeks ended 22nd July ...	2,277,779	3,006,253	5,284,032
	18,569,407	25,664,631	44,234,038

And the weekly averages have been :—

	Wheat. Cwts.	Other Grain. Cwts.	Total. Cwts.
Forty-eight weeks ended 17th June ...	339,000	472,000	811,000
Five weeks ended 22nd July ...	455,000	601,000	1,056,000
More	116,000	129,000	245,000

STATE OF TRADE.

THERE has been no special movement in trade. Business in Lancashire is considered to be very steady, and it is not probable any great revival will take place till subsequently to the harvest.

NOTICES TO CORRESPONDENTS.

We have arranged in future to issue a double number in February and August, instead as formerly in May and November. This has been rendered necessary by the great increase of the Meetings of the Banks and Discount Companies, which will be always carefully collected in the pages of the *Bankers' Magazine*. We shall also give the proceedings of the various Credit and Finance Companies as they are more or less associated with banking, so that our subscribers and readers can refer to them without difficulty. Correspondents will please forward communications addressed to the Editor, No. 8, Birchin Lane; subscriptions and orders as usual to Messrs. Groombridge and Sons, Paternoster Row, or Messrs. Waterlow and Sons, Carpenters' Hall, London Wall. **BANKING AND FINANCIAL ANECDOTES.**—It will be perceived from notice elsewhere, that the Editor of the *Bankers' Magazine* is collecting and arranging a series of Banking and Financial Anecdotes. Any contributions from subscribers and readers of the *Magazine* will be thankfully received, particularly if the subject-matter shall not have previously appeared in print. Nothing personal or offensive will receive publicity.

The fixed issues of the Irish and Scotch Banks at the present time are given in the *Banking Almanac*, as follows:—

6 Banks in Ireland, allowed to issue ..	£6,351,494
12 Banks in Scotland, allowed to issue ..	2,739,271

18 Banks in all, allowed to issue	£9,103,765
---	------------

The following appears, therefore, to be the

comparative state of the circulation:—

Irish Banks are below their fixed issue £292,282

Scotch Banks are above their fixed issue 1,803,435

Total above the fixed issue	£1,216,149
-----------------------------------	------------

The amounts of Gold and Silver held at the

head offices of the several banks, during the past

month, have been as follows:—

Gold and Silver held by the Irish Banks £2,076,491

Gold and Silver held by the Scotch Banks 2,490,749

Total of Gold and Silver Coin	£4,567,150
-------------------------------------	------------

Being a decrease of £24,415 on the part of the

Irish Banks, and a decrease of £1,449 on the

part of the Scotch Banks, on the several amounts

held by them during the preceding month.

CIRCULATION RETURNS OF THE UNITED KINGDOM TO JUNE 24, 1865.

The state of the Note Circulation of the United Kingdom for the month ending

for the Month ending 24th June, as compared with the previous month:—

	May 27.	June 24.	Increase.	Decrease.
Month ending June 21)	£21,251,547	£20,877,112	—	£374,435
...	3,000,548	2,896,772	—	103,774
...	2,947,871	2,747,083	—	100,783
...	27,089,961	26,520,972	—	578,992
...	4,596,951	4,557,798	—	39,153
...	6,930,489	6,762,209	—	168,241
...	£37,627,361	£36,840,888	—	786,478

of the month ending June 25th, 1861, with the month ending June 24th, 1865,

the Bank of England circulation of £512,078, a decrease in Private Banks of

£235,898; being a total increase in England of £235,898; and in Ireland an increase of £261,291. Thus

the month ending 24th June, as compared with the same period last year, presents an

increase in England, and an increase of £544,862 in the United Kingdom.

The Bank of England, for the month ending June 21st, gives an

increase of £16,000,921. On a comparison of this with the Return for

the month ending 24th, there appears to be an increase of £1,043,607; and an increase of £1,530,132

on the same period last year.

The Bank of Scotland and Ireland during the month ending 24th

June, give a decrease of £32,864 as compared with the Return of the previous

month, and an increase of £130,253 as compared with the corresponding period last year.

THE BANKERS' MAGAZINE,

AND

Journal of the Money Market.

SEPTEMBER, 1865.

STOCK EXCHANGE ADMINISTRATION.

It is only natural that the investing public should take a lively interest in the action of the Stock Exchange Committee. A quotation in the official lists may be no guarantee for the soundness of an undertaking, but it is a certificate which to some extent vouches the *bona fides* of promoters and managing directors. It shows that certain conditions have been fulfilled, certain preliminaries observed, and certain hostages given, by those inspiring genii who fingered the promotion money, published the prospectus, and settled the basis of the company. It tells us that the capital subscribed is ostensibly at least in a certain ratio to the entire amount required. It assures creditors that a fair proportion of the ten or twenty thousand shares into which the capital is divided have been taken up. It keeps the company's name before the eyes of every man who looks at the money article, and it tempts timid speculators and wary investors, because of the greater facility of realisation which recognition by the magnates of Capel Court undoubtedly affords. Nor can it be said that the powers of the Stock Exchange Committee are often exercised otherwise than wisely and well. Indeed, if their conduct were continually or frequently open to reproach, they would not long remain invested with their quasi-judicial functions. The public are not so fond of irresponsible authority as to endure continued control of important interests by men whose *bona fides* was not above suspicion. John Bull is constitutionally impatient of unreasonable restraints and doubtful dealings, nor does he become at all more submissive when the restraints are imposed upon his mercantile

transactions, and the dealings injuriously affect his breeches pockets. To say, therefore, that he allows a self-elected and irresponsible body to meddle with his investments, is to say in effect that in this, as in many other English institutions, efficiency in practice atones for deficiency in theory. The rules of the Stock Exchange may be arbitrary, but their operation is in the main salutary. The constitution of the committee may be bad in principle, but its operation is found to be highly beneficial in working.

Of late, however, there have been symptoms of considerable dissatisfaction with this state of things. The committee is apt to be somewhat capricious in its manner of dealing with matters coming under its cognizance. Existing professedly for the benefit and protection of the public, it appears now and then to lose sight of its proper objects, and to act as if the interests of jobbers and speculators were its chief concern. A company is formed to work a promising speculation, or take over an established business. It passes through the ordinary stages of development, and progresses with greater or less rapidity to complete organization. It comes into the world a crude conception, upon which hardly any one will bestow a second thought. It is "taken up" by some plausible promoter, or skilful secretary, by whom a board of directors is got together. Its advantages are set forth in a flowery prospectus, and detailed at length in newspaper advertisements, which generally wind up with circumstantial information about the last day at which applications for shares can be received. Trusting to the promises made by the "good men" on the direction, investors flock to the bank where deposits are to be paid. In due course we hear that applications have been received for from two to tenfold as many shares as can be issued, so that a very large number of would-be shareholders will inevitably be disappointed. Up go the yet unissued shares, like so many sky rockets: for a few days they figure in the list of new undertakings at tempting premiums; those who previously had feared to tread, rush rashly not to say madly, in; stock brokers, jobbers, and people with friends at court, make a handsome profit, and the outside world, whose avidity has made the knowing ones' opportunities await with redundant confidence the special settling day which shall entitle their pet scheme to a regular quotation. But sometimes the event proves their confidence misplaced, their anticipations delusive. The committee of the Stock Exchange puts on its "hose severe and beard of formal cut." It brings out its wise saws and makes the new company a model instance. It discovers some oft overlooked infringement of its

own rules, some change in the articles of association, which, in its judgment at least, constitutes a "material variance" from the statements of the prospectus. The result is a refusal of the quotation; which is followed, as a necessary consequence, by an immediate and inordinate depreciation in the value of the shares. The wise men on 'Change shake their heads knowingly; the foolish outsiders gnash their teeth despairingly. The rapid rise is followed by a fearful fall, and all manner of hard things are said about directors, share brokers, stock jobbers, and everybody else who has anything to do with joint-stock companies.

It will, perhaps, be said that we are complaining without reason. We shall be told that the refusal of a quotation is an act of public duty, for performing which the Stock Exchange Committee are entitled rather to great praise than to small censure. We reply, that the action of the committee is too late in time and too uncertain in instance to meet the complaint we are now making. Not until the applications have been sent in, and the letters of allotment issued, do the public know of the fatal flaw in the venture which induces those who regulate the destiny of nascent companies to pass a sentence of financial ostracism. Nay, more; it is undeniable that the secrets of the prison house are not particularly well kept, and that the course which the committee will take with reference to any particular scheme is known to the speculating few long before it is announced to the investing many. The consequence is that the former class have a start of some days, in a race whose every hour may be worth some thousands—thousands, be it remembered, which come out of the pockets of those whose only fault has been an excessive confidence in the integrity and straightforwardness of men whose fortune and position ought to render them above suspicion. It would be easy for us to cite cases in which a quotation has been accorded to projects rotten as tinder, and refused to others as sound as an acorn; in which the committee's error of judgment has lured honest men to their ruin, while in others their capricious or incautious exercise of their powers has cast undeserved discredit upon projects of unquestionable excellence and value. Our object, however, is not to peak of particular instances, but to assert a general principle. We seek not to condemn the committee because they have occasionally erred, but we desire, by reminding them of the importance of their duties, to prevent the necessity of future misadversion. Regard for the interests of the public is the only plea which can be urged for the maintenance of a tribunal so anomalous as the Stock Exchange Committee. A court which elects its own members, frames its own rules, exercises authority

of its own mere motion, absolves whom it will, and condemns whom it pleases, had need take especial and particular care lest its decisions should invite censure or provoke "the fury of malignant criticism." And if this be true universally, it is especially significant when the members of such a tribunal are individually supposed to benefit by the practices which collectively they condemn; when the relations between the judges and the public are such as in some degree at least to warrant the insinuation that private interest rather than public virtue may have prompted an act of discipline, or occasioned an exercise of severity. For our own part we should be sorry to impute unworthy motives or incautious action to the members of the Stock Exchange Committee. Many, indeed most, of its members, we personally know, and, with scarcely an exception, those we know we highly esteem. But we cannot shut our eyes to the fact that the public in general have not the intimate acquaintance with them which it is our privilege to enjoy. They see only the external surface of things. They see that while a quotation is freely recorded to some undertakings which they consider questionable, it is sternly denied to others which they regard as *bonâ fide* and commendable. They know that the refusal of a quotation in the latter case inures to their own loss, and that in the former it results in great gains to those whose hands the power of granting or refusing the advantages of such a quotation has been lodged. It would be well for the members of the committee to consider these things. Whatever be the immediate source of Stock Exchange prosperity, its first and greatest and most enduring cause must be the confidence of the public. If this be once forfeited, the charmers of Capital Court will try their arts in vain. They may pipe, but their subscribing and investing playmates will not dance. They may, like the syrens, sing their sweetest songs, but the investor, like another Ulysses, will stop his ears, and the syrens will sing in vain. In their own interest, therefore, no less than from regard to commercial morality, we ask the Stock Exchange Committee to ponder well what schemes they endorse, and what they condemn. Of late they have in a measure laid themselves open to the imputation of praising without cause, and condemning without excuse. We trust they will in future be more careful. Let them express their disapproval of Stock Exchange manoeuvres at a time when their opinion will be beneficial to the public, and let them not withhold their countenance from an honest and promising concern, from any regard to the interest of speculators for a fall. If they act thus, the public will continue to trust and to confide in their discretion, but if they take

any less straightforward course, their dereliction will not un-naturally be followed by a corresponding estrangement between investors and themselves. In the long run they will find that attention to the interests of the former is the best way to secure the prosperity of the latter. Let them be especially careful not to give any ground for suspicion that they have been capricious and unreasonable in refusing recognition, but when they do this let their discretion be exercised early enough to make the penalty fall upon the speculators, and not upon the *bonâ fide* investors.

A PRACTICAL SUGGESTION FOR FACILITATING THE
OPERATIONS OF THE CLEARING HOUSE, AND LESSENING
THE RISK AND TROUBLE OF COUNTRY BANKERS.

A VERY considerable part of the articles passing through the Clearing House consists of cheques and bills remitted by country bankers to their London agents. These articles ought to reach the Clearing House either in the "morning clearing" or very early in the "afternoon clearing." Unless they do so they interfere with and delay the London business, which flows in with great rapidity after 2 or 2.30 p.m. The bills from the country, however, and day by day an increasing number of cheques and warrants, &c., drawn "to order," come to the London bankers specially endorsed, and therefore have to be sorted and resorted for endorsement by the London banker in the busiest part of the day, and again sorted for the clearing after the endorsement is obtained. It will be easily understood that under such circumstances delay is often inevitable, and that such delay creates inconvenience in the clearing.

This is an evil which must grow. The trade of the country is larger every year, and of course leads to the circulation of more bills and cheques; and as regards cheques a greater proportion are *specially endorsed* whenever they form the subject of remittance.

At the other end of the chain the country banker has also *specially* to endorse over to his London correspondent the articles remitted, and he has mostly to do this at a time of the day when he is in the midst of correspondence, or some other equally important part of his duties.

The endorsement of these bills and cheques is in reality pure form. The Country and the London banker hold them merely

for collection. They have no speediest attainment of that end.

Is it then possible to suggest two things, viz. :—

(1.) Provide the security of poses of transmission through dispense with the delay of proc sending and receiving bankers.

(2.) Expedite the delivery “morning clearing,” and there London business later in the da

We believe it to be quite pos not merely to suggest it, but to which has been in successful op several years.

If it be said that to discon the London remittances would having before him a class of in tions, the answer is ready, viz. mechanical labour of executi give to the banker a real opp

over carefully and scanning them on both sides. And the same remark applies to the receiving banker in London.

It is inevitable that in the growing necessity for expedition and despatch in every direction, and for every purpose, all mere mechanical work must be abridged more and more. In France, the public functionaries are justly described as "machines of signature,"—so vast and indiscriminate is the rage for autograph signatures to the most common-place documents. This is a mistake which, of all people, bankers are most interested in avoiding. One of the chief objects of the organisation of a banking office should be to increase the means of observation and supervision on the part of the principals, by relieving them as far as possible of all mechanical labour that can be safely dispensed with.

And we believe that in bringing before our readers the facts stated in this paper we have done something towards promoting this most desirable end.

THE FACILITIES OF BANKING.

WHEN the mania for multiplying banking establishments was at its height, we ventured to express our apprehensions lest it should result in a redundant supply of banking accommodation. We showed that the marvellously high dividends paid by the London and Westminster, the Union, and similar joint-stock concerns, were due to circumstances of an exceptionally favourable character, upon which no new company could reckon, and we expressed our fears lest the promulgation of fresh schemes, at the rate of two or three a week, should occasion an excessive and dangerous competition in a business which especially requires a constant exercise of caution. For a while it seemed as if our warnings were unneeded. The new banks rejoiced in abounding business, and their shareholders in liberal dividends; the original capital was usually found inadequate, and new shares issued at high premiums were not only placed without difficulty, but sought with inordinate avidity. The quotations of many newly-launched banking companies were absurdly high; yet their momentary prosperity was supposed to be only the presage of a yet more golden future, and amidst the jubulations of those who thought profits of twenty and thirty per cent. were to be their ordinary remuneration, our less sanguine anticipations were almost entirely disregarded.

We have not had to wait very long for the verification of our apprehensions. Those who wish to see how far we were justi-

fied in uttering them may make a share list of to-day and of twelve five or six premium to eight or common, and even where shares have there has been a great and almost one bank we could name the fall premium, and were we to go through to a multitude of similar instances so impressive and practical sermon on expectations. The golden dream has It has been found that the early great to be beneficial. The new carcasses round which the eagles go instinct of their species. Firms, w than solid, engaged in operations hastening to avail themselves of the modulation which limited liability and provided for their especial benefit. opportunity traders of this class so failure, but in the end they left t with heavy bad debts and heaps of extent this evil may have wrought. In many cases, we know, open credit houses of doubtful character have lations or suspend their payments. indications to prove that the mischief banking, as in other businesses, take the greatest risks. Something customers, and a banker can do increase the fatal facility of credit the Unity, the Northumberland a score of other bankrupt establishments entirely upon this utterly unsound. In some cases, because good accounts others, as it appeared, from pure dangerous chances, a number of stricted liberty to play with the bank's resources. We hope that not to imitate the sublime folly of these we need only refer to a case heard at Court, during the last month, to tempt fortune has not yet died directorial bosoms. The Birmingham appeared as prosecutor of two men, conspired together to defraud the bank

of money. Of course we know nothing more of the facts than is detailed in the ordinary channels of public information, and, therefore, whatever we say, whether of the bank or of the prisoners, must be taken subject to such explanations as may hereafter be afforded. With this reservation, we remark that the history of the case affords an instructive comment on the risks run by those who depart from recognized rules of business. Mr. Benjamin Taylor, a Birmingham manufacturer, in May last, called to make inquiries about the facilities which the Birmingham Bank afforded. He had at times, "many excellent trade bills," which he was willing to discount with his present prosecutors, inasmuch as he did not like the mode of dealing adopted by a rival company which had hitherto been favoured with his patronage. From the newspaper reports of the proceedings, it seems that the usual preliminary of an introduction through some respectable firm was in this case dispensed with. The prospect of getting a customer whose floating amount would be £4,000 or £5,000, seems to have been sufficient for every purpose. Taylor's account was accepted, and within three weeks, he succeeded in getting nearly £3,000 of the bank's money on bills which it is now asserted are utterly worthless. He obtained this advantage by one of the stalest of stale artifices. He had an associate named Henry Kelly, in London, prodigal in aliases and ubiquitous in residences. With the help of this worthy, he procured or concocted bills, drawn sometimes by forging the signatures of respectable firms; sometimes on persons long ago dead, or removed from the addresses given; sometimes on men of straw, who were paid a few pounds by way of "commission" for writing their names. Had Taylor only gone about his work somewhat moderately he might have kept up the game almost indefinitely. But he frightened the bank too soon by discounting at the rate £1,000 a week. They told him they must decline to take any more of his paper, at which he was virtuously indignant, because "he was most particular as to the persons with whom he did business." But suspicion once aroused, was not be quieted by these assurances. He was taken into custody, and letters were found upon him which at once revealed his *modus operandi*. Kelly, his associate, had assumed the name of Reeves & Co., of Langbourn Chambers, and had ordered goods right and left, referring to Taylor as a guarantee for his respectability. Firms in Liverpool, Manchester, and other places had written to Taylor for this information, and had probably received answers from him which satisfied their scruples. Reeves & Co. dealt in everything from pins to broughams, but whatever they wanted they always gave

the new customer of the Birmingham. And as showing the readiness of the times, there was also found a company, with £100,000 capital, known and rapidly increasing business of Camden Street, Birmingham, and logging manufacturer."

It is only fair to state that Taylor in Birmingham, and that the man be engaged in business there. But for this, the neglect to ask for reference opening an account was a grave oversight of the Birmingham Bank gone to have learned that Taylor already £8,000, and, this fact once known, loss which has since resulted to the seems that the bills bore on their unsatisfactory character that the circumstance alone. The president his astonishment that any bank should the bills, as they were evidently fact, we regret to say, that in this Bank does not appear to have exercised in carrying out financial transactions however, have received a very severe doubt look sharply after reference inquiries into the *status* of customers not wish to speak more harshly of impostories. The mischief is in the indefinite multiplication of competitors rendered each in a measure forgetful of impeachable rules which cannot be the prosperity, or, it may be, even those who disregard them. One of new customer should be properly in the discount accommodation afforded like proportion to the extent of the Taylor's case these precautions seem overlooked. We hope that the attention the Mansion House have directed to the means of checking the further and (financially speaking) vicious s

ON RECENTLY DECEASED BANKS.*

(From a Correspondent.)

ENGLAND has the deserved reputation of moving faster through the channel in which money is to be made, and riches accumulated, than any other country. Our cousins across the Atlantic have shown us bolder feats certainly in the effects produced than we have any wish to lay claim to, but when an amount of speed is attained altogether out of proportion to the means employed, and endangering the safety of all concerned, such operations cannot be allowed to occupy any statistical rank, having broken the bounds of all reason and discretion, are looked upon as mere acts of folly and are unworthy of the attention of scientific investigators. The great disasters which befell the banking speculations in the United States arose, undoubtedly, from their being all allowed, by permission of the local legislatures, an almost unlimited issue of notes. These acts were easily obtained by banks which, upon the discovery of the large profits made by others, spread their notes of all denominations into every corner of the country, the smallest descriptions finding their way into the humble dwellings of the field labourer, who could not be expected to exercise any discretion as to the world. The conditions imposed upon these banks, viz., that their notes should upon all occasions be paid in specie on demand, would have no effect in checking the spread of such paper far beyond even a fair proportion of what might be issued above the specie actually at the disposal of the bank at any time. And as such institutions can never be expected properly to curtail their profits on the score of safety unless their transgressions are severely dealt with by the state—no other result could be looked for than that, upon an occasion of alarm, the paper would flow in, and all who could not gather in their resources would, without doubt, suspend. The changes in the value and total sum issued of the paper money in the United States has exceeded that of any other country at any period of history, and the consequence has been that America has been visited with greater disaster and ruin than any other country. Between 1811 and 1820 195 banks in different parts of the United States became bankrupt, and it is stated by a treasury report, dated 1820, that these failures were productive of greater misery and distress to the lower orders than can be found in any precedent, and all resulting from there being no sufficient check upon the amount of the issues of these banks, and no compulsion on the part of the government that proper inspectors were appointed to watch over the due proportion of specie reserve being maintained.

In 1837 it is stated that all the banks in the United States, without an exception, stopped payment; further crashes taking place in 1839 and 1840.

Various measures were taken to prevent the recurrence of such disasters, by making all the banks pay a half per cent. upon their

* It must be understood that we are not responsible for the opinions of the writer.

capital to a security fund. This was a measure which obliged properly managed institutions to pay for those that were badly managed, and would consequently produce a great deal of opposition, resulting in the measure partly falling through. Some of the banks gave so much of their own stock as security, but this would of necessity be the least worth when it was most wanted, and did not exhibit much sagacity on the part of the suggestors.

Although the failures have been many, and often of a most disgraceful type in England, we have never produced such wholesale ruin and misery as the reckless operations of the American bankers have brought upon the people of the United States.

The stoppages and failures of banks in Great Britain have resulted more from inefficient administration than from any laxity of principle on the part of those who govern their movements. For there can be little doubt that so long as a bank director refrains from any pecuniary obligation to the institution at whose board he has a seat, he will continue to give his counsel and assistance dictated from motives which hold in view the fixing of the establishment with which he is connected upon a firm and honourable basis. Such is quite natural, as every man strives to elevate himself, and will, in consequence, endeavour to raise any institution in whose ranks he may enlist, provided his better judgment may not be warped when he is called upon to vote for a measure that lies across his interests.

We are of opinion that such a condition should be equally imperative with respect to directors as it is with the manager of a bank, that upon no sort of condition whatever shall he be allowed to become indebted to the bank in which he holds office. There can be nothing so injurious to the welfare of an institution which deals in money as for one set of its members to sit in judgment upon the application of the others. The associations of office, the intimacy which may have caused one director to introduce another, will, if not on principle smothered in the bud, lead a man to forget that strict line of duty which must be on all occasions maintained intact and inviolate. If our public institutions are to be administered so that the people of the nation who are strange to the directors may receive that impartiality and unbiased treatment which the present state of civilization and enlightenment of the age we live in demand as their right. The most highly principled and honourable men will give way under an undue pressure; under a pressure the employment of which it is the duty of the community and of the legislature to guard against. A growing familiarity with a loose way of doing business will warp the mind of a man accustomed to shrink at the thought of even favouritism until he comes to view the scaffold with composure.

All the legal preventives which are imposed by a government against the loss of property by the public will prove of little avail when the law may be evaded through the ordinary channels of business, and the capital of a bank disposed of by its administrators for their own purposes.

Upon almost every occasion upon which the failure of a bank has

been publicly investigated, it has been discovered that the failure was not owing to difficult times or crises alone. It has been by the failing energy of those who were willing to have their names associated with it while prosperous, but who forsook it when adversity overtook it. If a director only considers the damage he may produce by leaving an establishment when signs of success are not so encouraging as at the outset, he would pause before he took such a step. Is it at all possible that every contribution of men and material must be certain beyond a question to succeed? Can every institution which is commenced on a large scale, and consequently to ensure success must make a large profit, be certain to answer? The warmth of a director is exhibited more by his refusing to join a board of a new company than by his best exertions when there to bring success to an undertaking when there is not room for it. The large number of banks that have covered our newspapers with their prospectuses has, long ago, absorbed all the bank directors. There came a demand for an article, but at so short a notice there could be no adequate supply. Do the average of bank directors know really what their attainments should be in order to qualify them to direct the operations of an institution involving the most complex principles?

The banking which took its rise in London in the seventeenth century, through the goldsmiths, has gradually changed and carried revolutions into all the dealings between man and man, and has connected one country with another until the real principles of banking have expanded from the simple operations of a person who took charge of sums of money for the public, into a huge commercial engine which can negotiate the sale of an empire, or lend the money of the public in the country where it is established for the relief of another country beyond the seas; and yet, when administered as it can be, is able to return to all their due, and when promised.

A bank which is established upon legitimate principles should be in a position to return the whole of its debts to the public, including the paid-up capital, at six months' notice. The further a banking or financial institution recedes from this point, the nearer it places itself to a suspension of payments when the pressure comes.

It must undeniably be a very hard case for a body of directors to refuse a business that will lock up £100,000 for nine months, because such a loan would cause inconvenience were the funds required before it fell due; and particularly if at the time large funds were in their hands unemployed. But let me ask, is the principle which would cause them to refuse such business, in a time when they could lend the same sum upon the same conditions for three months, to be disregarded, when they had much to lend, and when a departure from such principle endangered the position of the public depositors? In many undertakings there is never any certainty that a crash will not happen; but with banks, who can set aside jealousies and adopt a system of co-operation, there is always, under a wise administration, a certainty that there can be no crash. Without a strict obedience

to the premonitory symptoms which for money unfailingly exhibit, those affected by such causes must get them. In the hurry and excitement of business these forewarnings are not taken due notice of, but it is particularly that the public has a right to know, and managers shall give their unceasing

The endless ramifications through which the market is to be traced, and the vigilance which is required in order to keep pace with all the produce of the earth, wears out the mind. I do not find a somewhat congenial position in view the results that will infallibly follow the approach of dangerous fluctuations. It requires deliberate consideration of the whole, and whether or not it is possible to improve the system, by which these huge pecuniary institutions, banks, financial companies, and brokers, insurance societies, and all other material which endeavour to gain at the expense of the public generally, without a due

I shall, in the first place, proceed to examine the lists of the shares, and the prices paid for them daily, are believed by the public to be the basis of such institutions. The enormous quantities of stock after day in the purchase and sale of such takings which have their head quarters in London suggest that the multitude of investors and the value of the article they are purchasing is enormous.

The public, as a rule, does not take the trouble to search into the causes for the fluctuations. They will, doubtless, believe, that the fluctuations in the price of the earth's produce, together with cost of production, has a corresponding fluctuations in the price of food. But persons who require subsistence, and who may attend the labours of agriculture, are not in a peculiar accommodation which the fluctuations properly conducted, the stock of commodities fluctuate regularly and evenly with the fluctuations of commercial affairs generally, and are not acted upon by the great principles of commerce. If fluctuations were properly watched, and if the public really understood such questions, they would not have so often to complain that the fluctuations are too great, and induced to trust their property

A great evil which lurks at the bottom of all such mania is the opportunity afforded to a class of persons to set deliberately to work to foist such enterprises upon the public. There is an imposing array of financial companies bristling upon the share-list every day, whose existence depends very materially upon the manufacture of some undertaking or other for sale as a limited company. They have a large capital paid up and a staff which must be paid; and their great occupation is, in order to pay a dividend to their shareholders, to persuade as many contributions of men and material as possible, to constitute themselves into a limited company based upon so many shares which the public is invited to purchase. In order to achieve success both for promoter and promoted, it is their interests to magnify as much as possible the productive powers of mines, or the traffic of unmade railroads; to overstate whatever the dividend may have been which was reaped by previous operations, when the company was a private concern. The reason for a transfer to a society of people who can provide the work with more capital is that the dividends are becoming so large that it is a shame that so few should divide them.—Some such reason as this is given, and the poor public believes it.

Now, should the machinery by which such concoctions are thrust upon the country not be overhauled, and some sort of check—by the state, if necessary—be instituted for the prevention of such wholesale swindling, as such business can come under no other category? So long as the brokers and other agents get a living by the commission to be had out of the purchase or sale of these shares, it cannot be expected that they will “cry stinking fish.” It is not, however, only the public that suffers by this system, in which they are fleeced, but it gives refuge to a number of unsound undertakings, who foster a class of bad business, who encourage people to engage in transactions of which they are entirely uninformed. Such companies do not live by the steady ordinary business of a properly and judiciously organized bank; a bank who gets together a connection by a long course of legitimate business. A bank should be able to pay just as large dividends when interest is low as when it is high. They do not do so as a rule, but they should be able to. A bank must necessarily be better off when its customers are well off than when they are not. It may appear paradoxical to state that when interest is low a bank is as well off as when it is high, but every good bank should prefer doing a safe business, with certain and small profits, than with high rates and large uncertain profits. A bank with a cautious and sound administration, and with sufficient self-denial to refuse risky business, creeps up and gradually leaves its neighbours with their temporary large profits to be overtaken by the failures which are driven upon them by a crisis, when their previous gains are no compensation for the losses which may possibly wreck the whole concern.

Can it be in any sense of justice or honesty a proper mode of procedure when a bank lives from hand to mouth, paying away all its earnings, and hiding the weakness of its foundations from the public

for the sake of keeping up appearances? Many of the banks and finance companies are known solely by the dividend they pay. The public does not take the trouble to investigate the other features in their constitutions. In this manner they go on year after year pushing up the price of their shares, possibly carrying over bad debts as good, and making no attempts at a reserve fund.

Times will arrive when combinations of misfortunes will visit every department of industry and interfere with the receipts which a portion of the community are accustomed to get, and the consequence is, that if the chain of commercial payments is destroyed in any of its links, interruption must ensue as with every break-down, and some must be losers until the communication is properly re-established. Just in proportion to the complexity and extension of the said chain must be the magnitude of the disaster. As banks are the depositaries of vast sums of the public wealth, so is it the sacred duty of those intrusted with the guidance of such establishments to act like Fitzroy admirals over the commercial deep, and take in all fine weather sails and curtail their transactions when there is the least appearance of dirty weather. When the weather is fine for banking then the shareholders can have bonuses, but when safety must be unconditionally guaranteed then they must be content to give up the bonus for the common weal.

England drives very fast with such business, but can she take much credit to herself when she often upsets the coach? The Bank of France has gone much more creditably on her way than the Bank of England. People may be very ready to come forward and defend that fine lazy old institution in Threadneedle Street, but nothing defends suspension of cash payments. Explanations only make such matters worse.

Before any new banks are started in the United Kingdom, a prospectus should be drawn up informing the public of what they are going to do, whether they are going to establish a bank for the purpose of doing banking business, or whether they intend, in the event of their being able to obtain no deposit business and very little commission, to negotiate the sale of anything they can lay hands on. It is difficult to conceive anything more unsatisfactory than a complete deception in a matter of this sort. A body of directors who are answerable for the conduct of the affairs of the bank are and must be in the most disagreeable position possible when they are compelled to come before the proprietary time after time with only small results, when, after having organised a large company with a big capital, having appointed officers, they find the ground has been previously occupied. The result of this is, that they gradually drift into a sort of business that has no connection with, and nothing to do with banking business. A profit must be made somehow. How is it to be done? The error is not in the fact of there being no profit to be made in many of such cases, but that attempts were made to establish a bank in quarters which could yield no banking profits. No sufficient investigation was made to know whether such a bank

was really wanted : and so it was trusted to chance with the hope that a manager of genius would drag deposits out of the clouds.

It is very certain such scheming has been carried too far, and the public should be told plainly that in most parts of England there is no more room for banks under existing circumstances, and that they only injure the prestige and position of their country commercially in the eyes of foreigners by subscribing to banks and finance companies which have been concocted much of late, and with not many exceptions, to gratify the vanity of men who will be directors. It must be borne in mind that to acquire a thorough knowledge of banking a long course of experience is required, and that such is required more than all by those who direct.

Before any more banks are started, the Stock Exchange or some special committee should be appointed to investigate the affair, and ascertain and inform the public if there be a fair field for the enterprise, as such is frequently supposed to exist by the sanguine and inexperienced, when, on the trial being made, results such as those which have attended the efforts of some of our foreign banks are the unfortunate conclusion. Even if a gentleman joins a board of directors for love, it is a pity that the labour of such love is lost.

A. C.

BANKING AND FINANCIAL ANECDOTES.

No. X.

THE USE OF FICTITIOUS CAPITAL.

MANY years ago a banker of the name of B——, who had been for a length of time hopelessly insolvent, managed to keep his bank open by representing to his clerks that he had a fund of £100,000 in an iron chest, which was only to be used on an emergency, so that that sum, always figured in the books as an asset. The banker was one day seized with a serious and fatal illness. Previous to his death he called his eldest son to his bed-side, and requesting every one else to leave the room, thus addressed him!—"Tom, I have been able to keep open the bank on the supposition that there is £100,000 in an iron chest in the cellar. Now, I will tell you the truth, there is no such sum nor any money whatever in that chest ; but take my advice, continue to bring forward the £100,000 as an asset and prove under my date to an amount inclusive of that sum, which you will find by my will I have left to you, but do not on any account, as you value the continuance of the bank and your own position as a banker, attempt

to open the iron chest ; if you do, and the fact of there being no money there becoming known, the bank will assuredly fail." Soon after the death of Mr. B——, the son, thinking that as the old banker had been sparing of his money, there was in the chest double the amount named, resolved to disobey the injunctions of his father, by opening the chest. He accordingly descended to the cellar alone, there, sure enough, was an iron chest, of which he had the key, but from its rusty condition, all his attempts single handed to open it were in vain ; he could not, therefore, effect his object without additional aid ; he consequently called the bank messenger to his assistance, and with their united efforts the chest was opened, when to their utter amazement, at least of the messenger, it proved to be empty. On this discovery, which from the fact of there having been a witness soon became known, there was, in banking phraseology, "a run on the bank" which, as prognosticated by the deceased banker, soon after suspended payment.

THE TROUBLES OF A MISER.

A BANKER, many years deceased, who once carried on operations in Lombard-street, had a coachman of the name of Tibbs, who had grown gray in his service, and who, knowing that his master had for years been accumulating riches, thought he would imitate him, although in a small way. His savings, little by little, increased at last to a considerable sum, which he invested in the 3 per Cent Consols, and from that time he became a confirmed miser. At last he was too old to continue his employ, and retired on a pension. At the age of 72 he made love to an old beggar-woman about his own age, who was reputed to be rich. Tibbs used to stop and gossip with her every day, and as the saying that "the course of true love never runs smooth" is as applicable to old lovers as to young, so it fell out with this ancient couple. One day Tibbs had taken his place as usual by the side of his intended, in George-yard, Lombard-street, where the old woman had stood for years, when a gentleman passing, doubtless taking Tibbs for a beggar, gave him half-a-sovereign, probably instead of sixpence, which he hastily put in his pocket. The old woman said the money was intended for her and insisted upon having it ; the old man was equally as pertinacious, and refused to give it up, thereby, as the lawyers say, "issue was joined." This pretty quarrel brought on a coolness on the part of the old woman, whose

love of money was stronger than her love of Tibbs, and she consequently refused to have anything more to say to him. This was "a sad blow and great discouragement" to Tibbs, who had reckoned on adding to his own store of wealth that of the old woman, which he knew was considerable. But however sad this result, there was still a lower depth of misery in store for the old miser, who related to the clerks at the bank the following account of the cause of his unhappiness. He began by saying that one day a gentleman, who had known him for some time, met him in Lombard-street and invited him to his country house, as he, Tibbs, was then unwell: the change of air would, his friend said, do him good, and he might stop as long as he liked without any expense. Tibbs accepted the invitation, and "about a month after he got me to his house," the old man continued, "he began to talk to me about making my will, and thought I had better allow him to draw it up. I refused, when he continued to harass me about making my will, when I at last discovered his object was, that for his kindness to me I was to leave him all I possessed. After the lapse of three months, finding I would not permit him to draw up my will, he said I must leave his house, and at the same time put into my hand a bill of charges for three months' board and lodging, amounting to ten pounds, which he insisted upon my paying immediately I got to town, or he would send me to prison." The old man, with many lamentations, began to exclaim, "Oh, what shall I do; I cannot pay it; I shall be ruined." The clerk in the bank, to whom this pitiful tale was told, said, "Tibbs, if you cannot pay it without you must sell stock to meet the demand," which, after many mental struggles, he consented to do, when the amount was paid, and a proper receipt obtained. On the banker's clerk looking over the items in the bill he discovered that a charge was made for wine supplied to Tibbs, and as the party had no license for selling wine, Tibbs was advised to lay an information against his quondam friend, which, with the evidence of the bill and receipt in his possession he was enabled to do, when the party was fined twenty pounds for selling wine without a license, and as half of the penalty went to the informer, Tibbs, to his great joy, got back his ten pounds and reinvested it. On his death it was found that he had left to the gentleman who had put him in the way to recover the lost ten pounds, the whole of the Consols standing in his name.

THE BANKER'S CLERK AND THE EXCHEQUER CLERK.

SINCE the passing of the Act of the 4th & 5th William IV., cap. 15, which remodelled the Exchequer and provided that all the future payments on account of the public revenue should be made at the Bank of England or any of its branches, the arrangements for the receipt of the public revenue have been greatly simplified, and the amount of receipts, averaging about one million per week, is made available for the public service without delay, previous to which the Receivers-General of taxes, of which there was one for each county, only paid to the Government the amount of their collections half-yearly or quarterly, at the office of the Tellers of the Exchequer at Westminster, through a London banker. On one occasion a banker's clerk, who went to the Exchequer office to pay some money, gave the following description of what occurred.

In the office there were two young men, sprigs of nobility, both redolent of civet, one of them was occupied in trimming his finger-nails, and the other, with his back to the fire, was reading a newspaper. On the clerk's entrance the nail filer asked him *what* he wanted; this interrogatory was not put in a very conciliatory tone; however, on being made acquainted with the nature of his business, the aristocratical clerk threw an open book on the counter when the following amusing colloquy ensued:—

Aristocrat (in the same haughty tone he at first adopted) said—
"Make the entry."

Clerk—"What, am I to write in your books? Cannot you write?"

Aristocrat—"Make the entry, sir, and let me have none of your impertinence."

Clerk—"Well, if I must do your work, give me a pen." (The pen happened to be a very bad one, and he made the entry in what the aristocrat said, was "a bold impudent hand.")

Aristocrat (with passion and excitement)—"Cannot you write better than that?"

Clerk (calmly)—"Yes, with a better pen; but I believe, sir, there is no Act of Parliament to compel a man to write well; I wish there was, then you would have been taught to write. When I go into a carpenter's shop and find all his tools rusty and blunt, I set him down as a bad workman; you will know how to apply this remark."

Aristocrat—"You are a very impertinent fellow; pay the fee of 5s. and go about your business."

Clerk—"Well that's a pretty joke; so I am not only to do your

work, but for permission to do it am to pay you 5s. ; that beats my grandmother, and she was clever."

Aristocrat—"I shall make it my business to acquaint your employers with your misconduct."

Clerk—"And I shall make it my business, as a tax-payer, to insist upon your employers giving you something to do, or discharging you. I wish you good day."

The two young men were then left to chew the cud of their resentment against this insolent banker's clerk, as they termed him.

The banker's clerk kept his word, he brought under the notice of the proper authorities, the particulars of the scene above described, and very soon after these useless offices were abolished. The two Tellers of the Exchequer, whose duties, like those of their clerks, were mere sinecures, were, as is usual on the retirement of a public official, rewarded with a pension. One of them, the Lord Camden, refused to accept the pension, having considerable doubts as to the propriety of receiving a pension of £5,000 from the public purse, for services never rendered or even required ; the minister of the day being doubtless apprehensive that such refusal on the part of his lordship might establish a bad precedent, insisted upon carrying out the decision of the Government, by paying the pension ; his lordship, however, true to his original determination, on receipt of the pension repaid it to the Exchequer every half-year. This patriotic proceeding reflected the highest credit on his lordship, and was, without doubt, the brightest ornament in his coronet.

CUTTING LIGHT SOVEREIGNS.

THE Bank of England are in the habit of cutting, with a pair of shears, all the light sovereigns offered to them by the public, and on a recent occasion a gentleman having had a sovereign cut in the usual manner, and not liking the process, remonstrated in the following lines :—

A sovereign on this day was tried,
And *scales* the jury were ;
Justice was counsel on its side,
But *shears*, the judge, sat there.

The *jury* verdict gave ; and said
The piece was good, though light,
For wear the law allowance made,
To cut it was not right.

The judge cried out in horrid fury,
To hear *scales* talk of law,
"The fact alone is for a jury,"
Then snapp'd it in its jaw,

THE DISAPPOINTED BANKER'S CLERK.

THE following incident which occurred some years ago will show the manner in which a banker's clerk, who aspired to the hand of his master's daughter, was treated. The banker, who resided some ten miles from London, was in the habit, every Saturday afternoon, of taking home with him a small bag of silver with which to pay his labourers. On several of these occasions his daughter, whom the banker often brought to town with him, would take charge of the bag and would give the clerk instructions as to what denomination of silver money would be required. The young lady being very beautiful captivated the heart of the young clerk, whose attentions to her became so pointed as to attract her notice, but instead of reciprocating notwithstanding his outward man was, from his handsome appearance, well calculated to captivate the heart of the daughter even of a millionaire, she showed she was somewhat annoyed, but took no further notice of it, leaving it to chance to cure him of his unjustifiable presumption, and it was not long before a cure was effected.

On one of the usual Saturdays, the young lady, with a most gracious smile, gave the clerk the empty bag, accompanied by a piece of love ribbon, instead of the usual string, to tie up the bag. The substitution of the love ribbon for the ordinary string was construed by the romantic young clerk into a certainty that his affection was reciprocated; he, with more zeal than discretion, addressed a long letter to the young lady, filled with the most glowing accounts of his passion, and ending with a request that she would meet him on the following Sunday at the entrance of her father's park, at dusk and thus afford him the satisfaction of personally declaring his attachment for her.

The young lady, very properly, showed the letter to her father, who read it with the utmost astonishment, saying, "Leave this to me, my dear, I will set it right." Accordingly, on the Monday morning, he sent for the clerk, and producing the letter asked him if it was his hand-writing. The clerk admitted that it was, and was about to enter into an explanation, but was stopped by the banker.

who said, "Be so good, sir, as to draw a cheque for the amount of salary due to you up to this day, with the addition of three months." This having been done, the banker signed it and returned it to him, telling him to present it for payment at the counter, adding these cutting remarks—"As I have no intention of allying my daughter to one of my clerks you must at once leave my employ, for notwithstanding you have been with us some years, yet, under existing circumstances, I can very well dispense with your future services: you may leave." This was a sad blow and great discouragement to the amorous banker's clerk, who not only lost his mistress but his situation also, and for no other cause than that of falling in love with his master's daughter.

ORIGIN OF MESSRS. OVEREND, GURNEY AND CO., THE DISCOUNTERS.

THE original name of the firm was Richardson, Overend and Gurney, all belonging to the Society of Friends. Mr. Richardson commenced his career in life as a clerk in the house of Messrs. Smith and Holt, bill brokers, in Old Broad Street. The late Mr. John Overend was a cashier in the banking house of Sir James Esdaile and Co., Lombard Street, at the same time that Mr. Samuel Gurney was in Fry and Chapman's Bank, of Mildred's Court. On the visits of the latter to Esdaile's Bank, Mr. Overend used to make a joke of the peculiar shrill tone of voice in which Mr. Gurney used to address him. Mr. John Overend had been a clerk at Esdaile's Bank for many years, and for some time previously to his leaving the bank was in the habit of carrying on business privately as a bill broker, having an office in a court out of Cornhill. Finding his business increase, it is said, he one day told Mr. Esdaile he must leave them, he had so much business of his own that he could no longer attend to the business of the banking house. Mr. Esdaile is said to have replied, "We were just going to tell you the same thing, Mr. Overend." Mr. Richardson at the same time left Messrs. Smith and Holt and joined Mr. Overend; they subsequently took Mr. Samuel Gurney into the firm, and thus was formed the large and wealthy house of Overend, Gurney and Co., now merged into a limited joint-stock company under the same title. There are two classes of persons in this country whose business is almost exclusively confined to dealing in bills of exchange, viz., bill brokers and foreign exchange brokers; the former may be said to be the middle party

between those who have money to lend and those who wish to borrow. They were, on their first introduction, barely tolerated, but from the high character the above-named firm has sustained, a bill broker may now walk through Lombard Street with his head erect, and hold himself equal to the greatest among the banking and financial community.

THE FLUCTUATION OF BANKING PROFITS IN LONDON.

(From the *Economist*.)

ONE of the most important and best results of the development of the system of joint-stock management will be a more accurate knowledge than we now have of the profitableness of different trades, and the general profit of all trade. The accounts of a single trader or of a private partnership are shrouded in mystery; there is no good reason for telling them, and there are several good reasons for not telling them. But the accounts of a company in which a considerable number of shareholders are much interested must show to those shareholders the most material facts relating to the business. We are yet, however, far from such a desirable state of things. The only considerable trade which has been long enough under joint-stock management to tell us much is the trade of banking, and even as to this the published accounts of most banks are still very imperfect. Most banks persist in concealing the amount of their acceptances, and while it is uncertain whether the "liabilities" vaguely classed together are composed of paper issued by the bank, or money left with the bank, no sure deduction as to the nature of their business can be made. With such a fault in the data, no conclusion can hope to be correct. The London and Westminster Bank has set the example of dividing its deposits from its acceptances, but many banks of the greatest importance have as yet not followed its example. In the end the public will prefer a bank in which the accounts are such as they ought to be, to a bank whose accounts are such as they ought not to be.

But though the nature of the business carried on by these banks is not told us, its profits are told us. We do not know, as well as we should, how the money is made, but we are very fairly and fully told what money is made; and it is very curious to trace in this patent record the varying profitableness of monetary operations. The following are the profits earned by the long-established joint-stock banks of London during the last half-year, and we purposely confine our attention to these comparatively old banks of acknowledged credit, to avoid the unpleasant questions which embarrass the consideration of certain of the new banks, and the still greater odium of saying that one new bank is of established credit and that another is not so.

PROFITS EARNED IN THE HALF-YEAR ENDING JUNE 30, 1865.

London and Westminster Bank	...	£151,598
Union Bank	144,879
London Joint-Stock Bank	127,597
City Bank	34,108
Bank of London...	39,219
		<hr/>
		£497,401
		<hr/>

Whereas in the previous half-year the corresponding amounts were—

London and Westminster Bank	...	£170,995
Union Bank	180,195
London Joint-Stock Bank	156,150
City Bank	26,116
Bank of London...	54,301
		<hr/>
		£587,757
		<hr/>

And this is the more remarkable, because the London and Westminster Bank, whose accounts are full and conclusive, show an increase of £1,000,000 in the deposits, and likewise a large diminution in the expenses. In the case of this bank at least the net profit has diminished, though the means of making it have augmented, and though the cost of making it has declined. In the case of this bank, too, the cause of the diminution is not to be looked for, as might have been at first fancied, in the bad debt account, for it was expressly stated at the meeting that the bad debts of the past half-year have not much exceeded the average of many years past. The figures given above would seem to indicate that the City Bank was an exception to the otherwise general diminution of profits during the present half-year. But such does not appear to be the case. That bank deducted at Christmas £30,000 from its profits to meet "possible claims," and so large a sum having been deducted from the profits of the Christmas half-year, no unusual deduction has been necessary from the profits of the June half-year.

The true reason of this great diminution of the profits is the reduction in the value of money. A large London joint-stock bank has a considerable sum of money for which it pays nothing, and also a very great sum on which, when money can be lent at 8 or 9 per cent., it only pays 5 per cent. Up to 1859 the joint-stock banks used to allow for money at interest 1 per cent. below the Bank of England rate, however high that rate might be. But they found that such a rate was wholly unsuitable to a keen crisis. At such a time unusual sums of money must be kept at hand at a low profit, or at no profit, and it is, therefore, impossible to give extravagant rates for money which may be rapidly withdrawn. For money that is deposited for considerable periods of time, the joint-stock banks, as well as the bill-brokers, gave in the autumn of 1864 considerable

rates, but for money left only on the ordinary terms they did not give more than 5 per cent. Consequently they had an unusual opportunity of making profit; they could lend a large sum, for which they paid nothing or a low rate, at very high rates. And if they kept clear of bad debts they made great profits. But in the last half-year, when the rate of interest was very low, they had no such opportunity. They could not charge what they had charged last autumn, and though they paid less for much of their money, the compensation was not sufficient.

It is instructive to compare these accounts with those of this time last year, and it will probably surprise some of our readers to find that in some banks at least the profits were very much higher in June, 1864, than either in December, 1864, or June, 1865, and that the aggregate of all of them was somewhat greater. The figures are :—

PROFITS EARNED IN HALF-YEAR ENDING JUNE 30, 1864.

London and Westminster Bank	£234,032
Union Bank	154,371
Joint-Stock Bank	124,477
City Bank	48,588
Bank of London	58,291
	<hr/>
	£619,759
	<hr/>

The reason of these high profits was that the half-year ending June 30th was even more favourable to banking than the half-year which succeeded. In the spring there was a high rate of discount, and in the autumn a still higher rate; but there was a disadvantage in the autumn which there was not in the spring. There was not a panic, but there was a fear of a panic. A great many people, not without experience, expected that October and November, 1864, would have been more severe than they were, though they brought suffering enough. If the Bank of England had acted as it did in 1857, unquestionably 1864 would have been worse than 1857. With this apprehension in their minds it was not possible for bankers to use their resources as freely and boldly in the autumn as they used them in the spring; and though in many cases their deposits were more and the current rates of discount higher, yet the net result was not so good. If a banker is afraid to lend his money, it is of no use to him to have much of it, or that the nominal rates for it are high.

It is to be observed that the causes which make banking profits so fluctuating in London do not apply with the same force to many parts of the country, especially to the quieter parts. The rate of interest does not change in those districts with the same rapidity upon any securities. And the securities on which a banker lends in such places are not those which would be very acceptable in the London market at all. The London and Westminster must discount at some approximation to the Bank minimum the mass of the bills which come before

them ; but in many districts of the country no banker ever thinks of charging common bills less than 5 per cent. The tradesman for whom he discounts is not known in the London market, and the bills he brings would be taxed there a good deal more than the Bank minimum. A low rate of money in London, therefore, is not attended by equal cheapness in the country; and a high rate of money is not attended by equal dearness in the country. The country banker cannot, or thinks he cannot, run his rates up to the London minimum for first-rate bills, still less to the charge which would be made in London for the sort of paper which fills a country banker's bill-case. Both ways country banking is a trade of steadier profits; so much cannot be made of money when it is at the highest value, and more can be made of it at its lowest value.

THE PROSPECTS OF THE MONEY MARKET.

THE money market is now in a quiescent state. The weather has not been all that could be wished for the crops ; still, at present it is not so doubtful but that the end of the harvest, if the season improves, will turn out satisfactorily.

The trade of the country is sufficiently healthy to keep up a good inquiry for capital, and the late elections have absorbed some of the surplus hitherto available in the general market. Fair rates for discount are consequently sure to be supported, but it is now thought we shall not see a further advance. But the great problem to be solved is the extent to which shipments abroad may be made, either to India, Egypt, Spain, or in any other direction.

The money market is more capable than ever of affording supplies, for although we have had an enormous crop of new companies the majority have been unsuccessful, and while small deposits have been locked up, directors and others find great difficulty in obtaining calls. The failures in the East India and other branches in the early part of the year have so checked the desire to adventure in produce that for the next few months it is not probable there will be any revival. The circumstance also that France has been very free from an influx of new companies, and that her resources have not been in any degree encroached upon by large withdrawals of capital for any purpose, a fact proved by the highly prosperous situation of her bullion reserves, has tended to give confidence here and allayed the alarm usually felt at this period concerning any irregular adverse bullion movement.

The mania for companies in the United Kingdom itself is fast waning, and though it is still generally believed that the "limited liability" principle is destined to make much further progress, the late confusion produced at the Stock Exchange by the refusal of the Committee to grant settlements, has caused most parties to fight shy of speculative operations. In arriving at a determination to avoid transactions of the sort, a great blow will be given to illegitimate transactions, and the sooner will the dealers turn to a healthier course of business.

The advent of fine, seasonable weather is now alone required to increase confidence in the future. The money market is now comparatively in a satisfactory state, and it is to be expected, looking to the gradual influx of bullion, and the return of coin from the country, that there will be no necessity for any advance. If, with the current of business in its present direction, and there can be little or no positive expansion, the terms for discount still remain moderately cheap, we are likely to get through the remainder of the year without any pressing difficulty, and free from the stringency which has been predicted in certain quarters. Still, if any rise in the rate of discount were to occur, it would not occasion us any serious alarm, for everyone is now so thoroughly prepared for contingencies of the kind that the event would not produce surprise even in second and third rate quarters. On the Continent, the supply of money is abundant in most directions, the absence of political excitement creating a favourable effect.

AMERICAN VIEW OF STOCK JOBBING.

(From the New York Commercial and Financial Journal.)

Stock jobbing thrives best in times of civil commotion, when political changes, actual or contemplated, exert a powerful influence upon the prices of securities. It took its rise in England after the funding of the public debt by William III., for previous to that time monarchs were in the habit of ignoring and repudiating their obligations altogether if it suited their purpose—as of course it usually did. William I. introduced into England the practice of paying the public debt, and the charter granted by him to the Bank of England marks the earliest instance in any country of a national debt bequeathed to posterity. This was in 1694. Jobbing in the funds immediately began. 'Change Alley soon resounded with that vociferation and din that distinguishes our Broad Street to-day; and the new beginners left but few arts for us to invent in their crafty trade. Reports and rumours were as plentiful as now. Battles were won and lost, peace declared, towns

beseiged, and whole navies drowned in the course of a few hours; and history is even now confused by the unauthentic events they planned. Variations in the prices of stocks were sometimes effected by these means to the extent of two or three hundred per cent. in a single afternoon. Nor were these questionable arts alone employed. Correct intelligence, then as now, became the source of immense profit to its possessor, and post couriers and expresses were put in requisition, and employed to great advantage.

Among those who invested capital in these now familiar institutions was Sir Henry Furness, a director of the Bank of England. Throughout Holland, Flanders, France, and Germany he maintained a complete system of private news posts. Intelligence of the many battles fought at this period was received first by him; and by his enterprise the fall of Namur added largely to his profits. So superior were his means of intelligence that on one occasion William presented him with a diamond ring as a reward for important and early information. But even for this man the temptation to deceive was too great, and fabricated news and false rumours added as much to his purse, as the true. Another, the wealthy Medina, accompanied Marlborough in all his campaigns, administered to the avarice of the great captain by an annuity of £6,000 per annum, and repaid himself by the employment of expresses containing intelligence of those great battles which fire the English blood when they are named. Thus Ramilies, Oudenarde, and Blenheim imparted as much money to the purse of the wealthy Hebrew, as they did glory to the arms of England.

The innovations of modern times have changed all this: not that intelligence of important events is any less monopolized now than it was then, but only as regards the means of transmitting it. Expresses and post horses are now confined to the drudgery of carrying parcels and trunks, while the steam engine and the telegraph perform the more expeditious and important work of transporting persons and transmitting thought. But stock jobbery is just as much practised as ever.

A system of telegraphy extends all over the United States which is in divers ways made subservient to the plans and purposes of the same class of men. The intelligence which we read every day in the newspapers is collected by the numerous agents and reporters of the New York Associated News Company, who are stationed all over the country and have offices at all the telegraph stations. Sometimes this information is gratuitously offered to the company, as was the case when the frightened runaways at the first battle of Bull Run rode into Washington at the top of their speed and announced that the country was lost; sometimes it is collected by the agent of the company, as when the agent at Washington telegraphed the news of President Lincoln's assassination; and sometimes it is clipped by them from newspapers. Often the company does not obtain the latest intelligence, and the public are thus kept many hours and sometimes

days behind time in learning news which has all the while been in private hands ; but this is not often the case, and many large operators find it to their interest to employ the company to furnish them with news. This, of course, does not exclude them from obtaining extra information by any method they please.

Since the conclusion of the war, it is evident that every item of information likely to produce any commotion on the Stock Exchange must either have originated in New York, or come from Washington, or New Orleans, or Europe. The first may be considered the financial centre of the North, the second is that of the Union, the third is that of the South, and the fourth is that of the world. As the lines from Washington and New Orleans are both under strict military surveillance, it is interesting to glance at the small chance there is of telegrams coming from those points without first being made use of by some of the numerous hands through which they all are obliged to pass.

First there is the censor, then his deputy, then the operator, then the operators at intermediate points, then the receiving operator, then the messenger, then the agent of the Associated Press and his deputies, and, finally, the messengers who convey the intelligence, at last, to the offices of the various newspapers and private parties for which it is intended.

It is mere fatuity to suppose that these persons are such mere machines, such devotees to duty, so indifferent to making a fortune, so ignorant as not to perceive the ready means at their disposal, or so incorruptible as not to employ these means to their own profit whenever occasion offers. Almost a convincing instance of the existence of this kind of stock jobbery is furnished by the late "sensation" from New Orleans and Cairo, concerning Mexican complications.

The war being ended, and restrictions to personal liberty, trade, and intercourse being in course of removal as fast as the Executive can be made aware of their existence, little could happen to depress Fifties in Europe or raise the price of gold here, except an unreasonable continuance of arbitrary restraints or a foreign war. The restraint sensation having been pretty well tried and found to be insufficient, the stock jobbers determined upon a foreign war. Accordingly rumours of complications in Mexico found their way across the telegraph wire almost as soon as its continuity between this and New Orleans was established. Next came a report of 100,000 United States troops being in Texas to menace the Mexican frontier. A good deal of ingenious stuff about the Monroe Doctrine was sandwiched in between this rigmarole news, and when the affair was ripe, and the gold market in a state of vacillation, news was flashed from Cairo that 30,000 Americans had been driven out of Mexico, that there was an insurrection of the Church faction, that an army of Americans stood ready to avenge their countrymen as soon as the government gave the signal ! and the result was that gold went up three per cent. in one evening and the "job" was successful. Next day it came out that there were only 17,000 U. S. troops in Texas, of whom 6,000 were negroes ; that

there have never been over 5,000 Americans in all Mexico at any time during the past few years, that not a man of them had ever been "driven out," except for such reasons as would have "driven" them out of any other country, that no "Church faction" had rebelled, and, to crown all, that such news as reported could not have had time to come by the route reported. As a necessary consequence, gold went back to 143 1-2 again, and Broad Street quieted down.

With proofs of the complicity of the telegraph in the arts of stock jobbery it behoves operators in gold and stocks to be careful lest they allow themselves to be deceived by false or supposed news.

THE COMMERCE OF INDIA.

THE report of the Kurrachee Chamber of Commerce, presented at their annual meeting in June, furnishes some interesting points in connexion with the existing commerce of India. The primary topic is the virtual failure of the Indo-European telegraph line through the mismanagement that characterizes every part of it, and especially the "lamentable and utter inefficiency of the portion between Kurrachee and Bombay." It often takes longer for a telegram to travel between Kurrachee and Bombay than it does to come from London; mutilations and total loss of messages are of common occurrence, and it is a suspicious fact that "the graver delays took place in the month of August when intimation of the crisis in the cotton market was first received at Galle." The export duty on saltpetre is the next evil for animadversion, and the Chamber have adopted a memorial on the subject. Four years ago the Chamber expressed apprehensions of the extent to which this duty, "founded on the most fallacious principle known in political economy," would stimulate the production in France of artificial nitre, and the result has been, as regards Scinde, that the quantity has declined in that period from 101,629 cwt. to 25,436 cwt., and that those firms who had erected refineries in the province have been compelled to abandon the business. With regard to the adulteration of cotton and other produce the committee express a belief that the Act passed with a view to its suppression has proved effective, and has prevented the large exportation of inferior qualities, which used to be sent to Bombay with the object of mixing them with the better descriptions there. The instances in which cotton filled with rubbish, such as stones, pieces of brick, and caked dirt, were brought for compression to licensed presses were previously numerous, but the inspector reports that on the whole the cotton he has examined since the 1st of January, 1865, is decidedly superior both as regards cleanliness and preparation to that of last year. With respect to oil seeds the committee consider there is no reason to complain of the prevalence of adulteration. Rapeseed, as a rule, contains about seven per cent. of extraneous matter, about three or four

per cent. being barley. The great evil to be deprecated is the adulteration of wool. It formerly contained about twenty-five per cent. of rubbish, but now it contains fifty per cent. if not more. The consequence is that the trade is becoming extinct. The European firms will have nothing to do with it, and the stocks shipped by natives to Bombay find no purchasers there. It is accordingly recommended that the provisions of the Cotton Frauds Act should at once be extended to this staple.

INDIAN BANKING PRACTICE.

The annexed letter raises a question of great commercial importance as regards the rights and practices of the London banking institutions connected with India.

“32, Great St. Helen’s, Aug. 19.

“Sir,—As a question of great commercial importance has been raised by some of the Indian banks, we think you will consider it necessary to insert the following statement.

“We have accepted certain documents—bills which are held by the Asiatic Banking Corporation. According to the universally recognised custom, and in terms of the usual letters of hypothecation of all the Indian banks, we tendered as usual the amount of our acceptances to retire the draughts with the documents attached.

“To our great surprise we have been refused delivery of the documents, on the plea that the bank had a right to hold the surplus of the shipments against some claims the bank has on the drawer (who has failed) of the bills, on some transactions entered into in Bombay, and to which we are in no way whatsoever parties.

“The Central Bank of Western India has also made a similar refusal on as strange a plea—that their Bombay office has telegraphed to them not to part with the documents; as if the rights of third parties should be determined by what the different officers of the bank choose to telegraph to each other.

“The letters of hypothecation of all Indian banks provide that the banks have authority to hold and appropriate the documents only in the case of default by the drawers or acceptors. But as long as the acceptors are solvent, and able to pay their acceptances, they are entitled to retire the acceptances, and get possession of the documents attached.

“We cannot help expressing our surprise that gentlemen like the directors and managers of such banks could feel themselves justified in endeavouring to saddle upon others their own imprudent or unfortunate transactions. Be this as it may. The claim and excuse set up by these banks are so entirely subversive of all mercantile credit, confidence, and honour, and calculated to produce such serious consequences, that we feel it our duty to bring the matter to the notice of the public at once.

“We remain your obedient servants,

“DADABHAI NAOROJI & CO.”

Reports of Joint-Stock Banks.

ORIENTAL FINANCIAL CORPORATION, LIMITED.

THE ordinary general meeting of the proprietors of this company was held on the 28th July, at the London Tavern; Mr. John Brown in the chair.

The following report was read by the Secretary :—

"The directors beg to submit to the shareholders the report of the proceedings since the last general meeting, held on the 27th January, as also the accounts up to the 30th June, duly audited. In the circular issued by the directors on the 12th May, mention was made of their inability, from the want of unanimity in favour of the measure on the part of the shareholders, to carry out the suggestion as to the reduction of the nominal amount of each share. The directors have further to report that none of the proposals for amalgamation which they have had under consideration have as yet come to a successful issue. With reference to the accompanying accounts the directors have to mention that as against the item of £191,570. 9s. 8d. under the head of 'advances on securities,' the corporation holds collateral security to the nominal value of £333,585. It will be noticed that it has been deemed advisable to write off a further amount of £1,000 from the preliminary expenses, and this reduces the amount at the credit of profit and loss on the 30th June to £11,372. Unless otherwise desired by the shareholders, the directors do not intend declaring an ad interim dividend for the past half-year. As mentioned in the circular above alluded to, the directors have been enabled to place the securities of the corporation on a more satisfactory footing, but from want of capital the business done elsewhere than in India has been necessarily restricted. The transactions in Calcutta have been of a satisfactory nature; but the latest letters from our agents in Bombay bring advice of their having been obliged to carry over some of the loans they had entered into. Looking to the quoted price of the shares, and the natural anxiety expressed by many shareholders on that account, the directors regret that the suggestion made by them in their circular dated 12th of May last, that the shareholders should satisfy themselves respecting the actual worth of the shares by reference to the official records, should have been acted upon by very few of their number. Since, however, shareholders residing at a distance may have been prevented from availing themselves of the opportunity thus offered to them, the directors would now state that if the shareholders should think it expedient to appoint a committee from their own body to inquire into the affairs of the corporation in every particular, such a course would probably be satisfactory to all concerned."

Dr. Balance-sheet, 30th June, 1865.

Capital, 10,000 shares of £50 each—£500,000, viz. : 8,875 shares on which £10 has been called up, £88,750; less calls not yet paid, £1,225—£87,525; 1,125 shares forfeited, on which have been paid, £4,465	£91,990 0 0

Since the above report was printed the directors have been placed in a position to lay before and recommend to their members an amalgamation with another corporation.

Notice is therefore hereby given, that an extraordinary meeting of the members will be held at the London Tavern, on Friday, August 4, for the following business:—

1. To consider the proposed offer of amalgamation, and, if sanctioned.
2. To pass the necessary resolutions for that purpose.

The Chairman, in moving the adoption of the report, said that as against the item £191,570, which they had advanced on securities, they held collateral security to the nominal value of £333,585; but in addition that they had a lien upon the beneficial interest of a contract for a line of railway valued at £125,000, which was applicable to about £60,000 of the £191,000, in addition to the special securities held as against the amount due. Of course, what the present value of those securities was the directors could not say, or what they might ultimately realise. The liabilities were stated in the accounts at £185,000, which was less than was shown in the previous accounts. The board recommended that no *ad interim* dividend for the past half-year should be declared, considering that the directors, seeing that many of their transactions were still pending, and that it was at present impossible to say how they might ultimately turn out. He might add that after the directors had come to this decision the shareholders had appended to their report a recommendation on the same ground that the "balance of profits shown in the accounts should be carried over and dealt with." The last two paragraphs in the directors' report speak of

themselves, but as to the notice which now appeared by way of rider to the report, announcing the prospect of an amalgamation, or rather, as far as this corporation was concerned, absorption, he deprecated discussion as at present premature, but alluded to it for the purpose of affording information. The proposal was that the London and Mediterranean Bank should take over the corporation in its entirety, assets and liabilities, and for each share of £50 nominally and £10 paid in the corporation, the shareholders were to receive a share in the London and Mediterranean Bank nominally of £20, with a minimum of £5 credited upon it, and as the assets of the corporation were realised any addition would be added beyond the £5. Such was the pith of the proposal. It was further proposed that in the event of the amalgamation being carried out, three of the Oriental Financial directors should join the board of the London and Mediterranean Bank, so that the realisation of the assets would be under the supervision of directors thoroughly cognisant of the affairs of the corporation. In conclusion, he moved the adoption of the report.

Mr. Lysley (director) seconded the motion.

A Shareholder—How much is paid upon the shares of the London and Mediterranean Bank?

The Chairman—They have three sets of shares; upon one £5 each has been paid, upon another £3, and upon the third £2. 10s.

The Shareholder—Then, as I understand, for our £10 paid we are to receive £5 each share, which would represent our shares as being at £5 discount?

The Chairman—No, because as our assets are realised we shall have credited the realisation in addition to the £5.

The Shareholder—Shall we be liable for any calls upon the London and Mediterranean shares?

The Chairman—Of course, if you are shareholders in the company you are liable for calls with the other shareholders, but I am not aware of any intention to make a call.

Another Shareholder—At what price do the London and Mediterranean Bank shares now stand in the market?

The Chairman—3½ premium.

The resolution adopting the report was then put and carried unanimously.

Mr. Stewart, acting upon the suggestions made in the report, moved the appointment of a committee of shareholders to co-operate with the directors in carrying out the proposed amalgamation, or upon the negotiations for that purpose failing, to advise with them upon the realisation of the assets and the winding-up of the concern. It was clear they had been doing no business during the last half-year, and were in fact £1,599 worse than the previous accounts showed; and seeing the unfortunate state of affairs, the changes which had taken place in the direction, two of the directors having become bankrupt and therefore obliged to leave the board, and looking at the position of the corporation in the market, it was, he submitted, quite absurd to continue business a day longer, unless they could amalgamate with some other company. He had no doubt the absorption of so respectable a body of shareholders would be a great benefit to the London and Mediterranean Bank, and that the amalgamation would be advantageous for all parties.

Colonel Jamieson seconded the motion.

Major Ross spoke of the low price of the shares in the market, and generally to the unfavourable position of the company, which was ascribed in a great measure to the directors not being financial men. He believed

the result of the appointment of the committee must necessarily be the winding-up of the company. He was averse to going on any further, either by themselves or under an amalgamation with some other company, unless the directors could assure them of success.

Mr. M'Ewen suggested that they should postpone all discussion upon the amalgamation until the 4th of August, when they were to be called together specially to consider that subject, but he recommended the shareholders in the meantime to make inquiries for themselves as to the position of the London and Mediterranean Bank. He thought there could be no objection to appointing a committee to confer with the directors.

Mr. Lysley thought it a pity they had not had a committee of shareholders to co-operate with the directors and examine into the whole of the company's affairs before. The directors had never had the slightest intention of bolstering up the concern in any way, but had explained everything, and had all along invited the shareholders to come and judge for themselves. The low price of the shares was easily to be accounted for. The company was started in the days of high premiums, but soon afterwards money went up and shares went down. Then many shareholders could not pay their calls, and instead of forfeiting those shares immediately, as the directors ought, he now thought, to have done, they were allowed to hang about upon the market. Then, again, there were two members of the board who failed during the severe mercantile pressure. In case of these gentlemen the board thought they had a most valuable director, and so, as a man of business, and at the time of high standing and solvency, he was. The firm of that director held 1,000 shares, which, upon the bankruptcy occurring, were also thrown upon the market, and of course influenced it prejudicially to a still further extent. Indeed, he doubted whether the company had yet recovered, or could ever recover the prejudicial effect of having so many of its shares forced upon the market at one time. He defended the directors from the charge of being deficient in financial ability, and attributed the remarks of Major Ross on that point to disappointment in not being appointed a director himself. He believed that good would result from the appointment of the committee, and that they would report that the directors had carried on the business of the company as efficiently and as well as was possible under the circumstances. The fact was they had proceeded at first on a wrong basis by entering into large transactions with too small a capital, and had not made sufficient calls. He did not think they would lose any money by the outstanding transactions, and he hoped that, when the assets were realised, the £5 credited to them on the London and Mediterranean shares would be increased to £10 or more. He thought it would be better to omit that part of the resolution which contemplated the possible winding-up of the company.

A long conversation ensued, in the course of which several shareholders recommended that the motion for the appointment of the committee should be postponed until the meeting of the 4th of August, when they would know whether the negotiations for amalgamating with the London and Mediterranean Bank had been successful or not, while others desired the committee to be named at once.

Mr. Lysley suggested that the committee should be appointed, but should only be called in to act if the amalgamation fell through, and then that they should advise with the directors as to the best means of carrying on the business, or of concluding it.

Ultimately, Mr. Stewart withdrew his motion, it being understood that

it would be brought forward again should the proposal for the amalgamation fail.

Twenty-five guineas were awarded to the auditors for their services, and a vote of thanks to the chairman, the directors, and the secretary concluded the proceedings.

The meeting above referred to was held on the 4th of August, at the London Tavern, but it did not eventuate in any amalgamation being agreed to.

MIDLAND BANKING COMPANY.

On the 28th July the ordinary general meeting of shareholders was held at the London Tavern; Mr. T. S. Richardson in the chair.

The following report was taken as read:—

"The directors have the pleasure to submit to the shareholders the following statement of accounts and balance-sheet, for the half-year ending the 30th June, 1865, which has been duly examined and certified by the auditors. It will be seen that the gross profits for the half-year, including £755. 18s. 9d. brought forward from last account, have been £22,716. 13s. 11d. after making provision for bad and doubtful debts; and that, after deducting all current expenses, agency charges, interest paid to customers, &c., and allowing for rebate of interest on bills discounted and not due, there remains for disposal a balance of £7,095. 10s. 2d. The directors recommend that out of this sum £380. 4s. 10d., being at the rate of 10 per cent. per annum, should be written off preliminary expenses; that £3,608. 17s. 8d. should be appropriated to the payment of a dividend at the rate of 5 per cent. per annum, free of income tax, upon the paid-up capital of the Company; that £1,000 should be added to the reserve fund; and that the balance, £2,106. 7s. 8d., should be carried forward to profit and loss "New Account." The directors, in pursuance of the policy which has hitherto guided them, are of opinion that, having regard to the permanent interests of the bank, it is not desirable to increase the dividend on the present occasion. The directors are happy to report that the expectations formed with regard to the branches at Leeds, Huddersfield, and Sheffield, purchased of the London and Northern Bank, have been justified by the result of the last six months' operations, notwithstanding the comparative inactivity of trade in those places. In February last a daily branch was opened at Tunstall, where a valuable business is being rapidly formed; and in June last the directors were able, without any expense or being called upon to take over any objectionable account or liability, to acquire the business established at Longton by the London, Birmingham, and South Staffordshire Bank, which is of a lucrative and very satisfactory character. The directors are sanguine that these two branches in the Potteries will contribute largely to the general profits of the Company."

					<u>£22,716 13 11</u>

The Chairman, in moving the adoption of the report, said he had nothing to do but to congratulate the shareholders on the success of the Midland Banking Company. The bank was going on steadily increasing in prosperity. Comparing the half-year just past with the corresponding half-year of last year, there was an improvement in every figure, and the profits were larger. The current expenditure was greater this half-year, but then they had three branches now which belonged to the London and Northern—viz., in Leeds, Huddersfield, and Sheffield—which they had possessed only a month when the last meeting was held, and though the expenses were larger, the profits were commensurably greater. They

carried £1,000 to the reserve fund and over £2,000 to the profit and loss new account. If they had not carried forward this latter sum they might have divided 7½ per cent. The board, however, thought it better to strengthen the position of the bank by keeping a good amount to the credit of profit and loss than to divide the profit to the last penny. (Hear, hear.) By going on as they did they would make the Midland Banking Company one of the best, if not the very best, of the new banks. (Hear, hear.)

Mr. Woodd, M.P., seconded the motion, and expressed his satisfaction, on account of the old shareholders of the London and Northern Bank, that the affairs of the Company were in such a prosperous condition. (Hear, hear.) They had a good and increasing business before them, and it was pleasing to him to find that not the least of that good business was derived from the Yorkshire branches.

In reply to questions by shareholders,

The Chairman said that the large amount of £2,000 had been carried forward to the new account because, as he had already explained, it was thought more advisable for a young bank to have a secure and strong position than to make a large dividend in the beginning. (Hear, hear.) When they were in a perfectly sure position they could make a larger dividend, and investors would have the advantage of the amount reserved next year. With regard to the audit of the branch banks they could not send auditors to every branch, but an inspector was sent who investigated the accounts, and made careful reports which were submitted to the auditors. If they were not found satisfactory the auditors would not sign the report.

Mr. Martelli, one of the auditors, said that if an auditor was sent to the branches to audit the accounts, it would be very expensive, and not so satisfactory as the present system.

The motion was then adopted.

A dividend of 5 per cent., free of income tax, payable on the 1st of August, was then declared.

Mr. Strickland, of Leeds, moved the thanks of the meeting and a remuneration of £15. 15s. to each of the auditors, and expressed his entire satisfaction with the report and the dividend, and the mode in which the company was managed.

The motion, having been seconded, was adopted.

The Chairman moved a vote of thanks to Mr. Tomson, the general manager, and the other officers of the company, for their good and careful management of the concern.

Mr. Knight, a director, seconded the motion.

Mr. Tomson, in acknowledging the compliment, said that the kind manner in which the chairman spoke of him was but part and parcel of the kindness which he had experienced since the formation of the bank. (Hear.) He could not but congratulate the shareholders on the appointment of the inspector, who was a good and efficient man in every respect, and with whom he worked most harmoniously. He was sure that no efforts would be spared on their part or on that of the officers of the branch banks to promote the success of the establishment. (Hear, hear.)

A vote of thanks to the chairman concluded the proceedings.

BANK OF EGYPT.

An extraordinary general meeting of the proprietors of this bank was held on the 28th July, at the London Tavern; Mr. Tite, M.P., in the chair.

The Secretary (Mr. Cheshire) having read the notice convening the meeting, and the minutes of the last meeting, the following report was taken as read:—

"The directors have the pleasure to lay before the shareholders the annexed statement of accounts for the half-year which ended on the 30th June last, by which it will be seen that the net profits, including a balance of £4,819. 6s. 5d. brought forward from the previous half-year, amount to £16,966. 18s. 3d. This enables the directors to recommend a dividend for the half-year, as on the last occasion, at the rate of 10 per cent. per annum (£12,500), free of income tax, leaving £4,466. 18s. 3d. to be carried forward to the next account."

Balances-sheet, June 30, 1865.

							<hr/> £16,966 18 3 <hr/>

The Chairman, in moving the adoption of the report, observed that although things in Egypt had at different times assumed a very formidable shape, and many difficulties had arisen, the bank had, owing to the pru-

dence of the management at Alexandria, escaped any heavy loss similar to that which had befallen other banking companies. They were able to present to the shareholders a balance-sheet showing gross profits to the amount of £19,000. Their expenses had slightly increased, owing to some increase in salaries, which brought the total expenses up to £7,000. The net profit, after making allowance for every possible loss, was £12,147, which was nearly £600 more than the profit of the corresponding half-year in 1864. They had reason to believe that their business was very carefully managed in Egypt, and one particular description of brokerage business had been very successfully carried on. The meeting were aware that the state of things in Alexandria had, during the last half-year, been full of difficulties. Owing to speculations in cotton, a commercial crisis had ensued which had struck down some of the largest commercial houses; and he had been informed that in Alexandria itself the loss had been £2,000,000. Whether that were the fact or not he could not tell; all he could say was, that this bank had escaped. (Cheers.) Another circumstance which had almost totally paralyzed business in Egypt during the last six months was the cholera, which had raged with such frightful violence that the total number of deaths in Egypt up to 17th July had been 19,256; and of that number 4,000 persons had died in Alexandria, 5,000 in Cairo, 2,000 in Damietta, and 2,000 in Rosetta. He was happy to say that the scourge was now abating. During the past winter the management in Egypt, on which so much depended, was greatly assisted by the presence of Mr. Thurburn, one of the board, who was well acquainted with the trade and resources of the country, and who was present at Alexandria at the height of the crisis. Happily, by his assistance, combined with great prudence on the part of the management, the evils which had overtaken other commercial institutions had been averted, and they had emerged from the crisis comparatively scatheless. He concluded by moving the adoption of the report and accounts.

The Deputy-Chairman (Mr. Robertson, M.P.) seconded the motion.

Mr. Surtees called attention to the great diminution in the amount of gross profits this half-year as compared with that of the last, from which he inferred that the bank had made some losses.

The Chairman explained that the business was better in Egypt at some periods of the year than at others. Banking had not been so successful during the time of the cholera and commercial crisis as it was at other times.

The motion was carried unanimously, and a dividend of £10 per cent. per annum declared.

A Shareholder enquired whether there was a probability of a bonus next half-year.

The Chairman said he did not like to predicate anything in that respect, though he thought it extremely probable; at the same time the proprietors would bear in mind that the trade of Egypt had been much interfered with by the excessive mortality. They had honestly earned the dividend of 10 per cent. which was now declared, and the shareholders might depend upon it the directors would be most happy to meet them with a bonus, if circumstances warranted them giving one. (Hear, hear.)

Mr. Surtees inquired whether the bank suffered from competition with other banks.

The Chairman said that there was no reason to believe it did. Their banking business proper went on very steadily.

In reply to other questions,

The Chairman said that the bank had realised on the Ottoman loan, at

a profit, and invested the money in other securities. It was not necessary to state the details here, but the board of management were always ready to impart information on particular points to individual proprietors on their calling at the office.

Mr. Thurburn confirmed the statement of the chairman as to the generally prosperous condition of the bank, and as to its having, through the great prudence of the local management at Alexandria, escaped any important loss in the commercial crisis. It could not be said that they come quite clearly off, but he had no hesitation in saying that their losses in Egypt were far below the losses of any similar establishment. Their future prospects were very good, although, in consequence of the paralyzed state of trade owing to cholera and other causes, it was not probable that the expenses of the current half-year would very greatly exceed those of the present.

This being the whole of the business, a vote of thanks, proposed by Mr. Tidmarsh, was unanimously accorded to the chairman and directors, for their very valuable services during the past half-year.

LONDON AND SOUTH WESTERN BANK, LIMITED.

THE fourth half-yearly meeting of this bank was held at the London Tavern, on the 31st July; Mr. J. F. Vesey Fitzgerald in the chair.

The following report was read:—

"The directors have the pleasure to submit to the proprietors the balance-sheet for the half-year ending 30th June last. Notwithstanding the low rates of interest which have prevailed during the past half-year, and the consequent decrease of profits, it will be seen from the balance-sheet that after making provision for bad and doubtful debts, the gross profits for the half-year, including the sum of £1,660. 13s. 4d. brought forward from last account, amount to £19,517. 12s. 3d., and that after deducting interest paid to customers and all charges for expenses, there remains an available balance of £5,805. 9s. 1d. The directors recommend that £4,636. 13s. 4d. be appropriated to the payment of a dividend at the rate of 6 per cent per annum, free of income tax, that £856. 11s. 7d. be set aside on account of rebate of bills not due, and that the balance of £312. 5s. 2d. be carried to profit and loss new account. The directors have to report a large and steady increase of business, and avail themselves of this opportunity to remind the shareholders that by exerting their influence in extending the operations of the bank and introducing customers, they will largely contribute to its prosperity. The dividend will be payable at the head office, or at any of the branches, on and after Tuesday, 8th August."

The Chairman, in moving the adoption of the report, said that it contained so clear a statement of the position of the company that he need not then enter into any lengthened explanations; and he was glad to be able to add that the few remarks he should be able to make would, he had reason to believe, be of a perfectly satisfactory character. The directors felt persuaded that the business of the bank was at present placed on so sound a footing that their ultimate success was certain, and that the only question was, how rapidly that success should be developed. For his part he did not greatly approve of very rapid progress, and he should much rather see one of a steady, certain, and unremitting description. He need not call the attention of the shareholders to the great fall which had taken place in the value of money since the period of their last meeting. They were all aware that it was then about 9 per cent. and that it was at present about 3½ per cent. He had no doubt that their attention had been directed to a very valuable article published in the *Economist*, which showed that all our great banking establishments, although their prospects were in some respects better than before, inasmuch as their resources were greater, had realised smaller profits during the last half-year than during the preceding half-year, or the half-year previous to that again. Under these circumstances the shareholders, he was sure, would be gratified to find that the directors were able to offer them the same dividend they had received upon the last occasion. (Hear, hear.) That result, it should be remembered, was attained not only under the prevalence of a lower rate of interest, but under an increase in the amount of the company's capital, and it must, therefore, be held to be specially satisfactory. (Hear, hear.) At the period of their last meeting the paid-up capital of the bank was £135,515; at present it was £176,795. Their deposits then amounted to £368,501; at present they were about £500,000; or, in other words, they

were greater by more than 50 per cent. They had at present 2,500 accounts, and since the last meeting the accounts had improved even more in quality than in number. (Hear, hear.) He had next to call the attention of the meeting to some changes which had taken place in the constitution of the board of directors. They had lost the valuable services of Mr. Johns; but the shareholders would be glad to know that they continued to possess his good wishes and his confidence, and that his retirement was in no way connected with any question affecting the position of the bank. There had, at the same time, been added to the board Mr. Zuccani and Mr. Schoombs. Those additions, it was confidently anticipated by the other directors, would prove of great advantage to the company; and they believed that if that meeting had been held a few days later they would have been able to announce the accession of names of even a still more important character, if that were possible. They had been so overwhelmed with country business at the head office in Regent Street that they had thought it advisable to take an office in the City; and they also believed that with such a change they would be enabled to obtain the addition to the board of some first-rate City names. That brought him to the suggestion thrown out at their last meeting by Mr Jones, of Wandsworth, that they should as early as possible undertake a regular City business. The directors were quite as anxious as any of the shareholders could be to enter upon such a course, but they did not think the time for it had quite arrived. They did not consider that it would be advisable they should make that important change while their resources were comparatively so limited, and so much employed in the country and in the suburbs of London; but they could assure the shareholders that whenever they might go in in that way they would go in in earnest, and with a determination to win. (Hear, hear.) Some of them would, no doubt, be surprised not to see their manager, Mr. Addison, among them that day, and it unfortunately happened that he was prevented by serious illness from attending; but he was with them in spirit, and they must all feel anxious that he should resume his valuable services at the earliest moment his health would permit. (Hear, hear.) He (the chairman) had only further to state that he should be ready to answer to the best of his power any questions that might be addressed to him; and, in conclusion, he begged leave to move the adoption of the report. (Hear, hear.)

Lord G. Paulet seconded the motion.

The motion was at once unanimously adopted.

Votes of thanks were then passed to the auditors, to the manager, and the branch managers, and other officers of the company, and to the board of directors.

The ordinary general meeting was then brought to a close, and the assembled shareholders resolved themselves into a special meeting for the purpose of considering the expediency of altering certain clauses in the company's articles of association.

The Chairman said the first resolution he had to submit to the special meeting was that, in the 44th clause of the articles of association, the words "February" and "August" should be substituted for the words "January" and "July." The object of the proposed change was to enable the directors to hold the half-yearly meetings of the company a few days later than they had hitherto done; and that delay itself became desirable in consequence of the remoteness of some of their branch banks.

The motion having been seconded, was at once unanimously adopted.

The Chairman next proposed, in substitution for clause 79 of the articles of association, a clause to the effect that there should be paid to

the directors by way of remuneration for their services the sum of £2,000 per annum, and that such remuneration might from time to time be increased by the shareholders at any general meeting. By the clause as it had hitherto stood the remuneration of the directors was to be increased with the rate of dividend that might be declared; but some of the shareholders had expressed their belief at the last meeting that that was not a desirable arrangement; and it was on that account that the present change was proposed.

The motion having been seconded,

A Shareholder asked what was at present the number of the board of directors.

The Chairman said that there were nine of them, and that they were empowered to raise the number to eighteen.

The motion was then unanimously adopted, and the business of the day was brought to a conclusion.

GENERAL CREDIT COMPANY, LIMITED.

THE ninth ordinary general meeting of shareholders in the General Credit Company, Limited, was held on the 1st August at the chief offices of the company, 157, Goswell-street; Mr. E. J. Thompson occupied the chair.

The secretary having read the notice convening the meeting, the minutes of the last ordinary meeting were read and confirmed.

The report, which was read by the secretary, stated that the share capital was wholly subscribed, and all calls had been duly paid. The deposit and drawing accounts were daily increasing, both in number and importance. The advance department fully kept pace with the growth of the resources of the company. The discount transactions had been largely augmented, and were proportionately profitable. The whole of the losses, which hitherto had been small in amount, had been charged to the year's account. Since the last meeting a valuable lease had been acquired of very convenient premises in Cheapside, at which branch offices had been opened. The total profits had been such as warranted the directors in recommending a dividend at the rate of 8 per cent. per annum, free of income tax; that the reserve fund be increased to £2,000; and that £100 be written off the new offices account.

The Chairman, in a speech of considerable length, moved the adoption of the report, congratulating the shareholders upon the success of the company's operations during the past year. He also referred to the steady progress of the company from its establishment up to the present time, and urged that the past results were the best guarantee of future achievements. With the dividend that day declared the original shareholders would, during the nine years of the company's existence, have received back £62 for every £100 subscribed, and still the share capital remained intact. They held good and sufficient security to cover all advances made.

Mr. Moore seconded the motion.

Mr. Arnett suggested that in future the report and balance-sheet should be printed and circulated amongst the shareholders a few days prior to the meeting.

The Chairman having explained that the suggestion of Mr. Arnett could not be carried out without altering the memorandum of association, the report was adopted, and the dividend at the rate of 8 per cent. per annum declared.

The retiring directors having been re-elected, Mr. Helford proposed that the remuneration of the directors be £500 for the past and all future years.

Mr. Percy seconded the resolution.

Mr. Sherray objected. He thought the remuneration rather too high. He would not, however, offer any amendment.

The resolution was carried.

The retiring auditors were then re-elected, and a vote of thanks to the secretary and other officers having been accorded, the customary compliment to the chairman concluded the business of the meeting.

LONDON AND COUNTY BANK.

THE ordinary half-yearly-meeting of the shareholders of this bank was held at the London Tavern, on the 3rd August; Mr. W. Champion Jones occupying the chair. The meeting was a very crowded one.

The report of the directors, which was taken as read, was as follows:—

"The directors have the pleasure to submit to the proprietors the balance-sheet of the bank for the half-year ending 30th June last. They have also to report that, after payment of all charges, interest to customers, and making ample provision for bad and doubtful debts, the net profits amount to £106,821. 3s. 1d., which, added to £18,629. 12s. 3d. brought forward from the last account, makes a total of £125,450. 15s. 4d. for appropriation. The directors have accordingly declared the usual dividend of 6 per cent., with a bonus of 9 per cent., making together 15 per cent. for the half-year, which will amount to £111,790. 8s. 4d., and leave £13,660. 7s. to be carried forward to profit and loss new account. They regret to announce the decease of their esteemed colleague Mr. Edward Higgins, and have to report that Mr. Edward John Hutchins has been elected a director in his stead. The dividend and bonus (together £3 per share), free of income tax, will be payable at the head office, or at any of the branches, on and after Monday, the 14th August."

The Chairman—Gentlemen, it is again my privilege to lay before you the progress of our institution, by drawing your attention to, and asking you to adopt, the report of your directors for the half-year ended on the 30th June last. Whether that report is or is not satisfactory, it is for the meeting to decide. Since we last assembled here much has happened in the commercial world to give commercial affairs a very anxious aspect. Many mercantile firms of great repute and of great wealth have had to call their creditors together in this metropolis, and also in the principal towns in the country. At the same time, events in the money market of India have contributed to the general distrust; but still we believe that all this is consistent with the average condition of the internal trade of the country. (Hear, hear.) The directors will not withhold from you the assurance which they feel due not only to the proprietary, but to the general manager and the leading officers of the bank, that our participation in all that has happened around us has been almost enviable. (Cheers.) Being essentially a country, and only partially a metropolitan bank, it is not to be wondered at, nor, indeed, is it presumptuous in me to state, that we have shared only in a minimum degree losses which have occurred. The general aspect of affairs at Christmas last determined us to take more than the ordinary precautions, and the best proof of this is the dividend we have declared, which we hope will be entirely satisfactory. (Cheers.) We have placed to profit and loss everything that seemed to be necessary; and both in December and June we laid by a small sum from profits for the purpose of meeting any then undetermined or contingent loss. We are always desirous, when circumstances will allow, to avoid any fluctuation in our

dividends. We are aware that great variations in the half-year's receipts are inconvenient, not only to the shareholders, but to the establishment itself, and we shall rejoice when we are able by the state of the accounts to avoid them. You will see by the figures placed before you to-day that the business is largely, substantially, and rapidly increasing. (Cheers.) Our cash balances from the public have augmented during the last six months to £1,100,000—a circumstance wholly without precedent in the concerns of a bank. (Cheers.) And I would give you this further assurance, that the directors see no cause whatever, either from increased competition or any other circumstance, to arrest the progress of the bank. (Cheers.) It should be borne in mind, referring to the question of dividends, that the average rate of discount at the Bank of England in 1864 was $7\frac{1}{2}$ per cent., and, as that is an unprecedented rate, it is not probable that a similar opportunity of making such dividends will speedily return. But of this the shareholders may be assured, that we will adhere to the Bank of England rates as closely as we can. Adverting to other matters, I may mention that we have in Ireland one estate still unsold, which we hope some day or other will produce £7,000 or £8,000, which will go to the credit of the account to which the sum belongs. The business of perfecting the title, especially as it involves the case of minors, is more tedious than was expected, but we trust the title will be perfected in a short time, and before we place the estate in the market, which we hope to be able to do before the close of the year. I may also mention a circumstance which occurred, rather peculiar perhaps, the day after the last meeting—namely, that Mr. Ayre gave notice that he intended to appeal to the House of Lords against the decision in our favour given by Lord Westbury as Lord Chancellor. But the whole thing has terminated there, and we have heard nothing further on the subject. We have opened new branches only in two instances—one at Bromley, Kent, on the 12th June, and the other at Blackheath, on the 24th of last month; but these are only sub-branches, and very inexpensive. The total number of our branches is now 145, and I have great satisfaction in saying that the directors are thoroughly satisfied that it is much better for us not to go into any new localities except under the influence of very extraordinary inducements. (Cheers.) We are thoroughly satisfied that the diligent prosecution and extension of the business of our existing branches is the wisest policy. (Hear.) I will now, if you please, refer to the balance-sheet. The total amount of cash balances from the public is £10,904,272, being an increase in the six months of £1,124,518. (Cheers.) The liabilities on acceptances are augmented by £556,835. I may say that two of the leading banks in India, for which we are the London correspondents, have a capital equal, and in one instance superior, to our own. Here I may remark upon a statement which has appeared to the effect that the London and Westminster Bank was the first to introduce the practice of separating the acceptances from the cash balances. We can all, I am sure, bear witness that this practice was first introduced by the board of the London and County Bank. (Hear, hear.) There has been a decrease in the half-year upon the profit and loss account of £3,097. The gross profits for the half-year amount to £284,861, showing a decrease since the last half-year of £67,194. Passing to the credit side of the account, I find, as regards the two items, "cash in hand" and "cash placed at call," that there is an increase upon those two sums, taken together, of £176,228. (Hear, hear.) With respect to investments in Government, guaranteed, and other stock, there is an increase of £157,803. Discounted bills and advances to customers in town and country amounted upon this occasion to £11,163,912. (Cheers.) The increase in

this important branch of our daily operations is continual and steady, and the addition in the last six months is £1,330,865, which I doubt not is fully up to the average. (Hear, hear.) Under the head of "freehold and leasehold premises, &c.," there is an increase of £1,127, which arises almost wholly from fittings in the branches recently opened. In the interest paid to customers there is a reduction this half-year of £20,813, which is entirely owing to the lower rates of interest which have prevailed. With respect to the salaries and other expenses at the head office and branches, there has been during the last six months an increase of £7,114, but more than £6,000 of that of various additions which have been made during that period to the well-earned salaries of all your officers. (Cheers.) The profit and loss account, as usual, of items the principal part of which I have already gone through, including the dividend and bonus which have been declared by the directors—namely, at the rate of 30 per cent. per annum. (Cheers.) After making allowance for all these sums we carry forward £13,601 to the next account. The proprietors have already been informed of the loss of our esteemed colleague Mr. Edward Huggins. He was greatly respected among us; and I may mention that he brought many accounts to the bank, either himself personally, or through his connection. We have had the satisfaction of filling up his place at the board by the election of Mr. Edward John Hutchins, who is chairman of the Rhymney Iron Company, and a director of the London and South-Western Railway. He has been known for years to some of your directors, and, knowing his business and other qualifications, we place his nomination before you with peculiar satisfaction. (Cheers.) There is one part of our affairs which is always of particular interest, because it affords a test of the progress of the bank—I mean the number of accounts. (Hear, hear.) The total number of accounts kept with the bank in town and country on the 30th June is 44,616; there having been an addition during the six months of 2,844 new accounts. (Cheers.) The position of the directors is becoming more responsible and laborious with the rapidly increasing business, and they entertain a very confident hope that the profits which are likely to arise in the future career of the London and County Bank will be such as will compare as favourably as they now do with those of the first establishments of the same character either in this metropolis or elsewhere. (Cheers.) Before I sit down there is one other gratifying circumstance I would wish to mention. You all recollect and had great respect for our friend Mr. Cory, who died about a year and a half ago, and his daughter, who died within the last week or two, has left £500 to the provident fund of this establishment. That is an instance of gratitude to the bank, which, I think, deserves to be remembered, and ought to be duly appreciated. (Cheers.) The chairman, having expressed his readiness to answer any questions, moved the adoption of the report.

Mr. Bligh seconded the resolution for the adoption of the report and the balance-sheet, and no one having risen to address the meeting,

The Chairman, after a short pause, put the motion to a show of hands, when it was carried amidst cries of "all, all," and general cheers.

Mr. Peede, as a shareholder, said he felt the time had come when he could propose a resolution which he had had under consideration for some time past. Taking the year 1854 as a starting point, he found that the bank had now doubled the capital it had then, that it had 145 branches instead of 77, that its profits had risen from £41,775 to £166,995, that the dividends had been trebled, or raised from £10 to £30 per cent. per annum, and that the shares had been largely augmented in value. He thought, under these circumstances, the time had come to vote an increased

remuneration to the directors, and without another word, he would move that £2,000 additional be paid to the board for their services, such payment to date from the 1st of January last.

Mr. Potter seconded the resolution, which was immediately put and carried unanimously, amidst loud applause.

The Chairman, on behalf of himself and colleagues, thanked the meeting for that proof of confidence which, indeed, he thought would not be withheld because the directors were not likely to be the last to participate in the prosperity of the bank, seeing the labours they had to undergo in connexion with its increased and increasing business. (Cheers).

A cordial vote of thanks to the chairman terminated the business.

CONTINENTAL BANK CORPORATION, LIMITED.

An extraordinary general meeting of the shareholders in this company was held at the London Tavern, on the 7th August, in order to consider the propriety of winding-up the company voluntarily; Mr. William Walter Cargill in the chair.

The Chairman said the meeting was convened for the purpose of placing the bank in liquidation, under the provisions of the Act of Parliament. It had been held sooner, perhaps, than it otherwise would have been in consequence of the requirements of the Stock Exchange, who could not fix a time for a settlement in the shares of the London and Mediterranean Bank with which it was proposed to amalgamate, until the determination to be now come to was formally known. The whole of the shareholders had already been made acquainted with the terms of the arrangement by which the London and Mediterranean Bank took up the business of the Continental Bank Corporation, and nine-tenths of their number had given their assent to the proposed winding-up of the latter; but still, as a matter of form, it was necessary that he should move the following resolution, viz.:—"That the Continental Bank Corporation, Limited, be wound up voluntarily."

Mr. W. J. Maxwell seconded the motion, which was then put and unanimously agreed to.

The Chairman said it would be necessary to hold another meeting to confirm the resolution passed that day, and that meeting they intended to call for the 25th August, when the directors expected to be able to lay before the shareholders the accounts of the company made up to the time of the amalgamation with the London and Mediterranean. At their last meeting the directors had to report a loss to the amount of £13,000 odd. By the arrangement, however, with the new company that sum would be provided for in the sale of the goodwill of the business of this company, and if, upon realising the estate, there were any balance of profit, the directors would be glad to give it to the shareholders in the shape of a dividend.

The proceedings then terminated.

EUROPEAN BANK, LIMITED.

The half-yearly meeting of the shareholders in this bank was held at the London Tavern on the 7th August; Mr. Charles Bye Colchester in the chair.

The report, which was read, said :—

"The directors have the pleasure to submit to the proprietors their third half-yearly report, ended 30th June last, which cannot fail to be considered otherwise than satisfactory. It will be perceived from the balance-sheet that the gross profits realised, including the sum of £2,271. 16s. 2d. brought forward from last account, amount to £50,446. 6s. 8d.; and that, after defraying expenses of management, directors' remuneration, rebate on bills, and making a full allowance for bad and doubtful debts, a net profit remains of £29,685. 6s. 9d. The directors recommend that £16,380. 15s. 9d. be applied for the payment of an interim dividend, being at the rate of 5 per cent. per annum, free of income-tax, that £3,200 be written off premises, purchase, and preliminary expense accounts, and that the balance, £10,104. 11s. be carried to profit and loss new account, to be dealt with at the close of the financial year, when the premium accruing from the transfer of the business of the late London, Birmingham, and South Staffordshire Bank will also be available. The directors continue to pursue the policy of seeking a sound business, and look with much satisfaction to the steady progress made during the past six months. It is very gratifying to the directors to find themselves in a position to report favourably as regards the branches, all of which have produced profitable results. The directors have to acknowledge many valuable accounts introduced to the bank by shareholders, in answer to an appeal made by the manager at the last meeting, and hope for a continuance of their support."

The Chairman said that it afforded him much pleasure to propose that the report and statement of accounts which had been circulated among the proprietors should be received and adopted. He could not but feel that the report would be equally satisfactory to them as to the directors, more particularly when they bore in mind the period of time which had elapsed since their last meeting. As they were aware, it had been a six months of very great commercial depression, and much heavy losses had been sustained by both banking and financial establishments. Notwithstanding these commercial calamities, he was glad to say that the European Bank had escaped without any great loss. Indeed, their loss had been altogether of such a trivial description that it was hardly worth notice. This must, he thought, be very gratifying to all connected with the bank, as it showed that the business must have been conducted with great caution and care. There was one item in the statement of accounts which might appear rather large. He alluded to the liabilities and acceptances, which amounted to £384,271. But when he told them that more than one-half of that amount was made of drafts drawn by their branches abroad on the head office, at from three days to one month, they would at once see that there was no risk from that source; on the contrary, it was one of the largest sources of profit. It afforded not alone a large revenue to the bank, but also showed that the credit of the bank abroad was increasing. During the past half-year their branches had all worked satisfactorily, and changes were making in the Paris branch which there was good reason to believe would yield good results. These changes were working most satisfactorily. He regretted that on account of some legal difficulties they had not been able to get possession of the premises at the back of the bank as yet, but the directors had been assured that the delay would not be more than a few days or a week longer. When they had possession of these premises the directors would be able to receive both the shareholders and their customers in a

befitting manner, and they would be enabled to conduct the business of the bank as it ought to be conducted. At present the directors felt that they should apologise for the many inconveniences which their customers had to suffer while transacting business at the bank, but this, he need not say, was entirely owing to the smallness of their premises. He hoped that this state of things would be entirely obviated before the end of the next six months. The directors continued to entertain the opinion that this was a successful company, and that the success which had already accompanied its operations would continue. In fact, they felt that that continued success was sure. The shareholders had only to continue that support to the directors which they had hitherto afforded to place the company in one of the first positions in the city of London. As far as the directors were concerned they would on their part do all that lay in their power to ensure that success, and he hoped that the shareholders would, by bringing accounts and deposits to the bank, give their assistance. He did not know that there was anything else worth referring to, and he would therefore conclude by moving that the report and statement of accounts presented be received and adopted.

Sir Robert Carden seconded the motion.

A Shareholder said the purchase account was put down at £30,000. He wished to know what that amount covered?

The Chairman said it covered the purchase of the English and Irish Bank in Dublin, and the Bank at Marseilles. It was proposed to write off £3,200.

A Shareholder said the bank premises, &c., were put down at £14,500, and inquired if any fresh purchases were included in that sum?

The Chairman: No.

The motion for the adoption of the report was then put and agreed to.

The Chairman then proposed that a dividend at the rate of 5 per cent. per annum be payable on and after the 21st inst., and stated that the warrants would be sent free of income-tax. He also expressed a hope that at the end of the year the directors would have a considerable sum to dispose of, and trusted they would be able to deal liberally with the reserve account and the shareholders in the shape of dividend.

The motion was put and agreed to.

Mr. King, in proposing a vote of thanks to the chairman and directors, said he regarded the report as very satisfactory, and considered the European Bank one of the most successful banks which had been established. If the shareholders assisted the directors as they had hitherto done, he felt confident that the establishment would achieve great results.

The motion having been put and agreed to,

The Chairman briefly acknowledged the compliment, and the proceedings then terminated.

CARLISLE CITY AND DISTRICT BANK.

THE directors of this bank have declared a dividend of £1. 2s. 6d. per share, for the half-year ending 30th June, 1865, being equal to 18 per cent. per annum. The profits for the half-year, after payment of expenses, amount to £6,978. 17s. 2d., being at the rate of £24. 1s. 3d. per cent. per annum. After paying the above dividend, and £480 for alterations, safes, and furniture at the two new branch offices, there will remain in the auxiliary fund a sum of £3,653. 15s. 6d. The guarantee fund now stands at £28,000.

Annexed is an abstract of the balance-sheet of the company for half-year ending 30th June, 1865.

JOINT-STOCK DISCOUNT COMPANY, LIMITED.

The fourth ordinary general meeting of the proprietors of this company was held on the 31st July at the London Tavern; the deputy-chairman, Mr. Wm. Charles Brown, presiding.

The Secretary, Mr. H. J. Westrup, read the report and accounts, which were as follows:—

“It is with great satisfaction, considering the difficulties which had to be surmounted in connection with the recent and protracted commercial crisis, that the directors find themselves enabled to present a statement of accounts, showing a gross profit of £54,073. 16s. 3d. inclusive of £3,243 2s. 11d. brought forward from last account. After deducting the rebate of

interest on bills not due and the current expenses, the balance has been appropriated for the payment of a dividend at the rate of 6 per cent. per annum, or 6s. per share, carrying forward £6,573. 4s. 7d. to profit and loss new account. The directors have set aside an amount as provision against loss in respect of bad debts which they consider will be amply sufficient for the purpose. Of the amount of the company's claim against the Leeds Banking Company, more than 10s. in the pound has been already received, and there is no doubt of the entire amount being realised, with interest. Mr. Joseph Bravo and Mr. H. V. East have been elected to fill the vacant seats at the board caused by the retirement of the late Mr. T. W. Henderson and the death of the late Mr. J. H. R. de Castro.

The Chairman said that though the directors in the report said it was with satisfaction that they announced the dividend, they did not mean to say that the amount of 6 per cent. was in itself a matter of congratulation, but that it was satisfactory that they were in a position to make that announcement under the adverse circumstances which had recently prevailed. There had been many heavy failures during the last two half-years. The company had been in existence only about two years, and for

half that period there had been severe trials in the commercial world. If they had had seven years of good trade, and out of that only one year of difficulties, they would have stood in a very different and much more favourable position. They thought it satisfactory to have laid by such a sum as they had during such difficulties, and still have a balance of £6,500 to carry forward. Many shareholders had desired to have some new directors on the board. Two gentlemen had already joined the board. A third would join immediately, and with their assistance they would be able to get on more comfortably. It required a special capacity on the part of the men whom they appointed as directors. Some few of the shareholders objected to Mr. Rixon, their solicitor, being on the board. Mr. Rixon felt annoyed at the remarks that were made, and immediately on the first meeting of the board said he was perfectly willing to resign his post. The directors felt that Mr. Rixon's services were so valuable during a period of difficulty, in which he had shown great attention, that they could not justify themselves in accepting the resignation. The result was that he proposed Mr. Noyes, who is solicitor to the London Financial Association, and he was appointed solicitor to the company, jointly with Messrs. Rixon and Son. The directors were anxious for success, and would do what they could to ensure it, but wished the shareholders to contribute by bringing business and deposits. (Hear, hear.) He (the chairman) then moved that the report and accounts be received and adopted. The motion, he observed, would be seconded by the managing director, Mr. Wilkinson. It was to be regretted that that gentleman had not addressed them more frequently, for he was sure that the more they heard from him the better they would be satisfied.

Mr. Wilkinson, the managing director, seconded the motion. He said he thought it was right to let them know the way the company was getting on. They had been and were going on through very trying times. The state of the money market was worse than it was in 1847 or 1858; and taking all those things into consideration, and that they were a young company and had difficulties to surmount, it ought to be gratifying, in the present state of the discount market, when they had competition and opposition in the shape of financial companies which allowed higher rates for deposit, that they had taken the position they had, and had not paid a higher rate for money than other banks and discount companies. They could not give more than the bank of England, and it was essential that the credit of the company should be maintained. He did not believe they could have a repetition of those difficulties. If they did, the directors would be at their posts to assist him in overcoming them and making the company a great company. But they had surmounted great difficulties. Every discount company was opposing each other; but they had got £800,000 capital, which none of the others had. They had dividend to pay on it, but the confidence it inspired was sure to bring in persons with deposits. It was with deposits they made money. The £400,000 had helped them very much, and although financial companies were paying 5 per cent., 6 per cent., and 7 per cent., they could never afford to pay more for deposits than the bank rate of interest. Messrs. Gurney and Co. had turned themselves into a discount company. A letter had been sent to them asking, would Gurneys and Co. affect them? He said they would not. He maintained that discount companies would succeed if they hung together. With reference to the prospects of the company, they were opening new accounts, and they were making great progress. Some shareholders complained that their shares had fallen; but if they only looked into the state of things for the last six months, there was not a

concern in London that had not gone down 6, 7, 8, or 10 per cent. The Alliance Bank was at 11 premium, and it was then at 3 or 4; the City Bank was at 125, and was then at 105; the Bank of London was at 160 and 162, and it was then at 138. So with the London Joint-Stock Bank, and many others, and a comparison will show that this Company has gone down the least. Many persons holding shares were disheartened. But they must stick to their property. If they adopted that course, he was satisfied this would be a great concern. A shareholder has remarked, on his name appearing as director of another company, which, however, he belonged to long before this company started. The way to make a concern prosper was to extend its connections and business; and with this view, and assuming he was offered a seat on the direction of any bank that could do this company good—so long as the interests of the Joint-Stock Discount Company were not neglected—he should not hesitate to accept it, as his great aim was to raise this company in the estimation of the public, and with their help and confidence he would make it a great concern. (Hear, hear.)

Mr. Slater believed this was not the end of the financial year. He wished to ask whether the two new directors elected would be subject to confirmation by the shareholders. He wanted to know the remuneration given to the directors and managing director. John Fisher, Esq., was a director. What had become of him? He objected to a dividend of 6 per cent., and moved as an amendment that it should be 7 per cent. instead of 6 per cent. Their expenses were largely increased. This was not a new institution. It was a limited company. As a joint-stock company they paid for an old business, and paid a handsome sum for it. He saw a falling off of half a million on deposit and loans, and the National Discount, with a capital of £600,000, had a reserve of £300,000, and they with a capital of £800,000, had only a reserve fund of £30,000. There had been a depression in their shares of £2 per share. This company was not like other discount companies, which had been formed for the clique bringing them out, and not for the advantage of the shareholders. He also inquired whether they had any recognised chairman.

Mr. Galsworthy said the directors might well congratulate the shareholders on the satisfactory statement made by the managing director. It appeared on examination they had been doing a very sound business. Taking the operations of the company in three periods, and taking the capital at £3,400,000, the profit was 86 per cent. Then, taking it at £3,300,000, the profit was 83 per cent.; and then, when the capital was £3,347,000 it was 1 per cent. Mr. Slater had spoken of a falling off in the deposits and loans, and he thought if they would compare the statement they would find the deposits had increased, and not fallen. The amount of profit by the working of the company, looking at it with precise figures, during the first three years was very much the same, and increased from decimals to one per cent., and that being spread over the capital it would be more than they had ever received before, except for the fact that the capital was so extremely large. The purchased business was a small business as compared with the present business of the company, and he thought they should distribute the dividend the directors recommended. He asked them not to jeopardise anything, but to receive the dividend recommended by the directors.

The Chairman said that the directors had thoroughly considered the subject of the dividend, which rested with them to declare. Mr. Slater had referred to the surplus. They thought it better to let it go to the end of the year, and then decide what was to go to the reserve fund.

As to the newly-appointed directors, those appointed did not require confirmation. Mr. Fisher some time ago expressed a wish to retire, and he did so. The remuneration of the directors was fixed by the articles of association. The managing director had a minimum of £3,000 per annum. It had been a matter of complaint that their expenses had been £1,600 in excess. He could not say what the increase was. They had increased their capital, and their business was very considerable, and required to be well and carefully managed. He did not think they could go on without some additional assistance. As to the falling off in the loans and deposits, it was impossible to give details how they arose. It was from the state of business at the time; more loans were required at one time than another, according to the amount of bills on hand. The profits were not so large as those of last year, but if any gentleman wished for information he would recommend him to read the *Economist*, which gave a detail of the various large banks, and how much their profits had fallen off during the last half-year, and he should be sorry if an equal falling off had taken place in the profits of this company. (Hear, hear.) They had no debt of Cave Williams's for £25,000. They had bills with Cave Williams's name at the back of the paper. But they had other names to the same paper, and they were not under any apprehension upon that point. (Hear, hear.) Since Mr. Henderson, their late chairman, had left, no chairman had been appointed. He (Mr. Brown), as vice-chairman, had been selected to act, and if any gentleman of high commercial standing, and one who by his connection could increase the business of the company were brought forward, he would not stand in his way.

A Shareholder—Can you give us any information about the unpaid call?

The Chairman said that out of £400,000, the amount of the call, there was about £9,000 unpaid. They had not yet thought it necessary to press the shareholders who were in arrear, but probably they might shortly find it desirable to put "the screw on." In the meantime the defaulters were paying interest at the rate of 10 per cent., and as the directors held the shares as security, he did not see that there was any ground for anxiety on that score. (Hear, hear.)

The report and account were unanimously adopted.

After a vote of thanks to the chairman and directors, and a separate vote of thanks to the managing director, Mr. Wilkinson, the proceedings terminated.

HAMPSHIRE BANKING COMPANY.

THE thirty-first Annual General Meeting of the shareholders of this bank was held at Southampton on the 1st August, Mr. George Hunt in the chair.

The following report was read:—"The Directors have pleasure in laying before the shareholders their annual account of the affairs of the bank, made up to the 30th of June, 1865. The profit upon the year's business, after paying the current expenses and writing off bad debts, amounts to £26,400. 5s. 10d., from which the sum of £8,522. 10s. has already been taken and distributed for the annuities and dividend for the six months ending 31st December last, leaving an available balance of £17,877. 15s. 10d. which it is proposed to deal with in the following manner, viz.:—

£1,000	to the new building fund.
£3,000	to the payment of half-year's annuities.
£6,886 13s. 4d.	to the payment of a dividend at the rate of 10 per cent. per annum.
£3,250	in payment of a bonus of 7s. per share upon the old and new shares without distinction.
£1,761 2s. 6d.	to be carried over to the next account.
<hr/>	
£17,877 15s. 10d.	
<hr/>	

The guarantee fund has been increased by the addition of £15,466 for premiums received on shares, and £1,030. 10s. 3d. for interest, and amounts to £50,591. 3s. 7d., and the directors recommend that it should still be permitted to accumulate, at the least by the addition of its own interest. The liabilities and assets shown in the accounts to be submitted to the meeting, have undergone the customary careful examination of a committee of the directors, and the board submit them with confidence, believing them to be a *bonâ fide* and reliable representation of the affairs of the bank. The lamentable instances of mis-management which have been developed during the last few years, one of which has recently occurred in the immediate neighbourhood, have made the directors keenly sensible of their responsibilities and of the hazard attending the submission of accounts to which due consideration has not been given, and they have striven to use the best means for securing accuracy and truthfulness, as well as for obtaining for themselves the fullest information upon all matters relating to the company. To this end they determined upon appointing two general managers in the place of one; and upon inviting Mr. Atkins, their late manager, to take a seat in the direction, to aid the board by his experience. The failure of the South Hants Bank, at Portsea, presented a favourable opportunity for opening a bank in that town, and the directors have already succeeded in attaching to it a sufficiency of business to render it remunerative, independently of the support which it gives to the other branches of the company in that particular district. The business of the bank having increased so greatly during the last few years, the directors intend to issue reports at the making up of the December half-year; in order that in future the shareholders may be informed at shorter intervals of the progress making by the company."

The report was unanimously adopted, and the appointment of Mr. Thomas Keeping and Mr. Richard Legg as joint managers, in the room of Mr. Atkins, who retires, was confirmed.

Cordial votes of thanks were given to the chairman and board of directors, to the managers, and other officers of the establishment, and the proceedings terminated.

CUMBERLAND UNION BANKING COMPANY, LIMITED.

The thirty-sixth ordinary general meeting of this company held at the County Hotel, Carlisle, on the 3rd August; Mr. George Head Head, in the chair.

The following report and balance-sheet were submitted:—

"The books and accounts have been audited by Messrs. Quilter Ball and Co., who spent a fortnight in making a most searching investigation, and a copy of the statement of accounts certified by them is annexed hereto. The net balance at the credit of profit and loss account for the year, after

writing off all bad debts, amounts to £28,246. 0s. 9d. An intermediate dividend of £4 on the old shares was paid in February last which absorbed £8,000, and a further sum of £4,178. 6s. 7d. is required to pay the interest at 5 per cent. on the new share instalments. After these payments there remains available the sum of £16,067. 14s. 2d., out of which the directors have the satisfaction of recommending a dividend of £5 per share (payable on Monday, the 7th August), absorbing £10,000 (making, with the dividend in February, £9 per share on the old shares), and they propose that £6,000 be appropriated to form a contingent fund to meet existing doubtful debts, and the balance of £67. 14s. 2d. to be carried forward to the current half year's account. The directors are glad to be able to congratulate the shareholders upon the results of the important steps authorised to be taken by the extraordinary meeting in December last, by which the old established business of Messrs. J. M. Head and Co. was acquired, the liability of the shareholders defined, and the co-operation and assistance of gentlemen of wealth and standing in the county thereby secured as shareholders and directors. The demand for shares so greatly exceeded the number at the disposal of the directors for allotment, that in a majority of cases the applications had to be curtailed, and many altogether declined. The calls have been paid up with a punctuality almost unexampled, and, as the accounts show, the small amount unpaid at the date of the last call on 30th June has since been received. It is worthy of remark too, that this large sum of additional capital and premiums (upwards of £220,000) has been received with scarcely any perceptible diminution in the amount of deposits or credit balances."

General Balance, 30th June, 1865.

The report was unanimously adopted.

BIRMINGHAM TOWN AND DISTRICT BANKING COMPANY.

THE twenty-ninth annual general meeting of the proprietors of this bank was held at the Queen's Hotel, on the 8th of August; Edwin Gwyther, Esq. in the chair.

The following report was read:—

"The directors of the Town and District Bank have called the shareholders together to submit their twenty-ninth annual report, showing the operations of the bank for the past year ending 30th June. The directors, upon a careful examination of the accounts, have the satisfaction to state that after writing off from the gross profit a sufficient sum to cover the bad debts, and paying income-tax and all charges connected with the conduct of the business, there remains a net profit of £24,157. 0s. 8d., being more than 20 per cent. on the paid-up capital of the company; to this must be added the sum of £2,376. 15s. 7d., being the amount carried forward from undivided profits of the former year, and also the sum of £8,435, arising from premiums on shares allotted to various applicants who promised to exercise their influence in favour of the bank. The above amounts make a gross total of £34,968. 16s. 3d., and the directors are of opinion that it will conduce to the interest of the bank to carry a large sum to the guarantee fund, and to pay a dividend for the last half-year of 9s. per share, free of income-tax, which, with the dividend, of 9s. and bonus of 3s. per share, paid in March last, will make 21s. per share on the year's trading. Should the dividend, as now recommended, be adopted by the shareholders, the distribution of the gross amount of £34,968. 16s. 3d. will be as follows:—

Half-year's dividend at 9s. per share, paid in March last ...	£8,586 0 0
Bonus of 3s. per share, ditto ...	2,862 0 0
Dividend proposed to be paid, on or after 1st September, of 9s. per share ...	8,671 10 0
Building fund ...	100 0 0
Guarantee fund from premiums on shares, £8,435; ditto from profits of the present year, £1,565, ...	10,000 0 0
Balance to next year's profit and loss account ...	4,749 6 3
	<hr/> £34,968 16 3 <hr/>

"The guarantee fund, which stood last year at £66,500, will, by the proposed addition of £10,000, amount to £76,500. It is with feelings of deep regret that your directors have to announce the resignation of their late manager, Mr. Bassett Smith, who for nearly thirty years, with untiring energy and great ability, conducted the business of the bank; and, as a mark of the high estimation in which his exertions are held, your directors recommend that a pension of £600 per annum be paid to him during the remainder of his life. His advanced age was the only reason which induced him to relinquish the post which he so long and ably filled. The directors have, however, the satisfaction to announce that Mr. Smith has consented to take a seat at the board as a supernumerary director. The directors, after a careful consideration of the testimonials submitted by a large number of candidates for the vacant managership, came to the unanimous opinion that those sent by Mr. Thomas Barney, of the Stamford, Spalding, and Boston Bank, and previously of the London and Westminster bank, were the most satisfactory; therefore they proceeded at once to confer the appointment on him. The directors have much pleasure in stating that, from the experience they have already had of Mr. Barney's qualifications, they are convinced that he is eminently adapted for the managership of the bank."

The following resolutions were carried:—

Moved by the Chairman, and seconded by Mr. J. C. Woodhill, "That the report now read be received and approved, and that a printed copy be forwarded to each of the shareholders."

Moved by the Chairman, and seconded by Mr. Samuel Evans, "That a dividend of 9s. per share, free from income-tax, be now declared for the half-year, payable on and after the 1st of September next."

Moved by Mr. Henry Elwell, and seconded by Mr. Charles Dudley, "That the thanks of the proprietors be presented to the directors for their services during the past year."

Messrs. Thomas Penn and Richard Parry having reported that Messrs. John Aston, C. R. Cope, and D. S. Hasluck had been re-elected as directors,

It was moved by the Chairman, and seconded by Mr. R. H. Sumner, "That the thanks of this meeting be given to Messrs. Thomas Penn and Richard Parry for their services in examining the votes for the election of directors."

Moved by the Chairman, and seconded by Mr. J. O. Bacchus, "That the best thanks of this meeting be given to Mr. Bassett Smith, the late manager, for his services during the past year, and for the zeal and energy he has displayed in conducting the affairs of the bank ever since its formation."

Moved by the Chairman, and seconded by Mr. Samuel Rawlins, "That the best thanks of this meeting be given to Mr. F. C. Bourne, the sub-manager, for his attention to the duties of his office."

Moved by Mr. J. O. Bacchus, and seconded by Mr. John Manly, Jun., "That the best thanks of this meeting be given to Edwin Gwyther, Esq., for his services in the chair."

ENGLISH JOINT-STOCK BANK, LIMITED.

A second ordinary general meeting of the shareholders of this bank was held at the London Tavern on the 14th August; Captain Mangles in the chair.

The following is the report of the directors for the half-year ending on the 30th of June last :—

"The directors, in presenting their report, refer with satisfaction to the progress the bank has made during the past half-year. Since the last report was issued the number of places where the business is carried on has been increased from 26 to 34, whilst in the same period the number of customers has increased 33 per cent., and the amount on current and deposit accounts nearly 50 per cent. Notwithstanding the low rate of interest that has prevailed during a great portion of the time, the annexed statement shows the gross profit for the half-year ending the 30th June, 1865 (including the premium on new shares received up to that date), to be £24,965. 10s. 6d. After deducting interest paid to customers on deposit and current accounts, current expenses, rebate on bills, and providing for bad debts, the directors recommend the payment of a dividend at the rate of £6 per cent. per annum, free of income-tax, on the paid-up capital, which will absorb £3,000; that £352. 1s. be written off the preliminary expenses, and £1,317. 10s. off the purchase of the old banks and expenses of establishing new branches, being in both cases at the rate of £10 per cent. per annum; and that the sum of £5,500 be carried to the reserve fund. This will leave £1,054. 12s. 4d., together with rebate £835. 18s. 10d., making the sum of £1,890. 11s. 2d. to be carried forward to profit and loss account. The dividend will be payable on and after the 15th August."

The Chairman, in moving the adoption of the report, stated that the bank was in a most flourishing condition. The number of customers was increasing, as also was the number of current and deposit accounts, and as ample provision had been made for bad debts, he thought it was every reason for congratulating the proprietors upon the position which they stood. On the 31st of December the number of accounts was 1,908, and on the 30th of June it was 2,555, showing an increase of 66. The deposit and current accounts, which on the 31st December amounted to £279,366, had increased by the 30th June to £412,089, showing an increase of £132,723. Since then 207 new accounts had been opened, and £28,506 paid in. As this was not a time to expect large deposits, he thought the directors might congratulate the proprietors on having their report so favourable a result. It was stated in the report that the number of places where the business of the company was carried on had been increased from 26 to 34. Between the 31st December and the meeting of the company in February, they had opened branches at Bristol, Poole, Haslemere, Rochester, and Chobham. Since February new branches had been opened at Derby and Notting-hill, and they had bought the Bulfinch Bank. One of their purchases had been the West Surrey Bank, and he was glad to say that since it had come into their possession the deposit had been increased from £137,000 to £170,000, showing that they had purchased an old, rotten, and worn out concern, but a business substantially good and sound in itself. He begged to move the adoption of the report.

Mr. Lawrie seconded the motion.

Mr. Budden asked for information with regard to the amount of remuneration paid to the directors, and the salaries of the general manager and secretary.

Mr. Kemp, one of the auditors, said the remuneration to the directors consisted simply of the amount voted at the last meeting.

The Chairman said the salary of the general manager had been raised to £1,500 a year. That of the secretary was £300 a year.

Mr. Budden was glad to hear that the remuneration of the general

manager had been increased. He thought the managers generally were underpaid.

The Chairman remarked that in the infancy of the company it was necessary to begin cautiously, and to feel their way. The moment they felt justified in increasing the salaries of their officers they would only be too happy to do so.

Mr. Broad urged upon the directors the necessity of having an establishment of their own in London, instead of the agency of the City Bank.

Mr. Sharp expressed a similar opinion, and proceeded to criticise the statement of accounts. He said they professed to have a balance of gross profits amounting to nearly £25,000, but he did not think it fair to include with the profits an item of £7,258, representing premiums received on new shares up to the 30th June. He was afraid they were distributing a portion of the capital of those who took new shares in order to put it in the pockets of those who had not taken them. (Cries of "No, no.")

The Chairman explained that the accounts were perfectly correct. The net profit amounted to £11,224, and of that sum they had held back £5,500 as a reserve fund. The dividend they recommended was a fair and honest one, or it would not have received the sanction of the directors. The question raised by Mr. Broad as to the propriety of having an establishment of their own in the City of London was one which at the present moment was receiving the careful consideration of the board.

Mr. Budden asked what premium had been paid for the Bideford Bank.

The Chairman declined to enter into details, but said the premium amounted to three and a half years' purchase. He thought they had obtained a very good bargain.

The motion was then agreed to.

The Chairman next moved that a dividend at the rate of 6 per cent. per annum be declared and paid.

Mr. Lawrie seconded the motion, which was unanimously agreed to.

The proceedings then terminated with a vote of thanks to the board of directors and the managers of the company.

ENGLISH, SCOTTISH, AND AUSTRALIAN CHARTERED BANK.

THE twenty-fourth ordinary meeting of the proprietors of this bank was held at the London Tavern, on the 31st July—George Hay Donaldson, Esq., in the chair.

The following report was read :—

"The accounts of the bank for the half-year ending in the colonies on the 31st March, and in London on the 30th June, show a balance of profit of £22,538. 17s. 7d., after making provision for bad and doubtful debts. The directors regret that the necessity has arisen for writing off a further sum to meet loss from failures referred to in the last report, the effect of which is to make the result of the operations for the six months under review less favourable than had been anticipated. They are disposed, however, to regard as exceptional the present reduction in the amount available for distribution, and have confidence in the expectation that the future profits of the bank will admit of an increased dividend being maintained. They, therefore, recommend that out of the balance of £22,538. 17s. 7d. a dividend be paid at the rate of 7 per cent. per annum, free of income tax, on £600,000, the paid-up capital of the bank, which

1106 *English, Scottish and Australian Chartered Bank.*

will require £21,000; that the premises and furniture accounts be reduced by £1,000, and that £538. 17s. 7d. be brought forward to the current half-year."

						<u>£34,371</u>	6	11

The Chairman, in moving the adoption of the report, said he was glad it fell to his lot to state on the present occasion that the directors at length felt justified in recommending a 7 per cent. dividend. The directors had hitherto been very cautious, and he thought they would now receive credit for having rightly and duly considered the matter before coming to this decision. At the last meeting a sort of pledge was given that when the reserve fund had attained the respectable figure of £50,000, at which it now stood, the directors would look to increasing the dividends rather than to augmenting the reserve. Hereafter occasions would arise when both objects would be attended to, and while, as he hoped they would be able to do, they sustained the same rate of dividend they would find opportunities of further increasing the reserve. He was one of those who were partial to a large reserve; they were all partial to good dividends, and he trusted they would be able to carry out both objects. (Hear, hear.) He moved that the report and balance-sheet now read be received and approved, and that the dividend, as recommended in the report—

viz., at the rate of 7 per cent. per annum, free of income tax, and payable on and after the 7th August—be declared.

The motion having been seconded,

In reply to a shareholder,

The Chairman added that the bad debts referred to in the last report were, so far as the directors knew, entirely swept away.

A suggestion made by a shareholder, that the value of the premises in Cornhill should be stated in the accounts, the chairman promised should be attended to, adding that the premises, which cost them £6,000, were now worth at least £20,000.

The motion was unanimously agreed to, and a vote of thanks to the chairman and directors concluded the proceedings.

EASTERN EXCHANGE BANK.

A SPECIAL meeting of the Eastern Exchange Bank was held on the 14th August, at the bank premises, Cook Street, Liverpool; Mr. Patrick Hunter, chairman of the board of directors, presided.

The following report was read:—

"The directors have the pleasure to lay before the proprietors an audited statement of accounts to the 30th June, 1865, showing a balance of net profit of £6,600. 11s. 4d. which they propose to carry forward to next account. It will be seen that the gross profit for the half-year, £13,876. 1s. 0d., is at the rate of 14 per cent. per annum. In framing the accounts, it has been necessary on this occasion (owing to the temporary absence of constituents from Egypt, in consequence of the epidemic lately raging there), to include commissions to the extent of £4,000, earned in Alexandria, based on the manager's estimate, who represents that the actual sum is over rather than under the amount stated. Although the time during which the bank has been in full operation in Alexandria does not exceed four months, in consequence of the cessation of business during the crisis in the early part of the year, the directors are satisfied that its foundation has been successfully laid. This has been done at moderate cost, and without any payment for goodwill. The business transacted has been free from bad debts, if they except one dependency, now in course of liquidation, on which it is possible they may sustain a loss of from £1,000 to £1,500. There are, however, circumstances which induce them to hope for a more favourable out-turn."

General Balance-sheet for the half-year ending 30th June, 1865.

LIABILITIES.

	<u>£17,244 5 3</u>
Balance of net profit to date	£6,600 11 4

The Chairman said—When we last assembled I mentioned that our much respected chairman was confined to the house by illness. I now have to announce his death, which took place a short time ago, and I feel sure you will all deeply sympathise with the family in their bereavement. The report which has just been read, and which has been in your hands for some days, contains a full account of all our proceedings, and of the exact position of the bank. It is not our intention, on this occasion, to recommend a dividend, as the short time during which the bank has been in operation would scarcely justify it, however favourable the result now shown is. Your directors were desirous that the proprietors and the public generally should know the exact position of the bank at an earlier period than our articles prescribed, having passed through such a crisis as the last; and it is a matter of sincere congratulation that we passed so well through such times, which cost so much anxiety to the mercantile community. It will be in the recollection of most of you that I mentioned at our last meeting that we had sent out our general manager

with an experienced gentleman to open a branch of the bank in Egypt. His journey has been of great value to us, and the branch has been successfully established. The alarming epidemic which broke out very shortly after the cotton crisis has curtailed our operations. I am very glad of the opportunity of speaking of the zeal and attention paid by the officers of the bank during this very trying time, for whilst so many left Egypt, they remained at their post. We have now, as the season is over, granted to our manager, Mr. Baker, leave of absence, and hope the sea voyage may benefit him, and he may return with renewed energy. During his absence our chief accountant, Mr. Smith, has gone out to render assistance, and we have most satisfactory reports from him as to the position the bank holds there. We do not intend at present to extend the bank to any other place, as we find a full and profitable employment for all our capital in Egypt. I have, therefore, much pleasure in laying before you the report and statement which has been printed and circulated amongst you, and feel great hopes for the future, for with the large stock of cotton and the increasing production of Egypt, we may safely look forward to a steady and profitable business there.

Mr. A. C. Stewart said he should like to ask a question as to how the expenses of the bank were incurred? He only wished for information. It appeared that the expenses of carrying on the bank were $4\frac{1}{2}$ per cent. on the capital, and although business in Egypt was done during only four months, for the other two months money was very dear, and he presumed that the directors did not allow it to be idle, but put it out at interest. The shareholders, as everybody knew, could get 5 per cent. for their money without investing it in a bank.

The Chairman said there were many expenses which would not come in the next half-year's account, and the bank would be in full operation during the whole of the six months. At present they could hardly judge fairly as to the profits.

Mr. A. C. Stewart wanted to know what were the extras, and what the permanent expenses.

The Chairman said the accounts were open for any shareholder to examine. It was very difficult to say what the working expenses would be, but as their business increased so would their other expenses.

Mr. M'Kean, in reply to one or two questions, read a statement in which it appeared that the gross expenses at the head office were £2,500, and at the Alexandria office £1,501.

Mr. A. C. Stewart—Is £1,600 paid for office rent alone?

Mr. Banner, the solicitor—Yes.

Mr. M'Kean said there was a sum for income-tax which was paid on the dividend.

Mr. John Bigham said it appeared that the gross profits were £9,800; and the supposed profit of £4,000 added to that made £13,800, whilst they had to deduct from that £4,169 for expenses, £3,362 for rebate, leaving a net profit, after a deduction for a bad debt, of little more than the actual working expenses. That was the result of six months' good average business. They had given the directors credit for having escaped losses, but, if the result of a good time was such as he had stated, did it enable them to hope much for the future? Rumours had been abroad to the effect that there was a proposal for an amalgamation with the National, and he thought it would be well for the chairman to take that opportunity of telling the shareholders simply and candidly what was the position of that question. (Hear, hear.) For himself, he thought it would be wise to consider such a proposal, for their capital (£200,000) was small, and

their expenses, as compared with the capital, heavy. (Hear, hear.) Might he ask, if the directors intended to make a call or two calls upon the shareholders, would they call the latter together for the purpose of taking their opinion on the subject? He hoped his remarks would be received as they were made, namely, with the very best of feeling. (Hear, hear.)

The Chairman said neither his brother directors nor himself had the slightest wish to keep back anything from the shareholders, but give fully and candidly all such information as they could with propriety. (Hear, hear.) He might state that they had had no proposal from the National board, but that suggestions had been made and several hints thrown out to them with respect to amalgamation. (Hear, hear.) There was a proposition to amalgamate three banks together, and thus would have been formed a strong and an excellent institution, second to none out of London. (Hear, hear.) One of the parties had, however, withdrawn, for what reason was best known to themselves; but if any suggestion at all suitable should be made it would be submitted to the shareholders for their approval. He believed that the business of the bank was progressing most satisfactorily, and that the next season in Egypt would be a successful one. He defied any bank of so short a standing as theirs to produce such names among its customers as were to be found in their ledger, and altogether their prospects were most encouraging. (Hear, hear.) As regards the question about making a call upon the shareholders, he thought the latter would give the directors credit for not making a call unless it was for the purpose of increasing their business. It would not be according to the articles of association to call the shareholders together in order to obtain their permission to make a call. (Hear, hear.)

Mr. Thomas Chilton, one of the directors, said the board looked for a very considerable business from Alexandria next season. He thought that the past half-year was by no means a fair criterion of what might be expected in future years. He was of opinion that in an exchange bank £200,000 was not a sufficient capital, and he should certainly advocate a further call being made. As to amalgamating with other banks, he wished his brother directors to put that question out of their minds, for he believed it would only prove a source of weakness. The National Bank of Liverpool would not amalgamate except on terms beneficial to itself, and if beneficial to itself, the shareholders of the Eastern Bank would have to pay accordingly. (Hear, hear.) He asked the proprietors to cast to the wind all idea of amalgamation, and do what they could to further the interests of the bank, the prospects of which were extremely encouraging. (Hear, hear.)

Mr. Atkinson asked if that was not an ordinary half-yearly meeting, as he wished to make a few remarks?

Mr. Banner—No, it is not. It is called for the express purpose of receiving these accounts.

Mr. Atkinson said he thought they were all indebted to Mr. Bigham for having elicited the information he had, and he believed they had every reason to place implicit confidence in the directors.

Mr. Bigham moved a vote of thanks to the chairman for the admirable manner in which he had discharged his duties.

Mr. A. C. Stewart seconded the motion, which was carried unanimously.

The Chairman having responded, the meeting separated.

MERCANTILE AND EXCHANGE BANK, LIMITED.

ASPECIAL general meeting of the shareholders in this bank was held at the Law Association Rooms, Cook Street, on the 21st August; Mr. T. B. Forwood, the chairman of the board of directors, presiding. There was a numerous attendance.

The meeting was called for the purpose of considering and, if approved, adopting a resolution for altering so much of the agreement between this bank and the London Bank of Scotland, Limited, as relates to the allotment of 22,000 shares of this bank to the shareholders and directors of the London Bank of Scotland, by limiting the allotment to 10,000 shares instead of 22,000.

The Chairman said as the time of the meeting was valuable he would just indicate the course that the directors proposed should be adopted. The meeting was called for the purpose of mainly—in fact he might say solely—entering into an arrangement with the London Bank of Scotland; and he begged to call upon the solicitor to read the resolutions which the directors submitted for their approval, and, subsequently, he (the Chairman) would, with the permission of the directors, make a statement with respect to the business of the bank for the past half-year.

Mr. Haigh, the solicitor, then read the resolutions.

The Chairman, in moving the adoption of the resolutions, said he thought a very few words would suffice to induce the shareholders to pass them unanimously. They were already aware that at the two meetings held on the 5th and 22nd of July, last year, they passed resolutions for making certain arrangements with the London Bank of Scotland, from which they hoped advantages would be derived in the way of bonuses and premiums to their bank. However, difficulties arose in the way of allotting the whole 22,000 shares, and after numerous interviews and negotiations with the directors of the London Bank of Scotland, and after encountering considerable difficulties, which the directors did not now think it necessary to go into, the directors hit upon the plan proposed, by which they were of opinion all the difficulties would be met, and the Mercantile and Exchange Bank would, so far as the London Bank of Scotland was concerned, be placed in a position so as to work beneficially for all concerned. (Hear, hear.) The result of that arrangement was that the London Bank of Scotland would take 10,000 shares, the Mercantile and Exchange being placed either in receipt of cash for the shares, or such an amount of security as should appear to the directors thoroughly satisfactory. (Hear, hear.) He need not tell them that a considerable amount of difficulty was experienced in bringing about the arrangement as to the 10,000 shares; and the directors hoped that the shareholders would approve of that arrangement, and thus an immense amount of litigation be avoided. (Hear, hear.) Some of those present might want to know to what extent the directors were in possession of funds received from the London Bank of Scotland. An amount of £85,000 had been received in cash, and what they considered a full and satisfactory security for the balance of £15,000. With these few observations he begged to move the resolutions read by the solicitor, and he called upon the chairman of the London board (Mr. Walker) to second the motion. (Applause.)

Mr. Walker seconded the motion.

In reply to a question,

The Chairman said the arrangement now proposed was in lieu of that having reference to the 22,000 shares; and the 10,000 shares were covered by cash or satisfactory security. He fully expected that the arrangement would be a final one, and that the new shareholders would be anxious to

work cordially with the present shareholders, with the view of furthering the interests of the bank. (Hear, hear, and cheers.)

In reply to Mr. Kendall,

Mr. Haigh said the shares would not be got without either money or security.

The motion was then put and carried unanimously.

The Chairman said this was the whole of the formal business of the day, but the directors feeling that there was considerable anxiety entertained—and very naturally so—by many of the shareholders, the directors and their friends, as to the position of the bank, in consequence of various rumours—the majority of which, in fact nine-tenths of which, were unfounded—the directors thought that if it should be the wish of the shareholders they would make some informal, unofficial statement, as to the position of the bank. The shareholders were perfectly aware that on the 22nd of April they themselves passed a resolution by which they altered clause 191 of their deed; and the deed having been altered they sanctioned the board in holding only one meeting during the year for the purpose of presenting a report and statement of accounts. The judiciousness of the proceeding had been confirmed by the experience of the board, for they were quite satisfied that the bank required rest and repose, and should not be dragged into a statement too frequently; and they quite coincided in the wisdom of the resolution then passed. At this particular period, however, the directors of the bank desired to avail themselves of the opportunity of giving as much information as was consistent with the interests of the bank. The shareholders, he was quite sure, were not present to carp or find fault, but to consider what was the true position of the bank (hear, hear), and the directors were prepared to give, so far as they could, a full statement of the past business, and to ascertain whether there was not that in the future which would give them confidence in their property. He (the Chairman) would ask the shareholders to do what in them lay to assist the directors in retrieving the losses and placing the bank in the position which they desired it to hold. He would now read the following informal report:—

“By the resolution passed at the extraordinary meeting held on the 22nd of July, 1864, it was determined that only one meeting of shareholders should be held after the close of the year, to pass the accounts, but, to meet the desire of many shareholders, the directors have decided to avail themselves of this extraordinary meeting to communicate some particulars of the working of the bank for the past half-year. They regret that the commercial disasters of the half-year, the fall in the value of produce and other securities, have rendered the liquidation of many of the accounts which were in contingency, and found to be dubious at the date of the last report, much more difficult, and attended with greater loss to the bank than they had any reason to anticipate. To the fact of the large amount written off to meet this state of things, and not to losses on any new business, the board ascribes the position of the present balance-sheet. The gross profits of the bank for the half-year ending the 30th June have been £26,364; for the corresponding half-year of 1864 they were £33,018 and after deducting from the current half-year's profits, rent, salaries, and all charges, £11,291, and rebate on bills not due, £2,570, there remains as net profit £12,503, which, considering the low rate of interest, affords encouraging evidence of the activity and validity of its business. Since the last meeting the directors, after mature consideration, have closed the Glasgow office, and have arranged for the conduct of their business with the Clydesdale Banking Company on terms mutually advantageous. Resulting from

this arrangement (besides lessening the responsibilities of the bank) there will be a large economy of capital and a considerable saving of expense not apparent in the present account, as the closing of the bank is too recent; and the bank is enabled to transact the business of its constituents in Scotland on satisfactory terms. The foreign exchange business continues to afford considerable facilities to the customers of the bank, especially in Liverpool, and yields a profit on its working. The bank's operations in America are conducted with caution and advantage to the bank; nor has the sudden collapse in America after the war affected the bank, except as regards the rapid depreciation upon the balance of gold held in New York; and this, which is estimated at £4,186, is allowed for in the figures now given. A change having become necessary in the management of the Liverpool office, the directors have under consideration the arrangements necessary to fill up the office vacated by the manager. The difficulties with which the bank has had to contend, especially from sinister rumours, have been great; and yet its business both in London and Liverpool continues to progress, and the number of accounts, as compared with those open in the half-year ending 30th June, 1864, being the largest since its existence, show a satisfactory increase. The directors, looking at the valuable business which has already been accumulated in the face of so many obstacles, and, convinced more than ever that increased banking facilities in Liverpool are needed to keep pace with its trade, feel justified in stating to the large and influential body of proprietors of the bank that, by their united efforts in its favour, they have it in their power to render the bank prosperous and successful.

"30th June, 1865."

Balance of profit and loss to June 30, 1865	98,851	0	4
							£2,031,915	13	8

The figures (the Chairman continued to remark) were appended in order that the position of the bank might be made known. He might be permitted to extend this statement a little, perhaps, in order that the shareholders might be placed in possession of as much information as possible, and he would make a few observations on each item of the report. After reading over the items of gross profit, working expenses, &c., given above, the Chairman said it would, perhaps, be asked what the directors had to say in reference to the large amount of charges? Now he (the Chairman) found that the expenses—the exaggerated expenses—were less than they were last year. They had expended a large amount in legal expenses, in fact this was one of the largest items; but they had had a great deal of

negotiation with the London Bank of Scotland; and then there was a large amount for rent and taxes. He need not tell the proprietors that the directors had for some time past aimed at a reduction of the expenses. The expenses had been considerably reduced in Liverpool, and in London they had a very economical staff; but their chief item of reduction in prospect was in connection with Glasgow, for it was anticipated that by the closing of the Glasgow branch there would be a saving of £2,500, and for which office an item of £1,000 was set down in the present figures. This was all he had to say as to the profit and loss account. He would say a few words in reference to the closing of the Glasgow office. When the Mercantile and Exchange Bank was started, many persons thought it started with considerable originality of idea, it being somewhat like a triangular duel between Liverpool, London, and Glasgow, the directors believing that they had some chance of getting profits. The expectations of the directors were realised, and in Glasgow their manager succeeded in rapidly gaining a position for the bank which no English bank had gained before they started; but their manager had had a more advantageous offer from his old friends, and it had, therefore, been decided to close the Glasgow branch, and accept the Clydesdale Banking Company as their agents. If their customers would try, they would find that the bank could offer quite as advantageous terms under the new arrangement as previously. With regard to the commercial disasters which had happened during the past year, they, as commercial men, were all familiar with what had taken place, and every one of the proprietors would have considerable sympathy with the directors under the misfortunes which had occurred. The Mercantile and Exchange was not a new bank just starting, but was in full and steady progress when the disasters came. He (Mr. Forwood) had taken pains to ascertain whether there was any justice in the statement of the board that the disasters of the past half-year had been most serious. Now, he found that the public failures had involved an amount of £11,100,000, and if the failures that had been positively assumed had been to this extent they might add 50 per cent., or say 33 per cent. more to the amount in account of compromises and private arrangements during the past half-year. The Mercantile and Exchange Bank was not only a Liverpool bank, but had relations with London, Glasgow, and New York, and, therefore, its interests were more wide-spread; but the failure which affected them had chiefly occurred in Liverpool and London. It had been stated that they had been very heavy losers through an East India house, and that they had lost £45,000. The directors were rather astonished when they heard this rumour, and instituted inquiries, and the result was that it was ascertained that a bank with a somewhat similar name to their own had suffered. (Laughter.) Turning to cotton. On the 6th of January the price of American cotton was 28½d., and on the 6th of April 16d.; fair Dhollerah in January 19½d., and in April 10d.; and Egyptian in January 25½d., and in April 12½d. Any gentleman, therefore, knowing anything of the Liverpool cotton business would understand that the directors had not taken to themselves any amount of credit in saying that it was a very disastrous time and required great care to steer clear of the difficulties which presented themselves. Speaking of the disasters, the bank held a large number of special securities, and in some cases it was found that the directors had no legal power to sell them. So far as the new business of the bank was concerned they had only experienced two disasters, and these for very small amounts. One was in cotton and the other in corn, and they were contingent upon the accounts of the last half-year. (Hear, hear.) With regard to the foreign exchange business, L.

believed he was correct in stating that the directors had never come before the proprietors yet without this branch of their business having been continuously prosperous. The business in Liverpool and London for the past half-year had been profitable, and they had abundant testimony of the great facility and convenience that was experienced in selling good bills to the bank, the prices realised being equal to those obtained on the London market. Arrangements had been entered into with the principal bankers on the continent, and no bank was better off so far as agencies of this nature were concerned. With regard to New York, the proprietors knew the fearful state of things which had existed there; but the business had been profitable, except in gold. It was necessary for their agent to keep cash in hand for current business, and, in a remarkably short time, owing to the closing of the war, a very serious depreciation in the value of gold took place, and resulted in a loss of £4,000 to the bank. The Southern business was opening up, and if any field presented itself for the operations of a bank, no bank stood a better chance than their own. The next paragraph in the report had reference to the retirement of the manager, and though he need not trouble the proprietors with that, he might say that it was with great regret that the board were compelled to part with their servants. It was necessary that Mr. Brown should retire, and he had done so. The concluding paragraph in the report was one which affected the future. It alluded to sinister rumours, and they all knew what those rumours were. It had been stated that the bank had lost £45,000 on cotton bills. One gentleman had told him (the chairman) that he understood that the bank was interested to a very large extent in Bolton and Stockport, and had lost very heavily there; but when the matter was investigated, it turned out that the bank had not lost a shilling in this direction, and so the rumours were put aside. Rumours of all kinds had been circulated as to the bank, it being stated that the directors were seeking amalgamation with other institutions, and that they were ready to do this and to do that. Perhaps, when the proprietors looked at the balance-sheet, they would consider the losses very large: but it must be borne in mind that since 1863 they had divided £70,000 in bonuses and profits, and after all, the result was not so very unsatisfactory. He (Mr. Forwood) had invested a considerable sum in railways and had been accustomed to wait ten years for a dividend. Railways had to be reconstructed and repaired, and so in like manner alterations had to be made in the bank. They at first got into a good dividend paying position, and perhaps they paid the proprietors a dividend too quickly. In conclusion, Mr. Forwood said that the directors hoped that the shareholders would support them, because if they did they were almost certain to do a profitable business. They were not now a body of some four or five hundred shareholders as they were last year, but their constituency had swelled to 700 shareholders, and that was a guarantee that if they would all put their shoulders to the wheel a great deal could be done. He hoped that on the 31st of December the directors would be able to show a better state of things than was represented in the present report, but in order that the proprietors might not be disappointed, the directors had looked over all the accounts, and were anxious that the true position of the bank should be made known. He thought the extreme estimate that the directors could give was £3 per share for all contingencies on the accounts which had not been finally closed. With regard to the increase in the number of customers of the bank, some of their friends had been very dubious, and had stated that they were not only losing their business, but that their customers were deserting the bank. Now, the directors had

looked into this matter very carefully, and they found that in Liverpool alone there had been an increase in the number of customers during the past year of ninety-three, and in London of twenty-one, and the deposits were within £20,000 or £30,000 of what they were last year. So far as the directors were concerned they had no personal motives to serve in being on the direction, and if the proprietors considered that the interests of the bank would be served by any one of their number retiring, then they had only to express a wish to that effect.

A Shareholder said he would like to make one or two remarks after the statement made by the chairman. There would be no doubt that if they could get rid of the past the future would be bright enough. The statement of the chairman was not, however, satisfactory with the past, for that gentleman had not stated the real position of the bank with regard to the money. (Applause). He (the shareholder) presumed that the reports which had been going about as to the loss sustained in consequence of the London and Liverpool managers was not correct. He presumed he might take that for granted.

The Chairman was sure the hon. shareholder would allow him to remind him that he had alluded to the Liverpool manager, and that he had stated that the £3 share would cover every contingency. (Hear, hear.)

Mr. Kendall thought there could be no reason whatever why the directors should not state what they expected the losses to be owing to the transactions of the late London manager. (Hear, hear.)

Mr. Walker said if, as the chairman of the London board, he were asked had the London manager taken so much money out of the till and put it into his own pocket, he should state that there was no loss on that score; but if he were asked were the losses which the London board had sustained in consequence of the London manager's transactions, he should say every farthing. Take one single account, and of course they would excuse him mentioning names. (Hear, hear.) That was an account opened by a party in London of which the manager approved. The directors doubted the propriety of opening the account, and they spoke to the manager over and over again about it. However, it increased to £2,000 and £3,000, when the directors came to the positive conclusion that it should be closed, and, by a process of cooking the accounts, it appeared weekly as though it had been closed. However, in the summer season it swelled up at the Stock Exchange to the enormous amount which had been lost, and that without the directors having the power of seeing a single item—(expressions of surprise)—and he must say that if the bank had a series of dishonest managers, he did not see how the directors could practically control them. If fraudulent means were adopted by managers, he did not see how they could really be prevented by the directors, and to show what losses other banks had sustained through their managers he might mention the Pullenger frauds, which amounted to, he was reminded, £250,000. In spite of directors, and of the strictest investigation, such losses as they had sustained might come some time or other. Their auditor examined the accounts of the bank on the 30th June, and immediately afterwards the London manager made those large advances, which he said were covered by stock operations secured to him, and no doubt there was security of some sort or other, but the share went from £10 to £12 per cent. premium to below par. (Hear, hear.) The London manager had furtively and fraudulently gone into speculations with shares, and no doubt, if the speculations had succeeded, he would have made immense profits; but the thing collapsed, and hence the losses. If they were to go through the whole of the accounts on

which the losses had arisen, he would truly tell them that there was not one single loss which he had encouraged, and respecting which he should not have told the manager to beware, as there was not a single name to which he would give credit for £100.

Mr. John Bigham reminded Mr. Walker that he had not answered the question as to how much money had been lost in consequence of the operations of the board or manager. (Hear, hear.)

Mr. Kendall said as these large losses seemed to have been sustained in London, he thought the meeting ought to give to Liverpool the credit of not having incurred them. (A laugh.)

The Chairman said the sum total against the London branch was £92,000. What the directors said was that £3 per share would more than amply cover everything, both past and the future.

A Shareholder—Is the loss of £92,000 attributable to the defalcations of the London manager? ("Yes.")

Another Shareholder—Is the £3 per share estimated on 50,000 shares? ("Yes.")

After one or two further remarks had been made,

The Chairman said the directors estimated the losses at very much less than would be covered by £3 per share, but they had given that large amount, as it would leave a margin to cover every loss. The directors had no desire to conceal anything from the shareholders—they were but fallible—but they had estimated the probable loss on each account to the best of their ability.

A Shareholder said he wanted to know what the position of Mr. Brown, the late Liverpool manager, was with respect to the bank? There were absurd rumours going abroad; it being, for instance, asserted that the late manager had speculated very largely in shares. It was far better to know the truth; there was no use of blinking matters, and he felt certain that things were not so bad as to some they appeared to be. (Hear, hear.) He wished to know whether Mr. Brown's dealings were included in the absolute losses set down to June 30th? He thought it was far better to know these things, for he believed rumour had greatly exaggerated the facts, to the detriment of the shareholders. (Hear, hear.)

Mr. McEwen said what had emanated from the chair on the subject to which the shareholder had alluded was said with extreme delicacy. He thought that so long as the chairman stated that the loss would be limited to a certain amount, he would say that out of delicacy that ought to be considered sufficient. (Hear, hear.) He would call upon the chairman to state what, under any circumstances, was likely to be the loss sustained by the resignation of the manager.

The Chairman—Is it the wish of the meeting that I should allude further to the matter? It is a matter of delicacy, but some of my colleagues wish me to answer the question.

The Shareholder said if the chairman thought better not to answer the question he would withdraw it at once. (Hear, hear.)

Several Directors (to the chairman)—Answer it.

The Chairman said, with reference to the gentleman referred to, he had not left the bank in the position, or acted in the manner in which the London manager had done. (Hear, hear.) It was necessary to draw a very wide distinction between the two gentlemen. (Hear, hear.) Mr. Brown did not appear in the books of the bank as a debtor (hear, hear); and with reference to some transactions with which he was recently connected there was an account which would probably be a deficit, and for

a tolerably large amount—not on Mr. Brown's account, but on another account, for which other parties were liable. The directors had estimated that account at its most extreme point of loss, and there were in the future circumstances which might reduce the amount very largely, say by thousands. The directors had examined the account, and weighed the loss, and put it down in their estimate already made. They had no desire to conceal anything from the shareholders. (Hear, hear.)

Another Shareholder—You say you have ascertained as nearly as possible what is the loss; is it included in the £92,000 which you have already mentioned?

The Chairman—No, it is included in the estimate of the future. Having occurred since the 30th of June, I could not include it in the balance-sheet of the 30th June. (Hear, hear.)

After a few desultory remarks,

Mr. John Bigham thought that the shareholders might safely congratulate the directors on having no lack of courage in coming before them at a time when they were not compelled by their deed of annexation to do so. (Hear, hear.) Whether the future would turn out correct or not he could not say, but he could not help feeling that at present the state of affairs was unsatisfactory, for the shareholders had lost a portion of their capital. (Hear, hear.) He did not, however, think that it would be wise to take advantage of the directors' courtesy by entering into a discussion that day. (Hear, hear.) During the past six months no more had been said to speak of had been made; and as a shareholder who was deeply interested in the bank, he thought it was advisable to postpone coming to any discussion until the legal time for holding their meeting—that was to say, at the end of the year—arrived. (Hear, hear.) When that time did arrive, of course the directors would come forward with a statement of accounts authorised and vouched for by the legal auditor. The accounts which had been produced by the chairman were not vouched for, and being strictly drawn up the directors might not consider themselves bound by them. (Hear.) At the next annual meeting they would have a legal instrument laid before them; and it would be right, because the shareholders would bring all the judgment they possessed or the knowledge they would then obtain, and say whether they believed they could recover what they had lost, and also whether they should continue a bank. He was quite sure that at the next meeting momentous questions would have to be decided, and he was assured the directors would come forward with a proposition which he was fully convinced would meet with the approbation of at least nine-tenths of the shareholders. (Hear, hear.) After consulting with many large shareholders, he was induced to believe that it would be wise in them to postpone any discussion for the present; they had only to wait four months, during which time they would be in a worse position than they were now, and they could then consider the proposition to which he had alluded. (Hear, hear.) For himself, he thanked the directors for being manly enough to enter of their own accord in the statement as to the present most unfortunate circumstances in which they were placed, but, as one having a deep stake in the bank, he advised them to waive any discussion here. (Hear, hear.)

Mr. F. Boulton said he did not like the tenor of Mr. Bigham's remarks. Mr. Bigham appeared to suspect that the directors were keeping something back, and that the accounts of the bank had not been sifted and thoroughly gone into. [Mr. Bigham said that was not what he wished to convey.] He (Mr. Boulton) was exceedingly sorry if he had misconstrued Mr. Bigham's

remarks, but it appeared to him that was really what had been said. The directors had nothing to keep back, and although they might be ashamed of the result of the business, he did not think that they were individually much to blame. The shareholders were aware that the affairs of the bank were managed by a consulting committee, and that the directors generally did not see the accounts or know the details. He had had the honour to be appointed to look through the accounts, and he believed that no more than £2. 10s. would be required to cover the whole of the deficiency on the accounts not yet closed. This was considerably under the estimate of the directors, but he believed that £2. 10s. would not only be sufficient, but would leave a margin. (Hear, hear.)

Mr. A. C. Stewart said various rumours had been circulated as to the bank; some of them with good foundation, some with little foundation, and some with no foundation at all. He thought they were all perfectly convinced that the statement put forth was a true statement, (hear, hear,) and that the directors had taken in every possible contingent loss. (Hear, hear.) The shareholders had been told what their property was worth at present, and that was a point gained. He was sure they could not but thank the directors for the courtesy they had shown in making the statement which had been submitted by the chairman. He was convinced, although he was not sanguine at any time, that the statement to be presented by the directors at the yearly meeting would be a much better statement than they had heard to-day. (Hear, hear.)

Mr. Councillor Kitchen moved a vote of thanks to the chairman, and the motion was carried unanimously.

The Chairman, in responding, said he should not like the shareholders to leave under the impression that at the annual meeting a "golden image" would be produced from the cupboard instead of a "skeleton" to which he had alluded in the early part of the proceedings.

The meeting then terminated; but Mr. Haigh announced that another meeting would have to be called for the purpose of confirming the resolutions which had been passed that day.

ADELPHI BANK, LIMITED.

The half-yearly meeting of this company was held at the Law Association Rooms, Cook Street, Liverpool, on the 20th July; Mr. W. R. Camidge, chairman of the company, presiding.

The following report was taken as read:—

"The past half-year has been distinguished by the numerous changes that have been made in the bank rate, which, for the most part, has had a downward tendency, the average price of money having been much below that of the previous half-year. Notwithstanding these circumstances, your Directors have been able to employ the funds at their disposal on remunerative terms, and have now the pleasure to announce that, after payment of all expenses and making ample provision for bad and doubtful debts, there is a sum of £6,560. 2s. 7d. left for profit. Out of this sum the directors have declared a dividend for the past half-year at the rate of 10 per cent. per annum, free of income-tax, and added £1,000 to the reserve fund; the balance of £991. 4s. 7d. has been carried forward in favour of the present half-year. The accounts have been audited, and the sureties examined as usual by a special committee of two directors.

Statement of Accounts from December 31st, 1864, to June 30th, 1865.

LIABILITIES.

Subscribed capital, £260,220; Capital paid up on 4,293 shares at £10 each, £42,930.; on 8,718 shares at £7 each, £61,026—£103,956.; less calls unpaid, £1,671	£102,285	0	0
Amount due by bank on current and other accounts	187,883	14	2
Reserve fund per last report, £46,500; amount added this half-year, £1,000	47,500	0	0
Amount of dividend now due and dividends unpaid	4,637	7	2
Balance of profit carried forward to next half-year	991	4	7
	£343,297	6	6

ASSETS.

Bills discounted, promissory notes, &c.	£300,499	19	7
Bank premises, &c., &c.	22,366	7	9
Cash on hand and at call	20,430	19	2
	£343,297	6	6

PROFIT AND LOSS.

<i>Dr.</i>			
General expenses, including salaries, stationery, directors' remuneration, law expenses, allowances for bad and doubtful debts, &c.	£3,379	6	2
Interest on deposits, &c.	3,536	3	0
Dividend now due	4,568	19	0
Amount added to reserve fund	1,000	0	0
Balance carried forward to next half-year	991	4	7
	£13,475	12	0
<i>Cr.</i>			
Balance brought from previous half-year	£711	15	2
Profits	12,757	13	11
	£13,475	12	0

The Chairman—I feel, gentlemen, it will be very unnecessary in me to detain you long to-day, and that, in rising to move the adoption of this report, there will be very little for me to do. On looking at the figures in the accounts, you will perceive that, since the last meeting, the paid-up capital has been considerably increased, and that there is a larger amount of deposits with us than there was at that time. There is one very important item in the report to which I will direct your attention for one moment. It is under the head of “profit and loss,” and the item itself has reference to profit. You will observe by this report that the amount is considerably below what it was the last half-year. That at first sight would appear somewhat strange, inasmuch as we have done more business than during the preceding half-year. But, as a set-off to that, if you will look to the other side of the report, you will perceive that the item there of general expenses, &c., is more than £2,000 less than it was in the last half-yearly report, thus showing that, although the gross profits appear less during this half-year than during the preceding one, the expenditure on the various items included in that (debit) column shows a considerably less amount. If you look in that column you will see that it includes an item for bad and doubtful debts. That is the true explanation

of the reduced amount of gross profits this half-year, inasmuch as there have been fewer bad debts during the last than in any previous half-year since we were constituted a bank. This just carries out the truth of the statement that, where large profits are made in banks, they frequently mean very great risks, and that, where smaller profits are made, the risks are smaller and the net profit is thus very little altered. I am glad to say that this is the real reason with us. We have been improving our class of business during the last half-year, and we have fewer bad debts to report. I think that is peculiarly gratifying.

Mr. Ollerhead—It occurs to me, Mr. Chairman, while you are on this subject, that it would be a very great improvement if the bad and doubtful debts were stated distinctly and separately.

The Chairman—Perhaps you will ask questions of that sort after I have made my statement. I shall be very glad to answer them then. There is another very important reason why the gross profits appear smaller now, and that is because of the downward tendency of the money market during the last half-year. All the banks suffer in the same way. They have not been able to obtain as high rates during the last half-year as they did during the previous one, and therefore I expect to see in the reports of all the banks a less amount of gross profits than before. Money is like every other commodity, and when there is a redundancy of it it is cheaper. That is hailed with pleasure by the general community; but to banks and capitalists it means a reduction in their profits. I will only state that the accounts, and all the securities, have been thoroughly examined by two of the directors: Mr. Williams and myself, and we have found the accounts in a very satisfactory state. The books we found properly kept, and all the securities were at the bank. In reference to the appointment of a public auditor, unconnected with the bank, I mentioned it at the last meeting. I stated then that the election or appointment of an auditor rested with the shareholders: that the directors were not at all averse to it; and that, if the shareholders thought proper to elect such an officer, or auditor, they would be quite ready to receive him. But no action was thought proper to be taken at that time, and it now rests with the shareholders to say whether they will have such an audit. I may state that no public audit could be more thorough than that already instituted by the directors and by the committee appointed to examine the debts. One of our directors, since the last meeting, has resigned, and the directors have not thought it necessary during the interval between that event and this meeting to elect a successor. The gentleman referred to is Mr. J. W. Bell, who is the chairman of another company, and, according to the articles of our association, that prevents him from holding the office of director with us. I shall be very happy now to answer any questions, and shall conclude by moving the adoption of the report.

Mr. A. Fisk, deputy-chairman—I have great pleasure in seconding the adoption of the report. It is a peculiarly gratifying one, sir.

Mr. Ollerhead—I have nothing further to say but that I think it would be more satisfactory, in all banking affairs, to separate the bad and doubtful debts. I think the National Bank have adopted the plan. Instead of classing the expenses and all the bad and doubtful debts together, it occurred to me that if the debts were stated distinctly it would make no difference, only that it would be more satisfactory to the proprietary. It is the duty of the proprietary to throw out suggestions, and as a suggestion I leave it in your hands.

The Chairman—Are there any other remarks to be made?

Mr. Brawley—For my own part I am quite satisfied with your being

auditor of the accounts. But I have heard it talked out of doors that it would be better if we had some person besides you to do it. To give satisfaction out of doors, perhaps, it would be better to do so.

Mr. J. B. Hughes—I think, Mr. Chairman, the accounts are extremely satisfactory, and I think they show favourably, for I happen to know some of the bad debts that have occurred in previous years. I think they show that the bank is in a very sound state, and all that we want is for the shareholders to keep their accounts there, and bring in those of our friends in order that we make progress.

Mr. Brawley—Is this the time to move for the appointment of an auditor?

The Chairman—Yes. The first thing would be to move a resolution declaring that an auditor should be appointed, and the next to appoint him.

Mr. Hughes—Can that be done without five days' notice?

The Chairman—Some shareholders have been under the impression that the directors ought to take the initiative in this matter, and appoint an auditor or propose one; but that really is not the case, because the auditor is supposed to be a check upon the directors; and I think it would be unreasonable for the directors to propose or appoint a man to that office. The auditor comes between the shareholders and the directors.

Mr. Hickey—I suppose an auditor would entail an expense on the company, and he would only have to go over what had been done already and would be guided by the work done already. If the appointment would be a satisfaction to the shareholders of course it would be better made. But for my own part, I am quite satisfied, as I am certain the audit could not be better done than it is, as these gentlemen are acquainted with every transaction of the company, and the public auditor would have to be told by either the manager or by those directors who have examined the books previously. Therefore, it would be of very little consequence as regards the good it would do to the company, and it would only entail an expense we have very little necessity for.

Mr. R. P. Williams—As one of the directors who have audited the accounts I assure you that they are in a most satisfactory state. As regards the appointment of an auditor I think there is a great deal of truth in the statement made at a recent meeting of the City Bank. There are many banking accounts which ought to be private, and the City Bank refused to appoint an auditor on the ground that many of the accounts ought not to be divulged. If you have perfect confidence in your directors the appointment is unnecessary. A public auditor would have to take the accounts as presented to him by the clerks. The statement made at the City Bank meeting, the other day, was considered by the shareholders perfectly satisfactory.

Mr. J. W. Bell—I think by a clause in the articles you are compelled to appoint two of your directors specially for this purpose, and I think it is quite sufficient.

Mr. James Alsop—How far the appointment would influence the public mind is another question. I don't think Mr. Williams's objection is a good one, because a publicly-appointed auditor would of course be bound to secrecy, and as a public man he would be bound to observe it. I have the greatest faith in the present audit. My faith would not be increased one iota if Mr. Harwood Banner, or Mr. Blease, or some other public auditor were appointed.

The Chairman—Perhaps, gentlemen, as the accounts presented to-day have undergone so thorough an investigation, you will think it proper to pass the report, and leave the question of the appointment of a public auditor for future discussion. There is no amendment, I think!

Mr. Hickey—There does not seem an inclination to appoint a public auditor; therefore it would be better to go on with the business.

The Chairman—In reference to what Mr. Ollerhead has said as to the grouping of the items together in the debit column, we have the details here in the books, so that the shareholders can see them, and we don't see that it is good policy on the part of the bank to publish them. As long as we who are interested in the different items have the books to go to we think that is sufficient.

The motion "that the report be adopted" was then carried unanimously.

The Chairman—Now, gentlemen, if you wish to enter upon the subject of a public auditor, this is the time.

Mr. J. B. Hughes—Can you do it?

The Chairman—I think we can. This is the clause. (Read 119th paragraph of articles.) I apprehend that anything that is done now will be as to the future, not to the past, inasmuch as this report is past. The meeting which makes such an appointment must fix the remuneration to be given to such auditor. So that there are three things to be determined. First, to settle whether there shall be an auditor, then to appoint him and then to fix his salary. Those are the propositions which now remain to be considered.

Mr. Brawley—I rise to move that there shall be an auditor appointed to work with the auditor that may be appointed by the directors. I will take the sense of the meeting.

Mr. Ollerhead—Is that to be retrospective or to apply merely to the accounts at the end of the half-year?

The Chairman—If you have a public auditor, he or his clerks will have to be at the bank frequently during the half-year. It is impossible for them to do it thoroughly merely at the end of the half-year, for it has taken Mr. Williams and myself many days.

Mr. Brawley—I only throw it out to get the sense of the meeting. What expense would it be attended with?

The Chairman—I don't know.

The Chairman—As there is no seconder to Mr. Brawley's motion it falls to the ground.

Mr. Brawley—It was mentioned just now that one of the directors had resigned, and that no one had been appointed in his place. I think it would be as well the next time the report comes out to put in it the names of gentlemen who are eligible to be proposed as directors. As the list of members is now so numerous, it might be found inconvenient to put them all in as used to be the case.

Mr. Ellison—The shareholders have access to the list of names at the bank, and if Mr. Brawley will come at any time to the bank I shall be glad to read them all over to him.

Mr. Ollerhead—Don't you think the shareholders have confidence in the present directors?

The Chairman—I am reminded by the manager that inasmuch as our shares are not quoted in the Stock Exchange it would be as well for the shareholders to recollect that either in the purchase or sale of shares they will receive every assistance from the manager. It is very pleasing to see that the premiums on the shares of this bank have remained so steady. While the premiums on the shares of many of the other banks, and especially the new banks, have fearfully depreciated, ours have remained steady. And, looking at the report, one need not be surprised at that, for we have an amount, nearly equal to half the paid-up capital in reserve.

There are very few banks besides ours that can show a reserve fund equal to half the paid-up capital.

Mr. R. P. Williams—The directors can only use their own individual influence in bringing business to the bank. During the whole of the past half-year the business of the bank has been steadily increasing, and increasing in a very good way. But the shareholders should assist the directors amongst themselves and their friends by bringing business to the bank. If every shareholder would only bring one account to the bank the amount would be doubled, and we should have to call for a larger amount of capital. And if the business goes on in the same way I think it will be one of the best and most profitable I know. The amount of the bad debts during the past half-year was barely £700. There is scarcely a bank in Liverpool—well managed as Liverpool banks are—can show so small an amount, and not a single penny of which has been made this half-year.

Mr. Ellison—It will be pleasing for the shareholders to know further, that one-half of the entire £700 is for one item which is in course of payment; but, as it is likely to take a few years before it is paid, the directors have treated it as bad.

Mr. Ollerhead—I think your explanation is perfectly satisfactory.

Mr. Hughes—I beg to move a vote of thanks to the chairman for presiding over this meeting, and also over the directors.

Mr. Brawley—I beg leave to second that.

The vote having been passed,

The Chairman said—Gentlemen, I can only thank you for your expression of approbation. I assure you that the directors are quite as worthy and as deserving of thanks, as myself, and perhaps more so. I am only one amongst the others, and they have all been equally zealous with myself. I am very glad to see such a large attendance here to-day. It shows the interest the shareholders take in the affairs of the bank, when they attend here in such numbers, notwithstanding the excitement out of doors caused by the county election.

Mr. J. W. Bell then moved, and Mr. Ollerhead seconded, a vote of thanks to the directors and manager for the way in which they had managed the business of the bank during the past half-year.

The Chairman—I think the business of the meeting would not have been satisfactorily done without this vote, for the directors have been attentive, and I am sure the manager and the general officials have been most attentive. Mr. Manager, I have great pleasure in presenting the thanks of the meeting to you, and, through you, to the whole of the officials at the bank.

Mr. Ellison—I am very much obliged to you gentlemen, for this renewed expression of your thanks and confidence as to myself and the staff under me; and I assure you that there is but one wish on the part of myself and those working under me—to do all we can to further the interests of the bank.

Mr. R. P. Williams—Gentlemen, on the part of the rest of the directors, allow me to return you our thanks. We take it as a motion of confidence. We all of us do the very best we can, and I can add my meed of praise to the manager. He certainly does work hard, and is at the bank early and late. When we were auditing the accounts, the manager used to be there as late as ten o'clock and after.

This terminated the business of the meeting.

THE ESTATES BANK.

AN extraordinary general meeting of the shareholders of this bank (limited) was held at the Freemasons' Tavern, on the 22nd August, to consider the advisability of confirming an agreement entered into by the directors for an amalgamation with another bank, and to pass resolutions thereon.

The chair was occupied by Mr. Hattersley, chairman of the bank, who at length detailed the terms agreed on by the directors for an amalgamation with the Exchange Bank, Lombard Street, and he believed that such amalgamation would be beneficial to all parties. The ten-pound shares of the Exchange Bank would be transferred to the shareholders of the Estates Bank, in proportion to the amount paid up. The shareholders of the latter bank would have the advantage of being connected with a corporation doing a certain and lucrative business, and they might reasonably look forward to good dividends.

Lord Kinnaird, Dr. Ryan, of Dublin, and several of the provincial agents, expressed themselves in favour of the proposed amalgamation.

A Lady here stated that as a shareholder she had some doubts as to the policy of the proposed amalgamation. She would like to know if the shareholders of the Estates Bank were to receive any bonus for handing over their business to another company, and she had not yet heard what special advantages they were to derive from the change, especially as they were now going on well and paying a good dividend.

Ultimately the resolution for the amalgamation of the two banks was unanimously adopted.

NATIONAL BANK.

A SPECIAL general meeting of the proprietors of this bank was held on the 22nd August, at their office in Old Broad Street, in compliance with the following notice issued by order of the board of directors:—

"Notice is hereby given, that two successive special general meetings of the proprietors of the National Bank will be held at the office of the society in Old Broad Street, London, on Tuesday, the 22nd day of August next, and on Wednesday, the 23rd day of August next, at one o'clock precisely in the afternoon of each day, to consider the propriety of further increasing the capital of the society, by the creation and issue at par of 10,000 new shares of £50 each, to be distributed amongst the present shareholders in the proportion of one new share for every four of the existing shares, and (by way of bonus) to credit each such new share with £30 paid up by transfer to capital account of that amount from the rest or undivided profits of the society, thus placing such new shares upon the same footing in every respect as the existing shares, and whereby the entire capital will be increased to the sum of £2,500,000; and to provide for the rights (in respect of said bonus) of proprietors, the number of shares held by whom at the time fixed for the distribution of the proposed new shares, may not amount to four or may not be a multiple of that number. And at which meetings now called such resolutions may be passed as shall be deemed advisable for carrying out the objects above-mentioned, and certain resolutions relating to such objects, and approved of by the court of directors, and recommended by them for adoption, will be submitted to the proprietors."

The chair was taken by Mr. M'Kenna, M.P. There were not more than between twenty and thirty shareholders present upon the occasion, and the

resolutions proposed by the directors were adopted by the meeting without any opposition.

The Chairman said that the objects contemplated by the resolutions which were to be submitted to the assembled proprietors were of a very simple character, although they were couched in somewhat lengthened and technical language. Those objects were to transfer a sum of £300,000 from their reserve or undivided profit to capital account, and to transfer it in such ratio that each shareholder should be entitled to one new £50 share, representing £30 of paid-up capital for every four shares he held in the existing stock of the company. There was a further provision with respect to the holders of shares not divisible by four; and it was proposed that they should receive for each such share certificates or vouchers, which would be saleable in the market after their position should be duly certified by the bank. They had at present a nominal capital of £2,000,000, and £1,200,000 of that sum had been paid up. Their rest or undivided profit, after the payment of the last dividend, was between £700,000 and £800,000, and when the resolutions he had then to submit to the meeting were carried, as he anticipated they would be carried on that and on the succeeding day, the paid-up capital of the bank would amount to £1,500,000, and the reserve fund would stand at between £400,000 and £500,000. A dividend on the new shares of the same amount as that paid on the present shares would necessitate a distribution among the proprietors of an additional sum of £10,000 a year—that was to say, that while they now divided £100,000 a year, their future earnings should amount to £200,000 a year if they were to maintain the same dividend. It might be asked whether the bank had arrived at a point at which the directors could fairly expect to realise a profit of £200,000 a year; and to such a question he should confidently answer in the affirmative, while he believed that before very long the earning powers of the bank would reach a much higher figure. He did not pretend to predict precisely what their profits were likely to be, but he thought he could confidently state the ratio at which they had hitherto increased would not be materially diminished. He had lately received some communications from shareholders who appeared to labour under the impression that the new £30 shares which it was proposed should be issued would require that the person who was to receive them should pay up that amount. But that was a complete misapprehension, for the money was to be paid by the bank in the manner he had just stated. He believed he had offered all the necessary explanations in reference to the immediate business which they had that day met to transact. But it was, perhaps, desirable that he should avail himself of that opportunity of making a few observations with respect to their general position. Their balances from customers' accounts in London, on which interest was payable, were at present, as nearly as possible, tenfold what they had been four years ago, and their balances from customers' accounts in London on which they paid no interest were equal to the amount of customers' accounts on which they paid no interest in the whole of their 54 branches in Ireland. But their Irish business had not diminished, while their metropolitan business had so greatly increased, and thus balances from customers' accounts in Ireland were greater at present than they had been at the corresponding period of last year. He had to conclude by submitting to the meeting in a single motion a series of six resolutions, which had been framed for the purpose of carrying out the objects for which they had been brought together, and which they would have to confirm at a second meeting to be held on the day succeeding. Those resolutions were as follows:—

“Resolved:—First—That the capital of the society, which was originally £1,000,000, and which was by resolutions passed at two successive

general meetings of proprietors, held on the 23rd day of March and the 24th day of March, 1864, increased by the creation of 20,000 new shares of £50 each, shall be further increased by the immediate creation and issue of 10,000 new shares of £50 each, so as to increase the entire capital of the society to £2,500,000.

"Secondly—That such last-mentioned new shares shall on or under date of the 31st day of August instant be distributed by the directors amongst the proprietors on the register at the time of such distribution, in the proportion of one new share for every four of the existing shares, and each such new share shall be credited by way of bonus with £30 paid-up by transfer to capital account of that amount from the rest or undivided profits of the society, to the intent that such new shares may then be upon the same footing in every respect as the existing shares. And with respect to proprietors of three shares only or less, or of more than four shares not being a multiple of four, each odd share shall entitle the proprietor of it to one-fourth part of such bonus of £30 in respect of one new share. And the directors may give to each holder of any such odd share or shares such certificate or certificates under the hands of any two or more of them of his or her interest in respect to a new share, and of his or her right to dispose of such interest, but so that such disposition, if not to an existing proprietor, shall be subject to the approval of the directors, and shall in any case be verified by lodgment of the certificate at the company's office in Old Broad Street, on or before the 31st day of December next.

"Thirdly—That after the 31st day of December next, the shares created in respect of such odd shares and not previously disposed of under the last resolution, may be sold by the directors, who in that case shall place to the credit of the parties entitled thereto respectively in the books of the bank, without interest, the amount realised from the sale of such shares.

"Fourthly—That the proprietors of the new shares now created shall hold the same upon and subject to the same terms and regulations, and with the same rights and privileges, upon and subject to which the original shares in the society are held.

"Fifthly—That every proprietor or other person to whom any of the new shares now created shall be allotted or sold under the foregoing resolutions, shall, at such time and at such place as the directors may specify, execute such deed or instrument as the court of directors shall require, for the purpose of making himself or herself liable to the rules and regulations of the society, in respect of the new share or shares so allotted or sold to him or her.

"Sixthly—That the provisions embodied in the foregoing resolutions shall be new regulations and provisions of the society, and such resolutions shall accordingly be considered as amending, altering, or repealing the existing regulations and provisions, so far as they may be inconsistent with such new regulations and provisions."

Mr. Bolus Smith seconded the motion.

Mr. Fox said he had no opposition to offer to the motion. But he wished to take that opportunity of expressing his gratification at the position in which the bank was at present placed. They were at that moment reaping the fruits of the judicious husbandry of their resources in past years, and they were about to widen the field of their future operations. They had at present a sum of more than £1,000,000 committed to their charge, and that fact showed the progress they had made in securing the public confidence. He hoped that before the lapse of many years their accounts in Ireland would make a much more important figure than they did upon that occasion, and he believed that a better day was about to dawn upon that country, from which he had just come, and that her in-

habitants would soon find profitable employment through the application of capital to the development of her natural resources.

The resolutions were then unanimously adopted.

The Chairman said that they had no further business to transact upon that occasion, but it would be necessary that the motion to which they had just given their assent should be confirmed by a second special meeting, and the shareholders would have to assemble again on the following day for that purpose.

The proceedings then terminated.

The second special general meeting of this bank was held on the 23rd August, at their office in Old Broad Street, for the purpose of formally confirming the resolutions adopted at the meeting of the day preceding.

Mr. M'Kenna, who again occupied the chair, said that his duty upon that occasion was altogether of a formal character. He had, on the day before, explained to the best of his ability the scheme for the transfer of £300,000 of their reserve or undivided profits to capital account, and the creation of a proportionate number of new shares; and he had upon the present occasion only to move the confirmation of the six resolutions in which that proposal was embodied.

The motion, having been seconded by Mr. Ashlin, was at once unanimously adopted.

Mr. Wheeler said he thought that the thanks of the shareholders were eminently due to the directors for the manner in which they had conducted the business of the bank, and more especially for the masterly step just adopted upon their recommendation (hear, hear). He believed that the success of a bank depended exclusively on its direction—that if the direction were good it would certainly prosper, and that if the direction were bad it would certainly prove a failure. They all knew how successfully the National Bank had been managed by the present board of directors, and he begged leave to move to them the warm thanks of that meeting.

Mr. Stock, M.P., seconded the motion. Having for some time had many relations with that bank, he could testify that there was no establishment of the kind more admirably managed, and he was sure they all felt that they were deeply indebted to the gentlemen by whom its business was conducted.

The resolution having been unanimously carried,

The Chairman, in acknowledging the compliment, said he had to thank the meeting for their kindness upon that occasion. He could assure them that the best efforts of his colleagues and of himself were directed to the promotion of the welfare of the establishment, and that the greatest pleasure which a board of directors could enjoy was that of receiving such a vote as that which the meeting had just passed, and of feeling that it was not wholly unmerited.

Mr. Stock next proposed a vote of thanks to the chairman, who was, he said, the mainspring of the whole establishment, and who devoted to it all his time and energy.

This motion was seconded by Mr. Wheeler, and unanimously carried.

The Chairman then briefly replied, and the proceedings terminated.

ORIENTAL COMMERCIAL BANK, LIMITED.

AN ordinary general meeting of the shareholders of this bank was held on the 23rd August, at the London Tavern; Vice-Admiral Burney in the chair.

The following report was read:—

“Your directors have much pleasure in submitting the accompanying exposition of your affairs. The business—which is that of the former Oriental Commercial Company, Limited, progressively extending upon the power of the three concurrent and combining companies—emerges from a period of some considerable mercantile disturbance with this proof of a steadily increasing prosperity. The balance-sheet embodies the figures of the financial year, since the last published accounts of the Oriental Commercial Company, Limited; but as the former and separate interests of that company have been provided for, without interruption to the regular course of business, the balance of net profits to be dealt with really relates only to the operations of four months from the 1st of March last. The capital amount included, with reference to former members of the National Financial Company, Limited, refers only to shares actually exchanged on or before the 30th June last, and which rank for dividend from the 1st of March, contemporaneously with those of former members of the Oriental Commercial Company, Limited. The remaining £100,000 dates, upon the accounts, from the 17th of May last, to be vested in trustee officers for twelve months, and subject to a separate and special provision as to the profits which will have accrued thereon. As the period embraced by the combined accounts now submitted is fragmentary—having been thus marked out to preserve the uniformity of published returns and of general meetings, and seeing that the season comprised is that of the least activity and profit in the course of the company's regular business, your directors have determined to recommend that the net profits disposable be treated for distribution *ad interim* in the declaration of a dividend at the rate of 10 per cent. per annum, which will absorb £5,738, leaving £3,913 to be carried forward for accumulation, and dealt with as the company may hereafter determine. Your directors solicit attention to the fact that of the profits, amounting to £25,854, no less than £19,106 has been derived from commissions, and £5,954 from interest, showing the safe nature of the operations. The large sum yet in the company's hands on account of dividends previously declared, arises chiefly from amounts payable to members who have accounts current with the company, into which upon settlements such dividends will have to pass. The establishment of a branch at Patras, under the local public administration of a council and committee, with a view to the very large and important interests of the company in that quarter, has been hailed with cordial satisfaction; and your directors are assured of a further increase of business under gratifying conditions. From all directions in which the regular mercantile and exchange operations of the company have been opened up and extended, your directors continue to receive no less favourable intelligence:—notwithstanding that the prevalence of a serious epidemic on the coasts of the Mediterranean has operated to check activity for a time. Your directors can, therefore, express to you their confident anticipation, that the coming produce season, with a promise of more settled markets, will contribute amply to the profitable employment of your capital, so as at once to provide for liberal dividends, and for an adequate addition to the reserve.”

Balance-sheet, 30th June, 1865.

Dr.

Capital, viz.—The Oriental Commercial Company, Limited, 10,000 shares of £20 each, at £7 paid, £70,000; 4,652 shares, new issue, £23,278. 16s.; the National Financial Company, Limited, 19,720 shares of £20 each, at £4 paid, £78,880; the Financial Corporation, Limited 25,000 shares of £20 each at £4 each, £100,000	£272,158 16 0
Creditors on bills payable against produce and other securities	174,643 19 8

	<hr/>

The Chairman in moving the adoption of the report, said he felt called upon to say a few words, as it was probable some of the shareholders had not received the balance-sheet and report. If such was the case they should be very happy to furnish them with them. It was their endeavour to send out to every individual shareholder the report, as they fearlessly placed it before the public. He thought this report was a most satisfactory one, and he was in a position to look them in the face, and say he had not deceived them. If there were any questions they wished to put to them with respect to the amalgamation, they were ready to answer them. They need not call them there, but they wished every six months to give an ad interim dividend. Although only four months had then elapsed, they called them together to agree to a dividend of 10 per cent., which he thought they were justly entitled to distribute. He begged to move the adoption of the report.

Mr. Mavragordato seconded the adoption of the report.

Mr. Short said they were entering a new history of their capital. Would it not be well to investigate the question whether they should not pay 15 per cent. on that as a commercial company. In all commercial companies there was a certain amount of reserve fund, and if it were a large one, it placed the company in a better position than other companies which had not so large a reserve. When they had got a reserve fund of £270,000, their position was secured and the value of their shares increased. He would rather see the dividend 2½ per cent. less, and to have such a reserve fund as would place them in a proud position.

The Chairman said they did not intend to do any business but commission. As to the financial business, he had pledged himself not to do financial business.

Mr. Short—What is the reserve fund?

Mr. Swan—£49,500.

Mr. Short—What do you carry over?

Mr. Swan—£3,931. It now amounted to £49,500.

Mr. Morris asked what was the position of the shareholders who had transferred the Financial Oriental new shares?

Mr. Swan said there was no shareholder in the Oriental Financial Company who would not pay £3 or £7. All he would have to do was to hand over the difference to the purchasers.

Mr. Cobbet said there was a sum of £24,600 receivable on bills. Did they hold any security for this?

Mr. Swan—Certainly. They held security to the extent of £200,000. These bills were not held as security. They were received in connection with shipping.

Mr. Cobbet asked why £15,000 had been paid to the shareholders of the Oriental Commercial Company.

Mr. Swan said the Oriental Commercial Company entered into arrangements with the Financial Corporation. The Oriental Financial Corporation had a reserve fund amounting to £20,000, and it had established a business for which it was proposed to give a large amount. Therefore, paying it was a very great advantage to the other company coming in. The other companies should be paid back by the premium which they really created on the shares.

Mr. Cobbet—How many years' purchase was that?

Mr. Swan—It was but a little more than two-and-a-half years' purchase.

Mr. Cobbet—What did that balance refer to—the National Financial Company, Limited, balance £56,000?

Mr. Swan—Since then £26,000 has been paid off that. The £30,000 has been paid up, and they had nothing to do with this account.

Mr. Ormerod said he saw in the accounts relative to the Financial Corporation there was a very large advance under the head advanced for liquidation.

Mr. Swan—The amount of £37,100 was an item belonging to that company. They had made an agreement with the company, whereby they agreed to see that the accruing liabilities should be settled. They were to afford to them twelve months for the realisation by slow degrees. That would be the best result, for if they had pressed it on the market it might not have been realisable at all. Therefore they agreed to assist them in meeting the realisable assets as they felt due. The difference between £190,000 and £90,000 of the liabilities of the company had been paid, and of which £37,000 was paid out of their funds.

Mr. Cobbet—Was that paid off?

Mr. Swan—That is not due yet. The money was not due, and would not be needed for two months.

Mr. Ormerod said there were 25,000 shares at £4 per share, but only £2 a share was called up. The Oriental Financial Company limited it to 25,000 shares at £4 per share.

Mr. Swan said the capital of the National Financial Company was £75,000. Those shares of the National Financial Company had been converted from one £75 share into three £25 shares, subject to the payment of £25,000 being contributed to the reserve fund in the accounts of the Oriental Finance Company.

Mr. Ormerod—Are the shares at par?

Mr. Swan—They were at par at the commencement, but the liabilities were not due till the 6th of May, 1867.

Mr. Ormerod—Had the £100,000 been paid to them?

Mr. Swan—The £100,000 was secured to them. That was now the Oriental Commercial Bank, Limited. The £100,000 was carried on certain grounds, and the securities were credited to the liquidators of the company, they having to the 7th of May, 1866, to make good that amount. They certainly did not anticipate there would be any loss on that account. The Oriental Commercial Company had realised their assets and paid their debts.

Mr. Cobbet—You do not apprehend any deficiency?

Mr. Swan—Certainly not. They came there to place their affairs before them in the most clear and satisfactory manner, and if any shareholder came to the office they would show him the figures for himself to judge.

Mr. Cobbet—Could they make any estimate of what they would realise?

Mr. Swan—No. For certain securities were not due, and they could not make an estimate of a future realisation.

Mr. Watford said that their operations at that moment were of the most

satisfactory kind. When they entered into it they paid £50,000 down. The liabilities were £100,000. They were reducing the liabilities day by day. What further amount of reduction there might be he did not know. They had certain securities to realise, and by the 6th of May, 1867, they should realise all, and 10 per cent. would be paid to the shareholders by the Financial Corporation.

Mr. Swan said they had no separate transactions with the Financial Corporation, Limited. They could only recognise them, acting under the advice of counsel, that nothing should be done in the form of monetary transactions, except it was carried to the account of the liquidators. He might say, whatever arose out of it, the money would be paid over to dividend. They would pay out of that whatever arose on the profit. They found from the liquidators that there was no supposition that they had paid anything for goodwill. Who paid for the goodwill? They had corresponded with them about their goodwill, but it proved that it was they who expected the goodwill. The Oriental business was an increasing business. It had given them £16,000 as a whole, and he believed no more legitimate, or more fair fund for business, or a more profitable one in the commercial world, was to be found.

Mr. Morgan said that it made a difference whether it was paid to the liquidators or to the shareholders. It appeared to him they were bound to pay the shareholders of the Financial Corporation, and those who were shareholders at the time ought to have 10 per cent.

Mr. Swan said they were acting in all that had been done to carry out those arrangements to the best possible advantage to the greater body of the shareholders. Mr. Hatton, their professional adviser, told them there was no separate covenant; on the contrary, it required a series of covenants, and the Oriental Commercial Company, the Financial, and the Oriental Bank were represented by three gentlemen whose names were therein. If it was the subject of a covenant to pay a dividend, or anything else, it might be quite obvious to any lawyer, in order to create that covenant, and to give it to each individual, that he should have assigned it to another, and if he brought an action the plea which he would put in would be that the charge was on the other party. That was the advice they were acting on. They believed they had to pay it legitimately, and if it should be so, they should be very glad to pay it.

Mr. Short said if the business of the Financial Company was carried out he would not have had anything to do with the company. He understood the general arrangements were successful in their operation, and looked at the sort of shareholders contributing a certain amount of capital for the Oriental Commercial Bank, for which capital they had so many shares, but which capital was to be employed in the proper business of the Oriental Commercial Bank. That was an important thing to be made known to the public, and Mr. Swan stated the fusions of the capitals of those companies so far as their operations as the Oriental Commercial Bank went. He believed there was a soundness in their operations. He had not the same opinion of all financial companies, and he should be sorry to employ his capital in them. (Hear, hear.)

Mr. Swan said with a capital of £115,000 they had made a profit of something like £24,000 in four months. What would it be when they had £272,000, and what would they make in the next half-year? Seeing the large capital they would be entitled to in twelve months, he asked the manager if their profits were £24,000 on the employment of a capital of £115,000, could he assume that with a capital of £272,000 he could

employ it with equal profit. The answer he got was most satisfactory. He was perfectly satisfied in his own mind from figures, facts, and statements made, as connected with the future business, that they might make a large profit on £272,000. He believed the new company was contributing a large dividend to the shareholders.

Mr. Cobbett—If I feel disposed to pay £7. 5s. as a shareholder, I can do so?

Mr. Swan—Unquestionably; whenever you please.

The Chairman—Their business was so good, it exceeded their expectations. In Patras they instituted a board of the first merchants, and the chairman of the chamber of commerce had joined the board directly. He saw such a promise of business and such a prospect from all parts of the Mediterranean, he thought they would find at the end of the year they would have much larger returns than they now had. (Hear, hear.)

The report was unanimously carried, and thanks having been voted to the chairman the proceedings terminated.

LONDON AND MEDITERRANEAN BANK, LIMITED.

A FORMAL meeting of the proprietors of this bank, with which the Continental Bank Corporation is now amalgamated, was held on the 23rd August, at the South Sea House; Mr. W. W. Cargill in the chair.

The Chairman stated that the meeting was called in order to satisfy the requirements of the committee of the Stock Exchange. He, therefore, proposed a special resolution for making the following alterations in the articles of association, viz.:—To insert the words “except the shares of the company” after the word “foreign” in section 9 of clause 86; between the words “company” and “partnership” in section 11 of clause 86; and after the word “foreign” in clause 99; and to insert the words “except in purchasing the shares of the company” at the end of clause 100; the simple effect of which is to prevent the company from dealing in its own shares.

A vote of thanks to the chairman closed the proceedings.

NATIONAL BANK OF LIVERPOOL.

An extraordinary general meeting of the shareholders of this company was held at the bank, No. 14, Cook Street, on the 31st of July, to receive from the directors a report of the progress of the bank since the last ordinary meeting, and a declaration of dividend. Mr. Robert Higgin, chairman of the company, presided.

The Manager read the report as follows:—

“The directors of the National Bank of Liverpool, Limited, have much pleasure in presenting to the proprietors their fourth half-yearly report. After writing off all bad and amply providing for doubtful debts, the accounts of the bank, made up to the 30th of June last, show a net profit of £12,677. 14s. 1d., to which must be added £2,810. 9s. 10d. brought forward from last account, and £746 balance of premium on new shares, leaving available £16,234. 3s. 11d. for distribution, which the directors have applied as follows:—In payment of a dividend, free of income tax, at the rate of 10 per cent. per annum:—

10s. per share on 20,000 old shares	...	£10,000	0	0	
7s. per share on 8,779 new shares	...	3,072	18	0	
					13,072 18 0
Profit and loss next account	3,161 10 11
					<u>£16,234 3 11</u>

The assets and liabilities of the bank, and the profit and loss account to the 30th of June, are as follows:—

ASSETS.

Cash in hand and at bankers'	£120,159	3	11
Due to the bank on bills discounted, loans to customers, &c.	1,010,086	0	8
Bank premises	19,511	9	3
				<u>£1,149,756</u>	<u>13</u>	<u>10</u>

LIABILITIES.

Capital paid up	£282,460	0	0
Capital paid in anticipation of future calls, at 4 per cent. interest	5,925	0	0
				<u>£288,385</u>	<u>0</u>	<u>0</u>
Reserve fund	103,895	0	0
Due by the bank on deposit and current account, bills on London, &c.	738,052	9	11

				<u>£1,149,756</u>	<u>13</u>	<u>10</u>

PROFIT AND LOSS ACCOUNT.

Balance from last half-year	£2,810	9	10
Net profit for half-year ending 30th June, 1865, after writing off bad debts and pro- viding for doubtful debts	£15,867	14	1
Less rebate at 3 per cent. on bills current	3,190	0	0
				<u>12,677</u>	<u>14</u>	<u>1</u>
Balance of premium account	746	0	0
				<u>£16,234</u>	<u>3</u>	<u>11</u>

"Of the 2,494 new shares on hand at last meeting, 1,273 have been taken up by the proprietors at a premium of £7 per share, producing £8,911. This sum the directors have applied as follows, in accordance with the original understanding:—

Reserve fund, increasing it to £103,895, being £5 per share	£6,365	0	0
Extinction of preliminary expenses...	1,800	0	0
Profit and loss	746	0	0
				<u>£8,911</u>	<u>0</u>	<u>0</u>

"Owing to the numerous mercantile embarrassments and severe fluctuations in value of many of the staple articles of commerce, the directors have continued to aim at a safe rather than at an extensive business; and though the last half-year has not been favourable to banking, they are

happy to say the progress of the bank has been satisfactory, and that many new connexions have been formed since Christmas last."

The Chairman said—During the last six months there has been an unusual degree of distrust and anxiety in commercial circles, and but very little new business originated—that is, new commercial business—in the town. In accordance with prudence, the directors have endeavoured by all means in their power, and, as the result has proved, successfully, to preserve from loss the business they had obtained, leaving to more auspicious times the greater development of the bank, for which in Liverpool there is ample scope without unduly interfering with the business of our banking rivals. In carrying out this course, all safe business of a profitable nature, and which did not involve large advances, has been freely entertained; and as commerce settles down once more to its ordinary channels and usual risks, I doubt not but this bank will largely share in the successful results of trade. The amount of our acceptances, which does not appear in our account, is small, reaching only £20,650. The rebate on our bills was taken at 3 per cent., the bank rate on the 30th June last, up to which our accounts were balanced. Of the 1,221 new shares on hand on the 30th of June, a considerable number have since been allotted—the balance the directors reserve for distribution as the interest of the bank may require. The shareholders seem to have but little desire to attend our meetings, it being with considerable difficulty that we are able to procure the attendance of the number required by our articles of association for the purpose of declaring a dividend to the 30th of June. Although this non-attendance is very complimentary, as meetings when an unfavourable report is feared are always sufficiently numerous, still, as each meeting involves considerable trouble and expense to the bank, the directors purpose, at some favourable opportunity, to ask for powers to alter the articles of association so as to enable them to declare the mid-summer dividend without a formal meeting of the proprietors. If this alteration is made, the shareholders will receive their dividend and the report much sooner than at present. The cheques for the dividend now declared will be posted this evening. That ends the business of this meeting—it is an extraordinary meeting merely to declare the dividend, and there is nothing more to be done.

Mr. John D'Arcy, of Dublin, said—Mr. Chairman, having come from the sister country, where we hold a large stake in the bank, I have a desire to make a few remarks. The shareholders of this bank have good reason to congratulate themselves on the very favourable report presented this day—the more so, when we consider the unsettled state of business during the past six months, as well as the low rate of interest prevailing. When we consider that many other similar institutions, commencing at the same period, were unable to pay any dividend, we should doubly congratulate ourselves on the present results. That this is owing to the good arrangements of the directors and the manager, there can be no doubt; and to those gentlemen who steer this great ship we are all deeply indebted. I confess I was not prepared to hear so satisfactory a state of things, not to receive so handsome a dividend, which I look upon now as almost permanent for the future. I hold 100 shares in this establishment, and I never felt more confident in my investment than on the present occasion. I hope that, as we have taken our name from a great banking institution, we shall go on and prosper in its wake. (Hear, hear.)

The Solicitor—The meeting, gentlemen, is over. We are much obliged to you for your attendance.

The proceedings then terminated.

LONDON AND COLONIAL BANK, LIMITED.

A SPECIAL meeting was held at the London Tavern, on the 23rd August, to consider an amalgamation with the International Bank; Mr. J. Geary in the chair.

The balance-sheet was as follows:—

Dr.

Capital called up, 10,000 old shares at £20, £200,000; less calls unpaid to date, £39,794. 10s.	£160,205 10 0
Capital, new issue of 4,009 shares at £5, added to £20 calls paid in advance, £24,565, less calls unpaid, £14,480 ...	10,085 0 0
Premium on new issue at £4 per share, £19,636, less amount unpaid, £5,116	14,520 0 0
Sundry creditors	3,639 12 1
Total	£188,450 2 1

Cr.

Cash at Alliance Bank	£90 0 0
Stamps on hand	2 11 6
Montreal bank premises £573. 12s. 1d.	666 14 3
Good debts	1,684 5 6
Branch accounts, £5,664. 6s., less Montreal £121	5,543 3 1
Estimated to realise	4,000 0 0
International bank current account, £35,572. 17s. 4d.	41,923 17 1
Doubtful debts, J. Field and others	35,443 0 6
Allan Hay (New York)	70,645 11 4
J. Gladstone & Co., £22,964. 1s. 6d.	123,982 13 3
Preliminary expenses	14,788 6 4
Profit and Loss account	2,755 5 5
Total	£188,450 2 1

The Chairman said they were aware that at the meeting which they held on the 6th of July a certain agreement between themselves and the International Bank was brought up, containing a clause introduced by the latter bank, requiring that a warrant should be given them against all claims which might subsequently occur. The offer was declined, and it was resolved that a committee and the board of directors should take such legal steps as they deemed advisable. After great delay terms were arrived at, in the shape of an agreement with Messrs. Price and Devot, brokers, to take the shares at a given price. To carry out the agreement it was necessary for the bank to wind up voluntarily.

Mr. Morris (the solicitor), in explaining the nature and effect of the agreement, said that the holders of £2,578 old shares had expressed their willingness to sell at £7. 10s. per share, and the holders of 650 new shares had given evidence of their wish to adopt the same course, the price being in their case £3. 15s. per share. Only the holders of two shares had expressed any hostile views.

After some discussion, a resolution sanctioning the voluntary winding-up of the company was carried unanimously.

A vote of thanks was proposed to the chairman, and the proceedings terminated.

BIRMINGHAM JOINT-STOCK BANK, LIMITED.

The following are the liabilities and assets of this bank, according to the 21st and 22nd Victoria, cap. 91 :—

The liabilities of the Company on the 1st day of July, 1865, were :—

Proprietors' capital	£190,840	0	0
Due to the public on deposit, current, and other accounts ...	954,459	6	1
Capitalization fund... ..	20,846	4	10
Guarantee fund invested as follows:—In consols, £40,000; New Three per Cents., £10,000; East Indian Railway Five per Cent. Debentures, £10,915. 13s. 2d.; London and North-Western Railway Debentures, £10,000; London and South-Western ditto, £10,000; North-Eastern ditto, £10,000; Midland ditto, £10,000; South-Eastern ditto, £10,000; Lancashire and Yorkshire ditto, £10,000; Great Western ditto, £9,000; Great Eastern ditto, £20,000; uninvested, £178. 4s. 1d.			
	150,093	17	3
	<hr/> £1,316,239 8 2 <hr/>		

The assets of the Company on that day were :—

Government securities, &c.... ..	£149,915	13	2
Bills of Exchange	670,106	13	2
Advances and other loans on security	433,645	7	10
Bank premises	5,523	10	11
Cash in hand and at agents	57,048	3	1
	<hr/> £1,316,239 8 2 <hr/>		

CALEDONIAN BANKING COMPANY.

The twenty-sixth annual general meeting of shareholders was held at the bank, on the 7th August, when the following report was read and adopted :—

“ The directors have much satisfaction in laying before the shareholders the result of another year's operations of the bank. The net profits of the year ending 30th June, after payment of income tax and providing for bad and doubtful debts, amount to £23,185. 15s. 9d., being an increase upon previous years, caused by the more profitable character of the business during the first half of the year just terminated, and also by the realisation of some of the bank's securities at an enhanced value. The balance of profit brought forward from last year is £765. 16s. 11d., making the total sum now falling to be disposed of, £23,951. 12s. 8d., which the directors propose to appropriate as follows, viz. :—

£12,500	0	0	—in payment of a dividend at the rate of 10 per cent. per annum, without deduction of income tax.
9,000	0	0	—for addition to the bank's surplus or guarantee fund, thereby increasing it to £38,000.
750	0	0	—for the usual annual instalment in reduction of the cost of the bank's houses.
1,701	12	8	—balance to be carried to next account of profit and loss.

£23,951 12 8

The directors recommend that the dividend should be raised to 10 per cent., and they feel assured the shareholders will agree with them in thinking the increased rate of dividend is justified by the present position and prospects of the bank. The directors have to report that they have contracted for suitable premises for the branches at Grantown and Bonar Bridge. The retiring directors at this time are Charles Fraser Mackintosh, Esq., and William Simpson, Esq., and these gentlemen, by your regulations, not being eligible for re-election, the directors recommend that Eneas William Mackintosh, Esq., of Raigmore, and Robert Smith, Esq., Gordon Terrace, Inverness, be elected in their room."

Balance-sheet on the 30th June, 1865.

LIABILITIES.

Paid-up capital	£125,000	0	0
Circulation	83,256	0	0

COMMERCIAL BANK OF LONDON.

A MEETING was held on the 25th of August at the London Tavern. Mr. W. Jackson, M.P., who occupied the chair, said the directors had found great difficulties in administering the Kensington estate, not the least of them being the somewhat hostile attitude assumed by the trustees of Lord Harrington and by the railway company. According to the terms of the lease, the bank was compelled to erect a certain number of houses: the lease had only two years to run, and to perform their covenant they must erect twenty more houses. For that purpose it was necessary to borrow money on the security of the bank. If that were done, he had not the shadow of a doubt that the whole of the capital would be returned to the shareholders. He concluded by moving—"That details having been laid before this meeting, clearly showing it to be the interest of the shareholders that the necessary number of houses should be erected on the bank's Kensington estate, the directors be and are hereby authorised to assist in the erection, by loan or otherwise, of a sufficient number of houses to comply with the covenants of the building agreement with Lord Harrington, and to raise the necessary funds for such purpose on the security of the existing assets of the bank."

Mr. Robinson seconded the motion.

Mr. Johnson wished to know how long it would be before the shareholders received back the remainder of their capital.

The Chairman replied that it would be about two years. The house must be built by the summer of 1867, and ground-rents would then be created, which would be sold for the benefit of the shareholders.

After a slight discussion the resolution was adopted *nem. dis.*

The usual compliment to the chairman and directors concluded the business.

ENGLISH AND SWEDISH BANK, LIMITED.

THE annexed is the report to be presented at the forthcoming meeting:—

"The directors have the pleasure to submit to the shareholders the annexed statement of accounts for the half-year ending 30th June last, duly examined and certified by the auditors. It will be seen that the gross profits for this period, including a sum of £2,224. 8s. 1d. brought forward from the last account, amount to £26,421. 17s. 6d., which, after paying current expenses, and deducting rebate of interest, &c., leaves a balance of £14,156. 7s. 3d. Out of this the directors, in accordance with the powers conferred on them by the articles of association, have the satisfaction of declaring an interim dividend of eight shillings per share, free of income tax, carrying forward a balance of £6,238. 19s. 5d. to the next account. The directors have reluctantly accepted the resignation of Mr. J. A. Hankey as chairman, in consequence of his proposed lengthened absence from England, but he will still retain his seat at the board. Mr. Wm. Tetley has been elected his successor in the chairmanship of the bank. The directors much regret that death has deprived them of the valuable services of Mr. Wm. Gibson, member of the Gothenburg local board, while at Stockholm they lose the able co-operation of Mr. C. D. Arfwedson, whose other business engagements have necessitated a resignation of his seat at

the local board. Mr. B. Almquist, who had previously held the office of auditor at this branch, has been elected to fill the vacancy. The directors are happy to say that the reports from the branches show that the business of the bank continues steadily to progress, both at Stockholm and Gothenburg."

Balance-sheet, 30th June, 1865.

Dr.

Subscribed capital—19,519 shares of £50 each, £975,950; less 50 shares forfeited, £2,550, £973,450; capital paid-up, 19,469 shares at £20 each, £389,380; less calls in arrear, £650; calls in arrear at 30th June, which have since been paid, £7,215—£7,865	381,515	0	0
Received on forfeited shares	150	0	0
Current, deposit and other accounts	183,875	10	10

SHEFFIELD AND HALLAMSHIRE BANK.

IN our last number we gave a condensed report of the proceedings at the annual general meeting of the proprietors of the Sheffield and Hallamshire Bank. Since that report was issued, the following address of John Bower Brown, Esq., the chairman, in moving that the report be adopted, has been printed in the form of a pamphlet, at the unanimous request of the shareholders present, for private circulation amongst the proprietors; we transfer it to our pages, believing it will be perused with interest, containing as it does some valuable practical remarks on the management of joint-stock banks:—

The Chairman said—"Before proposing to you in form the adoption of the report, I have a few remarks to make on sundry passages in it, and also on several subjects growing out of banking operations in general, of the past and present years. Previously, however, to entering on these subjects, I have the pleasure to inform you that, in fulfilment of your request at the last annual meeting, your directors, on the 26th October, 1864, presented to Wm. Waterfall, Esq., plate, value £122. 5s., in token of appreciation of his long and valuable services as manager of your bank. The few pounds expended in excess of your vote will not, I am sure, be objected to by you, as we were only carrying out the spirit of your instructions. In doing this, we found it impossible to limit ourselves to the exact sum named by you, viz., one hundred guineas. It will be satisfactory to you to know that the business of your bank still continues in onward progress, in spite of the unfavourable influences of the late war struggle in the United States of America. As an evidence of the growing confidence of the public in your bank, the money deposits have been increasing during the whole year, and they now amount to a much larger sum than at any former period. Referring to the increased profit of the past year, I would respectfully ask you to bear in mind that the larger proportion of it was earned during the first half of the year, viz., from July 1st to December 31st, 1864, when money ruled at a high rate. The latter half, from January to June, 1865, has, in regard to the value of money, been not much in excess of average years. Please notice that the extra profit of the latter half of our last fiscal year, from January to June, 1864, a period of high rates, went into the accounts of that year, and was represented by a handsome increase of your reserved fund. You will observe, therefore, that if our fiscal year had ended 1st January last instead of 30th June, it would have embraced the whole year of high money values, and our report would have carried a more showy appearance, as well as a better surface comparison with other bank reports. But inasmuch as you have the 'substance' you will, as sensible men, care nothing about the mere 'glitter.' I have read nearly all the bank reports published in the '*Bankers' Magazine*' for the past six months, and I find that the average increase of dividend (growing out of the twelve months of dear money) has been from about one-third to one-fourth of their ordinary dividends, so that in this respect the Hallamshire Bank compares not unfavourably with other institutions. And considering, as before said, that your extra profit has been made in little more than half the year, whilst many, if not most of the banks alluded to embrace in their reports the whole of the year of high money rates, the comparison in favour of the Hallamshire Bank is still more satisfactory. Again, the comparative smallness of the liabilities under which your dividend has been earned is a cause for congratulation. Some of the reports I have read quote liabilities in several millions or dividends

not so much exceeding yours as you might expect, and in some few cases not exceeding at all. The report gives you a warning not to look for bonuses when the causes which produce them no longer exist, and therefore I will not further dwell on the subject, except to repeat a reminder I have on former occasions given to you, viz.: that if each of our shareholders would interest himself to bring us clients, and thereby increase our business and our profits, bonuses might become the normal condition of your dividends instead of an exceptional condition. Let me ask you to think of this, and to act upon it, and thus benefit your own property. Directors, from the necessities of their position, cannot take a single step in the direction here indicated, but you may do so with propriety. The very name of a 'joint-stock bank' implies a joint stock in efforts as well as in cash—a united proprietary in means as well as in ends—in helping to create business as well as in sharing profits. One further remark, and I have done with this branch of my subject. Your bank has no branches, and therefore your dividends are earned without help from such sources. This fact may be ground for a favourable comparison of the amount of your dividends with that of other institutions. Branches have two advantages: they furnish an increase of ordinary banking business, and they enlarge the area for collecting deposits: in some cases, this latter consideration is the more important of the two. The floating moneys of a district are collected into one large sum, and transmitted to another district where it can be profitably used, in discounts and advances. Successfully and ably used, branches become unquestionably a valuable adjunct to a parent bank; but the advantage is not purchased without some risk, the special nature of which I will not enlarge upon, except to say, that your directors feel that to watch over the interests and doings of one bank is as much as their time and energies can accomplish. Your manager, too, devoting the *whole* of his time and activities to the circumscribed area of one bank, can all the better probe into all the points and corners of the establishment, so as to keep everything in healthy order and condition. The reserved fund (called in your deed of settlement surplus fund), as you will notice, has again received a respectable addition to its amount, notwithstanding your bonus of £4,580. Taking into consideration all the elements disclosed in the figures of the Hallamshire Bank report of this day—viz., amount of your annual dividends, and amount of capital and of liabilities—your surplus fund is much larger than that of many banks, whose reports I have read, pro rata, with the claims upon it, and the risks and liabilities under which it stands. I have a list before me of about thirty banks, including therein the most eminent banks in England. This shows to me that our liabilities, as compared to our working capital, are the smallest in the whole list. Some of these banks, with dividends but a few per cents. in excess of ours, have liabilities reckoned in sundry millions, many times the amount of our liabilities, whose surplus funds, relatively with the possible claims upon them, are smaller than ours. When your surplus fund shall have reached a certain amount, it will be for yourselves and your directors to consider how far it is desirable or necessary to make continuous efforts for its further large increase. When the proper time shall arrive, this subject will have due consideration. At present the time has not arrived. It will probably be satisfactory to you to learn from me, that a not inconsiderable portion of the surplus fund is invested in Government securities—consols. I have now to draw your attention to a very few words in this report, introduced for the first time; and, instead of waiting for some one of the gentlemen present to ask for explanations, we tender them unasked. The words

referred to will be found in the second paragraph, and are these:—‘and making suitable allowances for doubtful accounts.’ The paragraph runs thus—‘After paying all the expenses of the bank, and making suitable allowances for doubtful accounts, the net profits are,’ &c. The fact of our making deductions from gross profits, on the score of dubious debts, is not new; the only change, therefore, is, that we now tell you of it. It must be apparent to every one present having business knowledge (and most of you as commercial gentlemen have that knowledge), that out of the thousand accounts in our ledgers, there must at all times be some about which we entertain doubts and fears, of more or less stringency, and yet they are not bad debts, and cannot be treated as such. We cannot call that ‘good’ which is ‘doubtful;’ and we cannot call the ‘doubtful’ ‘bad,’ until they become so. It would be untruthful on our part to include in our report as ‘good assets’ an amount which we deemed ‘doubtful;’ and, therefore, in faithfulness to you and to ourselves, we deduct from the gross profits a sum to cover for these ‘doubtful debts.’ This sum is arrived at by a careful examination of every annual balance-sheet. The name of each account is entered on the minute book, with the amount attached for which we entertain ‘doubts.’ Such of these accounts as eventually turn out ‘good,’ serve to take the place of other accounts, that we believed all right at the time, but upon which clouds have afterwards supervened. This frank statement ought to increase your confidence in us and our report, and I doubt not it will do so. The system now explained to you is one in almost universal use among the London banks. We have copied the very words used in nearly all the reports of the London banks, as you will find if you read them. Seeing their openness to their shareholders on this subject, we determined to copy what seemed to us an honest frankness, and I feel assured you will like us no worse for copying an example set to us in such high quarters as the London and Westminster Bank, the Union Bank of London, and many others. Besides, we have nothing to fear or to conceal, and therefore there was no reason why we should not tell you. There is one other subject of much importance which I should probably not have entered upon, but for the example which has been publicly set before us in an influential and highly respectable quarter. The reasons which induced that example operate upon us. To disregard it by a total silence on this occasion, might create a supposition that we were afraid of entering on the subjects touched upon in the quarter referred to. I allude to the cases of loss and ruin which during the last year have brought such deserved discredit on the management of joint-stock banks. My object will be to satisfy you that no fear need be entertained of any such serious disasters to your bank. I will tell you, in some detail, the regulations by which we hope to escape them. The enormous Pullenger frauds on the Union Bank of London, by which an amount equal to your whole paid-up capital and surplus fund put together was abstracted by the falsifying of accounts, together with sundry serious defalcations by old officers of other banks about the same period, led your directors, in 1860, to institute the rules I am going to particularise. In establishing these, they deemed that they were fulfilling their duty to you as trustees, not only for your share interest in the Hallamshire Bank, but virtually for your whole property which is at stake, as well as for your business prosperity in life, all of which, perhaps, might at some future period, when we and all the then officials shall have gone to our long home, be jeopardised by our disregarding the warnings those serious cases ushered forth to the world. We doubted no one and publicly said so;

but our conceptions of duty were of an imperative character. I need not say that the disasters of the past year have strengthened our convictions of 1860, and that we feel that we have done right in making ourselves more thoroughly cognizant of the internal workings of the bank. There was nothing to prevent us doing so before; but we were then, in 1860, more strongly awakened to its necessity and to our duties in regard to yourselves. The manager is not allowed to make advances to any one without the written consent of the board, as exhibited in their 'minutes.' A book is placed before us weekly, showing the state of every account in the ledgers; and another book showing the total amount of bills under discount for every customer of the bank. Your managers, neither past nor present, would have ever thought of discounting distant paper, as a bank manager recently did so disastrously as to shut up the bank; or of using the bank's moneys for any purpose whatever unknown to the directors. Arrangements were made in 1860, and which are still in force, for the periodical checking of the balances of all our London accounts, including Glyn's, the most important of them. A number of years ago, the books of a bank, I think in one of the Midland counties, showed that there was a large sum in the hands of the London banker. It was discovered on investigation that the bank's book did not record the truth. The directors had been deceived. This circumstance, together with the Pullenger affair, were the causes which induced us to establish a means of proof, independently of our own books, of the state of our account with Glyn, Mills and Co., Overend, Gurney and Co., and others. The cash in the bank is counted weekly by one of the officers of the bank, the cash books added up by him, and a certificate to this effect, signed by the officer, is presented to the board every Wednesday, and filed away in private possession of the board. The officer doing this duty is changed almost every week. Once at least every quarter of a year, two of the directors attend at the bank, before bank hours, to count the cash, no one in the bank knowing when this visit is to be made. In addition to this, the cash balance for each half-yearly balance-sheet is verified by being counted by the directors. It is a duty on my part to say, that this cash counting was at all times occasionally done both by directors and officers: all that our new rules effected was the having it done every week, and by fixing the responsibility on the person who signs the certificate, the counting by the directors being somewhat more frequent than formerly. The bills are taken down at very short but fixed intervals by two officers of the bank and added up, and their sum total certified by the signatures of the persons doing the work. The certificates are presented to the board and filed away in the 'directors' safe,' previously having been checked with the weekly balance-sheet. As with the cash, the bills were at all times taken down by the officers, but at longer intervals. All the change we made was in the signed certificate, and in having this important work done more frequently, and, instead of at uncertain times, at fixed periods. The deeds of property held as security for advances, as well as personal guarantees, are periodically called over by the directors from the security book—a work that occupies considerable time and much labour. A minute is entered on the directors' minute book of the delivery of any deeds to the parties owning them, and the chairman's signature attached to the entry in the security book, certifying of such delivery. Looking at the large amount of property represented by these deeds, and for which the bank is liable to their owners, too much care can hardly be exercised in watching over their safety whilst in the bank, and in their dismission from the custody of the bank. Some years ago we passed a rule that no officer of the bank should have a

current account with the bank; the only exception we made was in favour of the then manager of the bank, Mr. Wm. Waterfall. This rule was forced upon us by a case which occurred in a neighbouring bank, where a verdict of 'acquittal' was returned to a charge of 'embezzlement,' mainly on the ground that the defaulting officer had a 'current account with his bank,' which gave an opportunity for the plea of a 'quasi permitted over draught on that account.' This was not the only consequence: the 'guarantee society' refused to pay because the person was acquitted of the charge of 'embezzlement;' and the officer said, 'Our guarantee is against fraud, and of fraud he is acquitted by a jury after a fair trial.' I have been informed that the case was afterwards compromised by the guarantee society paying a part of the claim, leaving, however, a considerable sum as a loss to the bank. Now, as most of your officers furnish their securities for honest service through these guarantee societies, we felt that it would never do to have them jeopardised by permitting your officers to have current accounts with your bank; to do so would, or might, have made their securities in the event of 'fraud' a 'sham,' and not a 'reality.' common sense indicated the course your directors should take in the matter, and they took it. Another check which your directors instituted was that of obliging every officer in the bank to take a holiday of three weeks in every year, during which time some other officer must take charge of his department, and thereby discover if anything be wrong. The very knowledge that such investigation must ensue may prevent 'wrong doing,' and thus save a character for life, but which a supposed immunity from detection might forfeit. This is not an overstrained theory of over-jealous minds, as I will proceed to show you. In sundry cases of extensive fraud not long since, it was observed that the parties never left their banks for a single day for a long series of years—never would have a holiday, however pressed, as the other officers had; and these frauds were never discovered till sickness finally compelled the absence of the defaulting officer, and some other person had to take to his duties. In 1860, Mr. Cockayne and myself were deputed by the board to go to London, to make personal inquiries of influential parties there as to the best checks that could be devised to preserve banks from such frauds as about that time had startled the public. In almost every case they said that they thought a 'periodical compulsory absence' was one of the best 'safeguards' a bank could institute, and they acted upon it themselves. On the journey referred to, Mr. Cockayne and I heard many opinions on banking subjects, from gentlemen of high standing and large experience; and your directors subsequently adopted such of their suggestions, in a modified form, as were thought to be applicable to our case—of a country bank with comparatively limited doings—hence our rule of compulsory absence. Our officers have at all times had their holidays; the only change we made was to make it compulsory on every one, and without any exception save one, viz., your late manager, Mr. Waterfall. There are sundry minor regulations in force, but it is not worth while occupying your time with them. The principal ones are those now mentioned. You will observe that the rules are intended as checks against such errors of judgment as have recently brought discredit on directorial management; and also against such frauds as occurred several years ago. And I think you will see that our principal rules, such as cash and bill counting, &c., are not unreasonable, and are essentially only such as you gentlemen exercise in checking your 'cashiers' cash account,' and in demanding a stamped receipt from your dearest friend; neither the former nor the latter deeming himself reflected on by such cash examina-

tion, or such demand for a receipt. After all that I have said, your main reliance against fraud must ever be on the honesty and honour of your manager, and of the other officers of the bank. If so minded, an evil-disposed person could rob you in spite of all our checks and watchfulness. He might see some opening which had not been protected, as Pullenger did, and avail himself of it accordingly. All your directors can do, is to do the best they can. It seems to us an eminently unsound argument that because we cannot do everything, therefore we must do nothing. The contrary we hold to be the right argument, viz., to do all that our experience, and that of others more able than ourselves, point out as proper to be done, even if it should occasionally turn out that our plans have been defective in some unsuspected quarter. We are all fallible men and must remain so to the end of the chapter. I think it right most emphatically to reiterate that, notwithstanding our cash countings and periodical investigations, we have never for one moment doubted the sterling honesty of all your officers, past and present. Before entering on other matter, allow me to say that it is but justice to the parties concerned thus publicly to state, that your united staff of officers never worked more energetically and harmoniously together than they do at the present time; and that your directors are perfectly satisfied with the appointments they have made. Your manager has displayed larger capacities than we had given him credit for, and we confidently say to you, that the business of the bank will not suffer under his management. If you are not fatigued, a few minutes more may, perhaps, be profitably employed on a banking subject, although not pertaining to your own bank. In offering the opinions we are about to offer, your directors would be sorry, if you or any one should secretly accuse them of self-sufficiency. It would be an unjust charge. They hold their opinions with all respect and deference to the views of others older and more experienced in banking subjects, and not in any egotistic or dogmatizing spirit. Still, having certain opinions, they think it to be their duty to lay them (not before the public), but before their friends, the shareholders of the Hallamshire Bank, for them to extract such conclusions as they may think the opinions deserve. Politics, science, and art are studied daily, but how few think of studying the principles of banking, although so many in the community have everything at stake in banks. Hence, to point out dangers to be avoided and advantages to be gained by an intelligent exercise of the banking franchise, may be of value to you our shareholders, whether you coincide with our opinions or not. Everyone is ready to acknowledge in the abstract the value of experience; but to render experience valuable it must be well weighed and applied, otherwise it is a tree barren of fruit. I think some wholesome lessons may be learnt by the misfortunes which have fallen on sundry banks during the past twelve months, and on their unfortunate shareholders. Our comments shall be confined to the doings and misfortunes of three banks. In the case of the first bank, ruin was brought on by the directors vacating, as we think, their express functions, and allowing them to be usurped by their manager. It would appear from the reports circulating at the time, that his imperious will, supported no doubt by an appearance of great prosperity in the shape of large dividends, bore down the firmness of the directors, and they gradually allowed him to centre in himself all the powers of the bank, legislative as well as executive, without any effectual check on their part, the result being 'ruin.' Besides the loss of the paid-up capital, a call has since been made of a large sum per share, to pay the debts of the bank; the distress and ruin, and even deaths, if the press speak truly, that have occurred among the shareholders

is mournful to contemplate. Now, I lay the fault of this dreadful state of things on the 'directors,' not on the manager. Shareholders place directors in the position of trustees over their whole property, and they, and they alone, are responsible to the shareholders for its safe custody and legitimate use. Errors of judgment they may commit. They may assent to discount and loans, which turn out 'loss;' but so long as they honestly exercise the powers entrusted to them, for what they hope and believe at the time to be for the good of their institutions, shareholders ought to be satisfied, and I believe will be so; but directors have no right to surrender their functions to anyone, and it is a clear breach of a sacred trust to do so. The directors alluded to, I think, did wrong (with good intentions I doubt not) in permitting their manager to exercise sway, uncontrolled, over the doings and property of the bank. The manager was appointed by the directors, paid by them, and it was his duty to them to do nothing of a weighty or essential character, without their permission and assent, after ample explanations. If the directors of the bank had firmly withstood his encroachments, the bank might have been saved, and he might have been saved, and might at this time have been a successful and respected officer of the company. Pride and ambition, I fear, ruined the one, and want of firmness and moral courage, notwithstanding good intentions, ruined the other; and both these together ruined the shareholders. In the next case I shall mention, I am glad to say, that the manager is acquitted of any dictatorial assumptions. It appears that he entered into some large discount transactions at a distance from his bank, not only without the sanction, but even without the knowledge of his directors; and the discount operations referred to were so large, that on turning out disastrously, the bank was stopped in its career, and the bank has disappeared from among us. There has been no failure so-called, but some little loss, I have understood, will accrue to the shareholders. Here, again, the directors were alone to blame, as we respectfully conceive. Although they may not have given written permission for the manager to use the bank's money without their consent, I cannot doubt he had a tacit permission to do so; possibly, silence on other transactions of a like kind, though not perhaps to such an extent, may have been deemed assent. His instructions on entering upon his duties should have contained a direct prohibition against his undertaking any large discount, or any other large money transactions, without the written consent of the board, as exhibited in their minute book. To allow a subordinate, whatever may be his character, business judgment, and good intentions, such unlimited powers as that a bank may be ruined any day, without the knowledge of the directors, is a gross departure from common sense, and a grave dereliction of duty, as we think, on the part of the directors. In both the foregoing cases, you will observe, I blame only the directors, who, in our view, were the essential cause of the disasters. I will not blame the managers; they both might, and, I think, did really intend well, but they were allowed to act without that safeguard which Solomon's words sanction, 'in the multitude of counsellors there is safety.' The board of directors should have been 'the council of safety;' the very purpose for which 'boards' are appointed. If this be not the function of a 'board' I know not what their functions are: and shareholders might as well dispense with them, and 'elect' their managers with full, absolute, and sole powers. In the first-mentioned case, the directors would seem to have been frightened out of their duties; and in that of the second, the board were not stringent enough in the exercise of their duty; perhaps I should be nearer the truth if I supposed they did not

realise the extent and importance of directorial control. It is hardly needful for me to say that all my remarks are general, and have no application to ourselves. Your board knows its duties too well to fall into the errors of either the one or the other of the before-mentioned banks; and your managers, past and present, know equally well the value of half a dozen independent and unbiassed opinions on any subject, to wish to set them aside; they would not do it if they could—they never did do it. My whole object in these remarks is to satisfy you that the Hallamshire Bank is not likely to split on the rocks on which have been wrecked the banks referred to. The only other banking misfortune to which I will allude is that of a bank which suddenly collapsed not long ago. Again, the evil was caused, as we think, by the fault of the directors, but in a different way from the last-mentioned two instances. In this case the directors had appointed one of their number to the position of what is called a ‘managing director.’ Now, we unhesitatingly admit that there are some banks and some institutions whose special circumstances require the aid of one or more managing directors. Excluding, however, such exceptional cases, our opinion is, that this sort of bank arrangement is, in ordinary cases, objectionable and pregnant with evil. From the moment that the managing director takes his seat as such, the other directors are apt to feel less called upon to master the details that come before them; they insensibly become more easeful, and more and more rely on the managing director for seeing that all things are right, until finally, by imperceptible degrees, even it may be unknown to themselves, the other directors become ciphers, and the managing director becomes the sole depository of bank knowledge, which he may give out to his easy colleagues in such portions as he thinks fit, or none at all if he prefer. Here, again, you have the embodiment of a great mistake, as we think; a bank governed essentially by one man, one mind, one judgment, without any real check or control. It may be that he may turn out a manager after the model of the first-mentioned case, but under another name. He may do ill or he may do well; but the separate and independent opinions of the directors, as such, are gone, and for all the purposes of control and guidance the managing director might as well be alone; but this is not all the evil. From the moment a managing director is appointed, the ‘manager proper’ essentially becomes an inferior officer, notwithstanding his name. The managing director, if he so wills it, may become the real manager, and the manager in name must either do and follow as directed, or his place will soon become vacant; he will be fretted till he resigns; and hence that important check upon the directors themselves, which an honest and high-minded manager furnishes, becomes lost to the shareholders. I have come to the conclusion that the system of a ‘managing bank director’ may be, in designing hands, a pernicious one, and in any hands an unwise one. Speaking for myself individually, I would not sit at any bank board where there was a managing director. Now, what happened at the bank I refer to? At a recent meeting it was decided to put the bank in liquidation; the paid-up capital gone, besides a large sum to be made up by the shareholders, the manager proper having borrowed a very considerable sum of money. Books miserably kept—a handsome dividend declared not long before;—the managing director said, in effect, that he did not know how it was, and I have no doubt he was honest and spoke the truth, his supreme management not having been effective. The other directors knew nothing whatever, they relied on the managing director—but in result the bank, as such, is defunct. Rely upon it, gentlemen, the only proper and safe course for a

bank is, for every director to know everything about his bank, to act and to think for himself, and not to delegate his duties and responsibilities to another. As a hypothesis, and nothing more, I would ask—suppose a managing director and the manager were to collude together, instead of quarrelling, would the easy-going silent directors be any check to this? Unchecked power over millions should be given to no one, no matter what his character or standing. In conclusion, what has been now said to you is but the expression of the unanimous opinions of your board. They were desirous that you should have the fullest information regarding the state of your bank, not only in the figures as represented in the report, but in the general rules under which your bank's affairs are administered. They wish to impart to you that confidence they themselves entertain of the safety and soundness of your institution. The only opportunity they have of placing before you such information as my address has embodied is on these annual occasions. I am aware it is not very usual to say so much as your directors have done this day through me, but there is no sound reason why we should follow the customs of others to the limiting of our observations to you. I have but followed the request of my co-directors in going into matters at such length. If any of you gentlemen can suggest any improvements in our regulations, we shall be glad to give your suggestions a candid consideration. We are not immovably wedded to our opinions; we are not above receiving instruction, come from what quarter it may. Working details of bank management are in a great measure a sealed book, even to those most interested in them, viz., shareholders. As to the public generally, they are indifferent to them; and were they otherwise, it would be difficult for them to find ready sources of information. For your special advantage, we have in some measure lifted up the veil, by showing you the more important of the rules which are being faithfully carried out at the Hallamshire Bank. You will observe that we have not spared our own brotherhood of directors. It is our opinion, that in nine cases out of ten the causes of bank disasters of a ruinous character may be traced to the 'board of directors;' either from defective regulations, or want of vigilance and firmness in carrying them out, or from not seeing with sufficient clearness their weighty responsibilities to their shareholders."

NOTTINGHAMSHIRE BANKING COMPANY—MOORE AND ROBINSON.

At a general meeting of the shareholders of this company, held on the 28th July, at the George Hotel, Nottingham, it was unanimously resolved to convert the bank into a limited company: and for the purpose of extending the operations of the bank it was also resolved to create 30,000 new shares of £3 each, of which 10,000 are to be offered to the present shareholders in the proportion of one new share for three original ones, at a premium of £1. 15s. per share: a second 10,000 are to be offered to customers at a premium of £2. 10s. per share; and the remaining 10,000 are to be held in reserve for future decision. The premiums on the new shares are to be added to the reserve fund, which it is intended to increase to £100,000.

LLOYDS' BANKING COMPANY, LIMITED.

THE purchase by this company of the banking business of Messrs. Philip and Henry Williams, of Wednesbury, was ratified at a meeting of shareholders held in Birmingham on the 7th August. The premium on the shares already applied for would be equivalent to the goodwill. Mr. Henry Williams will have a seat at the board of directors. The bank of Messrs. Philip and Henry Williams was one of the oldest in the midland counties, and it continued to retain its position and connections in the face of very sharp competition raised by the joint-stock companies. The tendency in the midlands is for all banking business to fall into the hands of joint-stock companies. In Birmingham and the neighbourhood four private banking firms have been merged into joint-stock companies within a few months—Attwoods, Spooner, and Marshalls' business, after the failure, went to the Birmingham Joint-Stock Bank; and now the three firms of Lloyds and Co., Moillets and Co., and Philip and Henry Williams, form one limited liability company. There are other instances of the same tendency in other parts of the district.

CONVERSION OF THE TURKISH DEBT.

THE details of the conversion and unification of the internal debts of the Ottoman Empire have been published. The operation is to be proceeded with simultaneously at Constantinople, London, Paris, Amsterdam, Frankfurt, Alexandria, Vienna, Turin, Genoa, and Brussels. The arrangements appear to be in every point satisfactory, and the coupons will be payable at the Imperial Ottoman Bank at Constantinople, London, and Paris, on presentation, except the special coupons relating to the arrears of interest on the ten-years Serghis, due January and July, 1866, which will be paid on their respective due dates. In order to facilitate the operation of the conversion, and to avoid the necessity of issuing provisional certificates and sending the original bonds for verification to Constantinople, the Imperial Ottoman Government has appointed verifiers to attend at London and Paris, besides the commissioners-delegates, during the whole period appointed for the conversion, to verify the bonds tendered for conversion.

STANDARD BANK OF BRITISH SOUTH AFRICA.

THE following circular has been issued by the directors of the Standard Bank of British South Africa, on the subject of the depreciation of the shares in that establishment:—

"Sir,—In consequence of the immense depreciation in the market value of the shares of this company, a depreciation wholly unwarranted by any official information which has reached us up to the last advices from the Cape, I am instructed by the directors to communicate to you the following, being the latest intelligence to hand regarding the accounts of the company:—

"The bank's general manager, writing from Port Elizabeth, where the commercial crisis has been chiefly experienced, states, that having carefully scrutinised all the bad and doubtful debts at that branch, he estimates our losses there at £20,400.

"From Natal, where the crisis has also been very severe, the manager reports £100 will cover his loss, although the business transacted thereby the Standard Bank has been very considerable.

"Satisfactory reports have likewise been received from Cape Town and the other large branches of the company; and the chief manager of the Orange Free State branches (where, consequent on the action of the local Government, preparations had been made for withdrawal previous to the outbreak of hostilities) reports that 'at Bloemfontein and Fauresmith he does not think our interests will much suffer; but at Smithfield, the seat of war' (where the bank has a small agency), he states—'we may prepare ourselves for some loss.' This agency had only a credit of £10,000, and as the business had been contracted prior to the outbreak of hostilities the loss can only be small.

"If the directors, therefore, take twice the reported losses, or say £40,000, in all to cover any additional losses, they trust that they will then have provided for all the losses of the bank according to the information which has yet reached them.

"The directors much regret these heavy losses, but there stands at the credit of reserve fund £56,000, and at credit of net profits for the half-year ending 30th June last, £23,000, making in all £79,000, which, deducting the estimated losses, will leave the capital of the bank intact, and the balance at the credit of reserve fund.

"In the event of any further intelligence of sufficient importance being received before the next ordinary general meeting in October, the same will be communicated by circular to the shareholders.

"I am, Sir, your very obedient servant,

"W. F. SEABLE, Secretary.

"The Standard Bank of British South Africa, Limited,
90, Cannon Street, London, August 25."

Reviews.

Tables for calculating Interest on Deposit Receipts. By HENRY JON HAMILTON. Ward & Co., Belfast.

THESE tables have been worked for the purpose of calculating, almost at a glance, interest on deposit receipts of the Provincial Bank of Ireland, from the 1st January, 1862, to the 31st December, 1871. The calculations are based upon the rates of interest allowed from time to time, but, of course, the same principle would be applicable to any other bank, allowance being made for the difference in the interest. The construction of the tables is very simple, and will enable any person to calculate interest as easily as the discount on a bill.

Communications.

To the Editor of the "Bankers' Magazine."

LIMITED LIABILITY.

Dublin, August 8th, 1865.

SIR,—I have been requested to submit to your decision a question on the subject of "Limited Liability," which has been the occasion of considerable discussion.

The commonly received notion is that in a limited liability company each shareholder is liable only to the extent of the shares which are registered in his own name. Now it is alleged that, in virtue of a recent decision, his liability goes much farther; that if the company should become bankrupt, and some of the shareholders should be unable to pay up the full amount of their shares, the solvent shareholder is bound, in proportion to the number of shares he holds, to make good their deficiencies. Take, for example, the case of a joint-stock bank, limited, with £50 shares, £10 paid up. Let it be supposed that I have ten shares in that bank. According to the common notion of "Limited Liability," I cannot be held liable under any circumstances for more than £500. But if the alleged decision be upheld such a notion would be very erroneous indeed. It is possible the bank might be unsuccessful in business, and that in order to meet its liabilities, it might be necessary to call in the whole of its capital. It is also possible that many of the shareholders should be unable to meet this call. In such a case it is affirmed that I should be obliged not only to pay up the full amount of my own shares, but also to make good a certain proportion of the deficiency. In other words, the whole capital of the company must be available to pay the debts of the company, and if any shareholder cannot pay his proportion of the capital, the other shareholders must pay it for him.

You will much oblige a large section of your readers if you can say whether this decision has been given, or whether the principle on which it rests is good in law.

BANKER.

[We have never heard of such a decision, nor are we aware of anything in the "Limited Liability Act" which could justify it.]

PRACTICE WITH REGARD TO CHEQUES.

15th August, 1865.

SIR,—I beg the favour of your opinion upon the following case:—

A cheque drawn on branch A. is presented for payment at branch B., where the payee has an account. He takes part in cash and places the remainder to his credit. The cheque is returned by A. with the answer "refer to drawer." The payee now seeks to recover the amount from his

banker, objecting to its being deducted from his account, and alleging (through his solicitor) that the fact of the cheque being cashed by a branch bank is equal to its being duly honoured, and the banker has no right to return it.

Now, I want to know if any case can be quoted where custom would sanction such a proceeding, or whether there is any legal point in which the payee can support his claim.

Your obedient servant

Y.,

[We are not aware of any such case having been the subject of a judicial decision; we cannot, however, see on what grounds the claim can be supported.]

One more question—

A cheque is drawn on a London banker payable to "No. 14,936 or bearer," and crossed "to the order of A. B." Is it necessary to demand the endorsement of A. B.?

Y.

[No; the cheque having been originally issued to "bearer" is not limited by endorsement.]

CHEQUES DRAWN FROM ABROAD.

SIR,—Will you inform me whether a cheque drawn in Paris on a banker in England should bear a penny, or an ad valorem stamp, or both; also, if it would make any difference in this respect, if the cheque were sent direct to the bank by the drawer, or had passed through other hands before reaching it.

Yours obediently,

August, 1865.

ENQUIRE

[All cheques drawn abroad require an ad valorem stamp when presented for payment in England.]

BANK AND OTHER AMALGAMATIONS.

Manchester and Liverpool District Bank,

Manchester, August 28th, 1865.

SIR,—In the article, entitled "Overend, Gurney and Co., Limited," which appears in your publication for this month, the following passage occurs:—

"Going into the provinces, we find, among many others, that Lloyd, Entwistle and Co., of Manchester, have gone into one limited company, &c."

I beg to inform you that the business of Messrs. Lloyd, Entwistle and Co., in consequence of the failing health of some of the partners, was sold to this bank, which has not adopted the principle of limited liability or privilege, under certain circumstances, of not paying its debts to the full extent of its means.

I request that, in your next publication, you will correct the above error, which is likely to be injurious, as the most valuable class of

depositors—viz., that which puts its reserves of income into banks for safe custody rather than to make large interest—is well aware that banks like this, constituted under the Act 7 Geo. IV., c. 46, are better security for money deposited than those established under the Limited Liability Act.

I am, Sir,

Your obedient servant,

THOMAS COOKE,
Managing Director.

BANKING OBITUARY.

June 22.—At Ootacamund, Neilgheny Hills, Mr. Charles Anthony Johnston, late accountant of the Madras Savings' Bank and Treasury aged 57.

August 7.—At Vinkwall, Robert Easton, Esq., banker.

August 8.—At 4, Westbourne Road, Forest Hill, Mr. Thomas Tibbs, late of the London and Westminster Bank, in his 87th year.

August 10.—At 181, Albany Road, Camberwell, Mr. James Payne, for 53 years in the Bank of England, aged 78.

August 10.—At Aberdeen, Mr. Alexander Balfour, of the Bank of England, aged 57.

August 11.—At his residence, Claremont, Manchester, Sir Benjamin Heywood, Bart., banker, of Manchester, in the 73rd year of his age.

August 17.—At Clifton, James Lloyd, Esq., of Birmingham, banker, aged 59.

MERCANTILE SUSPENSIONS.

The only suspensions announced during the month of August were the following :—

Messrs. F. W. Parker & Co., Carlisle, manufacturers.

Mr. Baldwin von Bartels, London, South American trade.

Messrs. Kitchum, Son & Co., New York, bankers.

MONTHLY CHRONOLOGY.

August 3.—The directors of the Bank of England, at their weekly board meeting, made a further advance in the rate of discount from $3\frac{1}{2}$ per cent., at which it was fixed on the previous Thursday, to 4 per cent.

4.—Suspension announced of Messrs. F. W. Parker & Co., manufacturers, of Carlisle.

5.—Stoppage of Mr. Baldwin von Bartels, of Pinner's Court, Old Broad Street, in the South American trade, with £70,000 liabilities.

17.—Return of the Great Eastern steamer to Crookhaven, bringing

intelligence of the failure in successfully laying the Atlantic telegraph cable.

28.—Intelligence received of the suspension of Messrs. Kitchum, Son, and Co., bankers, of New York, said to have been caused by the discovery of extensive issues of forged gold certificates and abstraction of funds and securities by Mr. Edward Kitchum, one of the partners—the amount of defalcation being variously estimated at from two and a half to five millions of dollars, involving in losses several bankers and brokers. The defaulting partner is further said to have left the city with 60,000 dollars of the abstracted funds in his possession.

BANK MOVEMENTS.

The London and South Western Bank have removed their head office to East India Avenue, Leadenhall Street; the late head office in Regent Street will in future be the West-end branch.

It is announced that Mr. George Henry Briant, manager of the English Joint-stock Bank at Guildford, has been appointed manager of the Nottingham Joint-stock Bank.

It is announced that the old and respectable private bank of Messrs. Philip and Henry Williams has agreed to amalgamate with Lloyd's Banking Company, Limited, of Birmingham.

SWANSEA SAVINGS BANK.—During the half-year ending the 20th of May last this bank received in deposits £22,319. 19s. 7d., also interest from National Debt Office, £2,851. 18s. 2d., and transfers from other savings banks, £48. 10s. 4d. The repayments to depositors reached £19,661. 18s. 6d., and the transfers to Post office and other savings-banks only amounted to £320. 9s. 3d., which shows that confidence is felt in the management and stability of the old bank. The expenses of management for the half-year were £237; and the balances on the 20th of May stood as follows:—Invested in National Debt, £179,553. 17s. 10d.; separate surplus fund, £1,700; Glamorganshire Banking Company, £1,738. 8s. 9d.; making a total of £182,992. 6s. 7d., as compared with £177,987. 7s. 11d. on the 20th November, 1864, being an increase of £5,004. 18s. 8d.

FINSBURY AND CITY OF LONDON SAVINGS BANK, 76, Cheapside and Clerkenwell.—The managers of this institution held their half-yearly meeting on the 28th July, at the office in Cheapside; Mr. R. Morland in the chair. The accounts of the official auditor, Mr. S. Lovelock, to the 31st of May, were presented and approved. The statements showed an increase over the last year in the number of the new accounts; that the amount transferred from the Post Office and other banks to this bank had been nearly double the amount transferred to them, while the numbers had been nearly equal; and that the capital of the bank had been increased by the sum of £11,552. 9s. 10d. since the last meeting.

Notes of the Month.

HAMPSHIRE BANKING COMPANY.—We publish in our columns the thirty-first annual report of the directors of this company made to the shareholders on the 1st August, and we refer with pleasure to the successful progress the company is making, proving that the extension of its operations during the past few years was the result of sound judgment, and must be very encouraging to the shareholders. The profit of the year's business, after paying the current expenses, &c., amounts to £26,400. 5s. 10d., sufficient to pay the usual dividend of 10 per cent. per annum, as well as the annuities, and a bonus of 7s. per share on the old and new shares, thus yielding a very handsome dividend to the proprietors. The able general manager, Mr. Atkins, retires from the more active duties of the bank, and now fills the office of a director, and is succeeded by Mr. Thomas Keeping and Mr. Richard Legg. The shareholders marked their special appreciation of the long and valuable services of Mr. Atkins by voting him a retiring allowance of £500 per annum. Cordial votes of thanks were given to the chairman and board of directors, to the managers, and other officers of the establishment, for their attention to the interests of the company. After the annual general meeting of the shareholders had taken place, and the appointment of Mr. Atkins as a director had been confirmed, a very gratifying expression of feeling was evidenced towards him by the presentation of a handsome epergne as a mark of esteem and respect, from the whole of the staff of this now large county establishment. We cannot but admire the desire that prompted such a graceful act, which must indeed have been most welcome to the late manager after such a long and successful career with many of those who thus express their pleasure in being associated, and who, we imagine, were the first to congratulate him, upon his appointment as a director.—*Hampshire Independent.*

ROCHDALE PROPERTY AND GENERAL FINANCE COMPANY, LIMITED.—At the first annual general meeting of shareholders, held at Rochdale, on the 31st July, Mr. Handley in the chair, the following resolutions were unanimously adopted;—That the balance-sheet and report do pass.—The directors' report declared a dividend of 10 per cent., leaving a balance equal to 14 per cent. to be placed in reserve. The statement of accounts up to the 30th June, 1865, showed that after paying the current and one-fifth of the formation expenses, and providing for the rebate of interest on mortgages, bills, &c., not yet matured, there remained for disposal a sum equal to over 24 per cent. During the past year the directors state they have had various investments and projects before them, some of which have been secured. A plot of land has been leased at Dearnley, on which it is the intention of the Board to erect a number of cottages, which are said to be in great demand. Hitherto, however, the building department has had to give way for a more lucrative business, money on mortgages being in great demand. It was resolved that the number of directors be reduced to eight for the ensuing year, and that the share list be re-opened and the public charged 2s. 6d. per share.

TENDERS FOR BILLS ON INDIA.

The biddings for bills on India took place on the 2nd August at the Bank of England. The proportions allotted were—to Calcutta, Rs. 16,35,000; to Madras, Rs. 20,000; and to Bombay, Rs. 10,00,000. The minimum price was as before, 1s. 10½d. on Calcutta and Madras, and 1s. 10¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11¼d. will receive about 75 per cent., and on Bombay at 1s. 11¾d. about 70 per cent. Further

biddings took place on the 16th August. The proportions allotted were—to Calcutta 16,93,000 rupees, to Madras nil, and to Bombay 9,70,000 rupees. The minimum price was as before, 1s. 10½d. on Calcutta and Madras, and 1s. 10½d. on Bombay. Tenders on Calcutta at 1s. 11½d. will receive about 30 per cent., and on Bombay at 1s. 11½d. about 80 per cent. above these prices in full.

EXTRAORDINARY AMERICAN DEFALCATIONS.

It seems to be a reasonably well-established fact that crime has its epidemics no less than disease. Certainly the criminal history of this country for the past year would seem to afford a significant proof of the truth of this new apophthegm. We have the epidemic of murder, the epidemic of suicide, the epidemic of highway robbery, the epidemic of rape; in fact, these social diseases are even now at their height, and baffle the skill of the doctors; but most striking, and to some most alarming of all, is the epidemic of defalcation which has set in with extraordinary fury. In this city (New York) alone within the past week no less than four great defalcations have come to light. The commercial community was first startled by the Phoenix Bank robbery, of which the paying teller of the institution, one Jenkins, was the "hero." This swindle was alluded to in my last letter, and very few new features have since been developed. The amount of the embezzlement reaches 320,000 dollars. At the examination of the criminal to-day, Jenkins waived further preliminary proceedings and was committed for trial. His operations can be characterised as nothing less than extraordinary. He lavished the stolen money among prostitutes of the lowest order, and he seems to have been so greatly terrified at the fear of detection that his guilty conscience saw knowledge of his crime in every face upon which he looked. Fearing every bush an officer, he gave, according to his own statements, large sums of money to abandoned women whom he met, "because they looked as if they knew something about it." It seems that he and his principal accomplice, Earle, frequently discussed the probabilities and consequences of detection, and that Earle invariably declared that if his misdeeds were discovered, he would commit suicide. Jenkins ultimately expressed the same determination; but as it turns out, Earle alone fulfilled his promise. Jenkins was deeply affected when informed of Earle's death, declaring that he was "a good man," "no black-mailer," and "unfortunate rather than erring." Earle left a letter, in which he stated that he died "innocent, but wronged!"

The Phoenix bank robbery was followed by the "failure" of one P. E. Mumford, a broker doing business at 19, Wall Street, New York. This "failure" was simply another gigantic robbery, Mumford absconding with some 200,000 dollars belonging to merchants and speculators for whom he was an agent. Treading close upon the heels of this defalcation came another; a clerk in one of the largest banking-houses in the city being the principal in the robbery. The amount of money abstracted from this institution was 280,000 dollars; but the friends of the criminal, who represent the best people of the metropolis, have repaid to the bank the sum stolen from it by this person, and he has been packed off to

Europe, sailing from Boston to-morrow. Inasmuch as the journals of the metropolis have consented to withhold publication of the criminal's name it is perhaps well to follow their example. Let us hope that H— will, live to appreciate the value of wealthy relatives, and the narrowness of his escape from a felon's cell. This great robbery was discovered simultaneously with that which has inflicted a loss of between 300,000 and 400,000 dollars upon Ketchum and Company, the great New York dealers in Government bonds; dishonest clerks being in this case, as in others, the parties at fault. Ketchum and Company have suspended business. There are rumours in Wall Street of other great robberies; and a panic prevails in financial circles. With reason, too; for no depositor can feel safe when such enormous defalcations as those above chronicled are daily, nay hourly, coming to light. The defalcation by Smith J. Eastman, with a loss to his creditors of some 400,000 dollars, his flight to Europe, and final bringing-up in the hands of the French authorities, after a season in a French mad-house, have been commented upon by you; the recent arrest in Liverpool of Jeremiah Townsend, the Connecticut bank-clerk who ran away in May last with 100,000 dollars belonging to somebody else, has also been noticed in English journals; while the case of Windsor, our mercantile bank defaulter, has occupied the attention of your courts. In the West also, this epidemic is showing itself. On Sunday last the clerk of the United States quartermaster in Louisville was arrested in Cincinnati, on a charge of robbing the government of 20,000 dollars. And still another. Mr. A. P. Stone was the treasurer of the State of Ohio. He was appointed to fill that position by Salmon P. Chase, at the time of the appointment of governor of the States (since secretary of the United States treasury, and now chief justice), because of his presumed sterling integrity. He was chosen to fill a vacancy caused by the flight of Breslin Gibson, the regularly elected state treasurer, who absconded with some 300,000 dollars belonging to the state. Stone was also made collector of revenue for a large district. He engaged in cotton speculations, using government and states money for the purpose, lost heavily, resorted to the gaming table in the hope of recovering the deficiency, lost again, came away worse than a beggar, wandered into a cemetery, wrote a letter of farewell to his friends, and then swallowed a large quantity of laudanum, from the effect of which he ultimately died. His robberies amounted in the aggregate to 95,000 dollars.

There must be some inherent rottenness in the American system of finance to permit the occurrence of these enormous robberies. One can understand how a sharp, shrewd rascal, in a responsible position, can conceal his thefts for a time; but we are astounded at the facility with which bankers' clerks, and mere subordinates, can withdraw hundreds of thousands of dollars from the institutions by which they are employed, and continue their speculations for weeks, months, years, without discovery. Since the Phoenix Bank robbery came to light, examination has revealed the fact that over 40,000 dollars were stowed away in the bank by Jenkins, in odd corners, pigeon holes, and the like for subsequent removal.

TRADE OF THE UNITED KINGDOM.

THE Board of Trade returns for the month and six months ended the 30th Junewere issued on the 31st July, and again show rather unfavourable results as compared with previous returns: The falling off in the value of exports, however, is not very great, and is chiefly to be attributed to the decline in linen, woollen, and worsted manufactures. The total declared value of exports for the month last past was £13,227,062, against £13,978,526 in 1864, and £11,271,527 in 1863, which is a decline of £751,464 as regards the former period, but an increase of £1,955,535 over the latter. The total declared value for the six months of the present year is £74,128,638, against £78,047,586 in 1864, and £62,014,197 in 1863, which shows a falling off of £3,918,948 as compared with 1864, but an increase of £12,114,441 as contrasted with 1863. With respect to exports there is shown an increase in alkali, beer and ale, coals and culm, cotton yarn, cotton manufactures, hardware and cutlery, seed oil, wool and woollen and worsted yarn; but a decline in arms, ammunition, &c., earthenware and porcelain, haberdashery, and millinery, linen yarn, linen manufactures, machinery, metals, thrown silk, silk manufactures, British spirits and woollen and worsted manufactures. As regards imports, there is shown an improvement in guano, leather manufactures, flaxseed and linseed, tallow, wool, cocoa, coffee, tea, and wine; on the other hand, there is a falling off in raw cotton, flax and hemp, raw silk, spirits, and unrefined sugar. In the case of cereals, there has been an increase in wheat, barley, oats, beans, and Indian corn; but a decrease in peas and wheat meal and flour. As regards provisions, there has been an increase in butter, cheese, and eggs, with a decline in bacon and hams, and salt beef and pork. The changes in the various articles will be found enumerated in the annexed tables:—

EXPORTS.

Monetary Intelligence.

MONETARY REVIEW FOR THE MONTH OF AUGUST.

THE commercial and financial events of August have not been very important. We have had a quiet money market, limited stock speculations; and rather doubtful weather for the harvest; at the same time business has been especially restricted through the holiday season, the operators and others having in the absence of activity prolonged their vacation. It now seems pretty certain that the Bank directors will not advance the official minimum at present; indeed it is possible they may in a week or so reduce it $\frac{1}{2}$ per cent., an influx of bullion having set in and there being no Continental demand for export. The silver market remains quiet, the last advices from Calcutta and Bombay showing the rates of exchange to be favourable for this country. The best short paper is now discounted at $3\frac{1}{2}$ per cent., and three and four months' bills can be done at $3\frac{1}{2}$ and $\frac{1}{2}$ per cent.; Six months' paper is not freely negotiated. It may be remembered that the rates of money on the Continent are cheaper than in the United Kingdom.

The operations in English security have been limited. Prices have latterly been firmer owing to the purchases of the government bonds on behalf of the Sinking Fund and the investments of the public. Still the market must be considered in a quiet situation.

There has been no movement of consequence in foreign stocks. Steadiness is now the feature with a slight tendency to improvement, and next month there probably may be a return of buoyancy. Very few speculative transactions have recently taken place.

The railway market is at length recovering from its lethargy. The traffics are more favourable, the public have become buyers, and the dis-

position is evidently to give attention to this department. All the shares of the principal lines exhibit a decidedly firmer appearance.

Joint stock bank shares, finance and credit shares are all more or less gradually improving. If we turn the corner in business we may see a revival in quotations before long.

The produce markets remain very quiet.

THE GRAIN TRADE.

BUSINESS in nearly all the corn markets throughout the country has been anything but active during the last two or three weeks. As is usual at this period of the year, much depends upon the state of the weather for getting in the harvest, and as much rain has recently fallen, fears are beginning to be entertained that the corn yet to be gathered in may be seriously injured, should there not be a return of warm and genial weather. The price of wheat has consequently considerably advanced, and other grain in proportion. At the markets most recently held, even still higher prices have been demanded, but buyers refuse to respond, except in very pressing cases. The latest average quotations were wheat, 43s. 1d. per qr.; barley, 27s. 11d. per qr.; and oats, 23s. 10d. per qr. The price of wheat is now about the same as it was at the corresponding period last year.

The *Gazette* returns for England and Wales have been :—

Week ending, 1865.	Wheat. Qrs. sold.		Weekly Average. s. d.		Duty. s. d.		Corresponding Weeks Last Year. s. d.
July 29	63,828	...	42 10	...	1 0	...	43 0

NOTICES TO CORRESPONDENTS.

We have arranged in future to issue a double number in February and August, instead as formerly in May and November. This has been rendered necessary by the great increase of the Meetings of the Banks and Discount Companies, which will be always carefully collected in the pages of the *Bankers' Magazine*. We shall also give the proceedings of the various Credit and Finance Companies as they are more or less associated with banking, so that our subscribers and readers can refer to them without difficulty. Correspondents will please forward communications addressed to the Editor, No. 8, Birch Lane; subscriptions and orders as usual to Messrs. Groombridge and Sons, Paternoster Row, or Messrs. Waterlow and Sons, Carpenters' Hall, London Wall. **BANKING AND FINANCIAL ANECDOTES.**—It will be perceived from notice elsewhere, that the Editor of the *Bankers' Magazine* is collecting and arranging a series of Banking and Financial Anecdotes. Any contributions from subscribers and readers of the *Magazine* will be thankfully received, particularly if the subject-matter shall not have previously appeared in print. Nothing personal or offensive will receive publicity.

One or two communications stand over.

BANK OF FRANCE.

SUMMARY OF WEEKLY RETURNS OF BANKS OF ISSUE.

	Fixed Issues.	July 1.	July 8.	July 15.	July 22.
7 Private Banks	£4,189,151	£2,859,192	£2,912,170	£2,890,344	£2,866,667
9 Joint-Stock Banks ...	3,226,257	2,738,491	2,782,170	2,765,853	2,750,135
5 Totals.....	7,415,408	5,597,683	5,694,340	5,656,197	5,616,802

Large Weekly Circulation of these Banks for month ending July 22nd:—

Private Banks	£23,882,093
Joint-Stock Banks	2,769,183

Large Weekly Circulation of Private and Joint-Stock Banks ending as above

For a comparison of the above with the Returns for the month ending June 24th last, it shows:—

Decrease in the notes of Private Banks, of... ..

Decrease in the notes of Joint-Stock Banks, of... ..

Total decrease on the month

£214,679

12,074

£23,805

And as compared with the month ending July 23rd, 1864, it shows:—

A decrease in the notes of Private Banks, of... ..

A decrease in the notes of Joint-Stock Banks, of... ..

Total decrease, as compared with the same period of last year

The following is the comparative state of the circulation as regards the fixed issues:—

The Private Banks are below their fixed issues

The Joint-Stock Banks are below their fixed issues

Total below their fixed issues

£364,019

£1,307,058

467,095

£1,774,183

SUMMARY OF IRISH & SCOTCH RETURNS TO JULY 22, 1865.

Summary of Returns of Circulation of the Irish and Scotch Banks for the four weeks ending July 22nd, 1865, when added together, give the following as average weekly circulation of these Banks during the past month, viz.:

Large Circulation of the Irish Banks £5,718,427

Large Circulation of the Scotch Banks £3,711,737

Average Circulation of these banks for the past month

£10,090,164

On comparing these amounts with the Returns for the month ending 24th June last, they show:—

Decrease in the Circulation of Irish Banks £43,781

Decrease in the Circulation of Scotch Banks 186,989

Total decrease on the month

£229,750

And as compared with the month ending July 23rd, 1864, they show:—

Decrease in the Circulation of Irish Banks £372,992

Decrease in the Circulation of Scotch Banks £121,255

Total increase on the year

£401,247

The fixed issues of the Irish and Scotch Banks at the present time are given in the *Banking Almanac*, as follows:—

6 Banks in Ireland, allowed to issue... ..

12 Banks in Scotland, allowed to issue... ..

18 Banks in all, allowed to issue

The following appears, therefore, to be the comparative state of the circulation:—

Irish Banks are below their fixed issue

Scotch Banks are above their fixed issue

Total above the fixed issue

£966,399

The amounts of Gold and Silver held at the head offices of the several banks, during the past month, have been as follows:—

Gold and Silver held by the Irish Banks £2,078,443

Gold and Silver held by the Scotch Banks 2,408,292

Total of Gold and Silver Coin.....

Being an increase of £2,042 on the part of the Irish Banks, and a decrease of £32,457 on the part of the Scotch Banks, on the several amounts held by them during the preceding month.

£4,486,735

CIRCULATION OF THE UNITED KINGDOM TO JULY 22, 1865.

The following is the state of the Note Circulation of the United Kingdom for the month ending 22nd July, 1865:—

Circulation of Notes for the Month ending 22nd July, as compared with the previous month:—

	June 24.	July 22.	Increase.	Decrease.
Bank of England (month ending July 19)	£20,877,112	£21,983,547	£1,106,435	—
Private Banks	2,896,772	2,882,083	—	£14,679
Joint-Stock Banks	2,747,088	2,739,182	12,074	—
Bank of England.....	26,520,972	27,634,802	1,123,509	14,679
Private Banks.....	4,567,706	4,371,737	—	185,969
Joint-Stock Banks.....	5,762,208	5,718,427	—	43,781
United Kingdom.....	£36,840,886	£37,724,966	1,123,509	244,420

The comparison of the month ending July 23rd, 1864, with the month ending July 22nd, 1865, shows an increase in the Bank of England circulation of £658,137, a decrease in Private Banks of £14,679, and a decrease in Joint-Stock Banks of £138,083; being a total increase in England of £505,375, and in Scotland there is an increase of £121,255; and in Ireland an increase of £372,992. Thus being that the month ending 22nd July, as compared with the same period last year, presents an increase of £204,118 in England, and an increase of £788,365 in the United Kingdom.

The return of Bullion in the Bank of England, for the month ending July 10th, gives an amount in both departments of £15,774,689. On a comparison of this with the Return for the month ending June 21st, there appears to be a decrease of £235,232; and an increase of £2,021,366 compared with the same period last year.

The stock of specie held by the Banks in Scotland and Ireland during the month ending 22nd July was £4,486,735; being a decrease of £80,415 as compared with the Return of the previous month, and an increase of £258,984 as compared with the corresponding period last year.

OCTOBER, 1865.

THE NEW LAW OF PARTNERSHIP.

IN our August number, we expressed our doubts concerning some of the provisions contained in the new act to amend the law of partnership. We stated that our chief objection was the element of uncertainty which the new measure will introduce into transactions with such private firms as may avail themselves of the facilities it gives for the admission of dormant or annuitant partners. The statute specifies certain acts which shall not *of themselves*, make the persons doing them responsible as partners in the undertaking. These acts are the advance of money on a contract to receive a share of the profits, or a rate of interest varying with the profits; the acceptance of a share of profits as remuneration, by a servant or agent; the receipt of annuity by the widow or child of a deceased partner, or by the vendor of a business who takes a portion of profits in payment for good will.

We offer no apology for thus speedily recurring to a subject so important. Nor need we, after our repeated expressions of approval of the principle of limiting the risks of joint-stock shareholders, assure our readers that we are by no means unwilling to see it adopted by private firms. What we complain of is the uncertainty in which creditors will be left by the new law. A working man of business, who is known not to have sufficient capital for the trade he is doing, every day gets credit, because Solidsides is known to have a share in the concern, or because the Golden Dustman has come in as sleeping partner, or because Sir Peter Plutus's buxom young widow is known to draw quite a handsome income out of the profits of the firm of which her

late husband was for so many years the head. Hitherto, these excellent and wealthy people have been the creditor's trust, and the trader's stay, but now, when anything goes wrong, it may come out that they have been wise in their generation, and that by a secret back-stairs arrangement they have limited their risk to a certain sum agreed upon between the working member of the firm and themselves. There will of course be some cases in which the creditors will have no right to complain of the loss in which they are thus involved. But there will be many others in which, with greater or less justice, they will be able to protest that they have been deceived all along, and that they would never have parted with their goods or their money, had they not supposed they had all the estate of the more opulent partners to fall back upon. This will naturally lead to a number of attempts to show that the "limited," or as we may henceforth call them, the protected partners, have done something to forfeit their statutory protection, and what is or is not an act sufficient to entail this consequence will be contested at *nisi prius*, argued *in banco*, discussed in the Exchequer Chamber, and finally, after an indefinite amount of anxiety, uncertainty, and expense, decided in whole or in part by an appeal to the House of Lords. And after this little game has gone on long enough, Parliament will begin to think of a remedy for the evil, and will enact at last, as it ought to have done at first, that every co-partnership on the new basis, shall have the word "limited" at the end of its title, and shall be compelled to register the names and shares of every one interested, the proportion of profit he draws, and the amount of protected capital which he has invested.

We have no hope, however, that the legislature will show any undignified haste in supplying its own omissions. As the evils which Lord Tenterden's Act, and the Mercantile Law Amendment Act, were designed to cure, had subsisted, greatly to the advantage of the learned and long-robed profession, for years after any attempt to defend them had been given up, so will the crop of legal difficulties which the new law may be expected to mature, remain unsolved until some great and peculiarly hard case shall satisfy future Melbournes that the matter can no longer be safely let alone. The question whether the protected partners have done any act to forfeit their protection, will sometimes be one of law for the judge, but will far more frequently be one of fact for the jury, whose decision will vary with their sympathies and their prejudices, so as to add yet another element of confusion, to the glorious uncertainty of the law. *Misera est servitus ubi jus est aut vagum aut incertum*, is a maxim

of which, we doubt not, we shall be pretty frequently reminded in connection with this subject. The protected partners may sometimes, in legal phrase, estop themselves from setting up the limitation of their risk, by some unmistakable act, as by joining in a deed, a bill, or other security. As regards the parties to such instruments, these acts will be conclusive to fix the ability of those who might otherwise claim exemption. And other acts may have the same effect as against all the world, as if they allowed their names to appear as partners; if they are in the habit of buying, selling, or otherwise acting in such a way as to induce a general belief that they are members of an ordinary co-partnership, for here the judicial rule clearly is, that "if a person by a course of conduct, or by actual expressions, so acts that another may reasonably infer the existence of an ordinary partnership, whether the party intend it so or not, the party so acting cannot afterwards gainsay the reasonable inference to be drawn from his words and conduct."

We must not, however, expect that the courts will often have to deal with these clear and conclusive cases. They will have to draw fine distinctions, to split hairs, to lay down scarcely perceptible dividing lines. They will also be governed in great measure, by the analogy of cases already decided, and therefore we shall rapidly glance at some of the tests which have been held to prove partnership in former days. The doctrine of the leading case of *Waugh v. Carver*, in which it was long held that the gist of our partnership law was contained, may now be regarded as abrogated by statute, at least so far as those protected partnerships are concerned. It was laid down in a very celebrated judgment, that he who takes profits must, *ex necessitate rei*, be made liable to the losses. For many years however, the courts leaned in favour of restricting the application of this rule, and at length in *Wheatcroft v. Hickman*, a most elaborate judgment was given in the House of Peers to the effect that the true test of partnership liability is whether the persons by whom the business was carried on were the agents of those it was sought to make liable and authorised to pledge their credit. The defendants in that case were trustees of a firm in difficulties appointed to carry on the business, and to apply the profits, if any, in reduction of the debts owing to themselves and the rest of the creditors. In the course of their trusteeship, they ordered goods of the plaintiffs, who knew the capacity in which they were acting. The trading proved unprofitable, and the plaintiffs sought to make the trustees liable as partners, because as they contended, they were to benefit by the payment of their debts, and therefore, on the principle of

Wagh v. Carver, they were liable as partners in the concern. But, as already stated, the attempt failed on the ground above mentioned. Following this decision was one in which the payment of a certain salary and 10 per cent. on the profits was held insufficient to fix the partnership liability.

The first essential of a partnership appears to be a communion of participation of profits and loss arising both from purchase and sale. Hence, in a transaction for purchasing oil by three persons jointly, they were held not to be partners, because they were not interested in the future sale. On this principle, after the railway mania, sundry exceptionally lucky provisional committee-men escaped liability on contracts entered into by their coadjutors without their knowledge or consent, though the question in such a case as to whether the defendant held himself out as responsible for the debts incurred is always one for the jury. The same may be said as to the effect of the defendant's declarations respecting the nature of his interest in a concern, which he may have made on 'Change, or in the course of business, or even in ordinary conversation, though the presumption is necessarily very much weaker in this last case than in the two former.

Persons have been held partners by such acts as these: When a company had been formed to work a mine with a capital of £30,000, and only £20,000 being subscribed, the defendant took an active part in appointing a director to continue the scheme with the smaller amount. This was held evidence of his having authorised the board to go on with the smaller amount. In the same way a member of a building society was fixed as partner in an action for building certain houses whose erection had been resolved upon at a meeting at which he was present and approving. So when two merchants joined in certain consignments, and agreed that all commission on such business should be equally divided, this made them partners *quoad hoc*.

Attempts by a protected partner to bind the firm by acts *ultra vires*, may show that he has ceased to rely on his protection. As, if he submits a dispute in which the partnership is interested to arbitration, or, contrary to stipulation, draws bills on behalf of the partnership, these acts, though invalid as against the firm, may be sufficient to prove that he regarded himself, and wished the world to regard him, as a partner in the ordinary sense of the term. And the same would happen if he purchased goods in the name of the partnership, and, in fraud of his partner, converted them at once to his own use. Here, though the innocent partner would be liable to the vendee, the guilty one would probably be held no longer within the statutory exemption. The same result might follow if any protected partner.

other than a servant or agent remunerated by part of the profits, were to busy himself in collecting debts, or otherwise asserting an authority over the assets of the concern ; and acts subsequent to a particular contract may make such persons liable, as if they were to accept a bill or otherwise assume unrestricted partnership liability, for their condition would be different from that of partners newly admitted, who have, on the plea of no consideration, successfully resisted actions on bills which they had accepted for antecedent debts of the firm. In fine, we may say that the only safe course for a dormant protected partner will be to refrain from taking any active part whatever in the management of the concern, if he would enjoy the privilege which the legislature has given him of reaping many of the advantages and escaping some of the most onerous responsibilities of ordinary traders. But with agents remunerated by a portion of the profits, this reticence will, of course, be impossible, and in connection with them some of the chief difficulties of the new statute are likely to arise. Whether the evils we anticipate speedily become intolerable, will greatly depend upon the spirit in which our judges deal with the questions that may arise under the Act, but only a very sanguine man will hope to find that the beneficial working of the measure under notice has not been largely impeded by neglect of a very simple and obvious provision—a provision, be it observed, which has already been tried, and which is in actual and extensive operation in a class of transactions closely analogous to those of a private co-partnership.

COMMERCIAL INFLUENCES OF THE AMERICAN WAR.

THE American war being ended, it will be useful to consider its influences on the great branches of American commerce, that hereafter we may be better able to predict the business consequences of any great European struggle in which we, or others, may engage. When the war began, and indeed, generally throughout its continuance, it was regarded from two distinct points of view on this side of the Atlantic. There were those who judged of the probabilities of the case ; and there were those who took their stand on past experience. In some cases it might be said that probability and experience were combined, but they were exceptional : public writers and others, in the main, ranging themselves either on the side of theory or example. One of the most frequently quoted instances was France, when Law seduced our neighbours into extravagances and delirium. Mr. Chase's banking project was the conversion

of the General Bank into the Royal Bank ; the petroleum and contracts, his Indian Company, and Mississippi ; and Wall Street the veritable Rue Quincampoix. The blackness of darkness was said to be before him. As long, it was urged, as the sea is smooth, the tiniest bark may float upon its bosom, but when the tempest blows, the staunchest ship strains and creaks, and skilful seamanship alone saves it from destruction. Mr. Chase was a heretic, occupied in the stupid work of piling faggots for his own sacrifice ; of driving stakes for his own pinioning, that when the advancing tide touched high water mark, all would be over with him. And, it was continued, what else could be looked for from America : all economic wisdom being supposed to dwell at Birmingham or in Manchester ? On the other hand, the gentlemen of theory, those who never saw America, or if they ever saw it, knew so little of its strong national feeling, of its dogged resolution, and withal of its sturdy honesty, at bottom, that ghosts and goblins were constantly before them, looked forward to counter revolutions, anarchy, uprisings of the blacks, and with the triumph of the Confederate arms an instant repudiation of the unsound and unstatesman-like expedients of the United States treasury. According to those gentlemen, things had been done which ought not to have been done ; and of all sins, financial sins, they said, carry with them the surest punishment. What would happen when General Lee crossed the Potomac a conqueror ? The rotten fabric of shoddy rearing would tumble down, and the shock would be felt across the length and breadth of Europe.

If, however, it is the case that few if any Englishmen were sufficiently comprehensive in their views of the American war, it is not less true that the Americans were few and far between who saw their way through the haze of greenbacks, certificates of indebtedness, bonds bearing various rates of interest, and available for different purposes. Indeed it is true that several intelligent Americans, officially, semi-officially, and otherwise, found their way to England for information, and carried back with them to New York and Washington, all the standard treatises on currency and banking, and as many 1812 and later pamphlets as the second-hand booksellers could lay hands upon. Nor is it to be overlooked that so utterly at sea were the Americans, that the last appointment to the treasury turned on the names of the nominees, as if the accident of name might confer virtue ; as if a second M'Culloch were to be formed at the mere will of President Johnson. The circumstances were unusual, unprecedented, perplexing ; and the requirements staggering. The greatest conflict that history records, or that ever

may occur again, was in progress literally deluging the earth with blood, and demanding sacrifices of life and treasure which no doubt, would not have been made at all, could their extent by any chance have been ascertained before. So alike on both sides of the Atlantic men's judgments failed them; either because the sagacity or the faculty was wanting, to deal with a problem of greater breadth and depth than ever had been previously submitted to human reason. Fortunately for the interests of the commercial world, it has turned out that the resources of the United States have proved equal to the occasion, and that the policy of small expedients suggested by common sense has not been so much astray as to create confusion. The war is ended, and the atmosphere of commerce has regained much of its usual quiet. No great panic or revulsion has followed its eventful close, and with the exercise of common prudence none is likely to arise.

A very good general apprehension of the commercial influences of the war may be gathered from a few well-ascertained figures, accompanied by such matter-of-fact remarks as the figures may require. At the following dates gold stood at certain premiums, and certain sixteen commodities presented certain market values at those dates. What then was the fluctuation in gold, and what the fluctuation in the sixteen commodities? The figures are:—

	Gold Premium.	16 Articles.	Rise per cent.
March, 1862	... 1½	\$241.30	—
March, 1863	... 54	383.55	60
March, 1864	... 59	546.56	130
Dec., 1864	... 1.25	709.19	194

Here, then, is not a very rapid advance in gold, and not a very rapid advance in the market value of sixteen articles; for we are told, on the authority of Mr. Senator Woodbury, secretary of the treasury, that during the first American revolutionary war the depreciation of notes, and of course the appreciation of gold and commodities, was in the following rates:—

March 1, 1778	1 dollar in coin =	\$1.75 in paper.
Sept. 1, 1778	1 dollar in coin =	4.00 in paper.
March 1, 1779	1 dollar in coin =	10.00 in paper.
Sept. 1, 1779	1 dollar in coin =	18.00 in paper.
March 18, 1780	1 dollar in coin =	40.00 in paper.
Dec. 1, 1780	1 dollar in coin =	100.00 in paper.
May 1, 1781	1 dollar in coin =	500.00 in paper.
	1 dollar in coin =	1,000.00 in paper.

From March, 1862, to December, 1864, and from March, 1778, to May, 1781, are much the same intervals, and yet the gold premium in the first case was as \$1.25—in other words \$2.25 in notes had to be paid for \$1 in coin; while in the

second case \$1,000 in notes was the equivalent of \$1 in coin. The difference is the measure of the relative intensity of the monetary disturbance at the two periods. In 1781 the North American colonists were in the condition of the Confederates a year and a half ago; the currency worthless, regular business at an end, and the army kept in the field by forced supplies. On the other hand, in December, 1864, the Americans proper were in easy circumstances, actually charging more for everything they sold—their labour included—than they had any right to do; for the figures quoted show that while gold had advanced 125 per cent., the aggregate of sixteen commodities shows an advance of no less than 194 per cent., a superfluous advance of 69 per cent. No doubt some one pays the piper: but who pays him? Not the tens of thousands of labourers, mechanics, and others who have been enabled to commence business, to engage in market gardening, or to become farmers. Not the farmers who have had the means of increasing their acreage, and adding to their flocks and herds. Not the brokers, bankers, contractors, and capitalists, endless numbers of whom have accumulated substantial fortunes. The sufferer is the nation in its collective sense, and the measure of its suffering is the debt contracted in its name. That debt there is no use repudiating, and its burden will fall, like our debt, on future generations. Thus, in a certain sense, the war may be even said to have done some good; inasmuch as it has enabled many to climb to social eminence, independence, and comfort, who, without it, would have been struggling as before. The sixteen commodities and their prices, to which reference has been made, are the following:—

	March, 1862.	March, 1863.
Cordage Minilla.....	\$9.00 to \$10.00	\$18.00 to 18.50
Indigo	1.25 to 2.50	2.00 to 2.85
Coffee, Rio, 100 lbs.	17.25 to 19.50	30.50 to 34.00
India Rubber48 to .50	.85 to .87
Gummy cloth, 100 yards.....	11.00 to 11.50	16.00 to 16.75
Hides, Rio, 100 lbs.	21.00 to 21.50	30.00 to 31.00
Plaster of Paris	1.50 to 1.75	3.60 to 3.75
Leather, out, mid.	27.00 to 30.00	40.00 to 42.00
Mahogany	35.00 to 45.00	45.00 to 55.00
Molasses, 20 gallons50 to .55	.45 to .40
Silk, raw	5.00 to 5.50	10.00 to 10.57
Cassia, 100 lbs.	31.00 to 32.50	45.00 to 46.00
Gin	26.00 to 27.00	55.00 to 56.00
Sugar, Cuba, 100 lbs.....	6.87 to 8.75	9.25 to 11.50
Tin, Banca	30.00 to 32.00	56.00 to 58.00
Spelter	5.50 to 5.70	9.00 to 9.37
	<u>\$228.35 to 254.25</u>	<u>\$370.55 to 396.56</u>

	March, 1864.	December, 1864.
Cordage, Minilla	\$19.00 to 20.00	\$24.00 to 25.00
Indigo	1.60 to 2.50	2.60 to 3.00
Coffee, Rio, 100 lbs.	36.00 to 37.50	44.00 to 48.00
India Rubber83 to .85	1.16 to 1.20
Gummy cloth, 100 yards	15.50 to 15.75	20.50 to 21.00
Hides, Rio, 100 lbs.	29.50 to 30.00	31.00 to 32.00
Plaster of Paris	3.25 to 3.50	4.50 to 4.80
Leather, out, mid.	45.00 to 47.00	49.00 to 52.00
Mahogany	100.00 to 150.00	75.00 to 110.00
Molasses, 20 gallons70 to .80	1.10 to 1.27
Silk, raw	9.50 to 9.75	14.00 to 15.00
Cassia, 100 lbs.	62.50 to 65.00	100.00 to 105.05
Gin	103.00 to 110.00	210.00 to 215.00
Sugar, Cuba, 100 lbs.....	12.25 to 14.75	16.25 to 22.25
Tin, Banca	56.00 to 57.00	70.00 to 72.00
Spelter	12.50 to 13.00	15.00 to 15.50
	<u>\$516.13 to 577.00</u>	<u>\$679.11 to 739.27</u>

From March, 1864, until December, 1864, when the premium on gold was 59 per cent., and the premium on the sixteen commodities 130 per cent., the actual crisis of the war is covered; for in the words of a well-known American writer, "The uncertainties that attend the election, the publication of the annual reports, the assembling of Congress, the new projects for increasing the taxes, and their probable influence upon the value of and the demand for goods, together with the anxieties in relation to military operations and their possible influence, in combination with the treasury measures for raising money upon the value of goods have all tended to paralyze enterprise the more so as a new draft for 300,000 men was announced towards the close of December." No wonder that such an extraordinary complication advanced gold from 59 per cent. to 125 per cent., and commodities from 130 per cent. to 194 per cent. It is a curious circumstance, that the advances did not more readily suggest this, That before we venture to predict the commercial influences of war, we should be well assured of the resources of the people and of the basis on which rest the expedients of the treasury and the shifts of the banks. Then we may theorise as we please, and fortify our theories with the experience of former times. Had our American information been such as it now is, men would have been spared committing themselves to the realisation of impossible and absurd prophecies.

(To be continued.)

THE CLEARING SYSTEM.

To the Editor of the "Bankers' Magazine."

SIR,—It will hardly have escaped the observation of readers of the "Bankers' Magazine," that banking extension in the Metropolis has, within the last few years, assumed a new character. Formerly, all the banks were clustered in and around Lombard street, or in the immediate neighbourhood of Temple Bar. Those outside this companionship might be reckoned on the fingers. It is obvious that by this arrangement vast numbers of persons whose business happened to lie at a distance from the "city of gold" were debarred from the advantages derived from keeping a banking account, and the banks thereby lost much sound and valuable business. This fact does not seem to have attracted the attention of the private bankers, or if it did, they did not care to act upon it; but, with the rise of the joint-stock system and consequent increase of competition amongst bankers, came a change of practice: the experiment was tried of bringing the bank to every man's door, and thereby creating a great deal of new business, of a different class, it is true, to the accounts of the old first-class merchants and traders, but still well worthy of the attention of bankers. How successful the experiment has been may be judged by the number of branches the joint-stock banks have established, in fact, it may now be said that scarcely a district of importance is without, at least, one bank. Bayswater and Limehouse, Kensington and Camden Town, Pimlico and St. John's Wood, have all their branch banks; and within the last year or two some eight or ten have been opened at the West End of London, there being now nearly forty separate offices west of Temple Bar.

There can be no difference of opinion as to the advantages the public derive from the extension of the area of banking accommodation. The banker also reaps considerable benefit from new accounts from which he was formerly shut out by reason of distance. To the old banks however, this extension can hardly be said to be a boon; not only are they subjected to the competition of the new establishments, but they have entailed upon them additional labour and expense in the performance of the very important duties of collection &c. It is to the system, or rather want of system, in the collection of cheques and bills on non-clearing bankers that I wish to call the attention of the banking community, with a view to the initiation of some method to supersede the present antiquated, clumsy, and dilatory plan.

It seems most extraordinary that seeing the admirable way in which the clearing house has worked in the City, in economising both labour and time, the West End bankers should have remained contented so long without an attempt to extend its benefits to themselves, but still allow two or three dozen clerks simultaneously to traverse the same ground to do business that might be just as efficiently transacted by a fourth of the number. Doubtless there are difficulties in

the way of starting a fresh system, but what reform worthy of the name was ever carried where there were none to overcome? I for one cannot believe the West End bankers are averse to improvement, but think that if a feasible plan were laid before them, they would be ready to give it a fair consideration.

It would be well nigh impossible to obtain at the West End, over so much more extended an area, the rapidity and precision of the City clearing house, still that can be no reason for declining to amend the present most unsatisfactory system. Concentration is the thing required, and this may be had in two ways, either by the adoption of a central place of exchange, where one or more clerks from each bank should attend, or by a scheme propounded by Mr. Jarvis, and discussed in this magazine a few months since. He proposes that the collection should be made as at present at the counters of the different banks, but that instead of each banker clearing his own cheques they should be remitted to a common centre, and collected by one individual on behalf of all. The simplicity and economy of this plan strike one at once, and if a comparison between it and the present system be instituted it appears to great advantage. Mr. Jarvis would include in his collection all bills payable at private houses, post-office orders, and drafts on those nondescript people, army and navy agents; bills for acceptance would also be taken charge of.

It is said that Mr. Jarvis finds an obstacle to the working of his scheme in the practice of receiving credits up to four o'clock, and that if the public would submit to a regulation by which half-past three should be the latest time for "paying in," his scheme would be facilitated. It would, I think, be difficult to induce the public to accede to this arrangement, but supposing that point conceded, I must confess that it does not appear to me that Mr. Jarvis's plan would be thereby assisted, as I do not understand that it is his wish to supersede the clearing-house, but to engraft his own ideas thereupon. Under any circumstances the City banks could collect no more than they do now, and of course the West End banks must retain all their charge till the morning.

Whilst fully admitting the merits of this scheme of Mr. Jarvis, and recognizing the benefits, it would confer on the banking community, I am of opinion that an extension of the clearing-house system to the West End would facilitate business to a greater extent, inasmuch as it would be perfectly practicable to have the draft on those bankers who joined, cleared twice in the day.

Again, the establishment of a West End clearing house would relieve the banks of the necessity of keeping a large reserve of notes, which would then be released to meet the ordinary requirements of trade, of itself no small advantage when the amount thus uselessly held is taken into consideration, as it cannot at the lowest estimate amount to less than half a million. The profit would not, however, be reaped by the bankers, but by the community generally; as the bankers would not reduce their reserves materially, the form of those

reserves only would be altered : they would keep fewer notes, but it would be necessary to have an account with some West End bank by whom the balances could be adjusted. The benefits the bankers would derive would be the economy of time and labour ; consequently increased efficiency. I venture to offer the following suggestions for the consideration of the banking community :—

I propose that a clearing house should be established at some convenient spot westward of Temple Bar (Charing Cross would be suitable) to be conducted on similar principles to that in the City. That the City clearing bankers should present all drafts on West End bankers through a member of the West End clearing house ; West End bankers on the other hand should present their City charges through a City clearing banker.

That the day's clearing should embrace the receipt from noon to noon, and be divided into morning and afternoon clearing.

That the clearing house open at 10 o'clock, and the morning clearing close at 12 : this would include the receipt of the previous day after 12, and all returns from the previous afternoon's charge.

That the afternoon's clearing commence at 2 o'clock, and close at 3 ; this would include the receipt of the day up to 12 o'clock, and the returns from the morning's charge.

That the adjustment of the balances of the clearing be effected through the medium of the western branch of the Bank of England, and that the members of the clearing house should keep accounts with the branch for that purpose.

That when the balances between the respective bankers and the clearing house shall have been agreed, the clearing clerk shall make out and sign a credit or debit ticket to adjust the same ; this shall be countersigned by the superintendent, who will afterwards forward it to the Bank of England, and also send a certificate of the amount so debited or credited to each bank.

Some arrangement of this description would be necessary owing to the distances between the banks, unless it was agreed that the settlement should be one clearing in arrear, a system obviously open to very serious objection.

These suggestions are not offered under the impression that the plan proposed is perfect, I think, however, that valuable results would follow its adoption. It is time that the whole army of collecting clerks could not be dispensed with, but their numbers might be greatly reduced. The counters of the different banks would be relieved of the crowds that besiege them during the early part of the day, causing vexatious delays to customers, and consequent loss of temper.

The large reserve of bank notes now held by the various West End establishments to meet the demands of other banks would be rendered unnecessary, lastly the business of collection would be conducted more expeditiously for the customer, and economically for the banker ; a twofold advantage surely worth making the attempt to attain.

I have ventured to trouble you with these remarks on a subject the present position of which has long been an admitted evil, in the earnest hope of inducing some of the many talented men in the banking world to take it up in a really practical manner; if it is my fortune to have my plan criticised by any of your readers, I shall consider that a step has been gained by the ventilation of the question.

I am, Sir,

Your obedient Servant,

J. D. F.

London, August, 1865.

BANKING AND FINANCIAL ANECDOTES.

No. XL.

A BANKER'S CLERK AND HIS SALARY.

A BANKER'S CLERK, well known among his fellow clerks for his parsimonious habits, and whose salary was only eighty pounds a-year, was informed by one of the partners in the bank that the "house" (the title partners in a banking firm usually adopted) intended to raise his salary ten pounds. The clerk appeared somewhat surprised at this announcement, and replied, "I think it unnecessary, sir; I do not spend more than thirty pounds of what I now receive, and this addition will only tend to increase my anxiety and trouble." The banker, being quite unused to such an announcement, asked the clerk a few questions as to his mode of living, when he replied, "I usually breakfast in the street; and as to my dinner, I buy a penny loaf; and as you have an excellent pump at the end of the street, I have a drink of pure water; I have no tea or supper, and only indulge in a meat dinner on Sundays." This reply had the effect of hardening the heart of the banker, so that when any of his other clerks applied for an addition to their salary, he would relate this anecdote as an excuse for declining to accede to the request. The clerks very soon found means to rid the establishment of such an enemy to good living, exclaiming—

"Dost thou think because thou art virtuous
There shall be no more cakes and ale?"

SINGULAR TRIAL FOR FORGING BANK NOTES.

DURING the twenty-five years the Bank of England issued one-pound notes, the number of persons who were tried, convicted, and sentenced to death for forgery exceeded 500, besides 1,200 who were transported "for having forged notes in their possession, knowing them to be forged." Several of the trials were remarkable for the ingenuity displayed both by the counsel engaged for the prisoners, and also the prisoners themselves, in their endeavours to obtain an acquittal. One was the case of a man who had very peculiar notions respecting the nature of the offence with which he was charged, and for which he was found guilty. When asked by the judge whether he had anything to say why sentence of death should not be passed upon him, he replied as follows:—"My lord, I am indicted for issuing bank notes knowing them to be false and fraudulent; but I should like to know what difference there is between the offence, if it is an offence, with which I am charged, and that which 'the old lady' is daily committing: for she promises to pay what she never intends to pay, or ever can pay, for she invariably exchanges one promise to pay for another promise to pay." (At the time the bank did not pay its notes, but simply exchanged them for other notes.) "The learned counsel for the bank, who, no doubt, has been well paid, told the jury that I was instigated by the devil. This I deny; but even if I was my case would not be blacker, for if the 'old lady' is allowed to issue millions of false promises, why should not the old gentleman!" Here, the account states, there was a burst of laughter in the court, even the gravity of the judge was for a moment disturbed. He desired the officers to take into custody the offending parties; but this order was not so easy to execute, for the infection spread throughout the whole court, even the very officers appointed to keep order in the court could not refrain from laughing; but as laughing, like crying, must come to an end, the judge judged it best to let the laugh go round. When order was restored, and the prisoner was about to resume his address, the judge stopped him, saying, "We do not sit here to try the old lady to whom you allude, but to ascertain whether you have been guilty of felony. The jury have declared that you are guilty, and it is my painful duty to pass upon you that sentence from which I can offer you no hope of pardon," &c., &c. This may, and doubtless does appear very shocking, but in those days of "good old George III. of blessed memory," every Monday morning, during the sessions,

brought with it its death-bell, and Jack Ketch, whose profession was so profitable that no one ever thought of allowing him a fixed salary, was present.

THE BILL DISCOUNTER OUTWITTED.

ONE Sunday evening, in the summer, a celebrated bill broker was taking a walk near the seaside with his daughter, when they came to a gentleman's seat, the grounds round which were adorned with very beautiful flowers ; and, on stopping to admire the flowers, the lord of the domain, happening to be near the gate, and hearing the young lady express her admiration, invited the gentleman to view the grounds ; he also showed him his horses and carriages, then took him into the house and set before him wine and biscuits. On the gentleman's departure he exchanged cards with his hospitable host, each being pleased one with the other. It never occurred to the money-lender that all this show of wealth might be assumed for an object ; however, it was so, the party having, the previous week, by false pretensions, got temporary possession of the estate (which was to be sold with all the appurtenances) was determined to make the most of his present position. Consequently, on the following day he went to town and drove up to the door of the bill broker, and, having obtained an interview, he, with the greatest possible coolness, said he had come to town to pay for an adjoining estate, the purchase-money for which he found was £250 more than he had brought with him — would he kindly lend him his cheque for that amount in exchange for one of a like amount on his banker in the country ? The bill broker was for a moment disconcerted ; but on reflecting on the apparent splendour of the country establishment, and that his carriage was at the door, he, without further hesitation and with many courteous expressions of pleasure at an opportunity of obliging the gentleman, made the exchange of cheques ; the latter, with many thanks and apologies for the novelty of the request, drove off to the bank, received the money, then off home with his booty, being highly pleased with himself for having outwitted the money-lender. We need hardly say the cheque was returned "not sufficient ;" this unexpected result much surprised the bill broker, who of course wrote to the drawer, apprising him of the return of his cheque, who replied stating he would be in town in a day or two and would call and repay the loan with thanks, adding, "The return of the cheque was a blunder of the

bank clerk, who has been severely reprimanded for the error." But he never did call, but on the contrary, after victimising nearly all the tradespeople in the neighbourhood, he took French leave of his splendid establishment, carrying with him every portable article of value, and was never seen more.

BANKING IN JERSEY.

A FEW weeks ago, an English mechanic, having been engaged in perfecting some machinery in Jersey, on the completion of the job was paid the amount of his bill, £20, in £1 notes of the Bank of —, and being desirous of returning to England, and knowing that the Jersey notes would be useless out of the island, went to the bank to get the notes changed for gold. On presenting them to the bank and requesting he might be furnished with twenty sovereigns, the clerk in attendance seemed struck with the novelty of the request, and after some hesitation confessed "that he had not so much gold in the bank," adding, "but I will tell you what I can do for you. I will give you twenty notes on the Commercial Bank in exchange, which you can present at that bank and obtain gold for them." Our informant, who vouches for the truth of the above, then applied to the Commercial Bank and obtained the needful.

Most of us remember the story of the Killarney banker, who was also a saddler, and who, on being asked for cash for some of his promissory notes, answered, "Cash, your honour, what is that? Is it anything in the leather line?" This unsophisticated answer is not surpassed by that of the Jersey banker.

Banking in Jersey must be conducted on principles peculiarly local and entirely of a novel character, for it appears by the Jersey Almanack for 1865, that almost all the parishes in the island are banks of issue, a list of the parish banks is given, and the places where their promissory notes are made payable; but our readers will be somewhat surprised to learn that several of the parish banks do not state where their notes are to be paid; for instance, the parish of St. Brides issue notes "payable nowhere." The Trinity parish bank notes are also stated to be "payable nowhere." This can be verified on reference to the Jersey Almanack, from whence we have extracted the above information.

In our simplicity we thought it was necessary to state in the body of a promissory note where it is to be paid; but our Jersey fellow-

subjects take a very different view of such promises to pay, by unreservedly stating they are "payable nowhere." We should think such notes cannot have a very wide circulation, possibly not out of the parish; but the whole system appears to be a burlesque on the issue of paper money.

HOARDING OF GUINEAS.

AN old Irish woman went into a bank at Tipperary and asked the manager to give her Irish notes for ten golden guineas, which she said she had brought upwards of twenty miles to get changed, that she had hid the ten guineas up the chimney, and that they had remained there for forty years, that they had been placed there by her on the birth of her only daughter, that she had kept the secret up to this time, intending them as a marriage portion for her child, and as her daughter was to be married on the following morning she must, she said, return with the money, as no one in the village would take the gold. The banker told the old woman that he had no means of weighing the guineas and as some of them appeared much worn, if he gave her the full amount it must be at a risk of loss. After some parleying the old woman consented to receive ten pounds in bank notes with which she trotted off with great glee. Now, if she had put the ten pounds in the savings bank and kept it there all the time it would, with interest and compound interest, have accumulated to a much larger amount: as it was she considered it an important marriage portion. After the old woman had left the bank with the ten one-pound notes, a singular circumstance took place with respect to one of the guineas, which proved to be a William and Mary guinea of the year 1693, in capital preservation. A young Irish gentleman, a genuine Orangeman, offered the bank a five pound note for the guinea, which having obtained, he said, "I will bore a hole in it and wear it round my neck on the 12th of next July, in honour of the "immortal memory."

REMARKABLE CASE OF GENEROSITY AND DISINTERESTEDNESS.

A MAN of the name of Marsh, a furniture dealer in Dublin, in the course of many years made an immense fortune, and having, in the early part of his career met with many kindnesses from Mr. —, a

celebrated pawnbroker in Dublin, and with whom he had always been on terms of friendship, was desirous of showing, by some generous act, his gratitude for past favours, but being remarkably fond of money he was a long time making up his mind how to effect his object. At last he came to the determination to do for the pawnbroker what would doubtless be considered an act of unsurpassed generosity. Accordingly he called upon Mr. —, and informed him that he was going to the Bank of Ireland to make a transfer of some stock, and wished his friend to accompany him. Mr. —, having on many previous occasions gone to the bank with him, was not surprised at the request and therefore consented to do so. When they arrived at the Bank of Ireland, Mr. Marsh, who was a man well-known there, addressed the clerk as follows, "I am desirous, sir, of showing my gratitude to this gentleman" (turning to Mr. —) "for many kind services he has rendered to me for many years past, by making him some return for such kindnesses; I therefore request that you will make out the necessary papers for the transfer from my name to that of Mr. — one hundred thousand pounds, which is just one-half of the stock standing in my name in the books of the Governor and Company of the Bank of Ireland." Both the clerk and the pawnbroker, particularly the latter, heard with amazement this announcement. However, after very little discussion on the subject, the transfer was made; and on leaving the bank Mr. Marsh was poorer than when he entered it by one hundred thousand pounds, whilst the pawnbroker was the richer by that amount.

About ten days after the above transaction took place, Mr. Marsh called on the pawnbroker and informed him that he had been very unhappy in his mind since he had made the transfer of the stock. that he had not had a wink of sleep, would he therefore go with him to the bank and re-transfer the amount into his name? The pawnbroker readily accompanied him, and without the slightest hesitation re-transferred one hundred thousand pounds from his own name to that of Mr. Marsh, and on this occasion leaving the pawnbroker poorer by £100,000 than when he entered it. Now, let us see how this generous and disinterested act on the part of the pawnbroker was rewarded. Just twelve months after the events just recorded took place, Mr. Marsh died, leaving the whole of his stock, amounting to £200,000, to the pawnbroker, in consideration of kindnesses received and the unselfish disposition displayed on the occasion of the transfer of the stock.

THE NEW BRAZILIAN LOAN OF £5,000,000.

THE prospectus of a new Brazilian loan of £5,000,000 was issued on the 10th September by Messrs. Rothschild and Sons, the financial agents of the government, and is as follows :—

“ Imperial Brazilian 5 per cent. loan of 1865, for £5,000,000 sterling.

“ His Majesty the Emperor of Brazil having by decree, under date of the 6th July, 1865, authorised a loan of £5,000,000 sterling, in conformity with the law No. 1,244, of 26th June, 1865, and with the law No. 1,245, of 28th June, 1865.

“ Messrs. N. M. Rothschild and Sons, financial agents of the Imperial government, have to announce that they are ready to receive at their office subscriptions for this loan.

“ It will be emitted in bonds to bearer for £100, £500, and £1,000 each, carrying interest at 5 per cent. per annum, with coupons payable half-yearly in London or at Amsterdam, at the exchange of eleven guilders eighty cents per pound sterling; the first half-year's dividend being due on 1st March, 1866.

“ The bonds are to be issued for thirty-seven years, and will be redeemed by a sinking fund of £1 per cent. per annum, together with the interest on all bonds paid off, operating half-yearly in drawing by lot at par.

“ The first drawing to take place in March, 1867. The price of emission is £74 for every £100 stock, payable as follows :

	5 per cent. on application.
10	“ on allotment.
10	“ on 3rd November, 1865.
10	“ on 25th January, 1866.
10	“ on 23rd March, 1866.
10	“ on 23rd May, 1866.
10	“ on 24th July, 1866.
9	“ on 25th September, 1866.

74

“ The failure to pay the whole of these instalments forfeits all previous payments.

“ To subscribers who prefer payment by anticipation of the above periods a discount of 5 per cent. will be allowed.

“ Applications for this loan must be accompanied with a deposit of 5 per cent. on the amount applied for. In case the allotment should not require the whole deposit, the surplus will be returned; if it be insufficient for the first instalment on the amount allotted, the balance required must be paid forthwith.

“ Scrip will be issued, which will be exchanged for the bonds after payment of the last instalment.

“ Applications will be received until Tuesday evening, the 19th instant.

“ New Court, St. Swithin's Lane, Sept. 14, 1865.”

Reports of Joint-Stock Banks.

BOMBAY BROKERS' LOAN, DISCOUNT, AND BANKING COMPANY.

AN ordinary general meeting of the shareholders of the Brokers' Loan and Discount Company was held at the office of the company on the 24th July, to receive the report of the directors and a statement of the affairs of the company for the half-year ending June 30th, and also to elect directors. Cowasjee Nanabhoy, Esq., Chairman. The manager, after reading the notice convening the meeting and the proceedings of the last extraordinary general meeting, read the following report of the directors:—

"In accordance with clause 75 of the articles of association, the directors have the pleasure of meeting the shareholders with a view of submitting the report of the state of the affairs of this company for the half-year ending 30th June, 1865. As for the state of the affairs, the directors beg to refer the shareholders to the auditors' report, and in order to prevent erroneous impressions that may be entertained by any of the shareholders, from the remark made by the auditor, "that the securities have also been examined and found in order, with exception of a small portion," the directors have to state by way of explanation that they did not and do not think proper to have the shares of some of the institutions transferred to the name of this company, as by so doing it becomes a party liable to the debt of any such institutions in which shares are registered into the name of this company or its affairs: they trust this explanation will be quite sufficient to the shareholders. The directors regret to state that from the present bad times they estimate that the loss to this company would be about 4 lacs of rupees; but, of course, such loss would be reduced to a great extent when the securities improve from the present depressed state. Your directors are glad to say that notwithstanding the resolution passed at the extraordinary general meeting held on the 8th March last, they have not entered into any time-bargains, and also they have not lent any money on any financial or reclamation companies' shares, but they have mostly lent money on the shares of this bank and of chartered banks, and also on the shares of the banks with limited liabilities, and on landed property, and also on shares of presses and spinning companies, &c., &c. The directors have to state that the greater portion of the loss is attributable to the sums lent to Burjorjee Sorabjee Lywalla (late a director and now insolvent) on the securities of the shares in the Bank of Bombay and other banks. The directors have also to point out to the shareholders that the balance-sheet of the company, with the auditors' report thereon, shows that the net profit for the past half-year is Rs. 87,070-3-5, inclusive of Rs. 25,517-8-1, as outstanding interest on the overdue bills up to 30th June, 1865. The directors have to state that clause 76 provides that a printed copy of the balance-sheet shall seven days previously to the meeting be furnished to every shareholder, but the directors regret to say that owing to the unavoidable delay on the part of the auditors in auditing the accounts, they have not been able to comply with its requisition. The directors have to state that some time ago three of the directors, Messrs. C. G. de Souza, Burjorjee Sorabjee Lywalla, and Ruttonjee Runchoredass, became insolvents, and consequently they are disqualified, and there now remain Messrs. Cowasjee Nanabhoy, Luck-

Bombay Brokers' Loan, Discount, and Banking Co. 1193

midoss Dharsey, and Munjee Nursey, of whom the two former now retire, but are re-eligible. The directors are willing to give any explanation any of the shareholders may ask for. In conclusion, the directors would recommend the meeting not to declare any dividend until the amount of loss is provided for."

Balance-sheet for half-year ending 30th June, 1865.

July 1st, 1865. By balance brought forward Rs. 87,070-3-5.

It was then proposed by Pestonjee Burjorjee, Esq., and seconded by Dorabjee Cursetjee Colah, Esq.,—"That the proceedings of the last extraordinary general meeting now read be confirmed."—Carried unanimously.

Proposed by Pestonjee Burjorjee, Esq., and seconded by Dorabjee Cursetjee Colah, Esq.,—"That the directors' report, the balance-sheet, and auditors' report now read be adopted."—Carried unanimously.

Proposed by Dorabjee Curesetjee Colah, Esq., and seconded by Pestonjee Burjorjee, Esq.,—"That Messrs. Cooverjee Nanabhoy and Luxmedass Dharsey be re-elected as directors."—Carried unanimously.

Proposed by Pestonjee Burjorjee, Esq., and seconded by Dhunjeebhoy Jamsetjee Jussawalla, Esq.,—"That Messrs. A. G. de Ga, Rustomjee Burjorjee Mody, Dorabjee Framjee Panday, and Sorabjee Pallonjee Meherjee be appointed as directors in the room of those disqualified."—Carried unanimously.

Proposed by Pestonjee Burjorjee, Esq., and seconded by Dhunjeebhoy Jamsetjee Jussawalla, Esq.,—"That the thanks of this meeting is due to Mr. Ardaseer Bomanjee, the manager, for his conduct in the discharge of his duty, and also thanks to the existing directors, Messrs. Cowasjee Nanabhoy, Luxmidass Dharsey, and Munjee Nursey, for their management."—Carried unanimously.

The meeting then terminated.

BANK OF AUSTRALASIA.

THE half-yearly meeting of the shareholders of this company was held at the bank premises, Threadneedle Street, on the 28th July—Mr. E. Hamilton, M.P., in the chair.

The following was the report of the directors :—

"In conformity with the practice which has now been established some years, the directors have invited the attendance of the shareholders for the purpose of declaring a dividend, and of informing them that in the interval that has elapsed since their last report the progress of the bank has been steady and satisfactory. It must be borne in mind that within the last few years the number of local banks in the Australian colonies has greatly increased, and that banking operations there are now carried on in the face of active competition in all quarters. The position of the bank is, however, fully maintained, and there is every reason to look confidently to the future. The business in New Zealand is becoming important, and the result for the half-year ending in April last is as good as was anticipated. The seat of government having been transferred from Auckland to Wellington it has become necessary to open a branch at the latter place, for which the sanction of the court has been already given. The dividend and bonus will be payable on the 17th of October next, and will be at the rate of 14 per cent. per annum, free of income tax, that is to say £2.16s. on each old share and £2.2s. on each new share. Henceforward the old and new share, will stand on the same footing in regard to dividend and bonus, and all distinction between them will cease."

The Chairman, in moving that the report be adopted, observed that the business to be transacted was of so formal a character that he almost regretted that they were bound by precedent to invite the attendance of the shareholders on that occasion. The only definite matter before them was the announcement of the dividend at the rate of 14 per cent. per annum, or 7 per cent. for the half-year. He much wished that the profits realized had enabled them to make a better return, but with all deference to those who formed over sanguine expectations he thought the dividend was a satisfactory one, especially when they considered the recent extension of their capital by the issue of new shares without the usual loading of a high premium. The directors could not take credit or discredit for issuing the shares at par, as they were required to do so by the deed of settlement

Some might suppose that the directors were not good stewards in giving to the shareholders in this way £200,000; but, as he had said, they had no option. The colonial management, they would admit, had done well in enabling them to declare a dividend at the rate of 7 per cent. for the half-year upon their £1,125,000 of capital, and which would absorb the large sum of £78,750. The accounts from the colonies continued to be favourable. It was true that business was represented as dull, but that was in comparison with the standard of 1853, 1854, 1855, and 1856, which their zealous officers on the other side would be glad to see maintained. Their own business had not diminished; on the contrary, it had in some respects improved. All their advances were protected by good security, and from some that were at the last meeting a source of anxiety, they had escaped with less loss than they then anticipated. The superintendent was satisfied with the progress of business at New Zealand. The bank had taken deep root there, and they had every confidence that before long all the branches there would be productive of profit. The necessity of opening a branch at Wellington had arisen from the provision in the charter which directed that all notes issued by any of the branch banks should be payable at the seat of government as well as at the branch by which they were issued; they had, however, no reason to regret the change. Wellington was the capital of the first settlement made by the New Zealand Company, and being near Cook's Straits, which separated the northern from the southern islands, was more central and more available for business than Auckland. The reports from Australia were also favourable.

Mr. Holme seconded the motion.

In reply to a shareholder the Chairman stated that the bank allowed interest on deposits for fixed periods, but not on current accounts.

The motion was agreed to, and a vote of thanks to the chairman concluded the proceedings.

BOMBAY PRESIDENCY BANK, LIMITED.

THE second ordinary general meeting of the shareholders of this bank was held at the bank's office on the 31st July; Mr. Pestonjee Nowrojee Pochajee, in the chair.

The manager read the minutes of the last meeting which were confirmed, and afterwards read the advertisement convening the meeting for the following purposes:—1st. To receive the report of the directors, and the balance-sheet to 30th June, 1865, and to transact such business as shall in the said report be presented to the meeting. 2nd. To elect two directors, in the room of Messrs. A. C. Gumpert and Nowrojee Ardaseer Dauver, resigned. 3rd. To elect auditors for the ensuing year. 4th. To amend the 30th article of association by adding the words "or August" after the word "July" in the said article. 5th. To amend the 37th article of association by striking out the said article, and by substituting in lieu thereof the following words: "Any meeting of which notice specifying the intention to propose such resolution shall have been duly given." 6th. To amend the 100th article of association by adding after the words "any calls that may have been made upon any share of such shareholders in the company," where the same occur in the said articles, the words following, that is to say: "or otherwise howsoever as a debt due to the company from him either alone or jointly with any other person or persons."

The following is the directors' report:—

"The directors, in meeting the shareholders for the second time, have to lay before them the balance-sheet of the bank on the 30th June last, duly audited. A third call of Rs. 50 per share was made payable on 22nd September last, and the accounts show that the sum of Rs. 62,300 remains unpaid of that call, and Rs. 24,900 of the second call. Notice to the effect that all shares on which the second and third calls have not been paid have been forfeited, has been duly given to registered shareholders. The directors do not at present contemplate making any further calls. A statement of the income and expenditure for eleven months to 30th June is laid before the meeting. The balance of profit and loss account, viz., Rs. 3,59,720-15-2 the directors propose to carry forward to the current half-year, and beg to express their regret that they cannot recommend the payment of a dividend at this time. Looking at the monetary crisis which has existed here for the last three months, it is not to be supposed that the bank will escape loss, but meanwhile the directors cannot estimate accurately the exact amount. The directors, however, may mention that although in some cases they might have forced the sale of shares held in security for advances, they thought it advisable not to do so in a depressed market, and are confident that consequently the bank is now in a much better position. Since the beginning of July the prices of good stock have much improved, and the directors venture to hope that the course they have adopted will ultimately prove to have been a prudent one. With the view of extending exchange business, the directors propose opening branches of the bank in Calcutta and London, and forming local committees in those places. The shareholders will observe in the balance-sheet an entry of Rs. 91,500 for 610 shares held for allotment to the committees. The directors had hoped ere this to have had the branches in operation, but the unlooked-for state of local affairs has for a time prevented the arrangements being carried out. The shareholders will have to elect two directors in room of Mr. A. C. Gumpert and Mr. Nowrojee Ardaseer Dauver, resigned. The shareholders will also have to elect two auditors for the ensuing year. The directors recommend that certain clauses of the articles of association be amended, viz.:—The 30th article of association by adding the words 'or August' after the 'July' in the said article. The 37th article of association by striking out the words 'such meeting' where they first occur in the said article, and by substituting in lieu thereof the following words:—'Any meeting of which notice specifying the intention to propose such resolution shall have been duly given.' The 100th article of association by adding after the words 'any calls that may have been made upon any shares of such shareholders in the Company' where the same occur in the said articles, the words following, that is to say: 'or otherwise howsoever as a debt due to the company from him either alone or jointly with any other person or persons.'"

Balance-sheet to 30th June, 1865.

The Chairman then said—Gentlemen,—I have little to add to the report which has been read. The balance-sheet has been in your hands for the last week, and the directors are happy to think that it is more favourable than was at one time anticipated. After a careful valuation of our assets, I am able to say that the probable losses, although considerable, will not be so heavy as to interfere in any way with the working of the bank. I only ask you to continue that support and confidence in the directors which you have hitherto shown. Two of the directors having resigned, the board have the pleasure to recommend in their places Mr. Sapoorjee Ardaseer Panday and Mr. Rustomjee Framjee Metah. The names of Mr. A. Huson and Mr. J. L. Brodie will be submitted to the meeting as auditors for the next year.

The following resolutions were then submitted to the meeting and carried unanimously :—

Proposed by S. P. Framjee, Esq., seconded by Framjee Bomunjee Cama—"That the report of the directors and balance-sheet be adopted and printed for the information of the shareholders, and that a statement giving additional information be prepared, and be open for the inspection of any registered shareholder at any time in business hours from the 5th to the 15th August."

Proposed by Jehangeer Goostadjee, Esq., seconded by Manockjee Hormusjee—"That Mr. Sapoojee Ardaseer Panday and Mr. Rustomjee Framjee be elected directors of the bank."

Proposed by Limjee Jamsetjee, Esq., seconded by Cursetjee Sorabjee Wadia—"That Mr. Arthur Huson and Mr. J. L. Brodie be appointed auditors."

Proposed by Framjee Hormusjee Camasarywalla, Esq., seconded by Pestonjee Nowrojee Shroff, Esq.—"That 30th article of association be amended by adding the words 'or against' after the word 'July' in the said article."

Proposed by Jehangeer Goostadjee, Esq., seconded by Jehangeer Rus-

tomjee Mody—"That the 37th article of association be amended by striking out the words 'such meeting' where they first occur in said article, and by substituting in lieu thereof the following words: 'Any meeting of which notice specifying the intention to propose such resolution shall have been duly given.'"

Proposed by Framjee Bomanjee Cama, Esq., seconded by John Forth—"That the 100th article of association be amended by adding after the words 'any calls that may have been made upon any shares of such shareholder in the Company' where the same occur in the said article, the words following, that is to say: 'or otherwise howsoever as a debt due to the company from him, either alone or jointly with any other person or persons.'"

Mr. S. P. Framjee then proposed, and Mr. Merwanjee Ruttonjee Paruck seconded, a vote of thanks to the chairman for his able conduct in the chair, and the proceedings terminated.

BANK OF BOMBAY.

THE annual general meeting of the proprietors of the Bank of Bombay was held at its offices on the 7th August, to enable the directors to submit a statement of the affairs of the bank made up to the 30th June. Robert Hannay, Esq., chairman of the board of directors, presided. All the directors, except the Hon. Rustomjee Jamsetjee Jejeebhoy, together with a number of shareholders, were present.

The Chairman having read the advertisement calling the meeting, laid on the table the statement of accounts, and read the directors' report, as follows:—

"The directors have now to submit to the proprietors a statement of the affairs of the bank up to the 30th June last, showing a net profit of the half-year of Rs. 19,82,085-3-6, after providing for current expenses of establishment, interest on deposits, and deducting Rs. 22,836-9-2 for a loss incurred at one of the branches. From this statement it will readily be seen, that under usual circumstances the directors would not only have been enabled to have declared a liberal dividend, but also to have carried a handsome sum to credit of reserve. Looking, however, to the terrible crisis through which we have just passed (the most trying time perhaps for banks and commercial men ever seen in India), and considering the amount of liabilities current on 30th June, the directors have, after much anxious deliberation, resolved not to declare a dividend for the past half-year. This they have already intimated by circular to proprietors resident in Europe. The directors have much satisfaction in stating that since 30th June last the debts due to the bank have been very considerably reduced. Some time, however, must elapse before a reliable estimate can be made of the ultimate loss the bank will sustain through the failure of many of its unfortunate constituents. They trust, therefore, that the proprietors will approve of the course adopted by the directors in withholding a dividend for the past half-year. Taking a rather unfavourable view of liabilities current on 30th June last, the directors estimate that the losses will not exceed 30 lacs, but it is quite possible that the ultimate loss will be much less, so that there is every hope of shareholders receiving a fair dividend at the end of the current half-year. Since the last annual meeting of proprietors, new branches and sub-branches have

been opened as follows:—Branches at Ajmere and Jubbulpore; sub-branches at Ahmednuggur, Dholera, Secunderabad, and Wudwan. The directors have pleasure in reporting that the business at the branches is progressing favourably, although the government treasuries have not as yet been handed over. During the crisis, when for the first time in the history of Bombay, many hoondees were not paid at maturity, it was feared that the branches would prove a serious source of loss, but already the bulk of past due hoondees have been retired, and there is now no reason to doubt that the profits of the branches will considerably more than meet their losses. Calls on the new capital have been very promptly met; out of Rs. 1,04,50,000 of new capital, only Rs. 76,690-2 remained unpaid on the 30th June last. When this sum is paid the total capital of the bank will be Rs. 2,09,00,000. The directors have much pleasure in informing the proprietors, that in November last they effected a favourable sale of the premises occupied at present. The net amount expended on the building was Rs. 3,01,101-3-8, and the amount realised by the sale was Rs. 6,05,000, so that they were thus enabled to place a profit of Rs. 3,03,898-12-4 to the credit of 'Rest account.' The new and more commodious premises in the Elphinstone Circle are progressing favourably, and will probably be ready for occupation about 1st June next. A very erroneous impression having gone abroad relative to the extent of the bank's advances on shares, the directors have to state that after the rescinding of an old rule in April last, only about 35 lacs were loaned to constituents of the bank on the collateral security of shares. The bulk of the loans granted during the past year were, as was the custom of the bank, granted upon personal security only; and during the crisis when these loans became due, if constituents were unable to pay in full, the bank never hesitated to take what collateral security it could obtain. This, it is presumed, must have been the origin of the rumours as to enormous advances having been made upon shares. For the information of the proprietors, there are hereto appended copies of the auditors' report and the correspondence that passed between Government and the bank regarding a proposal made by the former that the bank should enter into."

The Chairman, in addressing the meeting, said:—Gentlemen, in moving the adoption of the report, I will, with your leave, make a few remarks upon the management of the bank, before and during the very trying period through which we have just passed. No one present can regret the losses sustained by the bank more than the directors themselves. Most of them are large shareholders, so that you may be assured in every thing they did they considered they were acting in the interest of the proprietors. The past three months has probably been as trying a time here as ever any directors had to contend with. Few banks, and I believe very few individuals, have escaped heavy losses; and as the Bank of Bombay was the chief bank of discount, dealing with enormous sums of money, when Bombay and its inhabitants were supposed to be revelling in wealth, I believe that had it in 1864-65 been under the control of a Hodgson, a Bowring, or a Lord Overstone, it would have been impossible even for them to have avoided heavy losses occurring in the late time of unprecedented disaster. In what were termed the good old times, when the bank sailed under its old charter, Bombay was a very different place from what it is to-day. In those good old days the limit of personal security was 3 lacs, and very few firms or individuals required more up till say 1856. Discounts were then very trifling, for the greater part of the bank's funds were generally locked up in Government paper, and the bulk of the loans were at low rates on similar securities. The bank sailed easily on, doing very little good, but, it is true, no harm. When investments left a profit, a

or 8 per cent. dividend was paid, but when Government paper was dull, shareholders had frequently to be content with $5\frac{1}{2}$ per cent. During the first sixteen years, say from 1841 till 1856 inclusive, the annual average dividend was about $6\frac{1}{2}$ per cent. From 1857 till now (including this half-year without a dividend) the average has been $10\frac{1}{2}$ per cent., but taking 1863, 1864, 1865, the period during which the new charter has been in operation, the average dividend (still including this blank half-year) has been over $12\frac{1}{2}$ per cent., and this upon a greatly increased capital. From 1856 the commercial growth of Bombay has been rapid; greater facilities than the Bank of Bombay could give were required, and these were met chiefly by the yearly increasing exchange banks. Much for the benefit of shareholders, the system of investing in Government paper was given up, under the presidentship of Mr. Birch, one of the ablest financiers it has been my good fortune to meet in India. This gave the bank more power for good, but it was soon found that the capital was insufficient; also that the restrictions in the old charter were antiquated, and required revision. Whatever may be said, I consider that you had then sagacious men on the direction. The new Act was carefully considered at the council board and by special committees, and the result was the passing of it without restrictions as to amount, and with permission, when deemed admissible, to advance on shares in public companies. The result of this was an enormous increase of business, and handsome dividends to the shareholders, and although large sums were advanced on personal security, until within the past twelve months, the bank's only loss was Rs. 20,000. The directors had thus increased confidence in the profit and safety of large personal loans, and one of the native directors, who was on all sides considered the most sagacious man of his community—I allude to Mr. Cowasjee Jehangeer—proposed that the secretary and treasurer from his long experience should not only have full power to grant loans on his own judgment, but should also have a vote at board, and power of veto over the recommendations of directors. This was not agreed to, but greater latitude was given to the secretary, and in 1864, when Bombay was in the heyday of prosperity, loans were granted to the then considered good men, with a free hand. At this time it was again proposed to double the capital. Shareholders, the press, and the public applauded: the act was done. New shares were issued, and those who chose to sell had an opportunity of making profits equal to many years' dividends. Had the present state of matters been then foreseen, no doubt a handsome reserve would have been formed out of the new issue, but instead of this the greater part of another crore was loaned to the eager public. In the now altered state of things it may possibly ere long be found that the capital is too large. We now approach the time when the present directors had their work to do. In the early part of the year applications for discount and loans were enormous; with a view to check this the bank rate was raised week after week. The bulk of the money then given was lent to purchasers of produce, and, as we believed, few of the loans granted were for the purpose of local speculation. Soon after this came the collapse in cotton, and with it the collapse of Bombay. The management of the bank was then a matter of ceaseless anxiety to your directors, and for my own part I can say the cause of many a sleepless hour. Loans were scrutinised with the utmost care, and were granted only in cases where they appeared to be likely to be productive of general good. The times being so peculiar, after due consideration we thought that circumstances would warrant the relaxing of rules and the lending to constituents who had the bulk of their funds locked up in first class securities. It was too late. Shortly after, the great share collapse came like

a peal of thunder, and the rule was placed in abeyance after advances had been made to the extent of only about thirty-five lacs. Sir Charles Wood, in his budget speech, says :—"Somehow or other—I don't know how—the bankers of Bombay got the power in their charter of advancing money on speculative shares, and they used that power to a considerable extent. I wrote early in the year to Sir Bartle Frere, calling his attention to the necessity of looking after what they were doing; and whether in consequence of my letter or not I can't say, but the government directors went down to the bank, and on their representations it ceased to do that which it had been doing for some time, viz., advancing largely on these shares. It was very wrong ever to have advanced money in that way at all, upon a perfect unnegotiable security. Whatever rumours may have reached this country, I wish to state that the bankers in Bombay will in future go on in the ordinary way, and there need be no apprehension in the public mind on this subject." Here he must evidently have been misinformed. What he may have written to Sir Bartle Frere, we do not know; but you are now aware that we did not advance largely upon shares, and the statement about the government directors coming down is simply an illusion. After all you have heard and read outside, you may possibly be surprised when I tell you that out of the 35 lakhs advanced on shares, only from 6 to 7 lakhs of this was lent upon shares in the Bombay Reclamation Company; and even these advances were to men whose personal security any of you would have taken. Eight and a half lacs were advanced upon shares in the Elphinstone Land Company at a premium which I believe any of you will be most willing to give a month or two hence. The balance of the sum named was upon shares in chartered banks. Many of these loans are already paid up, and upon others additional security has been obtained. Our policy may have been wrong: it is easy to prophecy after an event; but at the time the cry of the public and the press was, "What is the Bank of Bombay about? With two and a half crores of cash, why should it not freely help the public?" My belief is that during the past four months the course pursued by the Bank of Bombay and one or two other establishments, has done much to lessen the severity of the crisis, as well as to prevent the general ruin of Bombay:—first by judicious and well-timed loans to institutions and to individuals; next by not pressing good constituents in the midst of panic. Had we adopted the latter course, what would have been the result? I leave you to picture it. Whatever may have been the mistakes (who will throw the first stone, and say he has not made one during the past year?) whatever the shortcomings, whatever the much-to-be-regretted disappointment to shareholders, I again maintain that we have done much to avert a general bankruptcy. Many of our constituents are aware of this, and I feel confident that the day is not far distant when our actions will receive juster and firmer criticism. Considering the amount of local business done, I have no hesitation in saying that the losses of the Bank of Bombay will be smaller in proportion to the amount of its transactions than those of almost any other institution in Bombay, although the bulk of our loans were granted upon personal security only. From accounts now before you it will be seen that the net profits are about twenty lacs for the half-year, making the total amount of rest nearly thirty lacs. This, in the opinion of the directors, will more than cover the losses on past due bills, and all business current on the 30th of June. If we are right, and there is no present reason to doubt it, I think you are to be congratulated on getting so well out of such a time of difficulty and disaster. For my own part I should be sorry to see any great alteration in your new charter; it has been found, in my humble opinion, to work

well, and past sore experience will I trust enable the directors in future to work under it with some hope of large profits to shareholders. During the past six months a bank doing local business must have lost heavily under any charter, and in these days were you to go back to the old charter it would be about equivalent to letting the bank die a natural death; nor would it be kept long in pain. I must not forget to mention the great moral support received by the bank in the late trying times, both from Sir Bartle Frere, and the Governor-General. I hope this bank may never require the aid of government; but it was a comfort to the directors in such a time of difficulty, to know that they would have the assistance of government in case of need, and knowing this they were enabled to give timely support in many quarters. I have much pleasure in stating that during the late trying time great unanimity has prevailed at our weekly meetings; each director has done his utmost for the benefit of the bank, and we have received great assistance and encouragement from the cordial co-operation of the government directors, Messrs. Lushington and Chapman. During the past ten or twelve years, I think I have known all the government directors—most of them I have known intimately,—and I hesitate not to say that no more upright and honourable men ever sat at any board. I feel convinced that the most hostile critic or inspector would fail to discover that they ever assisted in passing a single resolution, or in carrying out a single transaction, from a selfish motive. Sometimes they were thought to favour government a little too much, but this was all. Mr. Birch was a model director, and a man of business; he did much for your welfare, and I hope his portrait may long adorn the board room of your new building. Mr. A. D. Robertson has been much blamed with reference to the new charter; but if the truth were told I think it would be found that his brother directors considered him exceedingly obstructive, not only in objecting to some clauses now in the bill, but also to some others which possibly but for him might have been there. I will say a word about Mr. Premchund Roychund, of late, perhaps, the best abused man in the three Presidencies. He is said to have ruined the Bank of Bombay, being dictator and director-in-chief; but the bank is not ruined, gentlemen; and if you ask Mr. Premchund, he will tell you that many of his proposals have met with considerable opposition at the board. It is very true that many loans have been granted during the past year on his recommendation; but it is equally true that this has been the case for the past ten years; and until lately I do not think there was a bank manager in the place who was not eager for his advice; nor until lately, do I think there was one who lost a rupee by taking it. Before you made Mr. Premchund a director, the most common remark in circulars returned by our native colleagues was "Better ask Mr. Premchund, and be guided by his opinion." Bear with me for a moment on a personal matter, and I have done. Mr. Tracey's name and my own have been made free use of. We have been pointed at as speculators who had no right to be at this board. I believe that all merchants are more or less speculators. Be this as it may, it is some consolation to my colleague and myself to be able to tell you that we have not, for our firms or for ourselves, borrowed one rupee from the Bank of Bombay, directly or indirectly, neither have we recommended a friend to do so. I will also publicly mention—what many of you may possibly be aware of—that I have never been concerned in a time-bargain, whether on stamped paper or unstamped. I always looked upon time-bargains in produce as being a hindrance to trade, and anxiously hoped they might have been suppressed. As for time-bargains in shares, they have been the curse of the place, and I believe a source of grief to all

who have had to do with them. For the good of Bombay, then, let us hope there is not an institution or a man in the place, willing to have anything to do with them henceforth, and for ever. The presidentship of this bank I consider to be a post of high honour, but it has grave responsibilities attached, and it has not been to me a bed of roses since March last. I have upon more than one occasion offered to resign it, as well as my seat at the board, but my fellow directors said "No." I tender you my resignation now. If you accept it, good and well; if not, health permitting, I am willing to work on to the best of my ability, and trust that you may have a more cheering report read to you at your next meeting. I move, "That the report and accounts now before you be adopted, printed, and circulated amongst the proprietors."

Mr. Lidderdale seconded the motion, which was carried unanimously.

Sir Jamsetjee Jejeebhoy moved "That the president's address to this meeting be also printed and appended to the directors' report."

The Hon. George Foggo seconded the motion, and remarked that he hoped the chairman's anticipations would be realised.

The motion having been carried,

Mr. Muncherjee Nowrojee Banajee moved "That Mr. James Ranken and Mr. J. G. Tyndall be re-elected auditors to the bank for the current year."

Mr. Jehangier Hormusjee Chinoy seconded the motion, which was also carried without comment.

As the proceedings of the meeting were about to terminate, Sir Jamsetjee Jejeebhoy, addressing the chairman, said: "I beg to propose that you retain your seat at the board—we have great confidence in you."

Dr. Collum remarked that as the meeting seemed to have every confidence in the directors, he thought that a vote of confidence should be passed.

Sir Jamsetjee Jejeebhoy then proposed "That the shareholders of the bank have every confidence in the chairman and directors, and that their thanks be accorded to them."

Dr. Collum seconded it.

The resolution was then put to the meeting and carried unanimously.

The meeting then broke up.

MERCHANT BANKING COMPANY OF LONDON.

AN ordinary general meeting of the shareholders of this company was held on the 14th September, at the London Tavern; Mr. John Paterson in the chair.

The Secretary (Mr. B. W. Ball) having read the notice convening the meeting,

The Chairman observed that hon. proprietors were aware that by the articles of association it was not necessary that a meeting of the proprietors should be held oftener than once a year; but the directors thought it was fitting and wise to call them together at a shorter interval, in order that any explanations which might be required should be afforded to them. It was very gratifying to him to be able to state that the business of the bank up to the 30th of June last, to which time the accounts had been made up, had been most satisfactory, the progress of the institution more than equaling the anticipations of the directors. It was hardly necessary to say that the interest account was not so large this year as last, because in an insti-

tution like the Merchant Bank, it was necessary to keep a large amount of their funds at call at the bankers'. During the year 1864 the company received from 7 to 8 per cent. upon such funds, but in consequence of the decline of interest during the last six months they had only received from 3 to 5 per cent. The interest accounts of the customers of the bank also showed a decline of something like 3 per cent. as compared with 1864. He did not, however, conceive that it was desirable that a very large amount of the profit should be made out of a high rate of interest, because when interest ruled from £7 to £9 per cent., it indicated an unsound, if not altogether an unsafe, state of trade, and he for one thought that, since interest had declined to 4 or 5 per cent., a better state of trade had arisen. Except as regarded the interest account the business of the Merchant Banking Company had been quite equal to the expectations of the directors, and they had no hesitation in declaring the *ad interim* dividend of £8 per cent. per annum upon the last half-year's work. They might be asked why they did not declare a dividend of £10 per cent., as on the occasion of the last *ad interim* dividend; but his answer was, that whereas they could at that time get 7½ per cent. for their money, they could not now obtain more than from 4 to 5 per cent., and that relatively the shareholders were in precisely the same position, because the bank gave them a dividend in each case at a rate exceeding the current rate of interest by 3 per cent. Moreover, the directors did not consider it good policy to declare excessive dividends until they had considerably reduced the sum due on account of the amalgamation, and had raised a sufficient reserve fund. The amalgamation account was a very large one, and the directors conceived that they would be acting in the interests of the company if, while declaring what might be considered a fair dividend, they took the opportunity of liquidating the amalgamation account within the shortest possible period. They intended to abolish it within the next few years, because they were convinced that if it was not now in existence, the shares of the company would be worth 100 per cent. above the present value. If, therefore, they were able to declare a dividend at the rate of 8 per cent. for the next few years, and, at the same time, take measures to extinguish that debt, it would raise the shares to their proper value, while the shareholders would be receiving virtually something like 40 per cent. By the articles of association, whenever they declared a dividend above 5 per cent. they were bound to place a sum equal to the excess to the reserve fund, so that while they were declaring a dividend of 8 per cent., they were necessarily placing also 3 per cent. to the reserve. The dividend would absorb £10,000, and the remainder of the profits, deducting the working expenses and contingencies, had been carried forward to the annual account. Of course, it would be understood that it was impossible in such a business as theirs to balance the accounts oftener than once a year, but he assured the meeting that the profits amounted to a very considerable sum. He now begged to move that a dividend of 8 per cent. per annum be declared, stating at the same time that he should be happy to answer any questions hon. proprietors might have to put to him.

A Proprietor called attention to the great depression of the shares of the company in the Stock Exchange, and inquired of the board to what they attributed the sudden fall from a premium of 8 per cent. to par.

Mr. Law could not help thinking that the depreciation in the shares arose from the over-candour of the chairman, who stated at the last meeting that advances were made to the full extent of produce securities, and inasmuch as about that time the whole of the produce markets experienced an alarming depression, and several failures took place, the public naturally

enough associated the bank with the state of the produce market, and the price of shares fell in consequence. He should be glad of some explanation upon this point; and wished particularly to know whether the bank continued to advance to the full amount of the securities presented to them.

The Chairman explained that there was some misapprehension upon the point. The principle upon which the bank conducted its business was not in any case to advance above three-fourths of the securities. What he stated was that there were many safe houses who never would pledge their securities, and that in such cases they had done business without exacting any such pledges, but certainly the general understanding was that they never went beyond three-fourths of the securities.

A Proprietor said that the true criterion of the state of the bank was the price of the shares, and they had fallen considerably, no doubt owing to the impression that it must have sustained great losses by the depression of the produce market.

The Chairman assured the hon. proprietor that he had taken a most mistaken view of the question. The business of the Merchant Banking Company was in no way regulated by the operations of the Stock Exchange. No doubt a general fall in shares had taken place, but it was quite sufficient for him to state that not only had no considerable losses been made—in fact none of consequence—but that the board had not in the slightest degree departed from the sound mode of doing business adopted by the eminent firm with which an amalgamation had taken place. Of course no bank enjoyed a perfect immunity from losses, and if they could insure that this would, he for one should only be too glad to buy up the whole concern. At the same time, the losses had been very small, and in no way justified the fall in the shares. He must state once for all, that the board conducted their business on sound banking principles, and were totally uninfluenced by what took place on the Stock Exchange.

Mr. Butler, a director, stated that the loss on produce had taken place chiefly in the article of cotton, with which the Merchant Banking Company had had little or nothing to do. The whole supposition of losses sustained was based on an entire misapprehension, and arose from the fact that because the bank made advances on produce, and because the produce market had been depressed, losses must have been sustained by the Bank to a considerable amount. On the contrary, the losses of the company had been very small. (Hear, hear.)

Mr. Law expressed himself much gratified at the statements which had been made by the board, which he hoped would put an end to the misapprehensions that had certainly existed in reference to the position of the company.

The resolution for the declaration of the dividend proposed by the board was then put to the meeting and carried unanimously, and a vote of thanks to the chairman and directors terminated the proceedings.

BANK OF ENGLAND.

A GENERAL court of the proprietors in this corporation was held in the bank parlour, on the 14th September, under the presidency of Henry Lancelot Holland, Esq., the governor.

The Secretary having read the minutes of the former meeting,

The Governor said he had to acquaint the court that this was one of the quarterly general courts appointed by the charter, and that it was one of the

half-yearly general courts appointed by the 12th bye-law for the making of dividends; that the net profits of the half-year ending the 31st August last were £704,269. 4s. 6d., making the amount of the rest on that day £3,733,945. 3s. 1d., and that after providing a dividend at the rate of 5 per cent., the rest would remain at £3,006,295. 3s. 1d. The court, therefore, would be asked to adopt the recommendation for a dividend at the rate of 5 per cent. upon and after the 10th of October next, without deduction for income tax. (Hear, hear.) The Governor said that no doubt the proprietors were prepared for the announcement of a smaller dividend than the previous one, but, taking into consideration all matters, he thought they would agree with him that there was great reason to be satisfied, and therefore, there would be no dissentient voice to the resolution proposing to pay that dividend. (Hear, hear.) He then formally moved that the dividend at the rate of 5 per cent. be declared, and stated that the warrants would be ready on the 11th of October next.

Upon the motion that the court be adjourned,

Mr. Moxon wished to ask one or two questions. Last year he asked the directors whether they intended to allow the payment of interest on deposits, and the answer given was that the court had taken the matter into consideration, but had not made up their minds upon the subject. He now repeated the question. Another point was one of great importance, and that was, as to the state of the debenture debt, in which the bank was alleged, out of doors, to be largely affected with railway companies. One of the directors of the Bank of England had taken the trouble to write to the newspapers upon the subject of the debentures of the Great Eastern Railway Company, and he wished to know whether the Bank of England were large holders of that company's debentures. He was anxious to know this, as in the next session of parliament some action might be taken upon the subject. It was asserted that the Bank of England held debentures in different railway companies to the extent of between £8,000,000 and £9,000,000, and in the interest of the proprietors and the public generally he wished to know whether such was the case. Whether the question was answered or not, he hoped that the matter would receive due attention at the hands of the court of directors at a future period.

The Governor said that with regard to the first question he thought the hon. proprietor had misunderstood the answer of the late governor. The subject of interest on deposits was every now and then pressed on the directors. But that was a question wider and larger than at first sight appeared. No person could say what changes might take place, but at present the directors were of opinion that it was not the interest of the bank to allow interest on deposits. (Hear.) The second question was a very proper one, and the attention of the directors had been called to it. Though they had not held anything like the amount of debentures mentioned by the hon. gentleman, they held a considerable amount, something like £4,000,000. But they had the pick of the railway debentures, and had not only good security but the respectability of the directors and of the management generally.

Mr. Moxon asked what amount of Great Eastern debentures was held.

The Governor said they did not hold any great amount of the Great Eastern. There were fifteen or sixteen railways whose debentures they held, but the amount of any one was not very large. In this, as in other instances by consulting their own interest they were doing all that could be required of them for the defence of the public. The House of Commons might, take some action in the spring, and it was a matter more for that body than the Bank of England.

Mr. Moxon referred to the case of the West Hartlepool to show the danger of these securities.

The dividend was then agreed to.

On the motion of Mr. Cave, seconded by Mr. Botley, a vote of thanks was passed to the governor and directors.

LONDON BANK OF MEXICO AND SOUTH AMERICA, LIMITED.

THE half-yearly general meeting of the proprietors of this company was held on the 19th September, at the London Tavern; Mr. J. Paterson in the chair.

The report, which was taken as read, was as follows:—"In compliance with the request expressed by the shareholders at the last general meeting, to the effect that such meetings should in future be held half-yearly, the directors have pleasure in calling them together on the present occasion, for the purpose of submitting the subjoined statement of accounts, duly vouched by the auditors, and of declaring an interim dividend. From these accounts it will be seen, that for the six months ending June 30th last the business of the bank at its several branches has made very satisfactory progress; the net profits, after deducting rebate of interest, current expenses, and providing for bad and doubtful debts, amounting to £22,884. 17s. 1d., or about 20 per cent. per annum on the paid-up capital of the bank, which, with the sum of £1,964. 2s. brought forward from last account, makes an available total of £24,848. 19s. 1d. This sum the directors recommend should be dealt with as follows:—To the payment of an interim dividend for the half-year ending 30th June, of 10s. per share, being at the rate of about 9 per cent. per annum, £9,992, leaving a balance to be carried forward to the next account of £14,856. 19s. 1d.—subject to payment of remuneration to directors and auditors, and income-tax. The directors have only further to add, that latest accounts are equally favourable, and furnish continued evidence that in Mexico, Lima, Callao, and Bogota, where the branches of this bank are established, there is a great field for the profitable employment of large capital in banking operations."

Balance-sheet for half-year ending 30th June, 1865.

CAPITAL AND LIABILITIES.

Capital—Amount authorised, in 20,000 shares of £50 each, with power to increase, £1,000,000.		
Shares issued—19,984 shares of £50 each, on which £12. 10s. per share has been called up, £249,800; less calls in arrear (of which only £315 now remain unpaid) £4,327. 10s., making a total of £245,472. 10s.; add calls paid in advance, £50		£245,522 10 0
Liabilities—Deposits, bills payable, and other liabilities £587,725. 13s. 10d.; notes issued at Lima, Mexico, and Bogota, £14,078. 13s. 4d.		601,804 7 2
Unclaimed dividends		291 4 0
Rebate of interest on bills current		7,924 12 6
Reserve fund		1,000 0 0
Profit and loss account—Balance of profit to 31st December, 1864, after payment of dividend, directors' fees, &c., £1,964. 2s.; balance of profit from 31st December, 1864 to 30th June, 1865, as per annexed account, £22,884. 17s. 1d.		24,848 19 1
		<u>£881,391 12 3</u>

PROPERTY AND ASSETS.

--	----------------	-----------	----------

The Chairman, in moving the adoption of the report, stated that it was advantageous in new concerns to make the shareholders acquainted as frequently as possible with the state of their affairs, and with that feeling the directors had readily responded to the wish of some of the shareholders to hold half-yearly meetings, consequently they were called together on the present occasion. The report was very satisfactory, and required little from him to recommend it. The profit fully equalled the expectations of those who looked for great things as resulting from banking in Mexico. They had made a net profit during the half-year at the rate of 20 per cent. per annum, while their losses had been very small indeed. To avoid a heavy item of preliminary expenses they had carried to current charges the cost of conveying the managers and officers to the branches at Bogota, Lima, &c., and also the expenses of removing books, safes, &c., to those places, which was very heavy. This brought up the general charges to the large sum of £13,270, but at least £4,000 of this the directors might justly and fairly have carried to preliminary expenses, but they feel that having made large profits, they would be acting most in accordance with the wishes of the shareholders by carrying these items to current charges. (Cheers.) If, however, they had been charged to preliminary expenses, the results of the half-year would have shown a profit at the rate of £25 per cent. per annum. (Hear, hear.) The largest proportion of the business of the bank was, as they were aware, in Mexico, and he was happy to say that it was carried on almost absolutely without loss. He was justified in saying this, inasmuch as the entire loss they had incurred from the beginning was only £40, which arose on a small bill taken on a remittance to this country. On the other hand, the assets in Mexico were very satisfactory, and the exchange business, which was very large, was as good as any similar business carried on by any bank in the city of London. They had equally good reports of the state of affairs at Peru, Callao, and Lima. The only loss made there arose out of a small bill drawn upon an Australian bank which turned out to be forged, but it was only for a small amount. At these branches the assets were equally satisfactory with those at the establishment in Mexico. At Colombia, that was at Bogota, they only commenced business in No-

vember, but from the reports received and the examinations which had been instituted, everything seemed to be going on satisfactorily there also. The amount of business done at Bogota was larger than they could with their present capital follow up, and he believed the shareholders were not just now inclined to sanction, nor were the directors desirous of making a further issue of capital. Since the closing of the half-year ending 30th June the business had continued to progress most satisfactorily at all the branches except Bogota, from which it was as yet too early to receive accounts. The profit made during the first month of the current half year was £5,872. 5s. 10d.; against the rebate of £7,924 they had for the month of July made a profit of £13,796, and as they carried forward to the current half-year's account £14,856, they had actually already in hand for the purposes of dividend at the next half-year £28,650. 17s. 11d., less the current expenses. (Hear, hear.) Within the last month they had increased their deposits to the extent of £5,000, and at Lima they had some of the wealthiest and most influential of the inhabitants amongst the depositors with the bank on fixed accounts. The notes of the bank were also readily taken, and altogether they were in a most healthy and satisfactory state. Some alarm, he believed, had been felt by some of the shareholders on account of the projected National Bank of Mexico, on the ground that it might compete prejudicially with this bank. He had no apprehensions of the kind, for he believed that in Mexico there was an abundant field for the successful operations of two banks, but he was happy to inform them that the scheme for establishing a National Bank of Mexico was now altogether in abeyance, and he did not know whether or not it would be ever revived. In conclusion he moved the adoption of the report.

Mr. J. T. Hunt seconded the motion.

In reply to questions,

The Chairman said as they were in favour in Mexico as a British banking institution, it was not intended to take any steps to obtain the position of a national bank in Mexico, it being better to leave well alone, and it being also to be remembered that as a British institution they would be uncompromised by any political change that might take place. In Colombia there was an idea of constituting the several branches of the bank into a National Bank of Colombia, but if they should decide upon taking steps to give practical effect to that idea, it would be on the principle of a separate capital, the shareholders having, of course, the option to take up that capital. He could not promise that there would be no further call, but there was no present intention of calling up further capital.

A brief discussion followed, in the course of which one or two shareholders held that it would increase public confidence in the concern if a larger proportion of the subscribed capital were called up, and Mr. Sinclair expressed some disappointment that with such a flourishing state of affairs the shares should be at a discount, and asked for information as to where the weak point was—a question which was replied to by another proprietor, who said that the only weak point was the infancy of the bank, and the chairman added that many persons entertained fears of the political position of Mexico, and that feeling no doubt acted to the prejudice of the bank. They were, however, improving, inasmuch as the shares, which were four discount a short time ago, were now at par.

The motion was carried unanimously.

An interim dividend of 10s. a share, payable on and after the 29th inst., was also carried; £1,000 was set apart as remuneration to the directors for the past half-year, and a vote of thanks to the chairman and directors concluded the proceedings.

BRITISH GUIANA BANK.

The following is a report of the proceedings at the fifty-seventh half-yearly general meeting of the proprietors, held on the 17th August; J. W. Davson, Esq., in the chair.

The Manager read the following abstract summary, exhibiting a general statement of the affairs of the British Guiana Bank on the 30th June:—

Dr.

Proprietors' paid-up capital	\$926,520	0
Reserve fund invested per Contra	200,000	0
Due to the public on account of lodgments, including interest on deposits current	586,262	14
Circulation	285,870	0
Dividends unclaimed	7,479	61
Balance in favour of the bank	85,526	34
							<hr/>
							\$2,091,658 09
							<hr/>

Cr.

Due to the bank on securities in bills discounted, bonds, other investments, cash in hand and in the hands of agents	\$1,858,458	09
Reserve fund investments in Turkish 4 per cents. guaranteed by England and France	\$96,000	
In Bank of England Stock	200,000	0
Bank premises, office furniture, &c.	33,200	0
							<hr/>
							\$2,091,658 09
							<hr/>

"The balance shown in the foregoing statement consists of the surplus fund, \$34,628. 60; net profits for the half-year ending 30th of June, \$50,897. 74. The Directors recommend the declaration of a dividend of 4 per cent. for the past half-year, being at the usual rate of 8 per cent. per annum; this will require the sum of \$37,068. 80, leaving \$13,836. 94 in accumulation of the surplus fund, and they further propose that a bonus of 1 per cent. be paid to the proprietors out of the surplus fund, after which their will remain a balance of surplus profits of \$39,200. 34.

"Georgetown, 27th July, 1865."

Moved by the Chairman, seconded by Mr. Robert Smith, and resolved—"That the report of the Directors be received and adopted."

Moved by Mr. John Drysdale, seconded by Mr. E. G. Barr, and resolved—"That, as recommended by the court of directors, a dividend be declared of 4 per cent. for the half-year ending 30th June; and that, further, a bonus of 1 per cent. be paid to the proprietors out of the surplus fund."

Moved by Mr. B. V. Abraham, seconded by Mr. W. Knox, and resolved—"That a copy of the report be laid before His Excellency the Governor, and that the proceedings of the meeting be printed for circulation among the proprietors."

Moved by Mr. Winter, seconded by Mr. Barr, and resolved—"That a sum not exceeding \$2,000 per annum be placed at the disposal of the directors for the purpose of remunerating them for their services."

Moved by Dr. Scott, seconded by Mr. E. H. G. Dalton, and resolved—"That the thanks of the meeting be tendered to the chairman and directors of the bank."

Moved by Mr. R. D. Stewart, seconded by Mr. H. J. Parnell, and resolved—"That the thanks of the meeting be given to the officers of the bank for their attention to their duties."

Moved by the Chairman, seconded by Mr. Mackey, and resolved—"That the thanks of the meeting be tendered to the president and committee of the Athenæum for the use of the rooms."

The Chairman vacated the chair, and the same having been taken by Mr. Mackey, it was moved by Mr. Winter, seconded by Mr. Drysdale, and resolved, that the thanks of the meeting be given to the chairman for his conduct in the chair.

The Chairman having resumed, declared the meeting closed.

BANK OF BRITISH COLUMBIA.

THE following is the report of the directors to be presented at the general meeting to be held at the London Tavern, on the 3rd October :—

"The directors have the pleasure to submit to the proprietors the accompanying statement of accounts for the half-year ended 30th June last, and have satisfaction in stating that after paying all charges, deducting rebate of interest on bills not due, and making ample provision for bad and doubtful debts, the undivided profits amount to £20,078. 13s. 8d., which the directors propose to appropriate as follows, viz. :—£9,375 in payment of a dividend at the rate of 10 per cent. per annum; £7,000 to reserve fund, which will then amount to £20,000; leaving £3,793. 13s. 8d. to be carried forward to the current half-year."

Statement of Liabilities and Assets at the London office and branches on 30th June, 1865.

LIABILITIES.

Capital paid-up	£187,500	0	0
Reserve fund	13,000	0	0
Deposits, notes in circulation, bills payable, and other liabilities	271,909	17	5
Balance of profit and loss on the 30th June, 1865	20,078	13	8
					<u>£492,488</u>	<u>11</u>	<u>1</u>

ASSETS.

Specie and bullion in hand, and cash at bankers'	£89,676	0	6

By balance	20,078	13	8
						<u>£20,078</u>	<u>13</u>	<u>8</u>

EAST INDIA BANK.

The second ordinary general meeting of the shareholders of this bank was held at its offices in Hornby Row, on the 9th August, to receive the directors' report; to consider whether the bank should be registered with limited liability; and to take such steps as might be considered necessary for effecting that object. The shareholders present consisted entirely of natives.

On the motion of Mr. Kessowjee Naique, seconded by Mr. Alladinbhoy Hubbibhoy, Mr. Muncherjee Nowrowjee Banajee was called to the chair.

After reading the advertisement calling the meeting, the Chairman read the following report :—

"Your directors have this day the pleasure of meeting you for the second time since the formation of the East India Bank, and it is their duty, in terms of the articles of association, to place before you a statement of accounts made up to the 30th June. A reference to the balance-sheet will show a profit to that date of Rs. 4,35,275-12-6; but as it is apparent that these figures, though correct in point of form, are merely nominal, it is proposed to give a short explanation on the subject. In the first place, your directors are anxious that it should be distinctly understood that the exhibition of a balance of profit on the bank's operations to the 30th June is not put forward with any intention of misleading those interested as to the real position of the bank. On the contrary, your directors wish to place you in full possession of all details, which may enable you to form a correct estimate of how it stands; but the exigencies of book-keeping required that the accounts should be made up as they have been. On numerous transactions still open, the bank will, without doubt, sustain very considerable losses; but, as the auditor very properly remarks, the extent of them it is impossible, with any degree of accuracy, at present to estimate. That heavy losses should have been sustained by this bank, in common with every other institution of a similar character in Bombay, will excite no surprise. Bombay has passed, is still passing, through an ordeal of no ordinary character, and the shareholders must be prepared to find that the East India Bank will not come out scatheless. The present is not an opportunity for making a detailed public

statement of the probable ultimate results of the bank's transactions; but your directors may safely say, that it is their belief that those results will at least bear comparison, and favourable comparison, with those shown by any other local bank established under similar circumstances. A few items in the balance-sheet call for observation. Shares to the extent of Rs. 15,70,000 have been forfeited, and the capital of the bank is thus reduced to Rs. 46,80,000. The shares in question were forfeited for non-payment of the 3rd and 4th calls, and Rs. 9,19,250, the amount paid-up on 1st and 2nd calls on those shares, has been placed to a reserve fund. Your directors did not take this step without full consideration; it may at first sight seem a harsh proceeding to forfeit shares because their holders are unable to pay calls; but your directors would remind you that the interests of those shareholders who can and do pay, are at least to be regarded as much as those of shareholders who cannot, or, as often happens, will not. It is clearly unfair that the operations of a bank should be crippled, and its business restricted, to the loss of those shareholders who have honestly contributed their share of its capital, merely because other shareholders are unable to pay their proportion, or think they can employ their funds more profitably to themselves in other ways. The requirements of the articles were fully met; every one whose shares have been forfeited had ample notice in the prescribed form, and your directors do not doubt but that the course they adopted will meet with your approval. It should also be mentioned that Rs. 8,00,000, the amount of capital allotted to the bank's Calcutta agency, is included in the balance-sheet under the item of loans and local bills discounted. With reference to the auditor's remark that some of the bank's securities are not in order, it must be stated that these almost entirely consist of financial and other shares which your directors do not consider it advisable to have transferred to the bank's name. Leaving the balance-sheet and accounts, your directors would now make the following important recommendation affecting the constitution of the bank. The basis upon which the bank is established is, as you are all aware, that of unlimited liability, and the recommendation of the board is that that basis be changed, and that the liability of the shareholders shall for the future be restricted in accordance with the provisions of Act 7 of 1860. This recommendation is made in concert with the wishes of many large and influential shareholders whom your directors have consulted; and they have reason to believe that the proposal will meet with the general sanction and approval of all concerned. In this view of the matter, they do not here enter into the reasons which have influenced them in arriving at the conclusion they have. If the proposal meet with your approval, it will be necessary to wind-up the affairs of the bank, *pro forma*; but this can be done without difficulty, and without stopping current business for a day."

The report having been adopted, Mr. Byramjee Cursetjee moved—"That Messrs. Kessowjee Naique and Alladinbhoy Hubbibhoy be re-elected directors."

Mr. Muncherjee Nowrowjee Banajee moved :—"That the constitution of the bank be altered by making the liability of the shareholders limited, instead of unlimited as at present, and that the board of directors be, and they are hereby authorised, in consultation with Mr. Crawford, the bank's solicitor, to take all necessary steps with that object."

Mr. Eduljee Dorabjee seconded the motion, which was agreed to unanimously.

The meeting then terminated.

BOMBAY CITY BANK.

THE first ordinary general meeting of the registered shareholders of this bank was held at its offices in Church Gate Street, on the 15th of August. Mr. Rudolph Ahlers occupied the chair. The shareholders present were exclusively natives.

The Chairman read the directors' report as follows:—"The directors, in meeting the shareholders for the first time, beg to lay before them the balance-sheet of the bank to 30th June, 1865. The bank was opened for business on the 15th August, 1864, and you will observe, from the statement now submitted, that the whole of the first call made on 21st June, 1864, and due 27th idem, has been paid; that of the second call made on 21st September, 1864, and due 5th November, there is unpaid the sum of Rs. 7,850; and of the third call, made on 31st December last, and due 28th February, 1865, there still remains to be paid Rs. 8,09,000. The shareholders have been duly advised, both by post and advertisements, that the shares on which these calls remain unpaid are forfeited. This measure has only been adopted after mature consideration, and the directors in doing so are confident that, for the benefit of the present shareholders, it should be carried out. Sufficient time has been allowed for the payment of all calls, the notice of forfeiture of shares upon which the second and third call remained unpaid having been advertised as long back as February last, but not acted upon until the 5th instant. After estimating the depreciation in the value of the securities held by the bank on its own account, allowing no interest to be calculated upon overdue loans or past-due bills, and taking into consideration the expenses incurred in the opening of the agencies in London and Calcutta, the balance of the profit and loss account is Rs. 97,583-12-9. This amount the directors propose to carry forward to the current half-year, regretting that they cannot recommend any dividend at this time. The sudden and great fall in the value of all securities in this market, and consequent panic, coupled with the numerous failures both here and at home, will, the directors regret to say, cause the bank to suffer considerable loss, but as in the great majority of its transactions the bank has been secured, and as an improvement in the value of good securities may be fairly expected, they trust that by a judicious disposal of those now held the eventual loss will prove but small. Branches have been established in London and Calcutta, the former being under the charge of Mr. Davison, the late manager here, and the latter under that of Mr. Leitch, late of the Oriental Bank, Calcutta; as both these gentlemen, especially the former, have considerable experience in banking, we have no doubt that these agencies will become a source of profit to the bank. In room of the present directors, who now retire, the shareholders have to elect others. Of those who have been acting, Mr. Ahlers, Mr. Price, and Mr. Bhugwandass Purahotumdass, offer themselves for re-election. The remuneration to be allowed must also be decided upon. The shareholders have also to elect auditors for the ensuing year, and Messrs. Brodie and Wilson, gentlemen well qualified for the post, are recommended. Their remuneration must also be fixed."

The Chairman then addressed the shareholders as follows:—"Gentlemen, in moving the adoption of the report just read, I will, with your permission, make a few explanations as regards the item of profit and loss in the balance-sheet now before you, and also a few remarks with reference to the general position of this bank. You will observe that the amount carried to the credit of profit and loss account for 30th June last is

Rs. 97,583-12-9, and I imagine that some of you will consider this amount small as compared with the profit shown by other banks which were established about the same time as this, and which also have recently published their accounts, according to which larger profits than ours have been realised. Now, in this respect I wish to point out to you that the profit of this bank also is larger than the amount stated above, but that we have reduced it by deducting from it the probable loss which the bank will sustain owing to the depreciation in the value of the securities held by the bank for its own account. For this purpose we have written off from the profit an amount of Rs. 84,735-13-10, and we now anticipate no further loss in this respect. Another circumstance which may make the profit appear small is, that we have not yet taken into account any interest on such loans or transactions as fell due before the end of June but have not yet been paid. We considered it best not to swell our profit by any such fictitious calculations, which might lead to disappointments afterwards. Our above profit, although small, is really earned and due; but I regret that I cannot recommend its distribution as a dividend, but must advise its being carried forward to next year's account; for although, as already stated, we have provided for the depreciation in the securities held on the bank's own account, no provision has as yet been made for the loss which the bank may sustain from the reduction in the value of the securities held on account of its customers. I would gladly have framed an estimate also of this loss, and laid it before you, but this is impossible, for two reasons, one of which is, that the securities are not yet sold, and the other, that we do not yet know the amount which ultimately will be recovered from those on whose account the securities are held. In six months' time we shall, no doubt, see much clearer in this respect. In connection with this subject I may mention that as the bank is entirely free from debt, no necessity exists for any undue haste in the realisation of these securities; on the contrary, the bank will hold them (unless previously redeemed) until such a moment as may be considered the most favourable for the sale; and I have no doubt, in consideration of this circumstance, and keeping a careful watch over the movements of the market, that the ultimate loss, although no doubt important, will still prove considerably less than is generally anticipated. If the bank has not been fortunate in its local transactions, it certainly may, as compared with other banks, congratulate itself upon its operations with Europe, for the amount of dishonoured bills in our hands is, comparatively speaking, very small, and after careful calculation it is thought that about one lac of rupees will be sufficient to cover the whole ultimate loss on this account. The forfeiture of the shares on which the second and third calls are unpaid has for some time had the very serious consideration of your directors, and in justice to the existing shareholders, they had no alternative but to adopt this measure. Nor can it be called harsh; for the third call was made long before the commencement of the crisis, and the forfeiture has not been put into execution until a few days back, when the crisis may be considered as ended. The position of the remaining shareholders is, of course considerably benefited by this measure. The report informs you that agencies have been opened both at Calcutta and London, and your directors trust, after confidence has been fully re-established, that both agencies will prove sources of profit to the bank. The gentleman at the head of the Calcutta agency, Mr. Leitch, was formerly in the Oriental Bank, and the gentleman at the head of the London agency is Mr. Davison, formerly manager here of the French Bank, and who probably is personally known to most of you as a very able and intelligent bank manager. Mr.

Davison takes very great interest in the success of our bank; and, as a proof of this, I feel pleasure in mentioning that he, about two months back, voluntarily placed half of his salary at the disposal of the directors, in order, as he writes, to prove his interest in the success of the bank, and in order to reduce its losses as much as lies in his power. The directors have accepted this sacrifice on the part of Mr. Davison, hoping soon to be justified in requesting him to revert to his previous remuneration. As you all know, we have just passed through a fearful crisis; but after a crisis, legitimate business in all its branches, as a rule, soon revives with renewed vigour. I have no doubt that this will also prove the case in Bombay, and that good and profitable years are before us, during which, also, this bank will find safe and profitable employment for its funds, and ample opportunity of redeeming its previous losses. Nor need we anticipate any further losses of consequence for several years to come; for I have no doubt that the crisis just passed has taught us all a lesson which we shall not soon forget. In conclusion, I call upon the shareholders to let their full confidence remain with the directors, and to give the bank all the support that may be in their power, and I have no doubt that twelve months hence we shall be in a position to lay before you a much more satisfactory report than we can do to-day. I beg to move that the report and accounts now submitted be adopted."

Mr. Cooverjee Cowasjee Jussawalla seconded the motion, which was agreed to unanimously.

Mr. Muncherjee Pestonjee then proposed, and Mr. Dadabhoi Nusseranjee seconded—"That Rudolph Ahlers, Esq., R.T. Price, Esq., and Bhugwandass Purshotumdass, Esq., be elected directors for the ensuing year;" which was also carried unanimously.

Mr. Cursetjee Eduljee Chinoy proposed, and Nowrosjee Muncherjee seconded—"That Cullilandass Mohundass, Esq., and Tribhohundass Jugeevundass, Esq., be elected directors in place of Mr. Ardaseer Cursetjee Dady, and Mr. Merwanjee Nusserwanjee Bhowngugree, resigned." The resolution was carried without discussion.

It was then proposed by Cursetjee Eduljee Chenoy, and seconded by D. J. Lisboa, Esq.—"That Messrs. Brodie and Wilson be elected auditors for the ensuing year, and their remuneration be Rs. 500 for each audit."

A vote of thanks was then awarded to the Chairman, and the meeting broke up.

ALLIANCE BANK OF BOMBAY.

THE first ordinary general meeting of the registered shareholders of this bank was held at the offices of the company on the 16th August, for the purpose of receiving the report of the directors and the balance-sheet to 30th June last,—to elect directors and auditors for the ensuing year, and to fix their remuneration. F. C. Kelly, Esq., of the firm of Kelly, Hore and Manisty, occupied the chair. All of the shareholders present, numbering between twenty and thirty, were natives.

The Chairman read the directors' report, which is as follows:—

"In meeting the shareholders for the first time since the formation of the company, the directors would lay before them a short statement of what has been done. The company was registered on the 11th of August, 1864, and commenced business on the 1st September with a paid-up capital of twelve lacs of rupees. A second call of Rs. 75 per share was made payable on the 15th of September, and was duly paid on all the shares

except 77. A third call of Rs. 50 per share was made payable on the 15th of December last, but the same has been paid upon about half only of the shares. The shares upon which the second call was not paid have been forfeited for the benefit of the company. As to those shares upon which the third call has not been paid, the Directors have in consequence of the state of affairs in Bombay, abstained hitherto from taking any proceedings to enforce payment—but they think that the time has arrived when the defaulting shareholders should be required to pay, and they propose, in case the call with interest is not paid in the course of the month, to forfeit the shares for the benefit of the company. From the accounts which have been circulated to the shareholders, it will be seen that the profit earned during the ten months over which the account extends is entered as Rs. 3,78,544-4-2. This, however, must not be taken to be the sum actually received as profits, but it represents the amount of profits which would have been earned on the assumption that all loans with interest were duly paid off, and to ascertain the true amount you must deduct the item of “adjusting account of interest.” The result is that the amount of profits actually received is Rs. 2,29,456-12-1. The directors regret that they cannot divide this sum as a dividend amongst the shareholders. The bank has not passed uninjured through the panic which came upon Bombay, and the directors regret to say that the bank has suffered considerable losses. It is impossible at present to say what the extent of the loss will be, as there are many accounts still to be adjusted; but the directors hope to be able in most cases to make satisfactory settlements of the debts. The fall in the value of shares in Bombay has been so sudden and so great, and persons recently of credit and wealth have suffered so seriously thereby, that all companies who have advanced money must necessarily have sustained losses to a considerable amount.”

The Chairman, in moving that the report and balance-sheet be adopted, said he did not propose to detain them for any length of time. The directors unfortunately had to appear before the shareholders of the bank on the occasion of the first ordinary general meeting, in times of great commercial depression in Bombay, and they very much regretted to say they are not in a position to recommend any dividend. A panic had come upon Bombay, he did not say unexpectedly—but much more suddenly than was anticipated, and the result was that this, as well as all the other banks, had had to strain its utmost energies to maintain its position. By the accounts submitted, the shareholders would be able to form an opinion as to the work done by the bank during the ten months in which it has been in existence. The directors had not thought it expedient or proper to suggest to the meeting any ideas of their own, but they would devote their attention to receiving the money due to the bank, and making the best settlement they can with the accounts outstanding; and they hoped by the next meeting to be able to lay before the shareholders a more satisfactory balance-sheet—one which would be sound both in figures and in fact. He did not propose to go through the accounts in detail: but if any shareholder present wished to ask any questions, he should be happy to answer them. By the articles of association, the bank had a right to establish branches; but under existing circumstances the directors had not thought it expedient to open any at present. In accordance with the provisions of those articles, all the directors retire by rotation; and the meeting would have to elect new ones. Their number was declared to be not less than four, nor more than ten, and the meeting would have to decide how many the number should be. For his own part, he might say, that if the meeting saw fit to re-elect himself and the other directors,

they should be happy to act. The meeting would also have to elect auditors for the ensuing year. No provision had been made for remunerating the directors and auditors; and owing to the present distressed state of affairs in Bombay, the former did not ask anything for their services; but with regard to the auditors, the directors wished the meeting to fix their remuneration. In conclusion, he hoped that by judicious management the securities sold by the bank increasing in value, they should be able to render the shareholders a more satisfactory account of affairs by this time next year. The chairman concluded by proposing that the report and balance-sheet be adopted.

Mr. Jehanghier Bomonjee seconded the motion which was agreed to unanimously.

On the motion of Merwanjee Framjee, seconded by Purbut Luckdass, the present directors, (Messrs. Charles F. Kelly, Hurburn Nursey, Gellabhoy Puddumsey, and Seeojee Velljee) were re-elected for the ensuing year.

Mr. Luckmisunker Hariprassim moved that Messrs. Brodie and Wilson be appointed auditors of the bank for the next year, which was also agreed to.

A vote of thanks, on the motion of Merwanjee Framjee, seconded by Purbut Luckdass, was then awarded to the chairman, which having been suitably acknowledged, the meeting broke up.

EASTERN FINANCIAL ASSOCIATION OF INDIA.

On the 1st August, the Chief Justice ordered that all the creditors and contributaries of the Eastern Financial Association, Limited, should be allowed an opportunity of showing cause, if any, against an order of the 6th July, 1865, which directed that the association should be wound up, and that all suits and actions against it should be stayed; and against the appointment of official liquidators. The whole matter, under the above order, was subject to be re-opened on the 10th, before the Chief Justice, but no creditor or contributory appeared to oppose the order of the court.

Mr. Bayley, instructed by Mr. Crawford, appeared for a number of creditors of the association, under an authority given by them, and stated that the parties whom he represented, considered that the best course to promote their interests was to wind up the affairs of the company, and that the desired end would, in their opinion, be secured more advantageously and more effectually by winding up voluntarily than by the court.

Mr. Taylor, who appeared on behalf of the association, agreed in the suggestion made by the creditors, and applied that the court would, with the consent of the creditors, grant leave to let the order already made remain operative. The learned counsel stated that the company would take immediate steps to pass a special general resolution to wind up voluntarily, but that, as some time would be required to give the necessary notice to shareholders, &c., he would suggest that the order now to be made should be an order adjourning further consideration of the matter for two months.

Mr. Marriott, who appeared on the same side, submitted that the only hostile creditor, the Imperial Bank of Bombay, had no right to appear to oppose the application, their claim being in a fair way to be satisfied.

Mr. Green, instructed by Messrs. Bickersteth, Cleveland, and Peile, for the Imperial Bank of Bombay, said that he had nothing to urge against

the present application, and that he appeared merely to watch the case on behalf of his client.

Mr. Bayley stated that the debts due to his clients amounted in the aggregate to upwards of 49 lacs out of 56 lacs, the total amount of the liabilities of the company.

The Chief Justice remarked, that subject to an affidavit to be made verifying Mr. Bayley's statement of the amount due to his clients, he would order that the appointment of official liquidators be adjourned for two months, with liberty in the mean time to any of the creditors to take such proceedings as might be advised, in reference only to the winding-up of the association. The order last made directed all suits against the company to be stayed unless cause to the contrary was shown on the 10th inst. (yesterday); and as no cause to that effect had been shown, his lordship now ordered that all suits against the company should be stayed. If, within the time now allowed, no steps should be taken against the company winding-up voluntarily, the court would interpose no obstacle to its doing so.

Mr. Taylor remarked, with reference to an allegation made in the second affidavit of Mr. Macpherson, manager of the Imperial Bank, that he was now in a position to show, on an affidavit made by Mr. Watson, manager of the Eastern Financial Association, that none of the directors had ever been indebted to the association, with the exception of Pestonjee Curetjee Shroff, now an insolvent.

Mr. Green: I do not know what this has to do with the matter; and I object to my friend trying here to impeach the accuracy of one of our affidavits.

Mr. Taylor said he was only contradicting an imputation made against the directors of the Association, which, if left unrefuted, might injure their reputation.

The Chief Justice observed that imputations having been made against some of the directors, which had been made matter of public discussion, Mr. Taylor took this opportunity of clearing the character of the directors, with the exception of one of them. The gentlemen who were directors of the company had, to his lordship's mind, taken a proper course in trying to clear their character of the imputations alleged against them. A statement like that made by Mr. Taylor, was no unusual thing under the circumstances of the case.

The authority under which Mr. Bayley appeared for the creditors, was signed by agents and managers of the Bank of Bombay, the Asiatic Banking Corporation, the Agra and Masterman's Bank, the Indo-Egyptian and London Bank, the Central Bank of Western India, the Bank of Hindustan, China and Japan, the Bank of Surat, the Delhi Bank Corporation, the Financial Association of India and China, the European Assurance Society, and a number of private gentlemen. They are creditors to the extent of Rs. 49,57,500; the total amount of the company's debts being Rs. 56,88,000, of which five lacs are due to the Imperial Bank of Bombay.

GENERAL FINANCIAL CORPORATION OF INDIA.

In pursuance of a requisition addressed to the directors, an extraordinary general meeting of the shareholders of the General Financial Corporation, Limited, was held on the 16th August, at the Company's offices in Ball Lane; Curmally Kassumbhoy, Esq., was called to the chair.

The manager, Mr. E. H. Warren, read the notice convening the meeting, after which the chairman read a Guzerathee version of the report of the directors, which runs as follows:—

"The directors, in placing the circumstances of the corporation before this meeting, wish to do so in as full a manner as possible consistent with their duties towards parties doing business with the establishment, so that the shareholders may know exactly the state of their finances up to 31st July last, to which date the balance is made out, and no transactions of any consequence have taken place since. They have not considered it necessary to close the books of the corporation, as the balance of the general ledger gives quite a sufficient account of their position, with the explanation they now make of the two principal items shown therein. The first is 'share purchase account,' which stands Dr. Rs. 3,87,761-12-0. This sum is represented by 50 Port Canning and 10 Elphinstone Land and Press Company's shares, which were, unfortunately, purchased at high premiums shortly after the corporation commenced business; but the terrible panic, which has shaken Bombay to its centre, having set in soon after, all power of selling even at a small loss became absolutely impossible. Valuing those shares at their present quotation, the difference from the rates at which they were purchased would entail a loss upon the company of about Rs. 2,90,000; but the directors feel certain that, in the course of a few months, both classes of shares will again rise very considerably in public estimation, as they represent good and sound companies, whose real value is much under-rated in the present state of nervous uncertainty with which all capitalists are affected; and purchasers at ruling rates will hereafter wonder much at the folly which caused men to throw away their sound stocks for nominal prices, in a time of panic almost unequalled in the history of any country. These are the only share transactions the directors have entered into, having always refused to meddle with 'time-bargains' or speculation in your own shares, both which transactions have caused the ruin of so many companies in Bombay. The other item which needs explanation is that of 'local bills discounted.' This represents all advances made by the company; and the directors are glad to be able to inform you that very nearly the entire amount of Rs. 3,18,000 is covered by securities sufficient to clear them, even if realised at present rates; and the unsecured balance is granted to such men that recovery is undoubted. So the directors do not anticipate any loss whatever on this account. The other items of the balance do not need any explanation, as each shareholder can easily understand them. It is only necessary to add that no persons whatever have any claims against the establishment, the deposit account being merely nominal, and loans have never been contracted. Upon the stagnation of business the expenses were reduced as much as possible, and everything was done that economy could suggest to lessen the outlay. The directors further state that they should have been able to show a much more favourable result but for being effectually paralysed by the small amount of paid-up capital at their command. They did intend to make further calls on the shareholders immediately after commencing business, but the unusual distress which affected all classes at that time, effectually prevented the possibility of such a course; but notwithstanding this difficulty, the directors feel assured that the shareholders will consider the position of the company very favourable indeed when contrasted with that of the other institutions in Bombay of the same nature."

The meeting was then adjourned till August 31st.

LONDON AND AUSTRALIAN AGENCY COMPANY.

THE London and Australian Agency Company, Limited, has been announced, and it proposes to carry out very important operations. The capital sought to be raised is £1,000,000 in 50,000 shares of £20 each, the first issue being 30,000 shares. Of this issue 6,000 shares have been apportioned to the vendors, leaving 24,000 for allotment to the public. The business intended to be taken over is that of Messrs. J. H. Clough and Co., of Melbourne, who have for years possessed a recognised position as pastoral agents, and transacting a most extensive business with flock and station proprietors throughout Australia. Operations are commenced with a guaranteed profit of £30,000 per annum; i.e., the vendors guarantee to forfeit so much of the purchase-money of their goodwill should they fall short of making such profit. It is stated that the purchase has been effected on the basis of prospective as well as retrospective profits. The sources of these are fivefold—viz., interest on money advanced; second, commission on money advanced; third, commission on wool sold by weekly auction; fourth, the charge for storing all wool; fifth, the difference between the cost of borrowing money here and lending it at the colonial rate. Arrangements have been made for guaranteeing a dividend of 10 per cent. for three years, and the vendors have also agreed to place their services at the disposal of the company for the same period, to co-operate with the manager, who will be appointed by an act under the direction of the board in London. The qualification of each director is fixed at £4,000, at least, to be held by him in his own right in the shares of the company.

NEW ISSUE OF ERIE RAILWAY BONDS.

THE issue of £800,000 sterling bonds of the Erie Railway Company was announced on the 22nd September. They are introduced through Messrs. J. S. Morgan and Co., and bear interest at the rate of 6 per cent. per annum in bonds to bearer of £100 sterling each, at the price of £75; redeemable at £100 at the end of ten years. The principal and interest will be payable in sterling money in London, free from all federal or state tax; £5 per £100 bond is payable on application, and £5 on allotment, the remaining instalments spreading over from the 28th October to the 15th of January next. Taking into account, in addition to the annual interest, which commences from the 1st of September, the payment off of the principal of the bonds at par in 1875, and the deferred period for the instalments, the return to the subscribers will be equivalent to about 10 per cent. per annum upon the issue price, viz., 75. Subscribers have the option of paying the full amount in advance upon any of the dates fixed

for the instalments, and upon such payments discount at the rate of 5 per cent. per annum will be allowed. Upon payment of the allotment money scrip certificates to bearer will be issued to the subscribers, which will be exchanged for the definitive bonds as soon as possible after the payment of the whole amount of the subscription. Where no allotment is made the deposit will be returned in full, without deduction. The amount of the loan authorised by the railway company was £1,000,000, but it appears it is doubtful whether the remaining £200,000 will ever be sent out, and it will not in any event be issued before the 16th of September, 1866. The traffic of the route shows a large increase, which is mainly due to the development of the resources of the district, to the numerous coal, iron, and oil companies recently brought into operation, and to the opening of the Atlantic and Great Western Railway, which has proved a great success.

TENDERS FOR BILLS ON INDIA.

THE biddings for bills on India took place on the 6th September, at the Bank of England. The proportions allotted were—to Calcutta, 13,46,000 rs.; to Madras, 90,000 rs.; and to Bombay, 10,00,000 rs. The *minimum* price was as before, 1s. 10½d. on Calcutta and Madras, and 1s. 10¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11¾d. will receive in full, and on Bombay at 1s. 11¾d. about 72 per cent.; above these prices in full. Further biddings for 20,00,000 rupees in bills on India took place on the 20th September. The proportions allotted were—to Calcutta, 10,51,000 rs.; to Madras, 1,49,000 rs.; and to Bombay, 8,00,000 rs. The *minimum* price was as before, 1s. 10½d. on Calcutta and Madras, and 1s. 10¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11¾d. will receive about 47 per cent., and on Bombay at 1s. 11¾d. about 49 per cent.; above these prices in full.

Communications.

To the Editor of the "Bankers' Magazine."

PRACTICE WITH REGARD TO BRANCH BANK CHEQUES.

Wells, 5th September, 1865.

Sir,—You state in your current number that you are not aware of any such case as that described by your correspondent "Y," having formed the subject of a judicial decision.

I beg to refer you to *Woodland P. O. v. Fear*, 26 Law Journal (Queen's Bench) 202, where a precisely similar case was decided in a most satisfactory and conclusive manner.

The facts of this case were these—A person named Hellier drew a cheque upon the branch of Messrs. Stuckey's Banking Company, at Glastonbury, where he kept an account and paid the cheque to Fear, who cashed it at the Bridgwater branch of the same establishment.

The cheque was duly forwarded to the Glastonbury Bank and returned from thence unpaid. Due notice of the dishonour was given to Fear, and ultimately an action brought against him to recover the amount, which the Court decided in favour of the Bank.

As this is a question vitally affecting Country Banks with branches, I beg to refer your readers to the Bankers' Magazine of 1857, page 724, where there is an article on this subject, and a full report of the judgment of the Court of Queen's Bench on the case I have alluded to.

Your obedient servant,
H. G. MARSHALL.

CHEQUES THROUGH THE POST.

SIR,—The opinion expressed in your July number (page 888), viz., that a banker receiving a cheque through the post, may hold it over till the following day before returning it, has been questioned by bankers of experience, both in town and country.

It is stated that remitting through the post a cheque to a banker on himself, is tantamount to presentation over the counter, and that the banker is legally bound to pay or return the same day.

The practice with us has been the contrary, and I shall feel obliged if you will kindly favour us with your reasons in full, quoting any cases bearing on the subject.

Yours truly,
W. C.

15th August, 1865.

[All the decisions appear to confirm the opinion given in our July number. In "Byles on Bills" 8th edition, pp. 19, 20, it is stated, "If the party receiving a cheque do not live in the same place with the drawer, he should send it to his banker, or other agent, by the next day's post, and they should present it on the day after they have received it." Again, "If it so happen that the drawer of the cheque, is the banker of the holder as well as of the drawer, no promise by the banker to pay the cheque will be implied by his receiving the cheque from the holder, without observation, and keeping it till the following day; for *prima facie*, he will be taken to have received it as the holder's agent." A perusal of the judgment in the several cases referred to by Byles, will show that the opinion of the judges was that a banker receiving a cheque drawn upon himself, whether through the post or from a customer for his credit, is not bound to return it, if unpaid, until the following day.]

CHEQUES SENT ABROAD.

Leeds, September, 1865.

SIR,—Will you be so good as inform me if a cheque for £5, or under, drawn here and circulated abroad, requires a penny foreign bill stamp, in addition to the stamp on which it is drawn.

Your obedient servant,
G. L.

[By Act 27 and 28 Vict., c. 56, s. 2, it is provided that any bill of exchange payable on demand, which shall be endorsed, or purport to be endorsed, out of the United Kingdom, wheresoever drawn, shall be deemed a foreign bill of exchange, and chargeable with the same amount of stamp duty as on an inland bill of exchange payable otherwise than on demand.]

CROSSED CHEQUES.

London, Sept. 23rd, 1865.

SIR,—A gentleman paid into his credit at his banker's at the West End (a branch of a City bank in the Clearing) a cheque for £100, drawn upon a City bank. The cheque was crossed with the name of the bank through which it was to pass, and was presented through the Clearing for payment. In due course the cheque was returned to the West End branch bank, marked "not sufficient." The West End branch returned it to its customer. After the lapse of a day or so the customer wrote a note to the manager of the branch (enclosing the dishonoured cheque) and requested him to present it again for payment without delay. The West End manager accordingly took the cheque to the bank upon which it was drawn and requested the manager to cash it, or "mark it for payment," if he was then in funds. This request was refused, with the answer from the City manager "that as the cheque was crossed it must go again through the Clearing House; that a cheque once crossed, although dishonoured, was always crossed, and that neither cash nor answer could be given to any private person nor the banker to whom crossed, except through the Clearing House."

Will you, Sir, kindly say in your next impression whether you consider the crossing still holds good and can be insisted upon after the cheque has been dishonoured and returned to the customer. Has not the intention of the maker of the cheque been carried out by its having once been presented by the banker to whom he has crossed it? Has not the crossing directed the cheque through the intended channel and done its work? As the crossing on a paid cheque is of no further use than to show the channel through which the cheque was presented and paid, so, it appears to me, the crossing of a dishonoured cheque ought to be of no further use after it has conducted the cheque to the point where it would have been paid had there been funds to meet it.

I am, Sir,

Your obedient servant,

H. B.

[By the letter of the Act 21 and 22 Vict., c. 79, a crossed cheque can only be paid through a banker; but it certainly appears to us that the first presentation should exhaust the effects of the crossing and that a dishonoured cheque, upon being re-presented, should be considered as payable to any holder, although it may have been crossed.]

CASHING OF CHEQUES.

SIR,—With reference to the letter of your correspondent "Y" in the September number of your magazine, will you allow me to state a case which came within my own experience a few years ago.

I was then manager of a branch bank, at which a cheque was cashed, drawn on another branch of the same bank by a person who was in the habit of changing cheques with me though he kept no account.

The cheque was duly forwarded for payment and returned dishonoured. The fact was at once communicated to the person of whom it had been received, and application made for re-payment of the amount. After some delay he denied his liability and I was obliged to place the matter in the hands of our solicitor, when to my intense surprise I was told the bank had no power to insist on repayment, as the cheque, having been cashed by

the bank on which it was drawn, although not by the particular branch to which it was addressed, was "satisfied," and the affair as much settled as if it had been paid in there. At first this interpretation of the law was considered false and absurd, but further inquiry seemed to prove clearly that this was not the case, and proceedings were consequently abandoned.

Yours obediently,
W. J. A.

THE FUTURE PROSPECTS OF FINANCE.

At the last moment, the 28th of September, the directors of the Bank of England have increased the rate of discount from 4 to 4½ per cent. ; although, from the strain for money the last few days, it was imagined that the court would have to support the terms for capital, it was hoped, in the face of the early payment of the dividends and the release of the deposits on the Brazilian loan, that the supply would have become better.

The full subscription to the Brazilian loan, and the payments upon the Erie £800,000 debentures, have in a partial degree affected the general market the last week or ten days. At the same time, however, business has assumed a much brisker appearance. Not only in London, but also in Manchester and Liverpool, operations have been entered into on a most extensive scale, which have temporarily quite changed the aspect of things. The produce markets in Mincing Lane have been firmer, with a rise in prices, and the tendency in other respects has been favourable.

But it is at Manchester and at Liverpool where the great activity has been manifested, particularly at Liverpool, and if it is not checked a little, it may eventually become a source of embarrassment. Cotton and corn have been largely adventured in, and an improvement has been going steadily forward in both of these articles for some time past. Cotton has experienced an important jump, and the speculation recently has been of such a rabid character, that it has threatened to verge into an excitement equal to that witnessed two years ago. If these symptoms should make further progress, and Liverpool and Manchester become once more the centre of this kind of gambling, a short period of dear money will entail a reaction, and the consequences may prove as serious as those encountered in October and November last. We trust we are not going to pass through any stringency during the last three months of the present year, and for the moment the indications are not sufficiently startling to create any apprehension. The safest way, nevertheless, to avoid shoals and quicksands of the sort, will be

to discourage speculation, whether in Liverpool, Manchester, or elsewhere; and everyone will be bound, in justice to himself or his neighbour, if he sees anybody going too fast, to interpose a word of caution or advice for the general good.

No doubt our trading relations are in a more healthy position than they were; that the pacific policy of President Johnson has assisted to stimulate business, not only with the North but also with the South; and that a revival of industry throughout the American States will cause large orders to be given over the length and breadth of the United Kingdom. These will greatly assist to invigorate the condition of our commercial transactions, and in the end leave profitable results. The introduction of new loans and new projects may be tolerated to a certain extent, and besides those already announced there are others to follow; but even such drains upon our resources must not be supported *ad infinitum*, because the Stock Exchange has been suffering for a long time past from the plethora of securities created since 1862.

Nothing can be more certain than that we shall get through 1865 satisfactorily if speculation is not allowed to ride rampant over legitimate business. If that, however, is to be the case, the sooner arrangements are made for another collapse, the better it will be for those who seek to protect themselves by timely preparations. There are numerous mercantile firms who have not got through the dark days of 1864-65 without difficulty, and should they have large losses through any fresh reaction, they will yet have to go by the board, prejudicing themselves and their connexions. A variety of finance and other institutions would also like to see the current year pass unaccompanied by any new financial disturbance, since their position by the lapse of a few months of ease and quietude will be materially strengthened. So, on all grounds, we desire to counsel a repression of active speculation.

Estates of Failed Firms.

THE ESTATE OF MESSRS. SCOTT, BELL & CO.

THERE was a numerous meeting on the 31st August, of the creditors of Messrs. Scott, Bell, and Co., who had recently failed, when the statement presented by Messrs. Coleman, Turquand, Youngs, and Co., showed debts and liabilities placed at £295,780, and assets at £323,517. Great sympathy was expressed for the partners, and it was unanimously agreed to carry out a liquidation under inspection.

THE ESTATE OF MESSRS. JOHN T. BELL & CO.

AN adjourned meeting of the creditors of Messrs. John T. Bell and Co., merchants, 2, Billiter Square, was held on the 7th September, when printed statements of the affairs of the Bombay firm, and also of their native broker, which had been submitted to the creditors there, were laid before the meeting, with certain amendments, as prepared by Messrs. Coleman, Turquand, Youngs, and Co., when it was resolved that the statement containing those amended statements should be forwarded to the inspectors at Bombay and communicated to the creditors there, together with the draft of a deed of inspection prepared in this country, according to the principles of the Bankruptcy Act, which the meeting here invited the Indian creditors to execute.

MONTHLY CHRONOLOGY.

September 4.—The directors of the Bank of Prussia raised their rate of discount to 5 per cent.

13.—Announcement by Messrs. Rothschild and Co. of a new Brazilian loan for £5,000,000 sterling in a 5 per cent. stock at the price of 74, with a sinking fund of 1 per cent., to be brought into immediate operation.

22.—Messrs. J. S. Morgan and Co. announced the issue of £800,000 sterling bonds of the Erie Railroad Company, to bear interest at the rate of 6 per cent. per annum, in bonds to bearer of £100, at the price of 75, to be redeemable at £100 at the end of ten years.

25.—Intelligence received that the Greek government had contracted a loan of £140,000 with the Ionian Bank at 7 per cent. interest, the principal to be reimbursed in fifteen years by monthly deductions from the customs revenues of Corfu, Cephalonia, and Zante.

28.—The Bank directors raise the rate of discount from 4 to 4½ per cent.

BANKING OBITUARY.

On the 29th of June, lost on his passage from Hong Kong to Foochow, in the P. and O. Company's steamer, Corea, Mr. Henry Noble, manager of the Agra Bank.

On the 12th September, at Heathfield Lodge, Upper Hornsey Rise, Mr. James Stewart, late secretary of the Bank of England.

On the 22nd September, at Great Cambridge Street, Hackney Road, Mr. William Pawley, late of the Bank of England, in the 81st year of his age.

On the 10th August, at Sydney, New South Wales, Mr. George Kilgour Ingelow, manager of the Oriental Bank Corporation.

BANK MOVEMENTS.

Mr. John Hall, Jun., of the firm of John Hall, Jun., and Co., of No. 1, New London Street, has joined the board of the Albion Bank.

Mr. William Dent, Sen., has joined the board of directors of the Joint-Stock Discount Company, and will occupy the position of chairman.

Mr. G. M. Alberti, of the firm of Oppenheim, Alberti, and Co., has joined the council of direction of the Imperial Ottoman Bank at Constantinople.

The Union Bank of Ireland has opened a branch, under the management of Wm. Macfadin, Esq., at Abbeyleix, Queen's County.

Messrs. C. S. Hanson and G. Tubini, bankers, of Constantinople, have been nominated by the Porte members of the Council of Surveillance of the Grand Livre of Public Debt of the Ottoman Empire, in accordance with Article II. of the Law of the 29th of March last.

The directors of the Delhi and London Bank, Limited, have declared an interim dividend of 9 per cent. per annum for the half-year ending 30th June, 1865.

The British and Californian Banking Company, Limited, have announced an *ad-interim* dividend of 4s. per share for the half-year ending the 30th of June.

The Merchant Banking Company of London, Limited, has declared an interim dividend of £1 per share upon the old shares, and 1s. 6d. per share upon the new shares (equal to 8 per cent. per annum).

It has been announced by the liquidators of the East of England Bank that a third dividend of 2s. 6d., making, with the former payments, 17s. 6d. in the pound payable to the creditors.

TRADE OF THE UNITED KINGDOM.

THE Board of Trade returns for the month and seven months ended the 31st July, were issued on the 31st August, and must be regarded as of a more favourable character than those presented for the past few months. Although the value of the exports is rather below that of the corresponding month last year, still the difference is but slight, and tends to show that the trade of the country is increasing, and that commerce is in a sound condition. The total declared value of exports for the month of the present year was £14,113,410 against £14,394,364 in 1864, and £13,648,840 in 1863, which is a decline as compared with the former period of £280,954, but an increase over the latter of £464,570. For the seven months of the present year the total declared value was £88,242,048 against £92,441,950 in 1864, and £75,663,037 in 1863, which show a decrease of £4,199,202, compared with 1864, and an increase of £12,579,011 contrasted with 1863. The chief changes have been an increase in the exportation of alkali, gunpowder, beer and ale, coals and culm, cotton yarn, cotton manufactures, haberdashery and millinery, hardware and cutlery, linen manufactures, metals, seed oil, silk manufactures, and woollen and worsted manufactures. But there has been a decrease in linen yarn, machinery, thrown silk, wool, and woollen and worsted yarn. In imported articles the increase has been in raw cotton, flax and hemp, guano, flaxseed and linseed, tallow, cocoa, coffee, spirits, unrefined sugar, tea, and tobacco. And the falling off in leather manufactures, paper, raw silk, wool, woollen manufactures, and wine. With respect to cereals there has been an increase in the importation of barley, oats, beans and Indian corn,

with a decrease in wheat, peas, and wheat meal and flour. In the case of provisions an increase is shown in the importation of all descriptions, with the exception of lard, in which there has been a large decline. The annexed tables exhibit the alteration in the chief articles enumerated:—

Exports.

	1864.	1865.
Coals and culm tons	761,496	881,635
Cotton manufactures yards	148,980,311	172,134,196

THE INLAND REVENUE.

THE Board of Inland Revenue have the good fortune to be able to state, in their report for the financial year ending with March, 1865, that notwithstanding a loss of £1,200,000 by repeal of taxation, the inland revenue collected was greater by £161,000 than in the previous year. The revenue from home-made spirits, £10,176,731, showed an increase of £484,216, and the number of gallons consumed as beverage in the United Kingdom, £20,369,844, an increase of £946,398. This is an unequivocal testimony to the prosperous condition of the labouring classes. Those who take alarm at an increased sale of intoxicating liquors must remember that, notwithstanding the increase of population, the quantity consumed is now very considerably less than it was some years ago before the duties were raised. The year 1852 was the last before those alterations in the rates of duty commenced, which terminated in 1860 in a uniform rate of 10s. throughout the kingdom. The consumption in 1852 was nine-tenths of a gallon per head of population, but the present consumption is little more than six-tenths of a gallon per head, and yet there is an increase of nearly £4,000,000 in the revenue. If we include the foreign and colonial spirits consumed the quantity is still almost a gallon and one-tenth per head in 1852, and not quite nine-tenths of a gallon in 1864. Of wine the consumption has risen in the same period from '23 of a gallon per head to '38, and of beer from '6 of a barrel to '7. These facts show the tendency towards the substitution of milder stimulants for ardent spirits. Comparing still the years 1852 and 1854, the consumption of beer in England will be found to have increased nearly 12 per cent.—viz. from '85 of a barrel per head to '95; in Scotland, 60 per cent.—viz. from '20 of a barrel to '32; in Ireland, 122 per cent.—viz. from '09 of a barrel to '20. Illicit distillation has decreased in Great Britain in the last year, but has increased in Ireland, the cases there arising to 3,452 in number. The smuggling in Ireland is concentrated in the poorest districts—Donegal, Sligo, Galway, and Mayo; and the consumers are those who are too poor to buy the duty-paid spirit. The quantity of malt made last year reached 48,538,412 bushels, again showing an increase. Foreign barley has been used for malting to an unusual extent, not merely on account of the inadequacy of the supply of English barley, but also because the colour or quality of some of the foreign barleys recommend them to the brewers of a certain class of ales. 28 persons made entry of malthouses for making malt duty free to be used in feeding animals under the Act of 1864. The quantity made was 10,705 qrs., but only 8,748 qrs. were mixed with linseed and delivered for consumption. Of the remainder part was placed in store, and part allowed to be used for brewing on payment of the duty. Several of these maltsters have given notice that it is not their intention to make cattle-feeding malt

again, and it seems probable that less than half the original number will continue at work. But it must not be supposed that this is owing to excise restrictions. On the contrary, the great majority of the gentlemen engaged in this manufacture acknowledge that they had nothing to complain of on that score, and the objections which were made by the few who were dissatisfied were directed against the regulation requiring that the mixture should be ground to a degree of fineness which has since been considerably modified. The entire net produce of excise duties in the year was £19,409,636—an increase of £1,000,529 over the previous year.

Stamps produced £9,531,974, an increase of £219,058. So far as the board can judge from the returns, the estimate given by some of the principal insurance offices that stock-in-trade was about one-third of the property insured against fire was a very fair one. A letter in *The Times* in the autumn of last year, complaining of the operation of the Legacy Duty Acts, elicited others of a similar kind, and produced an impression that either the law or the administration of it by this department was unjust and oppressive. Complainants were invited to state their grievances to the Treasury or to the Chancellor of the Exchequer, and, consequently, in addition to some of those who had publicly, but anonymously, expressed their dissatisfaction, several others came forward to claim a hearing. As the Board of Inland Revenue have received instructions to report generally on the operation of the legacy and succession duties, they refrain at present from any discussion of the subject. They remark that much of their time is occupied in adjudicating penalties on unstamped instruments. Of ordinary deeds thus brought to their chief office for completion there seems to be a gradual increase. This no doubt arises in a great measure from the general increase in the number of deeds, consequent upon the growth of railroads, the rise in value of landed property, and the prosperous condition of the country; but it may also be attributed to a practice which is extending itself among country solicitors of having their deeds engrossed by law-stationers in London, who are careless or uninstructed as to the stamp. It is suggested that solicitors should bear in mind that every deed, in strictness of law, ought to be stamped not only before execution, but before its engrossment, and if they paid proper attention to this requirement they would avoid the penalties which they now so frequently incur.

Passing by the land and assessed taxes, which produced in the year a net sum of £3,287,934, being an increase of £57,880, we come to the property and income tax, which, being reduced from 7d. to 6d., showed a decrease of £1,116,221, and produced £7,985,773. The estimate for the year was based on the very liberal calculation of a yield equivalent to £1,230,000 for each penny of tax, much more than was warranted by the actual receipts in former years, but about what might fairly be anticipated from the new assessments in 1864, under schedules A and B and the general progress of the country. It appears, therefore, from the excess of £180,000 over this sanguine estimate, that the improvement upon the assessments of former years is very remarkable. The mere account of the produce of the tax does not represent the assessments of the year, because it is composed of nearly one-third of the tax from the previous year's assessment, and two-thirds of the tax of the year in question. When there has been an alteration in the rate of the tax, it is of course still more difficult to arrive at any conclusion, from the accounts of the receipt within the year, as to the effect of the alteration. But it is certain that in many districts the amount of duty both under schedule A and schedule D is greater than

it was when the tax was at 7d. in the pound, and this remarkable improvement has shown itself in Ireland as well as in Great Britain. So far as schedules A and B are concerned this result is attributable in no small degree to the care and judgment with which the assessments were made on this occasion by the surveyors, acting under special instructions from the Inland Revenue-office. The valuations under the Union Assessment Act were also of great assistance, especially in the case of land in the occupation of the owner, where the former unsatisfactory parochial rating to the relief of the poor was the guide on which the officers chiefly relied. The same Act has likewise furnished a much higher valuation on a description of property most difficult to assess fairly—the houses of country gentlemen.

Monetary Intelligence.

MONETARY REVIEW FOR THE MONTH OF SEPTEMBER.

GREAT sluggishness has prevailed throughout the month both in finance and trading affairs. It is only at the last moment that there is any prospect of revival; symptoms of returning activity, however, are visible, and the apprehension is that speculation may perhaps be too freely encouraged. The end of the autumn and the whole of the winter trade should be good, seeing the late favourable weather and the moderate rates of discount which have recently ruled. The advance of $\frac{1}{2}$ per cent. just made in the Bank official *minimum* will create no pressure, though always, at the termination of the quarter, there is a greater inquiry for capital to meet revenue and other payments. The Bank rate being $4\frac{1}{2}$ per cent., the bill-brokers charge $4\frac{1}{2}$, and the joint-stock banks work at $4\frac{3}{4}$ per cent.

The tendency in the market for English securities has been unfavourable. A fall has followed the cessation of the government purchases, and the introduction of the Brazilian Loan has caused sales to be effected to take up that stock. No large transactions in other respects have ensued. The Exchequer bill market has been in a quiet state.

Foreign securities show no great change. Attention has been much directed to the Brazilian scrip, which from $1\frac{1}{2}$ pm. has gone to $3\frac{3}{4}$ to 4 pm., and is expected to be higher. Turkish has remained quiet, and the operators manifest no desire to push transactions. Mexican has recovered, but after reaching 27 has gone back to $26\frac{1}{2}$. It is said the National Bank of Mexico is about to be introduced. Spanish presents a slight increase of firmness. Most Federal securities have advanced; but the Confederate loan remains dull, and is now thoroughly repudiated.

Railway shares have been latterly rather stronger, but business has not been so active as it was last month. The principal speculators have been out of town.

Bank, finance, and credit shares have been fairly supported, and there is a gradual tendency to improvement. The buyers have taken the leading descriptions, because they believe in better dividends. A large amount of stock has been recently absorbed.

The produce markets have generally revived. An increased business has been concluded in sugar, tea, and coffee in London; and there has been great animation in cotton at Liverpool.

THE GRAIN TRADE.

The grain markets have exhibited considerable fluctuations during the last few weeks, as is usually the case at this period of the year, when the state of the weather exercises so much influence on the results of the harvest. The few wet days which occurred a short time since, caused the price of wheat to advance materially, but the subsequent brilliant and hot weather dissipated all ideas that might have been entertained with regard to the state of the crops, which, on the whole, have been well got in, and the samples which have since been brought to market have generally proved in excellent condition. The yield of most cereals is considered to be of about a fair average, consequently prices have again receded to very nearly the extent of the previous advance. At the present prices, however, the markets are firm, the latest official average quotations being—wheat, 42s. per qr.; barley, 30s. 2d. per qr.; and oats, 20s. 10d. per qr.

The *Gazette* returns for England and Wales have been :—

Week ending, 1886.	Wheat. Qrs. sold.	Weekly Average.	Duty.	Corresponding Week Last Year.
		s. d.	s. d.	s. d.
Aug. 26	48,026 ...	45 4	1 0	43 7
Sep. 2	51,742 ...	46 7	1 0	43 5

	22,666,194	30,474,167	53,140,361

And the weekly averages have been :—

	Wheat. Cwts.	Other Grain. Cwts.	Total. Cwts.
Fifty-seven weeks ended 19th Aug. ...	356,000	484,000	840,000
Five weeks ended 23rd September ...	468,000	582,000	1,050,000
	More 112,000	98,000	210,000

STATE OF TRADE.

The state of trade is generally better, and the mercantile community believe in an improvement throughout the remainder of the year.

NOTICES TO CORRESPONDENTS.

We have arranged in future to issue a double number in February and August, instead of as formerly in May and November. This has been rendered necessary by the great increase of the Meetings of the Banks and Discount Companies, which will be always carefully collected in the pages of the *Bankers' Magazine*. We shall also give the proceedings of the various Credit and Finance Companies as they are more or less associated with banking, so that our subscribers and readers can refer to them without difficulty. Correspondents will please forward communications addressed to the Editor, No. 8, Birchin Lane; subscriptions and orders as usual to Messrs. Groombridge and Sons, Paternoster Row; Messrs. Waterlow and Sons, Carpenters' Hall, London Wall. **BANKING AND FINANCIAL ANECDOTES.**—It will be perceived from notice elsewhere, that the Editor of the *Bankers' Magazine* is collecting and arranging a series of Banking and Financial Anecdotes. Any contributions from subscribers and readers of the *Magazine* will be thankfully received, particularly if the subject-matter shall not have previously appeared in print. Notices personal or offensive will receive publicity.

SUMMARY OF WEEKLY RETURNS OF BANKS OF ISSUE.

	Fixed Issues.	July 29.	August 5.	August 12.	August 19.
7 Private Banks	£4,189,151	£2,843,426	£2,859,084	£2,845,750	£2,824,266
9 Joint-Stock Banks ...	3,226,257	2,740,591	2,745,414	2,750,628	2,756,178
6 Totals.....	7,415,408	5,584,017	5,604,498	5,596,378	5,580,444

Average Weekly Circulation of these Banks for month ending August 19th:—
 Private Banks £2,843,131
 Joint-Stock Banks 2,748,303

Average Weekly Circulation of Private and Joint-Stock Banks ending as above £5,591,334
 In a comparison of the above with the Returns for the month ending July 22nd last, it shows:—
 A decrease in the notes of Private Banks, of £38,962
 A decrease in the notes of Joint-Stock Banks, of 10,959
 Total decrease on the month £49,921

And as compared with the month ending August 30th, 1864, it shows:—
 A decrease in the notes of Private Banks, of £176,445
 A decrease in the notes of Joint-Stock Banks, of 70,474

Total decrease, as compared with the same period of last year £246,919
 The following is the comparative state of the circulation as regards the fixed issues:—
 The Private Banks are below their fixed issues £1,346,020
 The Joint-Stock Banks are below their fixed issues 478,054
 Total below their fixed issues £1,824,074

SUMMARY OF IRISH & SCOTCH RETURNS TO AUGUST 19, 1865.

The Returns of Circulation of the Irish and Scotch Banks for the four weeks ending August 19, when added together, give the following as average weekly circulation of these Banks during the past month, viz.:
 Average Circulation of the Irish Banks £5,664,013
 Average Circulation of the Scotch Banks 4,340,669

Total Average Circulation of these banks for the past month £10,013,682

On comparing these amounts with the Returns for the month ending 22nd July last, they show:—
 A decrease in the Circulation of Irish Banks £54,414
 A decrease in the Circulation of Scotch Banks 23,068

Total decrease on the month £78,482

And as compared with the month ending August 30th, 1864, they show:—
 A decrease in the Circulation of Irish Banks £456,045
 A decrease in the Circulation of Scotch Banks 153,323

Total increase on the year £809,368

The fixed issues of the Irish and Scotch Banks at the present time are given in the *Banking Almanac*, as follows:—

6 Banks in Ireland, allowed to issue... £6,354,404
 12 Banks in Scotland, allowed to issue 2,740,271

18 Banks in all, allowed to issue £9,103,785

The following appears, therefore, to be the comparative state of the circulation:—
 Irish Banks are below their fixed issue £890,481
 Scotch Banks are above their fixed issue 1,800,396

Total above the fixed issue £909,917

The amounts of Gold and Silver held at the head offices of the several banks, during the past month, have been as follows:—

Gold and Silver held by the Irish Banks £2,040,184
 Gold and Silver held by the Scotch Banks 2,394,656

Total of Gold and Silver Coin..... £4,434,840

Being a decrease of £38,259 on the part of the Irish Banks, and a decrease of £13,636 on the part of the Scotch Banks, on the several amounts held by them during the preceding month.

CIRCULATION OF THE UNITED KINGDOM TO AUGUST 19, 1865.

The following is the state of the Note Circulation of the United Kingdom for the month ending 19th August, 1865:—
 Circulation of Notes for the Month ending 19th August, as compared with the previous month:—

	July 22.	August 19.	Increase.	Decrease.
Bank of England (month ending Aug. 16)	£21,983,547	£22,178,744	£185,197	—
Private Banks	2,882,083	2,848,131	—	£38,962
Joint-Stock Banks	2,750,162	2,748,303	—	10,959
Total in England.....	27,634,802	27,770,078	185,197	49,921
Scotland.....	4,371,737	4,340,669	—	23,068
Ireland	5,718,427	5,664,013	—	54,414
United Kingdom.....	£37,724,966	£37,783,760	185,197	126,403

The comparison of the month ending August 30th, 1864, with the month ending August 19th, 1865, shows an increase in the Bank of England circulation of £693,089, a decrease in Private Banks of £176,445, and a decrease in Joint-Stock Banks of £70,474; being a total increase in England of £446,170; while in Scotland there is an increase of £153,323; and in Ireland an increase of £456,045. Thus showing that the month ending 19th August, as compared with the same period last year, presents an increase of £446,170 in England, and an increase of £1,055,538 in the United Kingdom.

The return of Bullion in the Bank of England, for the month ending August 16th, gives an aggregate amount in both departments of £14,341,312. On a comparison of this with the Return for the month ending July 19th, there appears to be a decrease of £1,433,377; and an increase of £1,538,962 as compared with the same period last year.

The stock of specie held by the Banks in Scotland and Ireland during the month ending 19th August was £4,404,840; being a decrease of £51,895 as compared with the Return of the previous month, and an increase of £307,664 as compared with the corresponding period last year.

THE BANKERS' MAGAZINE,

AND

Journal of the Money Market.

NOVEMBER, 1865.

ADMINISTRATION OF BANKRUPTCY.

MR. MOFFATT has established a claim to the gratitude of the commercial community by the carefully prepared paper on the working of the existing law of bankruptcy, which he read at the recent meeting of the Social Science Association. The evils of which the honourable member for Southampton complains, have indeed been long felt and universally lamented by those who have had the evil hap to be personally interested in the realisation of a bankrupt estate. The proportion of legal and official charges to the sum realised, is an old grievance which is in some degree inseparable from the operation of winding up a suspended and confessedly insolvent concern, by persons, many of whom have no direct interest in a good dividend. But it is not of this that the mercantile public have most reason to be apprehensive. Our great danger arises from the facilities for fraud which recent alterations in the law give; from the means of baffling creditors which they provide, and from the frightful extent to which these two causes appear to be sapping the foundations of mercantile morality, and making bankruptcy rather the "correct thing" for any trader who finds a difficulty in getting on. No one would desire to copy the Roman jurists in making the bankrupt's person, as well as his property, an available asset. Few, very few, would ask for the power to subject the debtor to protracted, or indeed to any incarceration, in the absence of fraud, or such recklessness as almost amounts to it. Even among creditors, there is considerable difference of opinion as to whether the right to go against after-acquired property, should, in all cases, be given. But no one, except those who

benefit by it, can refrain from deprecating the continuance of a system which seems to make integrity a folly, by holding out unlimited inducements to knavery.

That the code established by the Act of 1861 has this effect, is abundantly evident from a comparison of last year's bankruptcy business with that of its immediate predecessors. Making every allowance for local disasters, such as the cotton famine, and for exceptional causes, such as the recent joint-stock mania, it is incontestibly true that the country, during that period, has enjoyed a very considerable amount of prosperity. Yet, since Lord Westbury's Bill became law the number of bankruptcies has been multiplied tenfold. We grant that the abolition of insolvency will account for a great part of this increase, but the same remark will not apply to the amount of assets realised. In 1863, the sum of £699,000 was realised under bankruptcies. In 1864, about £677,000 was obtained from 7,224 bankruptcies. Out of these sums, the officials netted £100,000 in the first year, and £140,000 in the second. What the creditors got may be imagined from the fact that in 6,600 cases out of the 7,224 the petitions were filed by the bankrupts themselves: and that 5,324 of these estates paid no dividend at all, while 848 others yielded less than half-a-crown in the pound. Yet only 80 out of the entire number (a trifle over one per cent. of these pay-nothing people) failed to obtain their discharge from the Commissioners. If it be asked why nearly 7,000 men should proclaim their own insolvency in a single year, we are afraid the reason must be found in the state of the law. If a man commits an act of bankruptcy (such as keeping house, going abroad to evade his creditors, or executing a bill of sale), and his creditors make him bankrupt within three months, the title of the assignees relates back to the original Act, and all those questionable transfers of property which so commonly precede an appearance in the "Gazette" are, or may be, invalidated. But if he takes the initiative and makes himself bankrupt, their title only dates from the day of the petition, because his going into court is supposed to be an entirely voluntary act on his part. This reasoning, the fruit of legal ingenuity, accounts in the most natural, though not in the most satisfactory manner, for the alacrity of debtors to seek the friendly shelter of Basinghall Street at the rate of about twenty-three per working day.

It may be thought that these figures are sufficiently portentous. But our insight into the business of insolvency will be lamentably incomplete if we confine ourselves to the regular and formal issue of fiats by bankruptcy commissioners. By far the greater part of such business is now done by deeds of inspec-

tion, composition and assignment. The first of these was until lately least in favour, possibly because willingness to place the affairs of a business which has got into difficulty, under the constant control of the creditors, was formerly strong evidence of the debtor's *bona fides*. They accordingly represent only £198,000 in 1863 and £600,000 in 1864. But some hitherto undiscovered virtue must have been found in them this year, for in the six months from October to April, they have bounded up at a rate, which if maintained through the year, will reach £10,612,000. Composition deeds come next, standing in 1863, for £373,000; in 1864, for £2,497,000; in the six months of 1865, at the rate of £8,872,000. But the grand new device for paying old debts is the composition deed, which the Act of 1861 made fashionable by its 192nd section; at first, indeed, it was looked upon as coolly as if it had been really a beneficial novelty. But in 1863, the amount of debts represented by these instruments was £1,015,000, and so prompt were defaulting debtors to appreciate the advantages they thereby gained, that the total for 1864 rose to £5,725,000, and while that for the first six months of 1865, if maintained throughout the year, will amount to £13,450,000; making a grand total of within a trifle of £33,000,000 a year, or £106,000 per working day, to which the statutory sponge is applied by means of these deeds of assignment, which offer such facilities for fraud, that Mr. Moffatt thinks all other questionable facilities the law has provided for the bankrupt's special benefit, are fair and honest in comparison! There is no preliminary proof of debts. The trustees are constantly in collusion with the bankrupt. Delays and adjournments *ad libitum* are employed to worry and wear out creditors who refuse to come to any arrangement the bankrupt likes to propose, and the result in most cases is that the fraudulent debtor gets his own way, and makes that particular disposition of his estate which gives him the most plunder and his creditors the least pay. And here again the law steps in to his aid. Though there has been no formal decision on the question, the leaning of the courts is in favour of regarding bankruptcy by deed as bankruptcy on a man's own petition, and as consequently giving his assignees no rights anterior to the date of execution. The only case which favours a different view is one in which the debtor had been made a bankrupt, and had afterwards, at the instance of his creditors, executed a deed in order to save the expense of winding-up in court. This was held to give the trustees under the deed the same rights as assignees in bankruptcy; but the judges expressly guarded themselves against laying down a

general rule, as they went only upon the circumstances of that particular case. The result is that counsel advise a petition in regular form whenever a suspicious-looking sale or transfer has to be set aside; creditors hesitate about incurring the expense, and in the end the bankrupt and those in collusion with him place the creditors at defiance. In memory of these facts, the above noted increase of such deeds ceases to be remarkable.

The repeated failures of bankers, merchants, statesmen, and law reformers to devise a good law of bankruptcy render it rather hazardous to offer opinions or suggestions in that behalf. And we must own we have little faith in some of the remedies propounded by Mr. Moffatt for admitted evils. We cannot see how a chief judge in bankruptcy would have ferreted out the frauds which lie hidden under thousands of seemingly *bonâ fide* instruments, nor how he would have done work for which the Act of 1861 provides no efficient machinery. The appointment of a paid trustee, with power to admit or reject claims, would be an advantage only if he were controlled by a court constantly sitting, before which any dispute could be immediately brought. And his remuneration should be made, not only contingent upon, but increasing with a favourable realisation of the assets, giving bonuses or increased per centages as the dividend progressed towards 20s. in the pound. Where bankruptcy has taken place without fault, the debtor should receive a final discharge from his liabilities; but where there has been neglect or recklessness, and (*a fortiori*) fraud, the creditor's right to sue should be suspended over him *in terrorem* until he has paid the whole amount, or such portion thereof as the commissioner should determine when granting his conditional discharge. We do not join in the laudations which some people seem disposed to bestow on the system pursued in Scotland. We believe that the economy, rapidity, and equity of bankruptcy administration in that country to be very much overrated. "'Tis distance lends enchantment to the view," and overcrowded as our courts are already with ordinary business, we should find a scheme by which questions in bankruptcy might be kept waiting for lengthy trials at *Nisi Prius*, interminable arguments *in Banco*, and inevitable delays on Circuit, would never be endured. What we want is a statutory abolition of all mischievous distinctions between bankruptcy by a man's own act, and by the adverse action of his creditors, and a simplification of procedure. To make effective the law when thus established it should be administered by men chosen from such members of the bar as have a special familiarity with commercial matters. They should be clothed with ample powers, their sittings should be arranged

so that, even in vacation, there should always be one court open, and their judicial functions should include the duty of deciding whether the bankrupt should receive an absolute or only a qualified discharge from his debts and liabilities. Lastly, the men to whom the administration of bankruptcy law is committed, should have the primitive power of police magistrates. For the smaller offences against the commercial code, they should have power to commit summarily, while the more serious cases they should send for trial. The only objection to this is, that the greater knave would have the better chance of escape, and thus the smaller offenders would be punished while their more guilty brethren get off scot free. Whether this consideration ought so far to prevail as to continue the present impunity to all, may be doubtful; but we think we have indicated some of the features which a good Bankruptcy Law should possess, and should be only too happy to see them embodied in the next attempt to legislate upon this difficult, but most important subject.

THE AMERICAN DRY GOODS TRADE THROUGHOUT THE WAR.

THE American dry goods trade has been the sport of various influences throughout the war. The imports were closely scrutinized, the auction room resorted to, the experiment of private sale tested, jobbers trusted and distrusted, buyers courted and turned away, that importers, consignees, merchants and retailers might hold their own against the changes of the war, and the exactions of the Federal treasury. Moreover, there were the panic of 1863 with gold at 171 premium on the 1st of March, and at 140 premium on the 26th of the same month; the panic of 1864 with gold at 181 premium on the 14th of April, and at 166 premium on the 19th of the same month; and the panic of 1865 with gold at 201 premium on the 1st of March, and at 147 premium on the 24th of the same month. The trade, however, still survives. It is, indeed, at the present time, in a hopeful state, old faces from the South having re-appeared, old accounts being adjusted and re-opened on terms as advantageous to the seller as they well can be to the buyer. May nothing happen to prevent the dry goods import values at New York soon reaching the old figures of upwards of \$100,000,000 annually.

The following figures show the total imports at New York for the twelve years before the war:—

1250 *The American Dry Goods Trade throughout the War.*

IMPORTS OF DRY GOODS AT NEW YORK.

	Woolens.	Cottons.	Silks.	Flax.	Miscellaneous.	Total.
1849....	\$11,933,279	\$6,519,972	\$15,295,753	\$4,756,561	\$3,959,210	\$45,514,775
1850....	16,565,016	11,038,595	20,231,034	7,562,941	2,282,437	58,329,823
1851....	15,252,028	11,027,938	23,486,456	6,744,818	4,110,163	60,626,403
1852....	16,172,991	11,339,858	22,944,503	7,103,887	4,644,017	62,304,261
1853....	28,204,146	16,808,353	34,128,519	8,790,135	5,766,964	93,499,066
1854....	21,834,346	15,610,146	27,599,393	7,258,052	5,805,939	78,157,876
1855....	19,157,015	11,274,221	23,478,460	6,924,635	5,963,365	66,802,697
1856....	26,185,825	10,901,185	28,780,519	8,772,322	7,208,592	88,927,453
1857....	24,938,408	17,480,962	27,691,987	6,938,737	6,676,856	82,676,523
1858....	21,124,303	18,567,943	20,381,735	7,008,636	4,914,523	69,098,765
1859....	37,329,041	27,781,264	33,682,647	11,120,484	6,266,052	112,970,944
1860....	34,532,922	17,721,725	34,988,710	7,914,152	6,574,427	101,880,946

To these large import values, the New York trade was reconciled, and those of 1860 were not thought excessive; not in the least exceeding the legitimate and proper wants of trade. In the trade of 1860 there are some points of general interest. The unprecedented consumption of 1859 so greatly stimulated European shipments that the spring trade was supplied early, and with much freeness. Indeed so excessive were the shipments, that the receipts for duties paid at the custom house, in January and February, exceeded those of 1859, for the same months, by no less a sum than \$3,360,000, or 15 per cent. Buyers held back; for they anticipated a deluge of imported articles. Importers in turn became alarmed; the spring trade languished; and ultimately there was a clearance at auction to the extent of \$25,000,000, at an average loss of 15 to 20 per cent. The loss to importers was computed at \$4,000,000. The South bought largely, and the West bought largely, and European shippers received a lesson which just now should be remembered. The New York market to be remunerative to the European shipper must be sparingly supplied, not gorged, because when gorged the goods are literally thrown away. That the South and West bought largely was accidental, and in no way connected with subsequent events, for the election of President Lincoln did not take place for some months after.

The fall trade of 1860 was as profitable as the spring trade was losing. The imports were short \$6,000,000, and there was no enthusiasm betrayed by European shippers. They were not to burn their fingers twice in the same year, in the same market; and the jobbers speedily realizing the character of the situation stepped in and bought up everything at good prices. Of auction sales there were next to none, and such as took place involved no sacrifice. The only let-down the market had was from a large arrival of French worsted and woollen goods, through the withdrawing of the French export bounty to the colonies. But prices were on the whole sustained; even in the eventual absence of any considerable Southern demand. The fall had

The American Dry Goods Trade throughout the War. 1251.

found the South convulsed on the vexed slavery question, and, being beaten at the poll, the intensity of sectional hatred was manifested by the absence from New York of the chief Southern jobbers. They kept aloof from New York, neither buying nor paying for their spring purchases. That the North alone absorbed the imports, shows what it can do in prosperous times without the South. It further indicates the enormous increase which, but for the war, would have taken place in the imports at New York. But for the war the European shipments in 1861 would have been greatly in excess of those during what proved to be the last year of peace.

The following figures show the total imports at New York throughout the war :—

IMPORT OF DRY GOODS AT NEW YORK.

	Woollens.	Cottons.	Silks.	Flax.	Miscellaneous.	Total.
1861....	\$16,720,931	\$7,192,931	\$13,334,411	\$3,580,303	\$2,808,520	\$43,636,689
1862....	25,718,592	8,501,512	11,568,807	7,666,946	2,665,370	56,121,227
1863....	29,703,956	7,913,957	15,534,469	10,381,059	3,731,106	67,274,547
1864....	31,411,965	8,405,246	16,194,080	11,621,831	3,956,630	71,589,752

These are specie, as distinguished from "greenback" values; and the falling off from 1859 and 1860 exemplifies the intensity of the war. It also points to vital questions of deep interest; especially in our own manufacturing districts. The demand for woollens last year exceeded the average wants of all the States before the war; but it chiefly consisted of blanket and clothing stuffs for the Northern armies. It, therefore, was an exceptional demand; one which will not be maintained, and which necessarily suggests dullness and forced idleness among a numerous class of home operatives. Manchester and Glasgow, on the contrary, may anticipate increased demands upon their looms, no matter what the price of fabrics, because last year the manufactured cotton imports of New York were \$8,405,246 against \$17,721,725 in 1860, and \$27,781,264 in 1859. Lyons and Spitalfields will also now be busy; for the normal state of the New York silk imports is 35 per cent. of all the manufactures. Nowhere, in peaceful times, is there such a market for silks as in New York, and while last year the imports were to the extent of \$16,194,080, those of 1860 were of the value of \$34,988,710. Throughout the war calico dresses were much worn, but now they are sure to be put aside. Whether Dundee and Belfast will continue shipping on the same scale as recently is scarcely doubtful. Until the price of cotton falls, flax fabrics will practically be as cheap as cotton fabrics; and among the wealthier Southern families the stock of linen must be short. Of the miscellaneous it is not required to speak.

The trade of 1861 was not profitable. It was a trade of in-

tense distrust ; no man caring to trust his neighbour. Indeed no man cared to trust the government ; and Mr. Chase, had he listened to all advisers and adopted half the schemes submitted to him, would have illustrated the well-known fable. What each and all were eager for, was a command of money, and that they were willing to secure on any terms. Accordingly the importer stood aloof from the jobbers and the trade. He desired money, money only, and designed to have it. For the speedy and sure attainment of his purpose the auction was resorted to. Here goods were, so to speak, realized ; but realized without the remotest reference to cost. For as much as they would bring, they were sold by the hammer, and only when even on such terms the demand failed, the jobbers were again sought and three and four months bills drawn.

The trade of 1862 was the most lucrative of several years. An American writer of repute thus speaks of it : " In 1859 and 1860 the market was depressed with over supplies ; in 1861 trade was light on account of the absence of Southern demand, and the large amounts of money lost which were due from Southern debtors to Northern merchants, and which losses curtailed the credit of merchants. Moreover, the breaking out of the war had induced the greatest caution. But in the spring of 1862 the market improved, and prices which had been ruinously low the year before, now advanced nearer cost, and in some cases left fair profits. At the time for the commencement of the autumn trade money was easy and plenty, the government having issued \$200,000,000 in treasury notes ; and with an abundance of money among the people, trade commenced earlier than usual, and the jobbing trade sought to supply their wants by regular purchases at private sale instead of waiting for the importers to put up their goods at public auction. The wants of the jobbing trade were so large that the private sale market became brisk, and the stock of goods ran short. This imparted firmness to the market, which was increased by the rising values of exchange, and by an advance on goods in Europe which greatly increased the cost of getting out further supplies. With an active demand, moderate receipts, and greatly increased expense in landing new goods, prices began to rise quite early, and continued to rise as exchange and cotton advanced. The demand for distribution exceeding the expectations of the trade, many kinds of goods became scarce. With an active demand, a scarcity of stocks, and plenty of money, it is easy to produce a panic in prices, if we may call a rapid upward movement a panic, as well as a rapid downward movement when it occurs. In the latter part of October, when the demand was most active and prices at the highest

point, the advance on many kinds of desirable goods was as much as 50 per cent. over the lowest point which had been obtained during the two previous years; while on some descriptions it was even greater." But the satisfaction arising from a redundant currency is usually short-lived. The gains of 1862 were more than once distrusted in 1863, and the quiet substantial state of things which existed before the war would have been gladly welcomed back by all. Importers were in turn enriched and robbed by hasty tariff changes; jobbers and others disconcerted in their computations by unforeseen appreciations and depreciations of the precious metals; and mechanics and workmen at times goaded to the verge of treason, because it happened that their nominally high wages were not always sufficient for the purchase of daily bread. Still, it must be confessed, that the poor man was on the whole benefited, partly, no doubt, through his resolute crying out, and that the middle class were also gainers; and necessarily when the middle class and the poor prosper, the rich are not losers. But let it be remembered that the gains of all classes, in the peculiar circumstances of the people of the United States, are contingent on good faith being maintained with the public creditor. Were the American public creditor to be disavowed, or were the debts of the separate States—the aggregate amount of which is now enormous—to prove too great a burden, in conjunction with the debts of the Federal treasury, it would be a task of some difficulty to produce a goodly number of solvent, rich or poor, within the bounds of the United States. Under a purely credit system individuals and nations are rich on the assumption only that what is owing to them will be really paid.

But it is time to speak of 1864, and to touch on some details. Trade in 1864 was in a most unsatisfactory state; it being generally necessary to take advantage of the favourable fluctuations in the gold premium for paying duties. Nor were the duties the only care of the importer, there were, in addition, the premiums on exchange. At the close of last year some descriptions of woollens which had to pay an import duty of 60 per cent. in gold were thus burdened:—

Net cost afloat at New York	\$1.00
Premium on exchange	\$1.27
Gold duty	60
Gold duty premium	76
Total tax on the one dollar's worth	2.63
Total cost to the importer	\$3.63

Into the hands of the consumer the one dollar's worth perhaps passed at a charge of \$5 or \$6. But to put the matter broadly, the whole value of the dutiable goods imported in 1864 was \$264,381,101, the average premium on gold 155, and the exchange 170. The actual cost of the imports was therefore—

Original cost	\$260,381,101
Freight, &c.	26,038,110
				<hr/>
				\$286,419,211
Exchange, 60 premium	161,061,526
Duties collected in currency	159,945,530
				<hr/>
Total cost in greenbacks	<u>\$601,416,267</u>

Another American writer of position says (October, 1864), "The events of the last month have been influenced principally by the great fluctuations in the prices of gold, that have tended to unsettle all values prospectively, and create great apprehensions in relation to the possible consequences of a sudden and large depreciation in the prices of goods. The combined influence of taxes and of currency inflation has carried goods so high as seriously to check consumption. The effect is the more decided since domestic productions have not risen in price so fast as other articles, because although articles of home production suffered the influence of paper inflation, those manufactured articles composed of imported materials, and goods directly imported, were influenced also by the premium on gold as well as the paper inflation, and the latter in the double ratio of premium on exchange and premium on gold. The depreciation of the currency is the one general cause of the rise, but the import taxes have added a further element of cost which is not borne by the domestic products. With each advance in the price of gold this becomes more evident, and it is the sign of increasing relative difference in prices which is the main cause of languishing commerce. The Fall trade is very backward, and many dealers are awaiting orders for the re-shipment of their goods to more propitious quarters. An ordinary quality of cloth, which paid 24 per cent. duty three years since, now pays 460 per cent. before it reaches the retailer, a fact which represents so many yards less for the same quantity of farm produce." Thus it was not unfortunate for the United States Government that the war terminated at the time it did, for its resources and energies were beginning to be fairly tried. No doubt its energies and resources are great, but it is pretty certain that at the present time they are unequal to the renewal and continuance of so great a conflict.

BANKING AND FINANCIAL ANECDOTES.

No. XII.

LOMBARD STREET.

THIS street has for many centuries been famous for its wealth, its inhabitants being formerly, as now, dealers in money; it is well known that previous to the time of Edward the Second it was the principal mart for the goldsmiths and money-lenders, now commonly called pawnbrokers. They displayed their bags of money on low benches in open shops, protected perhaps by occasional awnings from the inclemency of the weather. We have seen an ancient lease of a house in Lombard Street, in which permission is given to the occupier to enclose it with windows; and to this day, that part of a banking house in which money is received and paid, is called "the shop." The celebrated Sir Thomas Gresham, goldsmith to Queen Elizabeth, had his shop in Lombard Street, on the site of the banking house of Martin, Stone and Company; and for many years the successors of Sir Thomas Gresham, Charles Duncombe and Richard Kent, occupied the house and kept up the sign of the "Grasshopper." The present names of the courts and alleys in Lombard Street had their origin from the banker's signs, with the exception of "Pope's Head Alley," which was so named because the dealers in Roman Catholic wafer cakes and pardons resided there. The grandfather of Anne Boleyn, wife of Henry VIII., was a goldsmith in Lombard Street, as was also, according to Pepys, the husband of Jane Shore. Lloyd's Coffee House was originally in Lombard Street; it was the property of Edward Lloyd, in the time of Elizabeth, who was noted for his permitting merchants and others to assemble in a room in his house to discuss their business matters, without insisting on their taking refreshments; its many conveniences of locality, &c., increased its reputation, and at last it became the only place where marine insurances could be effected, and continued to be so, until, as Stow relates, "The merchants began to make their meetings at the Royal Exchange;" and up to the present time all the policies for marine insurance, effected at Lloyd's, contain these words, "And it is agreed by us, the insurers, that this writing or policy of assurance shall be of as much force and effect as the surest writing or policy of assurance heretofore made in Lombard Street, or in the Royal Exchange, or elsewhere."

In 1677 was published a list of all the bankers who kept "running cash," with their several signs, for the practice of numbering houses had not then been adopted. Among them will be found Peter Percefull and S. Evans, of Lombard Street, with the sign of the "Black Boy," evidently the predecessors of Willis, Percival and Company. James Hore, at the sign of the "Golden Bottle," Cheapside, the ancestor of the Messrs. Hoares, of Fleet Street, who have the symbol of a leather bottle, gilt, over the principal entrance of their banking house; it appears from Sir Richard Hoare's history of the family, that Mr. Richard Hoare, goldsmith at the "Golden Bottle," Fleet Street, resided there in 1692. Messrs. Goslings, also in Fleet Street, retain their ancient sign of the "Three Squirrels." Remains of this custom may still be found in many of the Metropolitan banks, for example, in the branch of the London and Westminster Bank, formerly the banking house of Snow and Paul, in the Strand, may be seen a golden anchor.

RUN ON THE BANK OF ENGLAND, 1720.

THE following explanation of a reported run on the Bank of England was printed and published in the above year :—

"Whereas there hath been several false and malicious reports industriously spread abroad reflecting on Sir Richard Hoare, goldsmith, for occasioning and promoting a run for money on the Bank of England; and in particular several of the directors of the said bank, reporting that the said Sir Richard sent to the bank for ten of their notes of £100 each with a design to send several persons with the said notes to receive money thereon, so as to effect his ill designs and to bring a disreputation on the bank, and occasion a disturbance in the City of London." This accusation Sir Richard as publicly denied, stating that the ten bank notes were required by Major Ashburnham for his journey to Scotland, for his expenses. Sir Richard further stated that had he intended to promote a run for money on the bank, he could have done it in a more effectual manner, having by him all the time that the great demand for money was on the bank, several thousand pounds in notes payable by the bank; and also that there was brought to Sir Richard, by several gentlemen, in the time of the run on the bank, notes payable by the bank, amounting to a great many thousands, which he was desired to take and receive the money immediately from the bank, which he refused to do until the great

demand for money on the bank was over. The authorities of the bank must have been very sensitive, if the withdrawal of so small a sum as £1,000 could have caused them any uneasiness, or to report that the withdrawal of that sum could possibly be construed into a run; but no doubt the real fact was, that there still existed a jealousy between the private bankers of London and the Bank of England. Many of the former, at the above period, and in particular Messrs. Hoares, issued their own notes, which notes only ceased to be issued when the bank had been fully established in public favour, and consequently a preference being given to the notes issued by the Bank of England.

A BANK PORTER CHOSEN AS A CLERK.

SOME years ago it was the practice, and we believe still is, for a candidate for a clerkship in the Bank of England to undergo a certain degree of examination as to his fitness for the office, one of the tests was that of counting twenty pounds in silver. It happened on a certain occasion that the name of a young man (who was a candidate for the post of porter) was placed in the list of clerks, and on the young man receiving the silver to count, he whispered to the head of the department, "There is, I think, some mistake here, sir; I am to be a porter and not a clerk." "Count the silver, sir," was the reply, adding, "a clerk is better than a porter any day;" whereupon the young man counted the silver, and having performed the operation expeditiously and correctly, he was told he would do very well. The candidate again whispered to the chief of the office, "I write very bad, sir, not being used to it;" the reply was "Pooh, pooh, when you pass, as you will do, take lessons in writing after office hours, and you will soon write as well as the best of us." This kind and considerate advice was adopted, and in a very short time the young man became a most efficient officer of the corporation, remaining in the bank for upwards of forty years, much respected.

THE BANK CLERK AND THE MUD CART.

THAT portion of the Bank of England now called the Garden, was formerly the churchyard of St. Christopher-le-Stocks, and, having formerly been consecrated, became, in the estimation of pious people, "holy ground." One of the clerks in the Bank, of the name of

Jenkins, lies buried in this consecrated ground ; the cause of this interment in such a place arose out of a fear expressed by his relatives, that in consequence of his singular height—he was upwards of seven feet—his body, which was much coveted by the faculty, would be exhuming if it were buried in any other place. A whimsical story is related of Mr. Jenkins. He was in the daily habit of passing through the Borough, and at the foot of London Bridge, on the Surrey side, there was a linen-draper's shop, the proprietor of which was a very little man. This dwarf made a point of standing at his door every morning at the time Mr. Jenkins passed, looking up to him in rather a contemptuous manner—at the same time, like the frog in the fable, endeavouring to swell himself up to the dimensions of the giant. This conduct on the part of the little linen-draper had become so irritating, that one morning observing a mud cart opposite the draper's door, full to overflowing, Mr. Jenkins took up the little man and soused him in the liquid mud-cart, walking away as though nothing had happened.

STORY OF A LOTTERY TICKET.

ONE of the joint stock companies formed during the bubble mania of 1720 was "The Charitable Corporation for lending money to the poor at moderate interest." This corporation got into difficulties, and the creditors petitioned Parliament for relief. The prayer of the petition was granted in the shape of a lottery—a very common mode of relieving distressed companies in those days. The following whimsical incident arose out of the purchase of a ticket in this lottery :—

An old bachelor had a female servant who bought a half ticket in the Charitable Corporation Lottery, No. 9,999. She said she chose this number because she had dreamt for three consecutive nights that this number had turned up a prize. This dream she told to her master, who made a minute of the number in his pocket-book. On the day the lottery was drawn the old gentleman saw an announcement that No. 9,999 had been drawn a prize of £20,000. He went immediately to Doctors' Commons and took out a marriage license for himself and Sarah Smith, his servant. He then hastened home, fearing lest any one should have announced to Sally her good fortune, and thereby frustrate his intentions towards her.

On reaching home, he found Sally was ignorant of the fate of her lottery ticket. He then addressed her in very familiar terms, stating

he thought her a very comely lassie, and ended by asking if she would like to become mistress of his house, in fact his wife. Sally blushed, and playing with the corner of her apron, asked if he was serious, whereupon he showed her the license. Notwithstanding the shortness of the courtship, it was arranged that they should be married the first thing in the morning. Accordingly on the following morning they were married, and after the ceremony was over, the old gentleman said, "Now, Sally, my dear, we will call at the lottery office about your ticket, which I have the pleasure to inform you has been drawn a prize of £20,000, so let us lose no time in obtaining the money." Sally immediately exclaimed, "Oh dear, what a pity!" "Why, what is the matter, Sally?" She replied, "Why, you must know that my sweetheart, who is a sailor, called on me a few weeks ago and told me he was going to the East Indies, and asked me to give him a keepsake, when I gave him the lottery ticket." It is easier to imagine than describe the chagrin and disappointment this information must have caused the old gentleman, who found he had, through his avaricious disposition, been saddled with a penniless wife, and that wife his former housemaid.

EXCHEQUER TALLIES.

TALLIES were of great and constant use in the exchequer coeval with the institution of the exchequer itself; these tallies were pieces of wood cut in a peculiar manner. For example, a stick or rod of hazel, well dried and seasoned, was cut square and uniform at each end and in the shaft. The sum of money which it bore was cut in notches in the wood by the cutter of the tallies, and likewise written on both sides of it by the writer of the tallies. These notches were cut at two opposite angles of the prism, which, being split, converted it into two prisms with triangular basis; these two notched cuts of woods were exactly equivalent to the modern engraved cheque and counterfeit; one was given to the parties paying money and the other retained at the exchequer. Clumsy as such instruments must appear to modern ideas they were undoubtedly an effectual protection against forgery or fraud. The circumstances attending the entire extinction of these primitive instruments is thus related in Lawson's History of Banking:—"In the month of October, 1834, the authorities of the exchequer gave directions that the tallies and foils (which were no longer required) should be destroyed. They were accordingly re-

moved from the exchequer to the cellars of the Houses of Parliament, and by a modern Guy Fawkes were placed in the flues to be consumed. The operation of burning the tallies, of which there were several cart loads, they having accumulated for centuries, began at six o'clock on the morning of Thursday, the 16th of October, 1834, and continued the whole of the day, until half-past six in the evening, when the flues having, as might have been expected, become overheated, a terrific fire burst forth, and in a few hours the entire building was a heap of ruins."

THE CLEARING BANKERS' COMMITTEE.

(From a Correspondent.)

It is a matter for national congratulation, that the banking business of the world centres itself in London, bringing in its train enrichment, not only to the citizens, merchants, and tradesmen of the metropolis, but diffusing wide-spread, throughout the country, handsome dividends amongst those who, by virtue of the Joint-Stock Act, are partners in this lucrative business. Few people know the immense extent of this, or have ever heard of the millions sterling, by which alone its daily operations are measured, or by what laws its internal economy is regulated, or who compose the council of so important a guild as our modern "goldsmiths," who, by their enterprise and probity, have so largely contributed to England's greatness among the nations. We think the constitution of this council calls for a few remarks, as it assumes to itself the functions of controlling the whole body of bankers in London, in their relation with each other, and in a minor degree with their customers also.

In its present state it is an anomaly amongst our English institutions, for it is neither elected by the members of its own profession, nor is it nominated by state or municipal authority, and the right to sit in the council appertains to the heads of a few private banking firms only, as an hereditary privilege.

Of course no one had any right to complain of the manner in which this council or committee was constituted, so long as it assumed only to govern the private bankers; and without agreeing with those who say that private bankers have had their day and will be unknown to the next generation, unless history records that they contained in their ranks a poet and a peer in the reign of our Sovereign Lady Queen Victoria, we cannot but see in the marvellous success of the joint-stock banks, a power or principle which they might as well hope to resist by restrictive measures, as to stop an express train by placing a cord across its route.

Those of our readers whose memories can carry them back to the introduction of joint-stock banking to the metropolis, may remember

with what determination the Committee of Clearing Bankers resisted the innovation by throwing every obstacle in the way of business that could harass and annoy the joint-stock banks, or be detrimental to the interests of their customers, and admitted them to share the facilities afforded by the bankers' clearing house, only when the joint-stock banks were so rapidly rising in importance as to command the privilege of exchanging drafts upon equal terms, which they had so long been denied. But though compelled to yield the use of their clearing house to their powerful rivals, they have withheld from them to the present day, the right to share their deliberations on measures which affect them equally with the private bankers who thus practically assume to themselves the sole right of determining matters not only affecting their own business but also the joint-stock banks who use their clearing house, for which accommodation a very ample rent is required by the committee.

The number of joint-stock banks who are doing a London business, and come under the title of "clearing bankers," is eleven; their paid-up capital amounts to upwards of twelve million pounds, and their united "liabilities" to nearly one hundred million pounds, and constitute, we think, a fair title to consideration on any question which in any degree affects this enormous wealth. The interests of the numerous customers whose it is, and a due regard to the wishes of the executive in whose hands it is deposited, demand that this wall of exclusiveness shall now be thrown down and the right fully conceded to every clearing banker to be represented in that council, which may then with dignity discuss any proposition brought under its notice.

The necessity for an immediate change in the constitution of this council, which is to control the banking interest of the future, with the prospect of an indefinite extension of the joint-stock system, and a probable decrease in the number of private bankers, is apparent, for inequality is daily increasing and must continue to do so. Nor are the joint-stock banks without specific grounds of complaint; for instance they have been recently called upon to obey an order in council, extending the time for receiving "returns" at the Clearing House, and thereby entailing upon managers and those whose duty it is to supervise this important item a longer attendance at the respective banks—and during the present month an extension of time in another department has been decreed by the committee, who order that all bankers shall "mark" cheques for payment next day to 5.15 instead of 5 o'clock, again causing part of the staff of the joint-stock banks to be detained for a longer period than usual hitherto.

We venture to say that had the joint-stock banks been individually represented, the above orders would not have been issued, but a remedy would have been sought in quite another direction for the pressure of business which they are designed to alleviate. An extension of time was most urgently needed to enable the bankers to pass through their books the enormous number of drafts sent by their customers for clearing, and in itself was just one of those subjects upon which the opinions of all the clearing bankers should have been taken. In-

stead of doing this, the orders we have referred to were issued by the Committee, and unless the increase in our mercantile transactions is to stop, these retrogressive steps must before long be repealed.

We will now venture to point out the remedy which our joint-stock banks would have advocated, and which we think is the only true course to be pursued unless indeed we are to drift back to the banking hours of 1847 ; but before we state the remedy, it will be well to glance for a minute at the case requiring its application. The banking houses are open until four o'clock, and their customers can and do send to their credit bills, cheques, notes, and coin, up to the latest minute, just as they did eighteen years ago when the banks were open until five o'clock.

The bills and cheques upon clearing bankers must be passed through two sets of books at least, and examined for endorsements, &c., before they can be despatched to the Clearing House, which also closes at four o'clock ; but a difference of five minutes exists between the clocks in favour of the Clearing House, and notwithstanding this device, and the concentration of all the available resources of the bankers, they can never succeed in the self-imposed task of clearing all the drafts, because no margin of time is allowed within which it may be effected, except the miserable five minutes alluded to, and consequently the number of drafts daily uncleared is so great that the bankers find it necessary to give their clerks increased time to present these uncleared drafts at the various banking houses to be "marked" for next day's clearing.

We think if a margin of thirty minutes were required of every customer who should pay in clearing cheques, it would at once be conceded by them, and we know it would allow ample time to the banker to clear the drafts on the heaviest settling day, and all the drafts being cleared none would be left for "marking ;" and further, it will be seen that due time being thus allowed, the drafts would be passed through the books more correctly and examined with greater care than is possible under the present system, and many serious mistakes would be avoided thereby.

We are able to speak confidently of the beneficial results of such a system as we indicate, because for many years it has been in actual operation at the Bank of England and also at the Union Bank of London, and we think we may safely infer that all the commercial classes are represented at these two banks, and therefore no inconvenience is suffered by them in consequence of this arrangement ; and from actual inquiry we can state that no single complaint has ever been lodged against the plan adopted at the Union Bank with such signal benefit to every member of their establishment.

We feel assured that we should be wronging our merchants and others if we doubted that a request for reasonable time in which to perform the important duties entrusted by them to their bankers would be otherwise than readily granted, even if it did involve in some cases a slight alteration in their own arrangements to meet the proposed change.

We revert for a moment to the immediate subject of our remarks and earnestly hope that the Committee of Clearing Bankers may, wisely considering the situation, avoid an assault on their citadel by a timely parley with their friends the joint-stock bankers, and by a graceful concession of just rights attach to themselves the good opinion of their countrymen and prove themselves to be in this generation, what their fathers were in the past, "wise men discerning the times."

"THE TIMES" AND THE CURRENCY QUESTION.

THE annexed communication (says *The Times*) furnishes another illustration of the ideas entertained in some commercial quarters regarding the Bank of England. The writer complains of the lock-up of a certain portion of the bank funds in railway and other debentures, and of "the miserably small reserve with which the directors are content to work," and recommends that the debentures in question should all be disposed of, and, further, that the note issue unprotected by bullion should be increased from its present amount of £14,600,000 to £20,000,000. The expediency of holding railway debentures may be open to discussion, but the writer, in describing the system as fraught with danger, and in assuming that an opposite course would place a more full amount of circulation at the command of commerce, overlooks three facts. These are, first, that if the bank were not to hold such debentures they would be held by other parties whose means, now employed in commerce, would thus be withdrawn to exactly the same extent, so that the discount market would be in just the same condition as before; next, that these debentures, when selected, as is doubtless the case, to fall due at different intervals and at moderately short dates, give the bank a power over the money-market almost as complete as if they were commercial bills; and finally, that if the bank were not to make such investments they must employ the amount in bills, and that this necessity, when money is extremely abundant, would render it essential for them to put down their rate not only to 3 or 2½ per cent., as is sometimes complained of, but to a still lower point. Apart, moreover, from all these considerations, there is the fact that the question is purely one of banking management, and that the Bank of England in that matter has just as much right as any other joint-stock or private bank to pursue its own course. With respect to the "miserably small reserve" with which the bank are content, the allegation is altogether unfounded. It is the object of the bank always to keep a sufficient reserve, and the very measures which speculators now find so distasteful have been adopted with that view. The sufficiency of a banking

reserve is to be tested by the state of public confidence, and if there are any of the private customers of the bank who feel apprehensive that the management in this respect is unsound they can withdraw their deposits to establishments they may deem more secure. The circumstance of the bank being compelled to publish its reserve is in itself an anomaly, that, like all anomalies, must occasionally be attended with inconvenience. The position of the Bank of England in its banking capacity is precisely the same as that of any other bank, and if one is to publish its accounts the whole should be compelled to do so. Finally, the suggestion that the issue of notes unprotected by gold should be increased from £14,600,000 to £20,000,000 simply amounts to a recommendation that the sum of £5,400,000 of gold should be driven out of the country, and although the temporary inflation of prices which would be the immediate symptom of the process would give great satisfaction to a large class of operators, the final result would be one of disappointment and dismay:—

"London, Oct. 20.

"SIR,—In looking over the last half-yearly report of the Bank of England in the *Bankers' Magazine*, I have been much struck with the following answer made by the governor to a proprietor;—'Though they had not held anything like the amount of debentures (railway, mentioned by the hon. gentleman (£8,000,000 to £9,000,000), they held a considerable amount, something like £4,000,000.' Now this confirms reports which I have often heard, but never before believed; and as I am told that they also hold other bonds, such as the city of London, for a large amount, I submit for the consideration of the directors that such a lock-up is most unsound banking. Had the Bank of England been a loan company or an insurance company, it would be legitimate enough to invest their funds in long-dated bonds, but for a bank, and that the bank of all the bankers in the kingdom, to lock up its funds in that manner, is a proceeding fraught with danger, and may lead to disastrous results.

"When we think of these 'lock-ups,' and the miserably small reserve on which the bank is content to work, we need not wonder that a little activity in the manufacturing districts is enough to cause the value of money to advance 3 per cent. in as many weeks.

"I admit that, upon the whole, the bank has been well managed of late years, but the government should be moved during next session of Parliament to permit an issue of notes upon £20,000,000 of government securities, in place of upon £14,600,000 as at present, and the directors should realise all these dead loans forthwith. The bank would then be in a position to keep a larger amount of reserve, and would be freed from the necessity of frightening the commerce of the country when it is in a most prosperous state.

"Your obedient servant,
D. L."

ROBBERY AT THE BANK OF LONDON.

THOMAS WOOD, 38, a gentlemanly-looking man, who formerly held the appointment of cashier at the Bank of London, and pleaded guilty at the September sessions to a charge of stealing about £3,000, the property of his employers, was placed at the bar at the Central Criminal Court on the 24th October, to receive judgment.

Mr. Sleigh, who with Mr. Poland, had been instructed to prosecute, said that the prisoner had been for ten years in the service of the bank as cashier, and it appeared that in consequence of something that transpired his till was removed suddenly, when it was discovered that there was a deficiency of about £1,900 in his accounts. This, of course, led to further inquiries, and it was ascertained that in addition to this sum of £1,900 the prisoner had obtained possession of a further sum of £1,600 belonging to a gentleman named Martin, who kept an account at the bank. It appeared that Mr. Martin kept two accounts, one a deposit account, and the other a banking account, and the prisoner executed a pretended authority from Mr. Martin to transfer £1,600 from the deposit account to the current account, and by this means obtained possession of that sum, and the nature of the transaction was such that it was not likely to be discovered unless some special attention was directed to the subject, as the amount of money in the prisoner's possession would appear to be correct. The prisoner did not seem to have given any explanation when the defalcation was discovered, and there appeared to be no doubt that he had been engaged in Stock Exchange operations, which had turned out unsuccessful, and he employed the money of the bank to cover the losses he had sustained. The prosecutors did not feel themselves, under these circumstances, justified in recommending the prisoner to the mercy of the court, but having stated the facts they would leave the matter entirely in the hands of his lordship.

Mr. Metcalfe, who was instructed for the defence, said he was afraid that it was too true that the prisoner had brought himself into his present position through a spirit of speculation and a desire to become unduly rich by that means. He could not deny that the prisoner had made use of the money that was entrusted to him by the bank; but without wishing in any way to dictate to bankers how they should conduct their business, he could not help remarking that it appeared to him that there was a want of caution in allowing a person in the position of the prisoner to have the entire control over a large sum of money for a very long period without any check over it whatever on their part. The effect of the proceeding was to place very great temptation in the way of the prisoner, and when he entered into these Stock Exchange operations there was no doubt that he entertained a sincere belief that he might use the money, and that he should be able to replace it before it was missed. The prisoner did not seem in any way to have falsified the books of the bank, and this, as it appeared to him, afforded additional grounds for believing that the prisoner really intended to replace the money; and he was also instructed that out of the money that had been abstracted by the prisoner £1,000 had been paid by the prisoner's sureties, and £1,100 had been obtained by the sale of securities and other property in his possession. All he could say in addition to the facts he had just mentioned was, that the prisoner threw himself entirely upon the mercy of the court.

The Recorder, in passing sentence, said, that every point of mitigation that was possible had been urged in favour of the prisoner, but it was impossible for him to regard the offence he had committed as any other

than a most serious one. It was not as though there had been only a single act of dishonesty; but the prisoner had not only taken the money out of the till, but he had obtained possession of a large sum that belonged to Mr. Martin, one of the customers, by a very ingenious proceeding. Upon the facts he felt that he had no alternative but to sentence the prisoner to five years' penal servitude.

Reports of Joint-Stock Banks.

ROYAL BANK OF IRELAND.

THE annual general meeting of the shareholders was held at the Bank House, Foster Place, on the 27th September; Joshua Watson, Esq., chairman of the board of directors, in the chair.

The following report was submitted to the meeting:—

"The directors, in submitting their twenty-ninth annual report, are impressed with the belief that it will afford satisfaction to the shareholders. The high rates of discount prevailing during the first half of the past year were not maintained during the second period, which, on the contrary, was marked by terms rather under than above those ordinarily existing. The results, nevertheless, of the bank's operations exhibit unmistakable evidence of a continued favourable action; and the shareholders, at the same time, will not fail to notice that the dividends this year had to be distributed over a considerably larger amount of capital than in preceding years. The reserve fund on this occasion has only been nominally increased; but, while from the large addition made last year it was not deemed necessary to add to it in any essential degree this year, the directors retain the opinion they have heretofore expressed, that an increase of this fund should not, under fitting circumstances, be lost sight of; as experience has convinced them that the command of a resource of this nature is an important element in the successful working of the bank, by enabling it to carry on its operations independently, as well as on account of the increased confidence in the bank's stability, which it is calculated to afford. In their last report the directors had to advert to the death of their then late chairman; and it is now with extreme regret that they have to record the resignation of his successor, Mr. Edward Atkinson, in consequence of ill health. This gentleman's time and abilities had been so long and so ably devoted to the service of the bank, that it was with unfeigned reluctance the board accepted his proffered resignation, which, with a full sense of the loss they sustained, they, nevertheless, were compelled to do. The vacancy created by Mr. Atkinson's retirement has been filled up by the election to the board of Mr. Robert Callwell, a gentleman so well known and so highly appreciated in the mercantile community of Dublin that the directors feel no doubt of their choice meeting the approval of the shareholders. The two directors who, under the provisions of the deed of settlement, should have retired from the board by rotation this year were Joseph Hone, jun., Esq., and Jonathan Pim, Esq., M.P. They were eligible for re-election, and would have been proposed for that purpose on this occasion. The sudden and lamented death of Mr. Hone, which took place on Monday last, precludes the election of more than one director at the present time; but the board will give their earliest attention to the filling up of the vacancy which thus arises."

The following resolutions then were proposed and unanimously adopted :—

Moved by the chairman ; seconded by Edward Fox, Esq., "That the report now read be received and adopted, and that the same be printed and circulated amongst the shareholders."

Moved by Alexander Findlater, Esq.; seconded by Robert Callwell, Esq., "That Jonathan Pim, Esq., M.P., be re-elected a director of the bank."

Moved by Alexander Parker, Esq.; seconded by Alexander Boyle, Esq., "That the proprietors of Royal Bank stock here assembled desire to unite with the directors in an expression of sincere sympathy and condolence with the widow and family of the late Mr. Hone, under the painful circumstances which attend a bereavement so sudden and unexpected as they have just sustained.

Moved by Henry Peile, Esq.; seconded by Robert Millner, Esq., "That the cordial thanks of the meeting be given to Joshua Watson, Esq., chairman, and to the other directors of the bank for their able and successful conduct of its affairs during the past year."

Moved by Edward Fox, Esq.; seconded by Robert O'Brien, Esq., "That the grateful thanks of the meeting be given to Mr. Copland, manager, for his uniform zeal in promoting so successfully the best interests of the bank."

Moved by John Quinlan, Esq.; seconded by Richard Wilson, Esq., "That the warm thanks of the meeting be given to Mr. North, sub-manager, and to the other officers of the bank, for their earnest and skilful attention to their duties, and for their uniform courtesy to the public."

BANK OF BRITISH COLUMBIA.

THE half-yearly general meeting of the proprietors of this company was held at the London Tavern, on the 3rd of October; Mr. T. W. L. Mackean in the chair.

The Manager (Mr. Ransom) having read the advertisement convening the meeting, the following report and accounts were taken as read :—

"The accounts for the half-year ended 30th of June last, show that after paying all charges, deducting rebate of interest on bills not due, and making ample provision for bad and doubtful debts, the undivided profits amount to £20,078. 13s. 8d., which the directors propose to appropriate as follows, viz., £9,375 in payment of a dividend at the rate of 10 per cent per annum; £7,000 to reserve fund, which will then amount to £20,000; leaving £3,703. 13s. 8d., to be carried forward to the current half-year."

Statement of Liabilities and Assets at the London Office and Branches on 30th June, 1865.

By balance ...	£20,078	13	8

The Chairman, in moving the adoption of the report, said that the directors felt great pleasure in meeting the proprietors under favourable circumstances, and in being enabled to present them with a balance-sheet which, he trusted, would meet with their approval. This was the sixth time they had met them in public meeting, and if they referred to their various reports and balance-sheets, they would find a steady progress of business with which there was every reason to be satisfied. The net profits had gone on steadily increasing, and the note circulation, which was a sure index of public confidence, had increased from \$35,959, at which it was in 1863, to \$204,325, according to the June returns of this year. The directors might have asked them to declare a larger dividend, but they considered their first duty was to extinguish debt in the shape of preliminary expenses, and to set aside for a reserve fund rather more at first than they would recommend in future. They would also observe that they had only increased their capital as the demands of their business required. Since they last met they had opened a branch at Portland, in the State of Oregon, and without venturing any opinion now, they felt that at a future meeting the proprietors would be satisfied with the results. (Hear, hear.) The extension to San Francisco and Portland necessitated fresh capital to meet their requirements, and for this purpose an extraordinary general meeting would be held on the 18th instant

to sanction this step in terms of their charter. In issuing new shares the directors, as promised, would offer them to the existing shareholders *pro rata* at a premium of £2 to be paid on allotment, and £5 on the 1st of January next. Future calls would be made at intervals of not less than three months, and only when the business of the bank required it. Hitherto the directors had been obliged, as prudent men, to set aside a large proportion of the profits for the creation of a reserve fund, but after the addition of £25,000 to that fund by the issue of new shares it would amount to £45,000, which would justify for the future the division of a much larger proportion of profits amongst the shareholders. (Cheers.) They had hitherto been exempt from bad debts, but he had cautioned the proprietors that they could not always expect immunity in this respect. The amount, however, which they now had to report was small, and had been provided for out of the profits of last half-year. They had much pleasure in bearing testimony to the continued zeal and prudence of their inspector (Mr. Walker) and the managers of the various branches under him, and they also felt it due to record their sense of the courtesy of the States governments in doing all they could by their representatives to promote the interests of the bank, and to facilitate their arrangements in establishing branches in United States territory. It must be a matter of congratulation to every right-minded man that the fearful crisis in the United States had terminated, and as her people possessed great intelligence and energy, and boundless resources, the directors felt assured that there would be such a revival of business in every part of the Union, that it would be felt by all, and by none more than by this bank. They were very unwilling to touch upon the present political position of the colonies of British Columbia and Vancouver Island, but the meeting was aware that his Grace the late Duke of Newcastle sanctioned unwillingly a separation of the colonies. The board felt perfectly convinced that in their union there would be strength—morally, physically, and commercially—besides a vast saving of expense in having only one staff of government officials to support instead of two. One colony possessed unbounded mineral wealth, with sufficient land for agricultural purposes to support a large population, while the other possessed not only a fine climate, and one of the finest harbours in the Pacific, but fields of coal with other mineral wealth capable of rendering it an important commercial centre. It might prove interesting to them to hear an account of British Columbia from the personal observations of the inspector of the bank, on his visit to the branches in that colony, and he would therefore read the following extract of a letter from that gentleman, dated 3rd July, 1865:—"I have now to report for the information of the court, that I have completed my tour of inspection to the various agencies of the Bank of British Columbia. My impressions of the colony are much more favourable than they were previous to my visit to Cariboo. The country is more settled up than I expected to find it, the mining interests appear more permanent, and the area of land along the road capable of cultivation is much greater than I had any idea of." "For the first ten miles," from Yale, "you follow the Frazer on its left bank, crossing Trutch's suspension bridge, and following the river on the other side, the road for the first thirty miles runs along the face of the mountain, and in many places is blasted out of the face of the solid rock, and built on crib work, looking down perpendicularly from 200 to 500 feet, right into the Frazer. The scenery is wild and mountainous in the extreme, and the road is a monument of great engineering skill and wonderful enterprise for so young a colony. The first evening brings you to Lytton, a small village which can never be more than a forwarding

point. Here you leave the Frazer, and follow up the right bank of the Thompson, keeping the same wild Alpine scenery till you cross Spences' bridge, at which point the Hudson's Bay Company's trail for Kamloops diverges. Leaving the bridge, a more open prairie country is found admirably adapted for grazing or agricultural purposes, and this lasts till you reach Clinton, which is the junction of the Douglas and Yale routes. This place at one time took a considerable start; there is a good deal of available land about it which gives capital crops, and it seems to me to be a very central point. Leaving Clifton you travel through the 'Green Timber' for about 50 miles, at an elevation of fully 4,000 feet above the sea, where continual night frosts stop all vegetation; descending from this, you come to Lake la Hache; and from there to Soda Creek, a distance of about 70 miles, there is a fine rolling prairie country, where with the help of irrigation, for which there is every facility, large crops of oats, barley, wheat and hay are raised. From Soda Creek a steamer takes you to Quesnel, from there you take the stage to Cottonwood, 36 miles from Williams' Creek, which distance is got over on horseback over a most execrable trail. The trip took me from the Monday morning till the Friday night, travelling all the time, sleeping one night on board the steamer. As far as I can see, this is a colony which can only be settled up by miners, but having once got a mining population, there is abundance of available land to supply a large number of people with all the necessities of life. Success in farming will permanently settle the colony, and create other means of employment and other sources of wealth. Hitherto the farmers have all been men of little or no means, but they are almost all content with what they have done, and I could give instances where the most extraordinary success has followed industry and hard work, where there has been a total absence of capital. Up to the present, the chief crop raised has been barley, for which large prices have been got. Now, however, government is about to offer a premium of £500 for the first flour mill built in the colony, so that I expect next year will see the colony entirely self-supporting, as far as flour goes. The actual mining of the colony is as yet confined to Cariboo, almost, I may say, to Williams' Creek. This is to be accounted for by the fact that provisions have hitherto been too high to allow of men going off on a prospecting tour. The enormous finds on the creek have so dazzled men, that they have hung about this great centre, working for wages, only to try again when enough has been saved. Besides this, a great many other creeks known to be rich are unworkable, owing to the absence of machinery, which it has hitherto been impossible to transport over the present trail. One Saturday I was on Williams' Creek, one claim washed up over 1,000 ozs. for one week's work, others were taking out from 300 to 70; and all this gold has been taken out by the most primitive means, not an article of machinery ever having been used. With my past experience as a guide, I am inclined to believe that on Williams' Creek alone there is work for many years to come, and I am at ease in my own mind as to the stability of our operations there. All along the banks of the Frazer there are evidences of mining operations—the whole country is more or less rich in gold. The government has received most satisfactory reports from the gold commissioner, who has gone to Kootenais and the Upper Columbia, and steps are being taken to survey the best line for a road to the Columbia River, which I believe will go by Shuswap Lake, where the Hudson's Bay Company are to run a steamer. While at Yale I saw a large lump of silver ore taken from a lead in the Shuswap district, which I am told is of considerable extent. Samples of this have been assayed both at San Fran-

cisco and New Westminster, and show an out-turn of from 1,100 dols. to 1,300 dols. to the ton. At present the discoverers of the lead are busy getting down several tons of the ore, which are to be sent to San Francisco, and there thoroughly tested. If this turns out as represented (and the specimen I saw warrants belief), I need not point out the revolution it will work in the prospects of the colony." It was right to mention that the American line of steamers from San Francisco to China was in active progress, and there was also a new English line advertised for New York and Panama, which eventually they hoped to see extended from thence to Vancouver Island and British Columbia; and that at no distant day England would have a line of her own from Victoria to China, in friendly rivalry with their brethren of the United States. Everything that facilitated communication between this country and her possessions, and reduced the cost of passage to the emigrant, must tend to develop those colonies where the bank first commenced business. In conclusion, he begged to move the adoption of the report and accounts, and would, before it was seconded, be happy to answer any questions that any proprietor might wish to put.

The Deputy-Chairman seconded the motion.

Mr. Wright thought the report and statement of accounts eminently satisfactory, and that the proprietors ought to feel themselves much indebted to the management for the prosperous state of the bank.

Mr. Morrell called attention to the increase in the expenses, and thought it would be convenient if the remuneration of the directors was set forth as a separate item. With respect to the expenses, they were set down in September, 1863, at £2,940; they had increased in September, 1864, to £5,186; and now they had crept up to over £10,000 for the half-year. He also expressed an opinion that the debenture of British Columbia held by the company, which was taken in the accounts at par, was put down at too high a rate, because if it was thrown into the market it would not realise so large a sum by 5 per cent. as the amount at which it stood in their asset account. He also wanted to know what amount they had in debentures?

The Chairman, in reply, stated that with regard to the increase of expenditure, it had resulted solely from increase of business. At the same time he pointed out that the honourable proprietor who put the question had omitted, in his comparison of 1863 with 1864, an item of upwards of £5,700, which in point of fact brought the expenditure of the former half-year up to nearly £9,000. With reference to their expenses, all he could say was that in September, 1864, they were able to show a net profit of 12 per cent., while they now showed 20 per cent. (Hear, hear.) In regard to the government debentures of British Columbia they were paying a good interest, and they were quite justified in putting them at par. They had no intention whatever of parting with them, as they considered them quite as good as Mauritius bonds or Victoria bonds at £104 or £105; and it was to be remembered that the debt of the colony did not equal the revenue.

After some discussion the report was adopted.

A dividend at the rate of 10 per cent. per annum as then declared.

In answer to a question from a shareholder,

The Chairman said the amount of new capital was to be £250,000, but it would be called up only as it should be required.

A cordial vote of thanks to the chairman and directors and manager concluded the proceedings.

An extraordinary general meeting of the shareholders of this company was held on the 18th October, at the London Tavern, Mr. M'Kean in the chair, for the purpose of authorising the increase of the capital of the bank by the issue of new shares.

The Chairman said it was so very lately that he from the chair mentioned the purposes for which they required additional capital that he had nothing further to remark. The fact was, extended capital was required for their immensely-increased business. It was proposed to issue 12,500 new shares of £20 each, on such terms, and on such conditions, and at such prices as the directors should think fit; being distributed *pro rata* at £2 premium, £2 on application, and £5 on the 4th of January; no other calls to be made, except at a limit of three months; but, of course, every facility would be afforded to avoid calling up capital, unless really required.

The motion having been seconded, the question was put.

Mr. Conybeare hoped that the public would not be allowed to take shares at a lower rate than they were offered to the shareholders.

The Chairman—Certainly they would not.

Question put and carried.

A vote of thanks to the chairman closed the proceedings.

LONDON AND BRAZILIAN BANK, LIMITED.

AN extraordinary general meeting of the shareholders of this bank was held at the London Tavern on the 10th October, for the purpose of taking into consideration, and approving a supplemental agreement relative to the amalgamation of the banking businesses carried on by this bank, and by the bank of Messrs. Mauà and Co. (and which agreement was confirmed by the shareholders on the 11th May last), and which supplemental agreement has reference to the liquidation by the amalgamated bank of the existing establishments. Mr. J. W. Cater occupied the chair.

The Secretary (Mr. Beaton) having read the notice convening the meeting, read a short report, which stated that at the special general meeting of the 11th of May last the details of the agreement for carrying into effect an amalgamation of this bank with those of Messrs. Mauà and Co. and Messrs. Mauà, M'Gregor, and Co., were submitted and agreed to, and that at a subsequent meeting that agreement was confirmed. The directors had accordingly taken the necessary steps to carry it out, having issued the new shares, except those which were retained for special purposes, and the company had been duly incorporated under the title of the London and Brazilian and Mauà Bank, Limited, for the purpose of carrying on business in London, Brazil, the River Plate, and the Argentine Confederation. The agreement for the amalgamation proceeded on the principle that the liquidation of the existing businesses should be made independent of the amalgamated bank, but it was found impossible to give effect to such an arrangement, and it became necessary to make some provision for the purpose of effecting that object by the amalgamated bank. A supplemental agreement had therefore been made, which provided for the liquidation of the businesses by this bank at the risk of each bank respectively. Messrs. Mauà had submitted a statement of the liabilities and assets of the several banks and branches, and that, with the balance sheet, had been gone over carefully by the directors, the result of which was that surplus assets to the extent of £1,500,000 in Brazil and the River Plate were shown. Those assets would be duly inspected and verified by the officers

of the bank abroad, and it was provided by the agreement that the shares in the new bank to which Messrs. Mauá and Co. would become entitled should not be delivered except for cash or on approved securities.

The Chairman, before calling on the secretary to read the supplemental agreement, explained that the process of liquidating the business of each bank by itself would not only involve great delay, but considerable additional expense, rendering three establishments necessary instead of one until everything was liquidated. The balance-sheet (up to the 30th June last) submitted to the directors by Messrs. Mauá, showed assets to the amount of a million and a half, so that their minds were made easy on the score of the liabilities the bank might incur in consequence of this arrangement. It was stipulated that the whole of the assets of the three banks should be handed over to the London and Brazilian for the purpose of liquidating the business, and that a balance should be struck at the end of two years, by which time it was anticipated the liquidation would be complete, when the balance due from one bank to another would be handed over. The object of the directors was that nothing detrimental to the business of the new bank should occur, which might be the case if these several processes of liquidation went on at the same time.

The Secretary then read the supplemental agreement, which was almost precisely in the terms of the chairman's explanation, the only addition being a clause to the effect that the shares to which Messrs. Mauá and Co. would become entitled might be disposed of by Baron Mauá at a sum not less than the aggregate of the sum due to the bank, and that the proceeds of the same should be placed to the liquidation account of the said firm with the amalgamated bank.

The Chairman having moved, and the deputy-chairman seconded, the adoption of the supplemental agreement,

A Shareholder inquired whether it was not stated at the former meeting that Baron Mauá would not dispose of the shares to which he would become entitled, but that they would be kept locked up.

The Chairman explained that so far as regarded the 50,000 shares which belonged to him, they would not be disposed of by the baron unless at a premium of £2. 10s. per share, nor would he permit his co-partners to sell their 100,000 shares, except at such a premium. It was certainly understood that the 50,000 would be locked-up.

Another shareholder expressed an apprehension that if so large a number of shares was thrown into the market, the concern would be swamped.

The Chairman said that if the baron did not dispose of them except at a premium of £2. 10s. it would be very satisfactory to the shareholders, because their own shares must be at the same premium.

The resolution was then put and carried unanimously, and a formal resolution authorising the directors to carry out the supplemental agreement with such modifications as they considered necessary was also agreed to.

The Chairman stated that there would be no alteration in the reserve fund pending the liquidation, and he also announced that there was no probability of any further calls being made, as the assets of the bank would be between £9,000,000 and £10,000,000, but should further capital be necessary, he was sure the shareholders would be glad to meet a call, because they might depend on its not being made unless the money could be profitably employed. He was also able to state that they would be in a position to declare the same dividend to the 30th of June last, as on previous occasions—(hear, hear)—and carry forward a small surplus; and he concluded by saying that Baron Mauá had behaved to the company in the

most frank and candid manner, and that his capital had not only been found intact, but that there was a large surplus beyond, which capital and surplus remained in security to the bank for any liabilities they might incur, which could not but be satisfactory to the shareholders. (Hear, hear.)

This being the whole of the business, the proceedings terminated, it being first announced that an extraordinary general meeting would have to be held to confirm the proceedings of the present.

LONDON AND MEDITERRANEAN BANK, LIMITED.

AN extraordinary general meeting of the shareholders of this company, was held at the Baltic Sale Room, Threadneedle Street, on the 16th October, to consider an agreement, bearing date the 7th day of September, 1865, and made between the London and Bombay Bank and General Financial Insurance Agency Corporation, Limited, of the one part, and the London and Mediterranean Bank, Limited, of the other part, for the sale and transfer of the business and property of the London and Mediterranean Bank, Limited, to the London and Bombay Bank and General Financial Insurance Agency Corporation, Limited, and for accepting payment for the same in shares of the last-named company, and for the amalgamation of the two companies upon the terms mentioned in the said agreement; and in the event of this agreement being approved by the meeting, to declare what is necessary or expedient to be done by the members of this company for the purpose of carrying such agreement and sale into effect.

Mr. W. J. Maxwell took the chair.

The Secretary read the notice convening the meeting, and also a circular in which it was stated that by the terms of the amalgamation, "the £20 shares in this bank will be exchanged for an equal number of £10 shares in the amalgamated bank, which will be credited with the amounts respectively paid up on the shares in this bank, less one-fifth of such amounts; this one-fifth being an estimated allowance for certain assets of this bank not transferred to the amalgamated bank, and which will be afterwards divided amongst the shareholders, *pro rata*, on the winding-up of this bank," and that "the London and Bombay Bank was formed for the purpose of carrying on business between London and India, and has a subscribed capital of £744,930 in 74,493 shares of £10 each, of which £2 per share have already been paid; and the directors of that bank, believing that its position would be materially improved by including in the field of its operations, branches at Alexandria and at Marseilles, in connection with the overland route, have entered into arrangements for an amalgamation with this bank, the terms of which will be submitted to the meeting."

The Chairman said the notice and circular which had been read, explained pretty fully the object of the meeting, and left him but little to say. The directors felt, as the directors of all new banks must feel, that they required strength, and they thought that by joining a concern like the London and Bombay Bank, with a paid-up capital of a million, and a wealthy body of shareholders, they should find it. By the amalgamation they had decreased the liability of the shareholders, and they considerably increased the strength of their share list. In addition to that they had got some gentlemen of high standing to join them in the direction. He moved:—"That the agreement bearing date the 7th day of September

1865, and made between the London and Bombay Bank and General Financial Insurance Agency Corporation, Limited, on the one part, and the London and Mediterranean Bank, Limited, on the other part, which has been produced and read to this meeting, be and the same is hereby approved and confirmed; and that the directors be and they are hereby authorised to carry the same into effect."

Mr. Cargill seconded the motion.

Mr. Everitt said he presumed before the amalgamation took place, the old bank be wound up.

The Chairman asked if Mr. Everitt alluded to the new shares in the London and Mediterranean, applied for the other day?

Mr. Everitt said he did.

The Chairman said they were going to return the deposits on them.

Mr. Newman inquired whether there were not some shareholders in the Continental Bank Corporation who refused to come in, and whether their money would be returned to them.

The Chairman replied that there were parties holding some 600 shares out of 10,000 who refused to come in. It was not intended to return those shareholders their money, it would be illegal and inconsistent to do so, and the loss they would sustain could not be ascertained until the assets were realised.

Mr. Newman said when he last met the board it was stated that their capital was intact, and that the Egyptian connection would enable them to realise great profits, and he was considerably surprised to receive the circular in which the shareholders were asked to acquiesce in a change in the constitution of the bank and join the Bombay company. Supposing the resolution were carried, what would be his position if he declined to go on with the company under its new designation, and its new auspices; and if he withdrew, what portion of his capital might he expect to get returned to him from the old concern?

Mr. King said as he understood the bank still retained the business of the Landells, which was a profitable one, he thought that under the circumstances there was every ground to hope that the company would be very prosperous.

The Solicitor said he would explain how this amalgamation took place. The Continental Bank was a bank with £100 shares, and at the meeting in February the shareholders unanimously determined that it was desirable to reduce the shares to £20 each, and to increase their capital by a million. In the state of the law that could only be effected by incorporating a new bank to take the business of the old one. They incorporated the London and Mediterranean, which was in fact nothing more than the old Continental Bank. At the same time they offered to the public to come in and take the million. The public did not respond, and then the London and Bombay offered to come in, the only difference being that their capital was paid up. In the present state of the law no such thing as an amalgamation could take place in form, and to effect it the business of one bank must be transferred to the other. By that agreement the business of the London and Mediterranean would be transferred to the London, Bombay and Mediterranean, and by that means the shareholders of this bank would carry out their original intention, and the business of the united bank would be carried on with a capital of two millions instead of one. If any shareholder refused to come in the directors could declare his shares forfeited, but they would be bound to pay him the market price of them fourteen days afterwards.

Mr. Newman—Can the chairman tell us what the market price is?

The Chairman—It is difficult to say, as the Stock Exchange has refused us a settlement.

The resolution was then put and carried *nem. dis.*

The Chairman then moved—"That this meeting declares that, for the purpose of carrying into effect the sale of the business and property of this company to the London and Bombay Bank and General Financial Insurance Agency Corporation, Limited, in accordance with the agreement of the 17th September, 1865, which had been approved and confirmed by this meeting, it is necessary that the members of this company should accept in exchange for each £20 share held by them respectively in this company, a £10 share in the London and Bombay Bank and General Financial Insurance Agency Corporation, Limited, credited with a sum equal to four-fifths of the amount paid up on each such £20 share."

Mr. Cumming seconded, and the motion was unanimously agreed to.

Mr. King moved—"That, in consequence of the refusal of the Stock Exchange to grant a settlement in the dealings of the shares of this bank, all persons to whom shares in the bank have been allotted, and who have paid the sum of £2. 10s. per share thereon, are entitled, if any should desire it, to have their allotments cancelled and their money returned without interest."

Mr. Routh seconded, and the motion was likewise unanimously agreed to.

A vote of thanks was then given to the chairman, who, in acknowledging it, said he intended to stick to the concern, and that he had every reason to believe it would be a very prosperous one.

The meeting then separated.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA.

AN extraordinary general meeting of the shareholders in this bank was held at the London Tavern on the 18th October, Mr. Mitchell, M.P., in the chair; for the purpose of declaring an interim dividend for the half-year ended the 30th June last.

The Secretary, Mr. J. C. Stewart, having read the advertisement convening the meeting,

The Chairman said that he had on this occasion to confine himself to submitting to the meeting a simple resolution. It had never been the custom of the directors to submit the accounts to the proprietors at a half-yearly meeting, and in not submitting them on the present occasion they made no exception to the general rule. But he must be candid with the meeting, and tell them that it would be very difficult at the present moment to submit a perfectly accurate statement of the accounts of the bank, because they had, in common with every other bank connected with the east, been involved in severe losses, and until the estates were wound up, or until all the produce was sold upon which they held the hypothecation, it would be absolutely impossible to furnish any statement of what had been the real losses of the bank in the east. On the last occasion when he addressed the proprietors—namely, in April of this year, they were in the middle of the crisis which had since passed over every part of the east. They were then in the midst of losses, a candid estimate of which was submitted to the proprietors at the time, made up to the 14th of March, and the directors then recommended a reserve of £22,000 out of their ways and means with a view to meet those losses. That recommendation was adopted. He regretted to say that since then the crisis in the east had become more severe. It had now happily passed away, but in

the meanwhile the severity of the crisis had been very great, and he did not believe that any bank connected with the east had escaped it. He was not there to invite invidious comparisons with other banks, but he believed that they had not fared worse than any of the other banks. At any rate, as far as the directors could calculate, the further losses incurred by the bank in the east had not been sufficiently severe to warrant them in advising that the dividend should be withheld. (Hear, hear.) By the terms of their charter they were forbidden to trench upon the paid-up capital, and in recommending the present dividend they had not knowingly, and he believed not at all, trenched upon the capital of £800,000; but, unquestionably, they had trenched severely upon the reserve fund of the bank, which it would be necessary hereafter to make up again. Their losses had originated entirely in the east. He could say that no bad debt had originated with the head office at home, and the main losses had been incurred at Bombay, Calcutta, and Shanghai. Against their agents at these places he certainly made no charge of dishonesty, but he did charge them with culpable neglect, remissness, and disobedience of the orders of the directors. (Hear, hear.) The persons who had hitherto acted in that capacity at Bombay and Calcutta had now ceased to be their agents, and there was a person already on his way out to succeed their present agent at Shanghai. As regarded the Bombay agent such had been his culpable remissness in one instance that the directors considered it not only possible but even probable that they might come upon his securities. That was a point, however, which had yet to be determined. Their losses at Bombay had been unquestionably very severe. As to the crisis at Bombay, as far as he could judge, no such crisis had occurred in the history of the world since the famous South Sea bubble. It was created partly by British speculators and partly by natives, and it culminated in all sorts of new schemes, which were driven up by stimulants to the most frantic point, and which had resulted in enormous losses. He believed that many of the new concerns so started had already been wound up or were on the point of being wound up. He could not give a better proof of the severity of the crisis at Bombay than by furnishing the quotations of the value of the shares of the Bank of Bombay, which was a state bank. On the 15th of January of this year the shares stood at £275 premium, and on the 23rd of June they were at 2 discount. That was a state bank. (Hear.)

A Shareholder—But what are they now.

Chairman, £65 premium was the last quotation. With regard to Shanghai, the losses of the bank there had been incurred, in some respects, fairly enough; but in the case of two houses that had since failed, he had no hesitation in saying that their agent had allowed the bank to become the victim of a complete juggle. (Hear, hear.) These two houses were well known, and he left them to their fate. Their agent accommodated them by drafts of theirs at fifteen days upon Hong-Kong, took their bills upon their Hong-Kong branches at sixty days, and the consequence was that the bank had been let in for a large sum. He had nothing to say except that their agent had been guilty of the most culpable rashness in giving way to these firms, and he could only conceive that their object must have been to make the bank the victim in order to enable them to pay a better dividend to their general creditors. (Hear, hear.) He believed that the crisis had now passed; trade was recovering itself, and it only remained for them to consider what was still the position of the bank in the east and at home. He believed that the confidence in their bank, both at home and in the east, was perfectly unshaken at the present moment. They were now a tolerably old-established institution, and he knew from their correspondence with

their present agents that, as far as exchange operations were concerned, they could pass their bills on the best of terms there, and if they wanted money at home, they could raise it on the best of terms. Their deposits had increased rather than fallen off; their credit remained the same, and he saw, therefore, no reason why they should not renew their business again on the same favourable terms as heretofore. (Hear, hear.) He should inform the proprietors that they were about to lose one of their directors, in the person of Mr. Bell, who was retiring in consequence of his unfortunate failure. Mr. Bell had been with them from the beginning, and a more honest and attentive director it would be impossible to find. He could say with confidence that the bank would lose no sum of any magnitude by his failure, and very likely would lose nothing at all. (Hear, hear.) The hon. gentleman concluded by moving—"That an interim dividend at the rate of 5 per cent. per annum, free of income-tax, be declared for the half-year ended the 30th of June last, to be payable on or after the 25th inst."

Mr. Jones seconded the resolution.

In reply to a shareholder,

The Chairman said he could not state to what extent the reserve fund would be trenched upon. He had already stated that it would be seriously trenched upon.

The resolution was then put, and carried unanimously.

On the motion of Mr. W. H. Mann a cordial vote of thanks was accorded to the chairman, who briefly acknowledged the compliment, and the meeting terminated.

BANK OF QUEENSLAND, LIMITED.

THE fourth ordinary general meeting of the proprietors of this bank was held on the 18th October, at the bank offices, Old Broad Street, City; Sir Joshua Rowe, C.B., in the chair.

The following report was read:—

"The directors have pleasure in reporting to the shareholders the result of the bank's operations for the half-year ended 30th June, 1865. In the accompanying accounts it will be noticed that the balance of undivided profit amounts to £12,381. 17s. 7d., or about 12 per cent. per annum on the paid-up capital. The directors propose to appropriate this balance of profit as follows:—£1,500 to be added to reserve fund; £688. 10s. 4d. to be written off preliminary expenses account; £2,861. 5s. 3d. to be carried to next half-year, being rebate on bills discounted current at 30th June, 1865; £6,261 in payment of a dividend of 15s. per share, equal to 6 per cent. per annum; £130. 8s. 9d. in payment of income-tax on the dividend; and the balance of £940. 13s. 3d. to be carried forward to profit loss new account. It is gratifying to the directors to be able to present this report, which must be satisfactory to the shareholders. The gross earnings, after paying interest on deposits, and providing for bad and doubtful debts, it will be noticed, are large, amounting to upwards of 17 per cent. per annum on the capital paid up. Deposits and circulation have increased 41 and 40 per cent. respectively, and the number of new accounts opened has been 220, an increase in the half-year of 60 per cent. A large and lucrative business has now been established by the bank, which, it is confidently anticipated, will yet be still largely increased, and there is, therefore, every encouragement to expect that the operations in future half-years will continue to show equally satisfactory results. The colony is still prospering; the pastoral interest will be much enhanced by the

facilities which the railways now under construction will afford in moving the wool and other station produce to market and to the sea-board. The gold-fields are being gradually developed, and the precious metal now forms an important item in the list of exports. The number of public works in progress, and the great demand for labour, together with a considerable and continual emigration, keep up an increasing trade and an active demand for money and banking accommodation. It is proposed that the dividend announced in this report shall be paid in the usual manner, on Monday, 23rd October instant."

Statement of Liabilities and Assets on 30th June, 1865.

LIABILITIES.	
<i>Dr.</i>	
Capital	£207,900 0 0
Circulation	19,881 0 0
Deposits	95,719 18 10
Bills payable and other liabilities	96,707 7 2
Reserve fund	1,500 0 0
Undivided profits on 30th June, 1865	12,381 17 7

ASSETS.	
<i>Cr.</i>	
Specie and cash at bankers	£19,802 16 5
Bills discounted, bills receivable, and other securities	406,202 1 8
Preliminary expenses, amount as per first statement, 31st December, 1863, £5,962. 19s. 11d. Written off to 17th May, 1865, £1,374. 9s. 7d.	4,588 10 4
Bank premises, furniture, &c.	3,496 15 2
	<u>£434,090 3 7</u>

Profit and Loss Account, 30th June, 1865.

Current charges, including salaries, rent, taxes, stationery, &c., at head office, £1,222. 15s. 2d., ditto at branches, including all preliminary expenses and first charges at new branch at Toowoomba, £3,945. 15s. 4d., making a total of	£5,168 10 6
Directors' and auditors' remuneration	640 0 0
Dividend (free of income-tax) on 8,348 shares at 15s. per share, £6,261; income-tax on dividend, £130. 8s. 9d.	6,391 8 9
Amount written off preliminary expenses	688 10 4
Amount added to reserve fund	1,500 0 0
Rebate on bills current 30th June, 1865	2,861 5 3
Balance carried to profit and loss new account	940 13 3
	<u>£18,190 8 1</u>
Balance from last account	£855 4 9
Gross profits to 30th June, 1865, after paying interest on deposits, and allowance for bad and doubtful debts	17,335 3 4
	<u>£18,190 8 1</u>

The Chairman, in moving the adoption of the report, an abstract of which has already been published, said that the directors had much satis-

faction in meeting the proprietors, and in laying before them a report which showed such satisfactory results. During the past six months the deposits and circulation had increased respectively 40 and 41 per cent., and the accounts 60 per cent. The gross profits had been £17,335, which, with £855 brought over from the preceding six months' accounts, amounted to £18,190. After paying all expenses, both here and in the colony, and adding £1,500 to the reserve fund, which was consequently raised to £3,000, they were able to recommend a dividend at the rate of 6 per cent. per annum, free of income-tax. He was anxious to say a word on the item of rebate on bills current, both because the sum was considerable with reference to the amount they had to dispose of, namely, £2,861, and because on previous occasions they had not been in the habit of rebating bills discounted. The amount having hitherto been insignificant, they had followed the practice of some banks which did not include this item in the accounts. After giving the matter a full consideration they had come to the conclusion that the proper course to adopt was to take off the amount mentioned in the accounts for rebate. (Hear, hear.) He might mention that although it was deducted now it did not actually come out of their profits, but was only delayed, and would come into their profits next half-year. He concluded by stating that since the last meeting a vacancy in the board had been filled up by the selection of Mr. H. Davidson, a gentleman of high character and standing in the city, but that the vacancy caused by the retirement of Mr. Mangles in consequence of delicate health, had not been filled, nor was it proposed to do so.

Mr. H. Brockett seconded the resolution.

Mr. Darvall complained that after he had taken a leading part in the formation of this bank and in promoting its interests, without having received a single shilling from it, he had been most cavalierly treated by the proprietors, who, when he went to the colony for a short time, expressed a wish that he should retire from the board on the ground that he was chairman of another bank. It was true that his position in the colony placed him as chairman in a wealthy bank, but so far from his connexion with that bank being injurious to this, it was exactly the reverse. Acting, however, on the wish of the shareholders, he had retired, but he took this opportunity of explaining to them that he was not at all in their debt, but that in point of fact he had conferred considerable obligations on the bank. He thought their business operations were somewhat limited in comparison with other banks; but at the same time their manager, Mr. Anderson, had shown himself highly qualified, not only to conduct what business they had in hand, but to extend it if he had larger means placed at his disposal. He (Mr. Darvall) thought there ought to be a local board of directors in the colony, who could test the securities and ascertain fully the character of the assets. If there was a board of three directors at Brisbane the number in London might be judiciously reduced as vacancies occurred, through the simple process of not filling them up. He thought also that the accounts would be improved by deducting the rebate from the profit, instead of adding it to liabilities, because the profit then shown would be actual, instead of a portion of it being a sort of estimate derived from discounting bills not due. He expressed himself in favour of increasing the capital, being confident that the bank had a great future before it if sufficient funds were placed at the disposal of the manager to enable him judiciously to extend the business.

Mr. Brockett, in reply to the remarks of his friend Mr. Darvall, admitted that the board were much indebted to that gentleman for his assistance when the bank was first established, and was confident that his services in

the colony would still be of very great benefit to it. When, however, some of the shareholders expressed an opinion that that gentleman ought not to continue on the board, it was the duty of the other directors to communicate that opinion to him. Mr. Darvall at once resigned his seat, and he assured that gentleman no one regretted the circumstance more than his colleagues did. With respect to the suggestion of a local board he did not approve of it, because his experience had taught him that local boards often tended to the injury rather than to the advantage of the institution, because they frequently availed themselves of their position to obtain advances either for themselves or their friends, and instead of being an assistance often did a great deal of damage. Independent of that objection, however, there was another in the present instance, and that was that none of the shares in the bank which were reserved for the purpose of allotment in the colony had been taken up, and, of course, it was impossible to form a local board unless the capital was increased, and a large number of shares were taken up in the colony.

The report and accounts were then unanimously adopted, and, on the motion of Mr. Darvall, a cordial vote of thanks was given to the chairman and directors for their able management of the bank, which concluded the proceedings.

ORIENTAL BANK CORPORATION.

A GENERAL meeting of the shareholders of this corporation was held on the 19th October at the offices of the corporation, Threadneedle Street; Mr. H. G. Gordon in the chair, for the purpose of declaring an interim dividend for the half-year ended the 30th June last.

The advertisement convening the meeting having been read,

The Chairman said he regretted that the dividend which he was about to declare was less than that declared for the corresponding period last year. The causes lay in a nutshell. They were well aware that the year 1864, and a great part of the year 1865, would ever be memorable in the annals of East India and China commerce and banking as one of the most disastrous that had occurred for many years. That period was to the directors one of intense anxiety, care, and trouble, and he sincerely trusted that he should never see the like again. In this country, about the period to which he had alluded, a tremendous fall took place in all kinds of imported produce, particularly from India and China; credit became very much contracted, losses were exceedingly severe, and eventually failures, unsurpassed for magnitude and extent, occurred. There was scarcely a mail which arrived from India that did not bring accounts of some disaster having occurred there. They were, in fact, between two fires. What were the directors to do? To endeavour to get out of the range of shot as soon as possible. They restricted their business, and in doing so they were most vigorously and efficiently supported by their representatives in the east. The result naturally was that their profits were very much curtailed, but they avoided losses which he had no doubt they would otherwise have incurred. Losses they had incurred, but far less than he at one time had anticipated, and they had determined, on what he thought was the wisest, the most honest, and best course—to meet those losses at once. (Hear, hear.) They had written them all off (hear, hear); they had made ample provision for any contingencies that might occur, while they carried forward a considerable sum for next year. He was aware

that it was no consolation to fellow-sufferers to know that others had been in the same predicament as themselves, and it was with no feeling of that kind that he should allude to one bank, but in order that the meeting might see how, with far greater advantages at their command, that bank suffered much more severely than they had done. He alluded to the Bank of Bombay—a state bank, in the centre of the very best information, and supported with an immense capital and with immense powers of various kinds. That bank at its meeting, which took place a few months ago, announced that its losses during the period to which he (the Chairman) was referring amounted to £300,000, and that, therefore, they could not declare any dividend. It was from no invidious feeling that he made that remark, nor from any desire to show that others might have been great sufferers; but it was to show that institutions carefully managed during the terrible crisis that prevailed could not escape the losses in which all banks connected with the east were more or less involved. Now for the reverse of the medal. Confidence had again been restored, credit was very sound, and there was every reason to anticipate a great increase to their business. Many offers had been made to them, showing the high position and credit which the Oriental Bank Corporation still maintained; and he trusted that when he had the pleasure of meeting them again at the annual meeting in April next, instead of having to make an apology for a rather shorter dividend than usual, he should have to address them in the language of congratulation. He concluded by moving, “That an interim dividend of £1. 5s. per share, free of income-tax, be declared for the half-year ended the 30th June last, to be payable on and after the 1st November next.”

The resolution, having been seconded, was put and carried, and the proceedings then terminated.

MAURITIUS LAND CREDIT AND AGENCY COMPANY, LIMITED.

THE second ordinary general meeting of this company was held on the 29th September, at the offices of the company, 25, Gracechurch Street; Major-General H. P. Burn in the chair. The following report was taken as read:—

“The directors have much pleasure in meeting the proprietors for the second time, and submitting to them the annexed statement of the assets and liabilities of the company to 30th June ultimo; and the profit and loss account, showing, with the small balance, £101. 5s., brought forward from 30th September, 1864, a net profit of £3,502. 16s. 11d. (or nearly 15 per cent.) for the nine months ending 30th June; a result which they deem most satisfactory. In order to comply with the company’s regulations, the directors have carried to the credit of reserve fund the sum of £500, leaving a balance of £3,002. 16s. 11d. to be dealt with by the proprietors—and which they recommend should be appropriated as follows:—1st. That a dividend of 10 per cent., or 4s. per share (free of income-tax), be declared, which will absorb a sum of £2,438. 11s. 6d. 2nd. That £471. 5s. 5d. be carried to the credit of preliminary expenses. 3rd. And that the balance of profit be carried forward. George Lyall, Esq., being the director retiring by rotation, and being eligible, offers himself for re-election; the board have much pleasure in recommending him to the proprietors. The remuneration of the company’s auditor in London for

the past year will be fixed at the meeting; and the directors recommend that a further amount be voted for the services of the company's auditors in Mauritius to 30th June ult. In conclusion, the directors beg to congratulate the proprietors on the success which has attended the company's operations during the past year."

The chairman, in moving the adoption of the report, reminded the shareholders that at their last meeting they were informed that the company had commenced business in the Mauritius with every prospect of success, and he congratulated the shareholders on the progress which had since been made. The accounts showed that nearly the whole of their capital was invested, and all the investments which had been made were of a satisfactory character, the loans being for terms reaching to twenty-one years, which was considered generally to be the best suited to the wants of the colonists. The great demand for loans best indicated how greatly such a company as this was required, securing great advantages, as it did, alike to the borrower and the lender. As yet he was happy to say they had not had to encounter bad debts (hear), but they had opened a reserve fund, which would be increased as circumstances might require. Another security they had was the sinking fund, which was an advantage to the borrower. It was a collateral security, which increased the security to the debenture holder, and placed him in the first rank of securities. In recommending the payment of a dividend, the directors had kept in view the policy of declaring such an amount as it was hoped would be continued in after years. They had met with the most cordial co-operation of the board at the Mauritius, and the directors were happy to acknowledge their efficient services during the past year. In conclusion, the hon. gentleman moved that the report be adopted, and that a dividend of 10 per cent., or 4s. per share (free of income-tax), be declared.

Mr. George Lyall seconded the motion, which was carried unanimously.

Mr. George Lyall was re-elected a director; £25 was voted to the auditor in London, and a like sum to those in the Mauritius.

A special vote of thanks was moved by Captain Gossett, and seconded by Sir S. Villiers Surtees, D.C.L., to the Mauritius board in very eulogistic terms.

After a brief conversation, in which questions on details of accounts were put and satisfactorily answered, the meeting separated.

OTTOMAN FINANCIAL ASSOCIATION, LIMITED.

THE second ordinary general meeting of the shareholders was held at the London Tavern on the 10th October—George P. Kitson, Esq., in the chair—for the purpose of receiving the report of the directors and for general business.

The advertisement convening the meeting, and the minutes of the adjourned meeting of the 28th February, having been read and confirmed,

The report was agreed to be taken as read. It was as follows:—

"The directors, in their first report to the shareholders, submitted the accounts of the association to the 31st of December, 1864, proposing that the financial year should terminate on the 30th of June in each year, and they therefore now furnish the proprietors with the balance-sheet as at the 30th of June, 1865, together with the profit and loss account for the six months to that date, both duly audited. Since the general meeting, held on the 28th of February last, the directors have added to the board

gentlemen of high commercial standing and influence ; and pursuant to intentions expressed, they appointed a general manager in London, but the result not being in accordance with the directors' expectations, the appointment has been terminated, and the matter of securing the services of another manager engages attention. Although the six months ending 30th June last cannot, for various reasons, amongst them the reduction in the price of cotton consequent on the cessation of hostilities in America and the loss of crops through the inundations in Turkey, be considered to have been favourable for the operations of the company, yet it will be seen from the profit and loss account that the gross profits for the half-year were £23,292. 19s. 8d.; which, with £6,833. 1s. 6d., balance of last account, enables the directors, after payment of all current expenses, to propose that £959. 8s. be written off preliminary expenses, £2,000 put to the reserve fund, and £18,079. 14s. (less a small amount for rebate) carried over to meet any losses which may result from the suspension of payment by their agents at Smyrna, Stephen Maltass and Anthony Pittaco, which the directors regret to announce occurred in May last. The directors duly dispatched a representative to Smyrna to take charge of the branch and to arrange all outstanding matters ; and from information received they have every reason for believing that the losses will be more than covered by the sum now carried over ; but until they are in a position to state definitively the exact amount of loss, they consider it prudent to recommend to the proprietors the carrying forward of the whole sum rather than declare a dividend on the present occasion. The directors have to state, in conclusion, that certain arrangements are in view, which, if completed, and the operations of the company be not entirely confined to the Turkish empire, must materially advance the interests of the shareholders, and they have still full confidence in the future prosperity of the association. Two directors, Frederick Harrison, Esq., and F. B. Henshaw, Esq., retire at this meeting, and, being eligible, offer themselves for re-election."

Balance-sheet, 30th June, 1865.

Dr.

Capital called up, viz. :—London, £15 per share on 10,000 shares, £150,000, less arrears, £19,370 ; Constantinople, £15 per share on 4,779 shares, £71,685, less arrears, £22,715 ; Smyrna, £15 per share on 2,045 shares, £30,675, less arrears, £14,943—

*Profit and Loss Account for the six months ending 30th June, 1865.**Dr.*

Current expenses, including salaries, directors' fees, stationery, advertisements, rent, and all other charges — London, £3,058. 14s. 11d.; branches, £6,028. 4s. 8d., making a total of	£9,086	19	2
To balance to be dealt with as follows:—written off preliminary expenses, £959. 8s.; added to reserve fund, £2,000; carried to new account, subject to an amount for rebate, not exceeding £300, and subject to provision for bad and doubtful debts (chiefly Smyrna), the amount of which is not at present determinable, £18,979. 14s., making a total of	21,039	2	0
	<u>£30,126</u>	<u>1</u>	<u>2</u>
<i>Cr.</i>			
Balance brought forward from last account...	£6,883	1	6
Gross profits for the half-year ...	23,292	19	8
	<u>£30,126</u>	<u>1</u>	<u>2</u>

The Chairman, in moving the adoption of the report and accounts, said the directors would have had much more pleasure if, in presenting this report, they could have felt it right to recommend the payment of a respectable dividend; but, though they showed a good amount of profits except in Smyrna, the board thought it their duty to recommend that which was suggested in the report—namely, to carry over the profits to the next half-year's account, by which time they would be enabled to ascertain the actual value of their assets at Smyrna, where unhappily, the business had been conducted in a manner contrary to the desire of the directors and to the expectations of the shareholders. But the time had arrived when he was called upon to give a contradiction as to the reported losses which had occurred at Smyrna through the failure of their agents there, Messrs. Stephen Maltass and Anthony Pittaco. In the month of April they appointed a general manager, and deputed him to go over to Smyrna, but his mission proved a failure, for, instead of making the arrangements that were given him, he unfortunately differed from everybody. Another gentleman was appointed subsequently who had acted in the best possible manner in the face of great difficulties, and the result was that an arrangement was proposed which had the approval of the board. Into the details of that arrangement it would not be wise at the present moment to enter, but the principal features of that agreement were that Maltass and Pittaco, the two agents in Smyrna, whose suspension had occurred, had made over all their property, and had guaranteed a certain amount of assets due to this company. To that statement he did not mean to commit himself on the present occasion, but he trusted that the recommendation contained in the report would be approved, and that the profits would be carried on to the next half-year. But he could not help saying that the want of unanimity of feeling and harmony which had prevailed at the last meeting had had a most damaging effect; it had for a time seriously affected their credit, and had left the board in a most unenviable position. They had had great difficulties to contend against; but, in spite of hostile rumours, no man could say this association had ever failed to meet its engagements. (Applause.) He alluded to the prospect of the co-operation of parties of the highest standing, and, in conclusion, moved that the report and statement of accounts be adopted.

The Hon. Richard Thos. Rowley having seconded the motion,

A Shareholder inquired whether any information of a more specific character would be given as to these negotiations?

The Chairman said he could not do so without mentioning the names of the persons with whom they were in course of negotiation. As regarded the foundation of the arrangement, it would simply amount to a favourable opportunity of amalgamating with persons whose character and fame were known all over Europe (hear, hear), and they might be incorporated, he hoped, with this firm. The general view of such proposed arrangement would be that the holders of shares of £20 each, with £10 paid-up, would have a liability of £10. At present the shares were £50, having £15 paid-up on each share, with a liability of £35 hanging over each share. The proposition was to pay up £5, making £20 per share in the present company, and then, when the amalgamation took place, they would receive in exchange for each of those shares on which they had paid up £20 per share, two shares of the amalgamated company of £10 each.

The motion was carried unanimously.

On the question of the remuneration to be given to the auditors,

Mr. Thompson proposed that, looking to the increased labours of their auditors, their remuneration should be increased to £50; and the motion was seconded, amidst an expression of dissent.

Mr. Cooper (of the firm of Johnstone, Cooper, Wintle, and Evans), as one of the auditors, begged to remind the shareholders of the necessity of always having a good and searching audit of their accounts, and gentlemen who devoted their time to the matter had a just right to be properly paid. But he was in the hands of the shareholders.

The Chairman begged to bear testimony to the great labour which their auditors had bestowed on their accounts.

The motion was put that the remuneration be £50, which was negatived.

Mr. Green and others suggested that the remuneration should be regulated by the payment or non-payment of a dividend.

It was then moved and seconded that the remuneration be £25; and the motion was carried.

Mr. Galsworthy, one of the auditors, said that the vote having been passed he could assure the meeting that whether the grant was £25 or £50, it was a matter of small moment to him; but he could not admit the principle of making the payment of the auditors depend upon the dividend. These accounts had cost them more than three times the trouble they had had on the former occasion. Surely auditors ought to be fairly remunerated.

Mr. Peter Crellin moved a vote of thanks to the chairman, which was carried with acclamation: and the chairman having responded thereto the meeting separated.

ORIENTAL FINANCIAL CORPORATION, LIMITED.

AN extraordinary general meeting of shareholders in this corporation was held on the 12th October, at the London Tavern, Bishopsgate-street; Mr. Brown occupied the chair.

The notice convening the meeting having been read,

The Chairman explained, that with the notice of the meeting two other circulars were sent to each shareholder, one was a notice for a meeting of shareholders in the London and Mediterranean Bank, and the other a report and balance-sheet of the London and Bombay Bank. After the

London and Mediterranean Bank had agreed to amalgamate with them they applied for a settlement, which was refused. They had taken for granted that the whole of the 50,000 shares would come in, instead of which only 43,000 or 44,000 came in. Upon those grounds the settlement was refused to the Mediterranean, and they had agreed to amalgamate with the London and Bombay Bank, the capital of which was intact. The advantage of an amalgamation would be that the liabilities of the shareholders would be reduced from £40 per share to £16 per share. He then moved as follows:—"That the directors be at liberty to carry into effect the amalgamation referred to in the resolution passed at the last general meeting without requiring the fulfilment of the condition of the London and Mediterranean Bank, Limited, obtaining a settlement upon the London Stock Exchange." It was necessary to pass that resolution to enable them to amalgamate with the London and Mediterranean, and to enable the Mediterranean to amalgamate with the London and Bombay Bank.

Mr. Lysley briefly seconded the resolution, which was, after a slight discussion, carried with only one dissentient.

A second resolution authorising the voluntary winding-up of the company having been adopted, a vote of thanks to the chairman and directors, moved by Mr. Stuart, and seconded by Major Ross, brought the proceedings to a close.

LONDON MERCANTILE DISCOUNT COMPANY, LIMITED.

AN extraordinary general meeting of the shareholders of this company was held at the London Tavern on the 18th October, for the purpose of receiving the report of the committee of shareholders appointed at the last meeting, to confirm the resolution passed at the extraordinary general meeting of the company held on the 19th of September, to wind up the company voluntarily, or to pass such other resolutions as the shareholders might deem advisable. Mr. John Geary, the chairman of the directors, presided.

The chairman moved "That the resolution for winding up the company voluntarily, passed on the 19th September, be and is hereby confirmed."

Mr. Thomas Flight remarked that they had been convened to receive a report, and he submitted that that report should be read before any further business was done.

Mr. Edwin H. Galsworthy then read the report of the committee of investigation, as follows:—

"The London Mercantile Discount Company, Limited, was promoted by Mr. Archibald Kintrea; the memorandum of association is dated the 7th January, 1864; the nominal capital, £500,000, divided into 10,000 shares of £50 each, first issue, 5,000 shares; and, according to the prospectus, was formed to 'carry on and extend' the business of an 'important discount establishment'—'satisfactory arrangements' having been made 'for acquiring the business.' By an agreement dated 2nd January, 1864, between Mr. Kintrea and Mr. Whiffin, secretary to and on behalf of the British Reversionary and Investment Company, Mr. Kintrea proposed to bring out a discount company with a nominal capital of £500,000, in 10,000 shares of £50 each, first issue, 5,000 shares, he (Mr. Kintrea) agreeing to purchase the business and assets of the British Reversionary and Investment Company, which business was not, as has been supposed, confined within the ordinary limits of reversionary companies, but included the discounting of bills of exchange and promissory notes, and

which company was the important discount establishment mentioned in the prospectus of the London Mercantile Discount Company as having been acquired under 'satisfactory arrangements.' Subject to the intended discount company being established with a capital of not less than two-thirds of the issue of 5,000 shares, Mr. Kintrea covenanted to use his best exertions to successfully establish the proposed discount company, and to pay the whole of the expenses relating to the establishment of the company 'prior to the date of the allotment of shares;' the directors not to proceed to an allotment unless two-thirds of the first issue of 5,000 shares were subscribed for and taken up. On the other hand, Mr. Whiffin, on behalf as aforesaid, covenanted with Mr. Kintrea to exchange the shares of the British Reversionary and Investment Company, amounting to 1,580 in all, for the like number of shares in the proposed discount company; and in case the proposed discount company should purchase the goodwill of the business of the British Reversionary and Investment Company at the sum of £9,000 and take to their assets and liabilities, then the British Reversionary and Investment Company would, out of the £9,000, pay to Mr. Kintrea £5,000 in consideration of his 'services, risk, and expenditure,' and would give the proposed discount company a sufficient amount of good debts, cash, &c., to balance the liabilities of the British Reversionary and Investment Company. At a meeting of the subscribers of the London Mercantile Discount Company, consisting of Messrs. James Barrett, Henry A. Hutton, Richard Ladell, Frederick Slack, Richard Buller, John Parry, and Andrew Forsyth (each of whom subscribed for five shares, which, as soon as the company was formed, were transferred to Mr. Kintrea), held on the 8th January, 1864, at Mr. Kintrea's offices, the agreement referred to, dated the 2nd January, 1864, was read, agreed to, and adopted; and it was resolved that the common seal of the London Mercantile Discount Company be affixed to a second agreement, one between the London Mercantile Discount Company and Archibald Kintrea, which was also 'read, considered, and adopted,' for carrying into effect the before-mentioned purchase of the British Reversionary and Investment Company; at this meeting Messrs. J. W. C. Aylett, G. Anderson, George Bermingham, Henry Chateris, F. H. Gilbert, John Geary, and Edmund Clench, directors of the British Reversionary and Investment Company, and John Denton, E. T. Gourly, and James Rymer, were appointed directors of the Discount Company. This second agreement, dated the day of the subscribers' meeting, namely, 8th January, 1864, in reciting that part of the first agreement, dated 2nd January, 1864, which states that Mr. Kintrea had agreed to pay the expenses of the establishment of the proposed discount company 'prior to the date of the allotment of shares,' contains the important words, not to be found in the first agreement, namely, 'provided no allotment of shares be made.' In other respects the second agreement coincides with the first, covenanting that the directors of the London Mercantile Discount Company shall not proceed to an allotment unless two-thirds of the first issue of 5,000 shares be subscribed and taken up; to give London Mercantile Discount Company's shares for British Reversionary and Investment shares; to give £9,000 for the goodwill of the British Reversionary and Investment Company's business; and to take the debts and liabilities upon the same terms as those mentioned in the first agreement. The first agreement divides the £9,000 into £4,000 for goodwill, and £5,000 for Mr. Kintrea, for which he was absolutely to pay 'all expenses prior to the allotment of shares' in the new company; but the second agreement puts the £9,000 as for the goodwill only, and differs further and most materially from the first (although both agreements are by the minutes said to have been considered, agreed to, and

adopted), inasmuch as Mr. Kintrea by it was to pay the said expenses, not absolutely, but provided 'no allotment of shares be made.' The prospectus of the London Mercantile Discount Company having been some time before the public, and about 3,000 shares only (*viz.*, about 1,420 by the public, and 1,580 by the British Reversionary and Investment Company's shareholders) having been applied for, and not two-thirds, as required by the agreements, Mr. Hardwick, of the firm of Messrs. Sole, Turners and Hardwick (introduced, as your committee believe, by Mr. Kintrea), at a meeting of the directors of the London Mercantile Discount Company, held on the 18th January, 1864, 'attended and submitted to the board a proposal for their acquiring by purchase the business of a certain discount firm; but before giving the name of the firm in question, he wished them to understand that the matter came to him through the introduction of Mr. A. Jay, who stipulated that he should receive a fee of £2,000, provided the directors came to terms with the parties, and concluded the purchase. Mr. A. Jay was then introduced, and requested before proceeding further, that a resolution should be passed, agreeing to pay him the above sum; whereupon it was agreed to by the board. Mr. Hardwick then, at the request of Mr. Jay, 'informed the board that the firm was Messrs. Womersley and Burt's, and gave the terms and conditions upon which they were willing to transfer their business, and identify themselves with the company.' After discussion, it was resolved—'That a committee, *viz.*, Messrs. Bermingham, Geary and Gilbert, be appointed to conclude the negotiations for the purchase of the business submitted by Mr. Jay.' Negotiations were thus commenced for the purchase of Messrs. Womersley and Burt's business; and at a meeting of the committee, held 25th January, 1864, at which your solicitor, Mr. Lewis, was present, the books of Messrs. Womersley and Burt were, as your committee are given to understand, requested as evidence of the stated profits of the business; and the request having been refused, for reasons then given, the negotiations were for the moment suspended; but at a meeting on the following day, to which Mr. Lewis was not summoned, the point seems to have been waived. The committee concluded an arrangement, which was confirmed by the board, for the purchase of Messrs. Womersley and Burt's business for the sums of £13,000 in cash, and £13,000 in shares, varying according to profits; the minimum being £10,000 cash, and £10,000 in shares. Under a deed embodying this arrangement, Messrs. Womersley and Burt were appointed directors of the company for a period of three years from 1st March, 1864, one to attend daily, as a member of the daily committee, at a salary of £750 a year each: Messrs. Womersley and Burt being bound, under a stringent covenant, not to enter into discount business on their own account for a period of fifteen years from 1st March, 1864. Concerning the power of the board to make the preceding salaried arrangement, and as to the liability of Messrs. Womersley and Burt to refund the salaries paid, questions may arise hereafter. On the conclusion of the arrangement with Messrs. Womersley and Burt, further applications for shares were soon received; and in the allotment of the shares 1,380 instead of 1,580 were allotted to the British Reversionary and Investment Company's shareholders, and the balance of the 5,000 to the public. The short allotment or difference between 1,380 shares which were, and 1,580 shares which were to have been allotted to the British Reversionary and Investment Company's shareholders, *viz.*, 200, fell upon Mr. Edmund Clench, who instead of getting 300 shares in the new company in lieu of 300 in the old, got 100 only in the new company, and was compensated for the non-allotment of 200 shares of £5 each by the payment of £1,000 in cash. In due course the agreed sum of £5,000 was paid to Mr. Kintrea, and £4,000, the

balance of the £9,000 for good-will of the British Reversionary and Investment Company's business was put to the credit of the British Reversionary Investment Company's assets. Shortly afterwards accounts were sent in to the company for certain 'expenses prior to allotment,' which the secretary, on 12th February, 1864, forwarded to Mr. Kintrea, as having been sent to the company instead of to him. Mr. Kintrea wrote, on the 20th February, 1864, 'perfectly astonished' at being asked to pay the debts of a company from which he had 'never received a shilling.' The directors were advised by the solicitor that, under the agreement of the 2nd January, 1864, Mr. Kintrea was clearly liable, but a committee, consisting of Messrs. Geary, Gilbert and Birmingham, was appointed to meet and confer with Mr. Kintrea on the subject; and, notwithstanding your solicitor's advice, the committee reported, on the 1st of March, 1864, that the company was liable, and became so under the ninety-fourth clause of the articles of association—the committee considering the whole case rested on the articles of association and the agreement of the 8th January, 1864 (in which, as has already been explained, were inserted words not to be found in the first agreement), ignoring, apparently, altogether the first agreement, that dated the 2nd January, 1864 (under which the solicitor had advised that Mr. Kintrea was liable); and the company consequently paid the expenses, amounting in all to upwards of £700. Whether Mr. Kintrea is liable for the return of, or whether the directors are not personally liable for the amount thus paid, are questions for your legal advisers. The resources and business of the British Reversionary and Investment Company appear to have been small, and looking at the £5,000 as having been paid to Mr. Kintrea as promotion money, your committee will not discuss whether the good-will of the business was worth the remaining £4,000, seeing that that sum was mainly a matter of account—the British Reversionary Company's shareholders not having divided any cash. With reference to Messrs. Womersley and Burt's business, those gentlemen have stated to your committee that they did not seek to sell their business, but were sought by Mr. Hardwick; and in regard to Mr. Hardwick's statement 'that the matter came to him through the introduction of Mr. Jay,' Messrs. Womersley and Burt state they did not know Mr. Jay, nor had they at the time of the negotiations any knowledge of an introduction fee. Your committee, at an interview with Messrs. Geary and Gilbert, were told by those gentlemen, in reply to a question upon what evidence of the value of Messrs. Womersley and Burt's business the directors agree to pay the sums mentioned in the deed, that they had made inquiries at the time, and found Messrs. Womersley and Burt to be highly respectable, and had been told that it was not usual in such cases to have the books produced. Mr. Geary did not remember sufficient of what took place at the time of the negotiations to be able to afford your committee any positive information; but two of the committee who negotiated with Messrs. Womersley and Burt, viz., Messrs. Birmingham and Gilbert, have stated that the business was represented to them by Messrs. Womersley and Burt as yielding large profits, certainly upwards of £5,000 a year; also that Messrs. Womersley and Burt stated the business was capable of great extension, and that there would be for the future working of the company deposits to a considerable extent. Messrs. Womersley and Burt entirely deny having made any such statements; but say that, on the contrary, they stated at the time they would not pledge themselves to any figures. Under these circumstances, and finding that Messrs. Womersley and Burt's books were not in possession of the company, your committee ask those gentlemen to produce them (the committee being of opinion, as they informed Messrs. Womersley and Burt that their books became the property of the

company on the purchase of the business), but Messrs. Womersley and Burt declined doing so. Messrs. Womersley and Burt have attributed the failure of the business to the want of capital, and have stated that they were not aware at the time of the transfer of their business of the heavy sums the London Mercantile Discount Company was under engagement to pay to Mr. Kintrea and others, and that they were under the belief that further shares would have been issued and more capital called up. The heavy preliminary payments and the small capital to work upon appear to your committee to have been the main cause of failure, the bad debts not appearing to be disproportionate to the amount of the bills discounted. Whether, however, Messrs. Womersley and Burt's business was worth what the directors agreed to pay for it, is a question the shareholders generally can as well judge as your committee; but to enter into a deed, covenanting in any case to pay those gentlemen a heavy sum for a business concerning the value of which no positive evidence was stipulated for or produced, was a course which your committee cannot too strongly condemn. Your committee find that, under the head of salaries, in the company's accounts, is included sums taken by the directors for committee fees at the rate of £300 a year, which they consider to be contrary to clause 77 of the articles of association, which states that the directors shall be remunerated for their services as may from time to time be fixed by the shareholders; and the liability, therefore, of the directors to refund will be a further question for your legal advisers. Your committee, in the course of the various meetings they have held, examined carefully the last printed statement of account or estimated balance-sheet, issued on the eve of the general meeting held on the 19th September; and although they do not agree in the balance there shown of assets over liabilities, yet they trust that with careful management matters may be so arranged as at least not to entail any further loss upon the shareholders. With every desire to save as much as possible of the proprietors' property, your committee suggested to Messrs. Womersley and Burt, that, looking to the present position of the company, as estimated in the printed statement referred to, and bearing in mind the large cash sums they received and have retained for the goodwill of their business, viz., £10,000, they should propose to take the company's offices, goodwill of the business, assets and liabilities into their own hands, upon an undertaking to pay back so much per share to the proprietors; but those gentlemen declined to entertain the suggestion, nor have they made any counter proposal. On the 10th instant your committee were requested by resolution of the board to state when a copy of their report would be furnished to the directors, to which a reply was sent that the report of the committee would be ready for submission to the meeting of shareholders on the 18th instant, in accordance with the resolution passed at the meeting on the 19th of September. In submitting the preceding outline of facts to the shareholders, your committee recommend that, subject to the approval of liquidators, whose nomination the committee prefer to leave entirely to the shareholders, and who shall be empowered to seek the assistance of the court if necessary, the voluntary winding-up of the company be confirmed and proceeded with; for looking at the past management and results, they consider that course far preferable to making further calls upon the shareholders for the purpose of carrying on the company at, in all probability, still further loss.

"GEORGE A. ADDISON.

"JOHN BOYD.

"EDWIN H. GALSORTHY.

"GEORGE WHIFFIN.

"17th October, 1865."

The chairman inquired if any one had any observations to make?

For some time there was no response. At length—

Mr. J. Flight said as no one else rose he would make a few observations. It appeared to him that the interests of the company had not been looked as well after in this concern as had the interests of the directors. He observed that a charge was made of £300 for fees to the directors. Now he distinctly recollected that at a former meeting it was stated that no salary would be paid to the directors except with the approval of the general body of shareholders, and the shareholders had never sanctioned any such payment. He should like to know whether any further outgoings in the shape of salaries were going on, and if so to what amount. He also wanted an explanation as to how the property of the shareholders had been sacrificed. What they had got was the suspended business of Messrs. Womersley and Burt. Unless some satisfactory explanation on these points was afforded him he should seek it through the medium of the Court of Chancery.

Mr. Alger said that he should like to know how it was that the directors permitted Mr. Edward Clench to forego the allotment of 200 shares, and give him £1,000 in lieu thereof. He should be quite ready to join Mr. Flight and others in having these matters investigated by the Court of Chancery. He should also like to know who were the original subscribers to this company who signed the articles of association. He believed that they were clerks in the office of the promoter, and persons of that class, who each took five shares, and made up the magic seven who could, by law, form a company for any purpose whatsoever, and when it was formed these five persons passed any resolution which their lord and master put before them. On that they purchased the British Reversionary and Investment Company, which was not formed as a discount company but was one under a guise. He could not understand how the directors of this company could have entered into such a transaction as this. The report of the committee was a very long document; it had only just been placed before them, and he thought the best course would be to adjourn the meeting in order to give them time to consider it.

Mr. Morris (solicitor) said the committee had properly abstained from forming any judgment on the facts which they had rather undercoloured than overcoloured. With regard to the parties who signed the articles of association, he believed it was a common practice to get the formal document signed by almost any person they could get hold of. But he thought that the articles of association of this company had an importance which they did not possess *per se*. There was a point to be considered, which was whether the whole thing was not rotten and unsound from the beginning. (Hear, hear.) What did they find? Why, that certain parties interested in another company, called the British Reversionary and Investment Company, conceived a plan of getting out of that company, not by selling it to *bona fide* parties who would purchase it, but by getting up another company; and what they did in effect was to continue the British Reversionary Company with a new name. It seemed to him to be useless to go into such matters of detail as whether the directors had received £300 and Mr. Clench £1,000; but if the promoters of this company had palmed off something on the shareholders which was not what was represented; if they had done that which in the language of the Court of Chancery was called a fraud, they must indemnify the shareholders of this company. He suggested that counsel's opinion should be taken on this point.

Mr. Lewis said if they wanted to aggravate the present position of affairs,

and have still further losses to lament over, they would adopt Mr. Morris's suggestion. In order to show that he (Mr. Lewis) was a thoroughly unprejudiced person, he might inform them that he had nothing to do with the formation of the company, directly or indirectly. He did not know of its existence until it was formed, and he never was advertised as its solicitor. But after the company was formed, it was a question whether the business of Messrs. Womersley and Burt should be purchased, and he was called in. He had no connection with the British Reversionary and Investment Company, and therefore he entered into the matter as a stranger. So far as regarded the suggestion of Mr. Morris, he did not hesitate to say that it would be an utter delusion on the part of the shareholders to cause any delay in the winding up, still less to incur any expense. The original prospectus of the company stated that it was formed for the purpose of taking up another business, and he believed that at that time the writer of the money article in one of the journals made the significant remark that the promoters did not condescend to state what the business was. But by the articles of association, which unfortunately by the law of the country were held to be a distinct notice, the name of the company was distinctly referred to, and by clause 7 it was stated that the directors should carry into effect any contract which had been made on behalf of the company with the British Reversionary and Investment Company. The committee had not been able to show that any one person connected with the British Reversionary and Investment Company had received any benefit from this contract, and at the time that company was entirely out of debt, except the ordinary current liabilities. And it was not the case, he believed, that Mr. Kintrea was himself a shareholder of that company. With regard to Mr. Clench, it appeared that instead of having to take £500, he was lucky enough to get more.

Mr. Morris remarked that Mr. Clench was Mr. Kintrea's partner.

Mr. Lewis said it might be so, but that did not lessen the effect of that which he was stating; for, with the exception of Mr. Clench getting £1,000, not one of the directors of the British Reversionary Company obtained any cash or any advantage by the transfer. The case stood thus, that this company was formed to take over the business of the British Reversionary Company. Whether that was a good bargain or not was another question, but there did not appear to be the slightest fraud in the history of the case, and he thought the shareholders would do themselves a serious injury by taking the matter into the Court of Chancery.

Mr. Morris said what he had advised was, not that they should commence a suit, but that they should take the opinion of counsel.

The Chairman said he was placed in a very painful position. The report which had been read to them went deeply into the details of the company. The directors applied to have a copy furnished them in time for them to consider it before the meeting, but that was refused, and they were, therefore, quite unprepared to say a single word upon it, except this, that they had not done one single act which would not bear the light of day. They were the largest shareholders in the company, and had lost their own money. With regard to the question of adjournment, the directors wished to wind-up as soon as possible, and it was requisite that the order to wind-up should be confirmed within a month. The fees had been alluded to. He distinctly stated at the last meeting that all that was received was £75 a quarter for the daily attendance. It did little more than pay his cab hire. They declined to draw the cheques last month, and they were doing all they could to save expense. With regard to Mr. Clench, more shares were applied for than they had shares to allot. Mr. Clench was to have had

300 in lieu of those he held in the old company, but he let another applicant, A B, have 200, and the directors paid Mr. Clench the premium he could then have sold them at. He did not see how it made any difference. (Laughter.)

Mr. Addison said they were told that at the annual meeting the directors said they would not take any fees, but he would remind them that a resolution was put that they be paid a salary, and that it was negatived. Nevertheless, after that, they took fees for six months, and the chairman's cab-hire, it seemed, was rather expensive, for out of £300 he took £156, and the remaining £144 was divided among the rest. He thought they ought to have the opinion of some eminent counsel as to whether the British Reversionary Company was not liable to this company.

A Shareholder inquired who was Mr. Kintrea.

Mr. Addison said they were told he was a partner of one of their directors, and in many of the companies that he got up Mr. Kintrea appeared as one of the directors. There was one point with regard to Womersley and Burt; that Mr. Burt distinctly told them he would not say that the business of his firm was worth even £1,000 a year. "Then," said Mr. Lewis, "I advise you to have nothing to do with it." The meeting was adjourned, and at the next meeting, Mr. Lewis being got rid of, the purchase was effected.

Mr. Galsworthy said it was right that it should be known that at the time of the transfer the British Reversionary had, besides the £6,900, a capital of £9,000 of other people's money, with which they were working. But he would dismiss them without further remark, because nothing was divided among them. The prospectus stated that the company was formed to take up the business of another company, and the articles of association stated what company it was; but unfortunately parties when they applied for shares did not often look at the articles of association. The main point in the report was what was called the second agreement, which he must confess was the most ingenious thing he had seen. By the alteration of a few words the company were charged with £700. Another point was, that when the company had been some time before the public two-thirds of the shares had not been applied for, and in his opinion Mr. Kintrea ought to have then been told that he had not fulfilled his contract; but instead of that he was allowed to introduce a Mr. Hardwicke, who in his turn introduced Mr. Jay as the seller of the business of Messrs. Womersley and Burt. He got £2,000 for that, though it appeared that Messrs. Womersley and Burt did not even know him, and that he entered into the negotiation without their knowledge. The getting of that £2,000 was a piece of ingenuity which ought to be held up for the admiration of a discerning public. He did not say that the business of Womersley and Burt was a bad business; but it was another question whether it was worth the sum they gave for it. That their directors should agree to give £10,000 for a business the value of which was not established appeared to him monstrous. He thought the best thing the company could do was to wind-up voluntarily. That would not prevent any one taking counsel's opinion on any one of these points if he pleased. He did not think there was anything like fraud in the inception of the company. He thought that Messrs. Womersley and Burt's books ought to have been given up when the purchase was made; but that had not been done.

Mr. Whiffin said that the capital of the British Reversionary was about £8,000, and they had about £10,000 deposits. Out of the £4,000, £2,300 was paid for preliminary expenses, a sum was devoted to an ad interim dividend, and a small sum was paid to the directors; and with regard to

the shareholders themselves, they had exchanged a liability of £5 a share for a liability of £45.

After some further discussion, principally on the question of adjournment, in the course of which the chairman stated that the directors intended to publish a full reply to the report of the committee, the motion confirming the resolution to wind-up was unanimously agreed to.

Mr. Addison then moved that the proceedings of the meeting be further adjourned till Friday, the 27th instant, and that the committee be requested in the meantime to take counsel's opinion on the various points which had been raised.

Mr. Zuccani seconded, and this motion was likewise agreed to.

The meeting then separated.

THE CREDIT FONCIER AND MOBILIER OF ENGLAND, LIMITED.

THE half-yearly general meeting of the shareholders of this company was held on the 24th October, at the London Tavern; the Right Hon. James Stuart Wortley, governor, in the chair, for the purpose of receiving the directors' report and declaring a dividend.

The following report was taken as read:—

"The directors have much pleasure in presenting their second report to the shareholders, but before entering upon its details desire to call attention to the general scope of the observations made in their report dated 8th April last. A reference to that report will show that the objects which the directors had in view were, the declaration of such a dividend as might be permanently maintained, and which they fixed at a minimum of 20 per cent. per annum, the establishment of a fund to be called the dividend reserve fund, for the purpose of insuring the due payment of such dividend, and generally to place the business of the company on so solid a basis as to secure the confidence of the public, and render its shares a safe and highly desirable investment. The directors also committed themselves to an opinion that the apprehensions so generally entertained of disastrous consequences to the commercial world upon the close of the American war were groundless, and they concluded their report by an expression of their confident belief that a continuance of profitable business would not be wanting. The American war has terminated, but the predicted disorganisation of commercial affairs has certainly not followed that event; and it will be seen by the balance-sheet which the directors have now the pleasure to lay before the shareholders, that the result of the business transacted by the company during the last six months has been so profitable as fully to confirm the directors in their predictions of results for the present half-year equally satisfactory to those realised during the previous six months. On reference to the statement of accounts annexed, it will be seen that the sum to the credit of profit and loss account (after paying all charges, expenses, and outgoings, including income-tax on dividend and bonus), and, therefore, net profit available to 30th September last, is £180,805. 4s. 9d. The directors recommend that, out of such profits, the sum of £30,000 be carried to the 'dividend reserve fund,' which will increase that fund to £100,000. The above mentioned appropriation will leave £150,805. 4s. 9d., out of which the directors recommend a dividend of 10s. per share (equal to 20 per cent. per annum), and in addition thereto, 10s. per share as a bonus (equal to 20 per cent. per annum), both free of income-tax, being

together £1 per share, or at the rate of 40 per cent. per annum, the same as distributed last half-year. The payment of this dividend and bonus will absorb £100,000, and the directors call the attention of the shareholders to the fact, that after providing for this large dividend and bonus, and increasing the dividend reserve fund to £100,000, the general reserve fund being £200,000, they will be enabled to carry forward the large sum of £50,805. 4s. 9d. to the credit of next half-year's profit account. These results, the directors feel assured, will be as gratifying to the proprietors as they are to themselves; they have been attained by great attention on the part of all concerned in the administration of the company's affairs. The directors have also the satisfaction to state that in addition to these pecuniary results, the company's influence has steadily progressed. This is abundantly attested by the offers of combinations in lucrative financial operations, from eminent private firms as well as companies and corporations, but which the directors are unable to fully avail themselves of by reason of the inadequacy of the present capital of the company, which compels them to decline valuable business daily. Although, however, the company has thus increased in prosperity, the directors feel they are called upon not to ignore the injurious reports which from time to time have been circulated against it. In utter disregard of facts, rarely, if ever, has any commercial association been so recklessly aspersed, or so unwarrantably assailed: the directors, however, are more than consoled by the reflection that rarely, if ever, has a company achieved so remarkable a success. Without attributing such reports to unworthy motives, they prefer to consider them as emanating from a not uncommon prejudice against new forms of commercial enterprise. It will not be requisite to remind most of the shareholders that many companies formed on new principles, in their earlier stage have had to pass through a somewhat similar probation, the most prominent and recent instances being, perhaps, the company which first introduced joint-stock banking: the company which inaugurated joint-stock discounting as well as the principle of limited liability; and one or two of the leading marine insurance companies which first undertook joint-stock underwriting. The directors refer to those instances because, notwithstanding the well known present success of those institutions, they were, at the commencement of their career, subjected to as large an amount of prejudice and unfair criticism as this company has had to suffer, in consequence of its being one of the first to introduce the then new principle of joint-stock finance. The balance-sheet now presented to the shareholders affords perhaps the best answer to these aspersions. The directors desire emphatically to state that, in examining the accounts of the company, with a view to ascertain the rate of dividend which it would be proper to declare, they have in all cases made ample allowance for every contingency. In order to put the position of the company fairly and without exaggeration before the shareholders they have in every instance valued the assets below the lowest market value of the day; and it has ever been the object of the directors so to conduct the business of the company as to realise the largest amount of profit consistent with the avoidance of excessive risks. It is a fact that the position of the company's affairs at this moment is such, and its investments are of that sound character, that, if necessary, the company could be immediately wound up and brought to a close by the distribution of assets amounting to £850,805. 4s. 9d. among the shareholders, represented by—The paid-up capital of £500,000; the general reserve fund, £200,000; the dividend reserve fund, £100,000; the balance of unappropriated profit, £50,805. 4s. 9d.—total, £850,805. 4s. 9d.; equal to above £8. 10s. per

share. Before leaving this subject, the directors wish to place on record their deliberate opinion and conviction that this company is destined in a very short period to take a foremost place among the leading monetary institutions of the country. Adverting to the remarks made at the conclusion of the last report, and also in the present one, as to the insufficiency of the capital of the company for the transaction of all the business which it would be disposed to accept, and to the great success which has attended its operations in spite of the comparatively limited amount of the capital at its disposal, the directors feel assured that the shareholders will learn with satisfaction the determination of the board to increase the capital to the full amount authorised by the articles of association, viz., £4,000,000, by the issue of 100,000 new shares, on which £3 per share only is intended to be called up. These 100,000 new shares the directors propose to issue as follows, viz.—50,000 shares will be offered to the shareholders in this company who shall stand registered on the books of the company on Friday, the 20th October next, to be allotted in the proportion of one new share for every two shares then held, such new shares to be issued to them at a premium of £2. 10s. per share; the remaining 50,000 shares to be offered to the general public (which, however, is also to include such shareholders as may wish to apply for shares in addition to those they are entitled to as shareholders), such shares to be issued at a premium of £3. 10s. per share. The premiums to be received upon this issue will amount to £300,000, which will be added to the £200,000 already standing at the credit of the general reserve fund, and will thus increase that fund to £500,000. The paid-up capital will then be £1,000,000. The new shares will be paid up as follows, viz.:—On those issued at £2. 10s. premium to the shareholders, £1 per share on application being on capital account; £1. 10s. per share on allotment, £1 being on capital account, and 10s. on premium account; £2. 10s. per share on 1st January, 1866, £1. 10s. being on capital account and £1 on premium account; £2. 10s. per share on 1st March, 1866, £1. 10s. being on capital account and £1 on premium account; being £5 capital, and £2. 10s. premium. On those shares issued at £3. 10s. premium to the general public, the following will be the mode of payment:—£1 per share on application, being on capital account; £2. 10s. on allotment, £1. being on capital account and £1. 10s. on premium account; £2. 10s. on 1st January, 1866, £1. 10s. being on capital account and £1 on premium account; £2. 10s. on 1st March, 1866, £1. 10s. being on capital account and £1 on premium account; being £5 capital, and £3. 10s. premium. These 100,000 new shares will participate in the next distribution of profits *pro rata* with the existing shares, according to the amount of capital paid up thereon: the valuable option will be, however reserved to the holders of these shares of paying upon any of them the whole of the above instalments, at any time previous to the date of the last instalment, viz., 1st March, 1866, on paying the company back interest from the date of such payment to 30th September last, at the rate of 20 per cent. per annum; such shares so paid-up to be then entitled to the same amount of profits next half-year as is declared on the existing shares. The directors are aware that in thus admitting the public to subscribe for shares, at a price so much below their value, they are departing from the practice generally adopted in an issue of new shares, of offering the whole of them to the shareholders; but the directors are so impressed with the importance of increasing the area of influence of this company—influence second only in importance to capital to a company like the Credit Foncier and Mobilier of England—and have had such proofs in the result of the

issue of shares a year ago, of the sound policy of admitting the public to a participation in such issue, that they feel confident of obtaining the approval of the shareholders in the course they have adopted. The following calculation will guide investors in estimating the intrinsic value of the shares, after the dividend and bonus now declared are paid, and when the issue is completed :—The general reserve fund will stand at £500,000; the dividend reserve fund, £100,000; in hand, profits not divided £50,805. 4s. 9d.; total, £650,805. 4s. 9d. Equal to above £3. 5s. per share on the whole 200,000 shares. So that the public, on subscribing at £3. 10s. premium per share, are being admitted partners in this company by only paying 5s. premium as premium; £3. 5s. per share being actually represented in value in the assets of the company. It follows, therefore, that the shareholders are practically receiving a bonus of £1 per share on each share they subscribe for, by getting their shares at £2. 10s. per share premium. Over and above these advantages, there is the probable enhanced value which will attach to these shares in the same way that the shares issued to the public at £2. 13s. 4d. premium in September, 1864, after having received £1 per share in April last as dividend and bonus, are now worth £4. 10s. per share premium, being in one year more than 100 per cent. increase on the amount paid for premium. The directors feel that with a paid-up capital of £1,000,000, a general reserve fund of £500,000, a dividend reserve fund of £100,000, making a total of £1,600,000, they will be in a position to meet the exigencies of any business that may be brought before them. It is, however, the intention of the directors to increase out of future profits the dividend reserve fund to £200,000, being in accordance with the plan announced in the last report, to have always in hand one year's dividend at 20 per cent. per annum, calculated on the amount of the capital paid-up for the time being. In conclusion, the directors have much pleasure in expressing their conviction that, from the business proposals now under consideration and in part concluded, the past management and operations may be accepted as an earnest of the future success of the company.

Balance-sheet from 8th April, 1865, to 30th September, 1865.

Dr.

Capital authorised, £4,000,000, in 200,000 shares of £20 each.

The Chairman then said, that as he knew they were men of business, and that, therefore, their time was valuable, he would not detain them by any lengthened observations. This was the second meeting of this great society; and he said great society deliberately, for although some critics and detractors of its fair fame sought to spread abroad reports injurious to it, there was no denying the fact that, after twelve months of its existence, it had secured an importance in the eyes of the commercial public which could not be mistaken. (Hear, hear.) Without detaining them by any general observations, he must say that it was the wish of the directors that every information should be given to the shareholders with respect to the business transacted and the mode of doing so. This Company, it must be recollected, was no ordinary one; there were public interests involved which required that confidence should be maintained, and prevented disclosures being given to the public at large; but, except in cases of that description, the directors were anxious to give every information in their power to those who had an interest in it. (Hear.) They must, however, remember that it was utterly impossible the directors could disclose the private transactions of their friends and clients to a public meeting like the present and in presence of the public press. (Hear, hear.) Such a course was never adopted by the great houses of Rothschilds and Baring Brothers, and he was quite certain the shareholders would not expect the directors of the Credit Foncier and Mobilier of England to adopt so unusual and

unwise a proceeding. Any questions, however, which might be put the answers to which, if given, would not be injurious to the Company, he should be happy to answer. On the part of the directors he claimed the confidence and support of the shareholders. They were responsible for the management of the Company, and if the shareholders felt dissatisfied they had it in their power to relieve them of their responsibility whenever they thought fit. They had the report before them, and if the present condition of their affairs excited any feeling of alarm amongst them they had a very easy method of getting rid of those who now managed their affairs. With respect to the balance-sheet, he would not go into details, but would call their attention to two or three points. They would find in it every information; and although every transaction in their business was not formally disclosed they would find everything essential for them to know stated in the clearest manner, so as to give them a correct notion of the soundness and stability of the Company. (Hear.) They would find the amount of bills payable reduced to £17,500, which, compared to the capital of the company, was a very small sum indeed, and they would also observe that there had disappeared from the balance-sheet furnished in April last, for office furniture, fixtures, &c., the sum of £8,000, and another item of £7,183, for what was termed preliminary expenses, had also disappeared. There was another item at the credit side of the account to which he also wished to refer. They would find that the amount of bills receivable was £1,217,930, and he must remind them that if they examined the balance-sheet of similar establishments they would find that it was the practice to give no further particulars. (Hear.) He would now call their attention to the present position of the company. And, as regarded that, he held it to be impossible for its greatest and most inveterate enemy to say that, under the guidance of the present board of directors and the managing director, it had not within the last twelve months achieved the character of being one of the most prosperous companies in the United Kingdom. (Cheers.) Notwithstanding this state of facts, however, information had reached him from many quarters that certain persons were spreading rumours injurious to its reputation and stability, which in many instances alarmed persons who could not judge for themselves, and drove them into the market to sell their shares at a great disadvantage. They were, however, he was happy to inform them, above that sort of thing at present, and could assure those shareholders whom he then had the honour to address that they might hold up their heads aloft and despise these insinuations and rumours spread abroad to injure and depreciate their property. (Hear, hear.) He could assure them, from his own personal knowledge, that the promises made in April last by the directors had been rigidly confirmed. That the multitudinous transactions of their company had been of the most solid character, and that the only difficulty the directors had to contend with was to make a selection from among the securities placed at their disposal. (Hear, hear.) They saw in the dividend the result of what had been done. (Hear, hear.) They had a net balance in their profit and loss account, after deducting all expenses, of £180,000; a half a million of their capital was paid up, and the directors recommended them to follow the advice given in April last—namely, that their minimum dividend should be 20 per cent. Their dividend reserved fund amounted to £100,000, and, looking at all the advantages acquired by the bank, the directors thought the more prudent course would be to give them 20 per cent. for the half-year, and a bonus of the same amount, which would make an aggregate of 40 per cent. per annum, or as he already said of 20 per cent. for the half-year, leaving a sum of £50,000 to be placed to their credit. They might have divided

that amount, but in a great concern like the present they thought it better to bring over that amount to the next account. (Hear.) Having now made that statement he would leave the final decision in the hands of the shareholders. The nominal capital of the company, he begged to remind them, was four millions; the capital issued was two millions, of which £500,000 had been paid up at £5 per share, and, as far as they could foresee, there was no expectation of having to call for any more, always supposing the shareholders consented to extend the powers of the directors, by enabling them to augment their capital—by the issue of 100,000 shares—from half a million paid-up to one million. (Hear, hear.) That proceeding would increase their status in the commercial world, and would give their operations greater vigour and elasticity. That course was determined on, after full and anxious deliberation, in order to benefit the present shareholders, and to give the general public greater confidence in the company. Those who held shares would be entitled to a premium of £2. 10. on shares worth £4. 10s. or £5 in the market; and those who took new shares would have them at £4 a piece. (Hear.) Now, with respect to their reserved fund, some shareholders wished to know what had been done with it. Well, he would not go into details, but while he assured them that it was held on the best possible security, he would remind shareholders that the public funds were not the most profitable investment that could be chosen. They were always affected by events which might any day occur in Europe, and he believed that, except in the case of trustees who were bound by will to invest money in the Three per Cents., very few, nowadays, put their money in the funds. Their reserved fund was held in securities which could be made available at any time; and if they did not invest it properly it might be said of them what was said in the Gospel of the man who buried his talent, that they “were idle and unprofitable servants.” (Hear, and a laugh.) On the whole he had the most perfect confidence in the prosperity of their company, which he believed would turn out to be a sound monetary system, forming a part in the government and well-being of this great country. (Cheers.) The right hon. gentleman concluded by moving the adoption of the report.

Mr. Levick (deputy-governor) seconded the motion.

Mr. Merriless complained that in the profit and loss account the shareholders had no information of what the cost of their business amounted to. He had no desire to find fault with the directors, nor did he at all approve of captious objections, but he thought a statement such as he suggested might be made with great advantage.

Mr. Bernard wished to be informed whether the directors intended to appropriate the new shares *pro rata*, or keep the power to themselves of distributing them to parties of influence whose names they should like to see on the register.

The Rev. Dr. G. Brown complained that the issue of the new shares would be more profitable to the public than to the present shareholders. According to the arrangement alluded to by the chairman, they would be enabled to get the shares for £1. 15s. each, while the present holders paid £2. 10s. for theirs. He also suggested that the £50,000 unappropriated be transferred to the account of profit and loss, and divided among the shareholders, or carried to the reserve fund.

Mr. Taylor wished to know how their reserve fund was invested, and what were the costs of management. He had been assured that these securities were worth £1,200,000, and although he had the greatest confidence in the directors he did not believe they had found the philosopher's stone, or would continue to pay 40 per cent. dividend. (Oh, oh.) He was a

friend of the representative principle; but he must say that present circumstances made him anxious for the honour of the company. (A laugh.)

Mr. Carpenter said he addressed a letter to the chairman, asking for information upon certain points which he would then repeat. In the first place, he wished to know in what securities the reserve fund was invested, and whether they were permanent. He also wished to be informed if the securities of the company were pledged, and whether any portion of the reserve fund was invested in the Three per Cent. Consols. In conclusion, he moved, as an amendment to the report, "That the directors be requested to invest their reserve fund in the Three per Cent. Consols, or some similar security, and that no part of it shall be used for conducting the business of the company without a special vote of the shareholders."

Mr. Bruce seconded the motion, and a rather personal discussion ensued.

The amendment was then put, and negatived by an overwhelming majority; after which the report was adopted.

A vote of thanks to the manager (Mr. Albert Grant, M.P.) for his zeal and activity in promoting the interests of the company was then passed.

Thanks were then voted to the right hon. chairman, and a vote having been proposed to the secretary and other officers of the institution, the proceedings terminated.

STANDARD BANK OF BRITISH SOUTH AFRICA.

THE fourth ordinary general meeting of this company was held on the 24th October at the London Tavern; Mr. Stenhouse in the chair.

The Secretary (Mr. W. F. Searle) having read the notice convening the meeting, the following report was taken as read:—

"Since the proprietors were prepared by circular of 25th August for the general character of the present half-yearly accounts, intelligence of further mercantile failures has been received, and the full amount then estimated by the directors has therefore been found necessary to cover losses to the 30th June. A further sum may be required in next account to meet losses on bills that had not matured within the half-year, a portion of which is contingent on the duration of the war in the Orange Free State. The directors have transferred £30,000 from reserve fund to help in providing for the half-year's losses, and in enabling the payment of a reduced dividend of 5 per cent. per annum. The directors take the opportunity of stating that the events from which the bank now suffers do not repress their hopes of future success; they rather rely on the rapid progress of the South African Colonies in productive wealth as the surest foundation for a profitable banking business. Certain alterations, suggested by experience, are now being made with a view to concentrate the management, as well as to strengthen the more important stations with capital derived from the closing of others of less promising character. The reconstitution of the company, authorised at last meeting, has encountered difficulties that have led the directors to suspend further proceedings thereon. The seats of Messrs. Black, Duthie, and Paterson have become vacant since last meeting, and have been filled by the election of Messrs. George Charles Frames, Alexander Cowan, and William Neisch, which the proprietors are asked to confirm."

Balance-sheet June 30th, 1865.

The Chairman, in moving the adoption of the report, expressed his regret that they had not met in as fortunate circumstances as on previous meetings; but at the same time the affairs of the bank were not in a position to excite serious alarm. There might be some difference of opinion as to whether or not they ought to declare a dividend, but looking to the circumstances that there might be many persons to whom such a declaration might be of the last importance, and to the fact that, in all probability, things had reached their turning point at the Cape, the directors, on the whole, thought it advisable that a dividend at the rate of 5 per cent. should be declared. It was stated in the report that £30,000 would be required from the reserve fund to pay the dividend, which would leave to its credit the sum of £26,000. It was, however, expected that the profits of the current half-year would amount to £25,000, £10,000 of which had already been earned; and, looking at the circumstances that the colony had passed, or was now passing, through a severe monetary crisis, the board had thought it necessary to set aside £20,000 for contingencies that might arise in the current half-year. The estimated earnings being £25,000, and the reserve fund £26,000, together made £51,000. The dividend at the end of December would absorb £12,000, which, added to the £20,000 set aside for contingencies, made £32,000, which would leave £19,000 to the credit of the reserve fund in December next. He also mentioned that some of the directors having resigned, it became necessary to fill their places, and the directors had selected Mr. Neisch, Mr. Alex. Cowan, and Mr. Mackenzie, to fill their places. Owing to the fact that the selection of two of the gentlemen had been made subsequent to the notice, it would be competent for the meeting to defer the confirmation, if necessary, till April next. He thought it unnecessary to make any further observations, as no doubt various questions would be asked, and he thought it would be better to answer them seriatim, thus affording the shareholders the fullest opportunity of investigating the affairs of the bank. He concluded by moving the adoption of the report.

A shareholder inquired the amount of the past bills due on the 30th of June last; what amount there was due on that account since the 30th of June; what branches were being closed; and whether the principal losses had not accrued at Port Elizabeth.

The Chairman said it was perfectly true that many serious losses had occurred at Port Elizabeth, mainly through the commercial crisis that had occurred in the colony, but at the same time all banks had suffered alike. The amount of overdue bills up to the 30th of June last amounted to £133,000 odd, but there were collateral securities which would reduce the actual loss to £41,000, and which had been written off as a bad debt account. Since the 30th June the past due bill account amounted to £13,164. The increase of charges had arisen from the appointment of a manager, whose salary had to be included, but they had selected a most able man in Mr. Stewart, who had devoted himself entirely to the elucidation

tion of the affairs of the bank, and through whose efforts there was every probability that it would not only recover all its losses but have a very excellent future before it.

Mr. Kintrea expressed an opinion that sufficient caution had not been exercised in taking over the business of the Commercial Bank at Port Elizabeth, and that the £38,000 due on the amalgamation account was a dead loss.

Mr. Manby read an extract from the *Eastern Province Herald*, which gave an account of the insolvency of Mr. Kirkwood, a colonial director, and called the attention of the meeting to the fact that the Standard Bank was scheduled as a creditor to the enormous sum of £40,000, the report in the paper stating that Mr. Kirkwood's estate was likely to pay in pence rather than pounds. He inquired whether there was any truth in the report.

The Chairman deprecated any allusion to reports in the public newspapers, and stated that although it was true that Mr. Kirkwood's account was so scheduled, the bank was in possession of collateral securities which would reduce the loss on that account to £13,000.

Mr. Manby called attention to the fact that a very large proportion of the local directors in the colony did not hold a single share in the undertaking, and also to the fact that a large item appeared in the accounts of "other advances." He inquired the nature of those advances.

The Chairman—They were overdrawn accounts against securities.

A long and animated conversation ensued, in which the chairman and directors were asked to state the details of the most minute transactions of the bank, and in reply to the numerous questions asked of all sides of the meeting.

The Chairman stated that almost immediately after Mr. Stewart, the present manager of the bank in the colony, had arrived, he discovered that the affairs of the bank had been greatly mismanaged by the local boards, who seemed to have gone entirely on the principle of helping themselves and their friends, the consequence of which was that when the commercial crisis came and failures took place, the persons who had obtained these large advances, not being able to repay them, became insolvent, and the bank was obliged to resort to such covering as it had in the shape of collateral securities. He also discovered that some of the branches, instead of being profitable, were entirely unproductive. Immediately on receipt of the intelligence, the board instructed Mr. Stewart to restrict all advances, to discontinue some of the branches, and to allow no overdrawn accounts that were not fully covered by ample securities. They also issued an order by which no person who was not considerably interested in the welfare of the bank should act as a local director, and in point of fact had given the strictest possible orders to the manager to put an end to the irregularities that had occurred. He reminded the meeting that the local directors were not appointed by the board but by the colonial shareholders, and that when the amalgamation took place they were continued in office solely on account of the able manner in which they had conducted the affairs of the Commercial Bank. He could not deny that they seemed to have managed the affairs of that bank in a far more satisfactory way than they had in this case, and he assured the meeting that no one deprecated more than the board the practice of persons acting as directors in the colonies who had no share in the bank. It could not be denied that many of those directors had made the bank a mere convenience to obtain advances, but that was all being rectified, and their manager, than whom there was no more able man in the colony, had the utmost confidence in the future prosperity of the institution.

In reply to a question from a shareholder,

The Chairman stated that it had been found impossible to carry into effect the scheme of reconstitution adopted at previous meetings, on account of a large number of shareholders objecting.

Mr. Jervis, in seconding the adoption of the report, thought that the shareholders had expressed a great deal of unnecessary alarm at the position of the bank. The general manager reached the Cape at the latter end of February, and to a man of his experience it soon became plain that a great deal of very improper bill accommodation had taken place. The first thing he did was to shut the door against all transactions of that sort, and the next was to get every kind of collateral security he could lay his hands on. That prudent conduct had been followed out, and he was sure would lead to ultimate success. The trade of Port Elizabeth was good, and that port was the fifth best customer they had. There was every reason, now that the crisis was nearly over, to be satisfied that the bank would not only recover all its losses, but eventually would yield a very large profit.

Mr. Kintrea could not participate in the congratulations of the seconder. As it appeared to him they had not only lost their reserve fund but they had given £38,000 for what turned out to be a bad business. He traced the losses of the bank to three sources—first, to their having local directors who had no interest in it; secondly, to opening and maintaining unremunerative branches; and thirdly, to the facilities afforded by the bank to the merchants of obtaining money too easily, thus leading to over speculation, and giving a false stimulus to trade. He had no doubt whatever about the future of the bank if these faults were corrected, and above all he trusted that they would never hear any more about managing directors who were not shareholders. (Hear, hear.)

Mr. Beke expressed himself dissatisfied with the position of the bank, and considered it highly inexpedient to declare a dividend at all. He, therefore, moved that the report and balance-sheet be not adopted.

Mr. Hodgkin seconded the amendment, which on being put to the meeting was lost, and the report was adopted by a large majority.

The dividend having been declared, the election of directors was proceeded with, and after some discussion, resulting in a proposition that the appointments made should not be confirmed, but that the matter should stand over till April, which was lost, the election of the three gentlemen nominated by the directors, viz., Mr. G. C. Frames, Mr. Neish, and Mr. Mackenzie, was confirmed.

A cordial vote of thanks to the chairman and directors, proposed by Mr. Kintrea, and carried by acclamation, concluded the proceedings.

DISCOUNT CORPORATION.

THE ordinary general meeting of the shareholders in this company was held at the London Tavern on the 27th October; Captain C. F. Mangles in the chair.

The following report and balance-sheet were submitted by the directors, and taken as read :—

“In again presenting to the shareholders a statement of the affairs of the corporation for the half-year ending the 30th September, 1865, the directors would desire to point out, that although the amount of business transacted has been less than during the previous half-year, yet the net profit realised has been comparatively greater, and has been attained during a very pre-

carious period, with a loss of only £400. This result has been arrived at by the operations of the company having been conducted with caution. The statement now submitted shows a gross profit, including £2,111. 7s. 6d. brought forward from last account, of £21,051. 17s. 8d., from which, after allowing for bad debts, rebate of bills not due, and current expenses, there remains a balance of £6,605. 3s., which the directors propose to dispose of in the following manner, viz.:—£5,000 to the payment of a dividend of 10s. per share, being at the rate of 5 per cent. per annum on the paid-up capital; £1,000 to be added to the reserve fund; and £605. 3s. to be carried to next account."

Balance-sheet, 30th September, 1865.

The Chairman, in moving that the report and statement of accounts be adopted, and that a dividend of 10s. per share free of income-tax be declared, and paid on and after the 1st of November next, briefly explained the position of the company's affairs. Much credit, he observed, was due to the managers for the way in which, to use a nautical phrase, they had steered the vessel through the shoals and dangers by which it had been surrounded, in the shape of failures in Indian banks and other

old establishments: and, seeing that the accounts showed a loss of only £400, he thought the managers were entitled to the utmost gratitude. Their business, if conducted safely, could, even under the best circumstances, only produce moderate results, because it was simply the difference between what they could take money for and what they could lend it at; and considering the great reduction of from £200,000 to £300,000 which had taken place in their liabilities since the last report, and which had been brought about solely by prudent management, he trusted the shareholders would be satisfied with the dividend, although it did not keep pace with those which were given by some other of the great credit companies. An important subject which had lately engaged the attention of the directors was the high amount of the shares. He understood it was contemplated to bring in a bill of a general character when parliament assembled, enabling companies to reduce the amount of their shares; but if no such general measure were introduced the directors would consider whether they themselves might not bring in a bill empowering them to reduce the shares of this corporation from £100 to £25, thus making the shares £5 paid up. Such a step, he believed, would produce a wholesome effect on the shares, which would then be much more largely dealt in than they were at present. Upon the whole he was so satisfied of the perfect soundness of the undertaking, that he hoped the shareholders would imitate his own example, identifying themselves more thoroughly with its interests, and bring in all the money they could, in order that it might be laid out with prudence and care, and realise a good profit.

Mr. G. Lyall (a director) seconded the motion, and urged the necessity which daily experience had shown to exist of increasing the amount of capital, which at present was not sufficient. The business transacted was of a very high class. It was well done. There was no lock-up. The securities consisted entirely of really good mercantile bills of exchange, and none had to run beyond six months. But business had to be constantly discouraged, because in these times of fluctuation it would not do with their small capital to run any risks. If, however, the capital were increased by about £200,000 the business might be doubled, and still be of the same good class. At the same time the expenses would be no greater, whilst there would be a considerable increase of profit. The present was, perhaps, not an opportune moment for taking this step, but at the first favourable opportunity it ought to be done in the way that would be most convenient to the shareholders. As a preliminary, it would be necessary to reduce the amount of the shares, and after that the question of augmenting the capital should be taken into consideration.

In answer to inquiries,

The Chairman stated that the £9,000 set aside in the previous account against bad debts was amply sufficient to meet any deficiency that might arise from that source. To which the manager added the remark that the whole of the £9,000 would be absorbed.

A Shareholder said that, after paying £70,000 on the amalgamation account, the capital they were working with was only £130,000, and the current expenses on this were at the rate of nearly 5 per cent. He was satisfied with the soundness of the concern, but contended that these expenses ought to be reduced, and that the most effectual means of doing so was to have a less numerous and costly staff.

The Chairman stated that the subject was then under the consideration of the board, and at the fitting time, when it was in their power, he had no doubt there would be a reduction. The management should be as economically conducted as possible, and the directors pledged themselves to do their

best to accomplish that result. He further explained that the £3,500, for the premises in Abchurch Lane, had been paid for the renewal of the lease for sixty years.

A Shareholder inquired whether the bills in hand were believed to be good.

The Manager, speaking to the best of his belief, should say, perfectly so.

Ultimately the motion was agreed to, the retiring directors, Messrs. Colchester and Lyall, were re-elected, a sum of £1,000 was voted to the board as remuneration for their services during the past year, and a cordial vote of thanks to the presiding chairman terminated the proceedings.

LONDON MERCANTILE DISCOUNT COMPANY.

A MEETING of the shareholders of this company was held at the London Tavern, on the 27th October, by adjournment from the 18th instant; Mr. John Geary occupied the chair.

The Chairman said the meeting was adjourned for the purpose of allowing time for the committee of investigation to obtain counsel's opinion on certain points which were raised at the last meeting.

Mr. Morris then read the case submitted to counsel, which went at great length into the history of the company, and concluded with the following questions, on which the opinion of counsel was requested:—

1st. Whether the original allottees of shares in the London Mercantile Discount Company can receive back the money paid on their shares, or obtain any other and what relief in respect of the circumstances connected with the formation of the company. 2nd. If yea, against whom and at whose suit the remedy can be enforced. 3rd. Whether, even if the company was fraudulently established, shareholders who were not originally allottees, but have purchased shares in the open market, some at a discount, have any ground of action or suit either at law or equity. 4th. Whether the shareholders should proceed with a voluntary winding-up, or how otherwise they should act with reference to the affairs of the company so as not to prejudice their rights, and on the other hand make the most of what remains and stop all useless expenditure. 5th. Generally to advise the shareholders as to the best course for them to pursue under the circumstances herein detailed, so as to recover the money paid if they can, and if not, to make the loss as light as possible.

On these questions the following opinion was given:—

"1st, 2nd, and 3rd.—We consider that the circumstances connected with the formation of this company would induce a court of equity to favour, as far as its rules might permit, any claims by original allottees of shares to have such allotments cancelled. But on the whole, and especially considering the length of time during which such allottees have acquiesced in their position as shareholders, we are not of opinion that they could succeed either in recovering back the money paid on their shares, or in getting their names removed from the register, or in obtaining any other relief based on the circumstances referred to. Still less is any such remedy open to those who have purchased their shares in the open market, since it is only persons who contract for their shares with the company that can in any case be relieved on the ground of the fraud of the company. 4th and 5th.—We are of opinion that by pursuing in equity the remedies hereinafter indicated, the shareholders may reasonably hope to lighten their loss to a considerable extent. In the first place, the purchase of the business of Messrs

Womersley and Burt appears to have been negotiated with what the law calls *crassa negligentia* on the part of the directors, not only sufficient to make those who took part in the negotiation personally liable for the damage resulting therefrom, but also, together with the other circumstances, amounting to such evidence of improper conduct as to invalidate the purchase thereof. And next, we are of opinion that in connection with this equity the £2,000 paid to Mr. Jay under the circumstances mentioned in consultation may probably also be recovered. We are further of opinion that, even if the purchase should not be set aside, the claim of Messrs. Womersley and Burt to salaries as directors and members of the daily committee is inconsistent with the articles of association, and cannot be supported. And we are of opinion that Mr. Kintrea is bound in equity to indemnify the company for the preliminary expenses attending the formation, which he undertook to pay in a contract on which the existence of the company was in fact based. The remedies above indicated may be pursued while the voluntary winding-up is proceeded with.

"THOS. SOUTHGATE.
"JOHN WESTLAKE.

"Lincoln's Inn, Oct. 25, 1865."

Mr. Morris suggested that time should be given to consider the opinions that counsel had given, and that there should be an adjournment. (Cries of "No.")

Mr. Whiffin objected to an adjournment, and said he thought they ought to proceed at once to the appointment of liquidators. He deprecated going to law. If they did they would be entirely in the hands of the lawyers, and no one could tell how much they would have to pay, whereas if they avoided litigation the assets of the company would about balance the liabilities, and they might possibly get back 10s. a share, or at any rate they would not have to pay more than 10s. a share.

Mr. Morris said he thought they ought, at least, not to abandon this matter without having an opportunity of seeing Messrs. Womersley and Burt's books. They could do this by filing a bill in chancery, and it would then be open to them whether they would proceed with the suit or not.

Mr. Britton inquired what were the issues involved.

Mr. Morris said £10,000 was paid to Messrs. Womersley and Burt for their business, besides which they were appointed to serve on the daily committee for three years, at a salary of £1,400 a year. Then there was a claim against Mr. Kintrea for £700, and they might recover the £2,000 paid to Mr. Jay.

Mr. Galsworthy said it was quite clear nothing could be recovered on the ground suggested at the last meeting by Mr. Morris, that of gross fraud, but it was not at all clear whether they would not be able to recover some of the moneys that had been referred to. He suggested that the shareholders should that day appoint a liquidator or liquidators, who should consider whether proceedings should be adopted or not.

Mr. Flight recommended that a bill in chancery should be filed.

Mr. Toner moved that Mr. George Whiffin and Mr. Richard Stone be appointed liquidators.

Mr. Robinson seconded.

Mr. Addison objected to the appointment of either Mr. Stone or Mr. Whiffin, on the ground that the former was auditor of the company, and the latter had been secretary.

A discussion of an angry and personal character ensued.

Mr. Addison moved as an amendment that Mr. Galsworthy be appointed.

Mr. Galsworthy declined to act, and Mr. Addison withdrew his amendment.

Mr. Galsworthy moved as an amendment the appointment of Mr. James Cooper, accountant.

At the suggestion of the Chairman and Mr. Morris words were added to the motion and the amendment directing the liquidators to take proceedings in chancery if they should deem it advisable.

The amendment and the original motion were then respectively put to the meeting, when there appeared ten for the amendment and twenty-one for the original motion.

A poll was demanded, and the Chairman declared that the poll would be taken that afternoon, and on Monday from 12 to 2, at the London Tavern.

NEW ISSUE OF THE SHARES OF THE CREDIT FONCIER AND MOBILIER OF ENGLAND.

AFTER the very favourable termination of the meeting of the Credit Foncier and Mobilier of England, Limited, the directors at once issued the prospectus for placing the 100,000 new shares of £20 each. Upon this issue, £5 per share only will be called by instalments, no further call being contemplated. Of this amount, 50,000 shares will be allotted to the present shareholders, and 50,000 shares will be distributed among the general public. When these shares are placed the subscribed capital will consist of £4,000,000, the paid-up capital £1,000,000, the general reserve fund £500,000, and the dividend reserve fund £100,000. The terms of subscription both to the existing shareholders and the public have already been announced, and there is no doubt that the lists will immediately be filled. The date of application is limited to the 2nd of November for London, and Friday, the 3rd, for the country. In the prospectus the directors place it on record as their deliberate opinion and conviction, "that this company is destined in a very short period to take a foremost place among the leading monetary institutions of the country."

TENDERS FOR BILLS ON INDIA.

THE biddings for bills on India took place on the 4th October, at the Bank of England. The proportions allotted were—to Calcutta Rs. 10,27,000, to Madras Rs. 2,40,000, and to Bombay Rs. 8,00,000. The minimum price was fixed at 1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11½d. will receive in full, and on Bombay at 2s. about 29 per cent.; above these prices in full. Further biddings for 23,00,000 rupees took place on the 18th October at the Bank of England. The proportions allotted were, to Calcutta, 9,82,000 rupees; to Madras, 4,18,000 rupees; and to Bombay, 9,00,000 rupees. The minimum price was as before, 1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11½d., will receive about 47 per cent., and on Bombay, at 2s., about 19 per cent.: above these prices in full.

BANK OF AUSTRALASIA, BELFAST, VICTORIA.—At a meeting of the most influential of the inhabitants of this town, a large sum of money was subscribed for the purpose of presenting a silver epergne and complete service of plate to the local manager of the above bank, on his removal to Christchurch, New Zealand. At the request of the subscribers, the secretary, D. J. Howes, Esq., J.P., asked the Ven. Archdeacon Brain, who was returning to England, to expend this money. The plate has been selected, and goes out this month. The epergne bears the following inscription :—
 “Presented to William Lilly Hawkins, manager of the Bank of Australasia, Belfast, Port Fairy, Victoria, on the occasion of his removal therefrom, after a residence of eleven years, to New Zealand, as a slight token of appreciation by his friends of his sterling worth, both in his public and private capacity.”

We have much pleasure in stating that the suggestion contained in our September number for facilitating the remittance of bills and cheques from country to London bankers, and expediting the operations of the Clearing House, seem to have met with much approval. We find that the plan has been already put in force by several of the largest private and joint-stock banks, and that the results are most satisfactory.

Communications.

To the Editor of the “Bankers’ Magazine.”

PROFITS OF ENGLISH BANKS.

SIR,—Can any of your correspondents justify or explain the procedure of English banks under the following circumstances?—

Say, A opens an account with a London bank, and pays to one of his creditors a cheque for £100, dated 21st October; this is again paid to some provincial creditor, and so on it goes from hand to hand until it reaches the bank, perhaps on 31st October; but instead of debiting A at the 31st (as is the custom in all Scotch banks) he is debited at the 21st, the date inscribed on the cheque, and the bank thus pockets ten days’ interest, which A is entitled to.

This may appear a small item, but in these days of high rates, and on a large account, it becomes considerable. I am told that cheques for small sums, such as £25, £50, or £100, paid to tradespeople, often take several weeks to reach the bank.

I should be glad to hear that this is not the invariable custom of all the English banks, for there is not much to be said in favour of the proceeding.

H.

BRANCH BANK CHEQUES.

October, 1865.

SIR,—I am very pleased to find my inquiry in your September number, respecting the cashing of branch bank cheques, so promptly responded to by

two of your correspondents. I think this is one of the best means of ventilating questions on banking, especially where so much is regulated by custom.

Mr. H. G. Marshall backs up your opinion, by quoting a case tried at the Queen's Bench, while "W. J. A." (evidently against his own judgment), gives one which was decided against the banker. I hardly know on what grounds such a legal opinion could be given, except there was delay in the presentment.

The two cases above quoted at present stand thus—one has been tried and decided at the Queen's Bench, and the other rests on an undisputed legal opinion; therefore the balance of opinion is, I think, greatly in favour of the banker.

Your obedient servant,
Y.

BRANCH BANK CHEQUES.

Margate, 26th October, 1865.

SIR,—Permit me, through your columns, to ask your correspondents, "Mr. H. G. Marshall" and "W. J. A.," if there were any grounds affecting the cases they respectively allude to other than those they speak of, as from their respective statements it would appear the circumstances were identically similar, whilst the legal decisions were diametrically opposed to one another.

I am, Sir,
Yours obediently,
T. J.

THE ISLE OF MAN AND JERSEY.

October 16th, 1865.

SIR,—In your next number will you please to say, whether a draft drawn from London on a person in business at the Isle of Man or Jersey, and which is accepted, payable at a bank in either of those islands, requires a foreign bill stamp, or is an inland stamp sufficient?

A SUBSCRIBER.

[If a sole bill, the same duty and stamp as for an inland bill; if drawn in a set of three, then the stamps specially appropriated should be used.]

BANKING OBITUARY.

On the 30th September, at Brighton, Joseph Aldersey Olding, Esq., of Lee Road, Blackheath, second son of the late Stephen Olding, Esq., of Clement's Lane, Lombard Street, and Lower Clapton, aged 46.

On the 23rd October, at Brighton, Edward Wheeler Mills, Esq., of 67, Lombard Street, and 5, Bryanstone Square, aged 64.

MONTHLY CHRONOLOGY.

October 2.—The Directors of the Bank of England advanced their rate of discount from $4\frac{1}{2}$ to 5 per cent.

2.—The Directors of the Bank of Frankfort put up their rate from 4 to $4\frac{1}{2}$ per cent.

3.—The Bank of Prussia raised its rate of discount to 6 per cent.

5.—The Directors of the Bank of England further advanced their rate from 5 to 6 per cent.

5.—The Bank of France increased its terms from 3 to 4 per cent.

6.—The authorities of the Bank of Holland advanced their rate from $3\frac{1}{2}$ to 4 per cent.

7.—The Directors of the Bank of England again further increased their terms for discount from 6 to 7 per cent.

10.—The Bank of Prussia again put up its rate from 6 to 7 per cent.

14.—The National Bank of Belgium also advanced its rate from 4 to 5 per cent.

18.—Lord Palmerston died at Brocket Hall, Hertfordshire, after a short illness, in the 81st year of his age.

21.—Earl Russell appointed Premier.

27.—Lord Palmerston buried in Westminster Abbey. The Stock Exchange and many other public places closed in consequence.

BANK MOVEMENTS.

The liquidators of the East of England Bank have announced a third dividend of 2s. 6d. in the pound. It will be remembered that this bank failed about a twelvemonth back, with £600,000 liabilities, and the previous dividends have amounted to 15s. in the pound.

It is intimated that Mr. F. W. Russell, M.P., chairman of the National Discount Company, and Mr. M. H. Chaytor, deputy-chairman of the National Discount Company, have joined the board of the London Bank of Mexico and South America.

The directors of the British and Californian Banking Company, Limited have appointed Mr. Samuel Magnus their London manager.

Mr. Henry Davidson, of the firm of Messrs. Davidson and Co., of 8, Lime Street Square, London, has joined the direction of the Bank of Queensland.

The National Bank of Australasia, which was established in 1888, and has a large and prosperous business in the colonies of Victoria and South Australia, offers 10,000 shares of £4 paid up at a premium of £2. These shares will be on the London register, and the premium derived from them is to be added to the reserve fund, which will then amount to the handsome sum of £130,000. The Melbourne direction embraces the names of the Speaker of the Legislative Assembly and the President of the Legislative Council. The bank has thirty-two branches and agencies.

Notes of the Month.

THE FRAUDS ON THE CANTERBURY SAVINGS BANK.—At the Canterbury Quarter Sessions, on the 18th October, Samuel Greaves, aged sixty-nine years, late secretary and actuary to the Canterbury Savings Bank, was tried on the charge of embezzlement. The amount of the deposits in the bank was about £150,000, and the investigation showed that the prisoner's defalcations, which extended over 25 years, exceeded £9,200. The precise charges preferred against him were that he in November, December, and May last embezzled three sums of £80, £65, and £100 respectively, the property of William Delmer and others, trustees of the bank. The indictment contained a second count charging him with receiving money on behalf of the trustees and appropriating it to his own use. Mr. Addison appeared for the prosecution, and Mr. Francis for the prisoner. The prisoner pleaded "Guilty," and Mr. Addison briefly stated the circumstances out of which the charges had arisen. It appeared that the prisoner was appointed secretary and actuary of the savings bank 33 years ago at a salary of £40 a-year, which had been gradually increased to £200 a-year, in addition to house rent, gas, and coal. In 1840 he commenced tampering with the money of the bank by fabricating depositors' pass-books, from which the entries in the ledgers were made. The amounts paid by the depositors were correctly entered in their own pass-books, but in those which the prisoner placed before the clerk to copy into the ledgers the figures were so altered as to show the sums which he had succeeded in drawing from the different accounts. The entire deficiency was found to be, in round numbers, £9,300. Mr. Francis addressed the court in mitigation of punishment, and alleged that the prisoner was first led to tamper with the funds of the bank through losses in another business with which he was connected, and at a later period through speculations in which he embarked with a view to retrieve his position. In answer to the Recorder (Mr. John Deedes) Mr. Callaway said that the claims of all the depositors had been fully met, the trustees having used the reserve fund of £3,500 for that purpose. Property to the amount of £700 was given up by the prisoner, and his surety had paid £400, which, with the bank premises, made up over £6,000, so that the actual loss to the trustees was about £3,000. The Recorder sentenced the prisoner to penal servitude for six years.

THE WILL OF SIR JOHN LUBBOCK.—The will of Sir John William Lubbock, Bart., F.R.S., D.L., of Lombard Street, banker, High Elms, Farnborough, and Lenias, Norfolk, was proved in the London Court, on the 10th inst., by his son, Sir John Lubbock, Bart., the acting executor, power being reserved to Lady Lubbock, his relict, to prove hereafter. The personality was sworn under £120,000. The will is dated 3rd December, 1864, and the testator died on the 20th June last, at the age of sixty-two. Sir John has bequeathed to his wife his jewels and paraphernalia, also the furniture, wines, farming stock, horses and carriages, absolutely; and leaves her ladyship the use and enjoyment, for her life, of his pictures, paintings, books, and plate, which, at her ladyship's decease, will pass to his eldest son, the present baronet. He disposes of his share in the banking-house (Robarts, Lubbock and Co.), as follows: one moiety to his eldest son, and the other moiety equally between his sons Henry and Beaumont, they paying therefrom an annuity of £6,000 to his relict. To his sons Alfred and Edgar, each a legacy of £10,000. To his son Neville (firm of Cavan, Lubbock and Co.), and his sons Montague and Frederic, legacies are bequeathed amounting to about £50,000, under business arrangements, they also paying to his relict a like annuity of £6,000. To his daughter Henrietta he leaves a legacy of £4,000. His two married daughters, Mary and Diana, he states, are both sufficiently provided for. His real and leasehold estates in Norfolk and Kent and elsewhere he leaves to his eldest son. The residue of his personal estate he bequeaths to his relict.

THE PRESENT AND THE FUTURE OF THE MONEY MARKET.

It is quite clear that at the present juncture we are in a critical position with regard to the state of the money market. During the last three weeks we have passed through a period such as has usually, in the olden days, preceded a panic, but with a calmness that has denoted how vastly things within the past few years have altered in this respect. If previously to 1857-58 the rate of discount had been altered three times within one week, there would have occurred the most painful excitement that could have been witnessed. Could our forefathers be summoned from their graves and be informed that the Bank rate of discount was $4\frac{1}{2}$ per cent. on the 2nd of October, was then raised to 5 per cent.; that it was again raised on the 5th from 5 per cent. to 6 per cent., and on the 7th that it was once more raised from 6 to 7 per cent., and that these changes took place without regarding panic symptoms, they would scarcely believe the fact. Yet, although this has been the case, while still some slight apprehensions exist of the terms being maintained at the present point, if they are not increased, the feeling among bankers and others seems to be that no fear of alarm need be entertained, trade having latterly remained in a sound and steady condition. Besides, we are all now becoming so used to these occasional pinches that unless something is very rotten at the core no great damage can ensue.

The three great causes which have contributed to act upon the rate of discount are as follows:—First, there is the increased expenditure of the public, the higher rates of wages, and the more extended employment of labour; in the second place, a large quantity of gold has gone to Ireland to pay for cattle, the prices of which at the large fairs have been four and five pounds per head above those paid in antecedent years; the linen trade at the same time being in a state of great activity; and in the third place, the speculation in cotton at Liverpool has absorbed increased sums of money, the general credit of the operators not being so satisfactory as eighteen months or two years ago. This has led to the bankers throughout the Lancashire and adjoining districts keeping their money close in hand, as they have been enabled to employ it to advantage. The Fenian agitation in Ireland was also said to have exercised influence, but such an assertion is not traceable to any authentic source.

Enough, however, is here advanced to show the effect of the absorption and the causes which have produced it. The advance in the rate from $4\frac{1}{2}$ to 5 per cent., and from 5 to 6 per cent. were not thought anything of, but as merely indicating the altered situation of the Bank, and the change in the general

prospects of the money market. But when the turn from 5 to 6 per cent. was followed by the advance from 6 to 7 per cent., then it was perceived that the Bank's resources were being largely interfered with. Nevertheless, although the sudden and progressive rise was considered sufficiently ominous, it was received as a necessity, and the great hope expressed was that it would stay there and not be carried to 8 per cent. It was, however, well understood that the directors, if they imagined it requisite, would have gone to 8 or even 9 per cent. had their reserve of notes and stock of bullion not become stronger. The despatch of gold to Ireland took place at an unfortunate period, just prior to the payment of the dividends, and the absorption of notes and coin at that moment being general, the Bank directors, to keep the establishment in anything approaching a position, were compelled to obtain advances upon stock. By two large operations of this kind they were enabled to bring themselves into a tolerably satisfactory state, and the peril of a further rise in the rate appears to be temporarily delayed.

The Bank of France all this while, their resources being better and their loss of coin and notes being trifling, although their silk, oil, and corn hitherto exercised some effect, only carried their terms from 3 to 4 per cent., and have since not moved either way. That establishment, however, has been in a very exceptional situation the last two years. France has in a great degree escaped the pernicious influence of a joint-stock mania. No rampant desire is now exhibited there to subscribe for shares in public companies, and if undertakings are organised, they have been invariably introduced here to obtain the capital. To this extent, therefore, the Bank of France has benefited, not having lost any of her resources in the locking up of capital in unremunerative enterprise.

The last Bank of England return just published shows that the establishment is in a much healthier condition, and that the reserve and bullion is rapidly recovering. It was expected there would be a change for the better, but not one so important as indicated by the figures. We, however, scarcely find ourselves in this relieved position before there are grave surmises started of the probable revival of shipments of silver to Bombay and the East, and the outflow of gold to Brazil. The tocsin of alarm has been sounded very vigorously in some quarters; but while we would not wish the public to apprehend any difficulty, it is very likely considerable sums will be sent away. Should these be out of proportion of estimates the Bank directors may be compelled to adopt further measures of restriction; but if, as is said, the imports from America, Australia, and the West Indies shall keep pace with the outward shipments, the rate may remain

at its present quotation. While hesitating to predict the existence of extreme rates of discount for the remainder of the year, we do not think anyone can safely reckon on much lower terms than embraced in the range of 6 to 7 per cent.

TRADE OF THE UNITED KINGDOM.

THE Board of Trade returns for the month and eight months ended the 31st August were issued on the 28th September, and again present results of an unfavourable character, the falling off in the value of exports being more marked than for some time past, and must in a great measure be attributed to the general dulness of trade. The total declared value of exports for the month last past was £14,158,648, against £16,274,269 in the month of 1864, and £14,088,814 in that of 1863, which is a decline compared with the former period of £2,115,621, but an increase over the latter of £69,834. For the eight months of the present year the total was £102,400,696, against £108,716,219 in 1864, and £89,751,851 in 1863, which is a decrease as contrasted with 1864 of £6,315,523, but an increase over 1863 of £12,648,845. With regard to exports, these returns show an increase in alkali, beer and ale, coals and culm, cotton yarn, linen manufactures, machinery, metals, seed oil, wool and woollen and worsted manufactures. On the other hand, there has been a falling off in cotton manufactures, earthenware, haberdashery and millinery, hardware and cutlery, linen yarn, thrown silk, and silk manufactures. With respect to imports there has been an increase in animals, raw cotton, flax, guano, flaxseed and linseed, tallow, spirits, sugar, timber and tobacco, but a decrease in clocks and watches, hemp, wool, woollen manufactures, cocoa, coffee, tea and wine. In the case of cereals there has been an increase in the importation of oats, beans, wheatmeal, and flour, and a decline in wheat, barley, peas, and Indian corn. As respects provisions, the increase is shown in bacon and hams, and salt beef, and the reverse in salt pork, butter, cheese, eggs, and lard. The annexed tables exhibit the changes in the several articles enumerated:—

EXPORTS.

	1864.	1865.

THE STATE OF THE FRANKFORT MONEY MARKET.

THE insane cry for the increase of a converting medium whenever money fetches high rates finds an illustration here at this very moment. Our Frankfort bank disposes of a capital of 10 millions, a bank-note issue of 30 millions, and deposits on an average of 7 millions of florins. This enormous amount, almost a sixth of the resources of the Bank of England, is in ordinary times by far too large for the requirements of this place, and the more so as the bank has to compete in the discount market with the firm of Rothschild and private capitalists. For ten months in the year the bank is therefore compelled to look out for business at the various commercial towns of South Germany, and the consequence is that whenever an extraordinary demand for money arises here the funds of the bank are locked up and unavailable for the legitimate trade. This year the bank authorities committed the mistake of going the whole length with their issue of 30 millions before raising the rate of interest, and when the pressure came there were no funds left, and the consequence was that money became not only dear, but difficult to get at all. The directors had acted under the fallacy that while their stock of bullion remained unimpaired it did not matter whether their notes went out to the utmost limit of their issue. While money was cheap our leading bankers took it at bank rates or drew foreign bills at high exchanges and lent the produce out on mortgage of American bonds at high rates, and thus the very funds of the bank were made use of to stock the Bourse with United States' securities. While money was cheap in London and Paris, and the exchange uncommonly high, this was a lucrative business; but now the time having come, with increased rates in London and Paris, and exchanges declining, these transactions must be liquidated, and the mortgage bonds taken up by the holders.

Our Bourse is thereby thrown into complete "disarray," and the result would have been yet more calamitous if London and Amsterdam had not taken up last week large amounts of American bonds sent from here. As it is, rates as high as 12 per cent. had to be paid for carrying over American bonds to the next account. Now, the cry of the sufferers under their own folly is for an increase of the capital and the issue of the bank. It is to be expected, however, that our authorities will not sanction such a measure, and not make themselves responsible for the false step to fetch "money from the skies," for the sole purpose to enable speculators to bring yet another bundle of American bonds to this place, while there are plenty in hand to accommodate such capitalists as are desirous to invest money in them.

Monetary Intelligence.

REVIEW OF THE MONEY MARKET FOR THE MONTH OF OCTOBER.

THE state of the money market during the past month has been rather exceptional. The Bank accounts having fluctuated and the terms for discount having been carried from $4\frac{1}{2}$ to 7 per cent., the question was at one time, might there not be some disturbance in the general financial circles? Such an unfortunate occurrence has happily been avoided, and all are now getting once more into a healthy situation. Still the supply of capital is not so large as usual at this period of the year, and the pinch has been felt with some little severity. The transmission of sovereigns to Ireland, and a further considerable absorption of notes and coin in the provinces, are circumstances which have influenced the quotations, but for the moment they are a little more easy. It is not expected we shall see any great variation in the official *minimum* for the next fortnight, until it shall be ascertained what may be the extent of the shipments of silver to India and Egypt. The Bank of France have only advanced their rate 1 per cent., and their resources have only been affected in a very partial degree. The joint-stock banks allow 5 per cent. for money at call; $5\frac{1}{2}$ per cent. for money at 7 days' notice, and 6 per cent. for money at 14 days' notice.

Little or no change has occurred in English securities, but quotations have been fully supported. The tendency is not very decided just now, the death of Lord Palmerston and the re-organisation of the Ministry having kept transactions in check. Foreign securities have exhibited a moderate amount of business. The operations in any class have been limited, and within the last few days a general decadence has taken place. The speculative descriptions, such as Mexican, Spanish, Greek, and Turkish, are generally lower.

Railway shares have become weak through the late sales for the fall. Now the account is in course of adjustment, several of them are firmer, outstanding engagements having been closed.

Bank and finance shares are rather higher. A moderate good business is transacted in them, and through favourable dividends prices are sustained. The great feature however has been the gradual and progressive rise in the shares of Overend, Gurney and Co., which have gone to 9 $\frac{1}{2}$ to $\frac{1}{2}$ prem.

The produce markets have been pretty steady, with a fair extent of transactions. When there was a prospect of a further advance in the value of money the tendency was dull. There is now without doubt a much better feeling.

THE GRAIN TRADE.

NOTWITHSTANDING the large importation of all descriptions of cereals, the markets throughout the month have shown a gradually rising tendency. The recent wet weather has caused the samples brought to market to be in a less satisfactory condition than for some time past, particularly wheat. In consequence of the hardening tendency of prices, millers have bought but sparingly, and for other sorts business has also been very quiet. The latest official quotations were:—Wheat, 42s. 1d. per qr.; barley, 30s. 11d., and oats, 20s. 11d. per qr.; wheat is now 4s. per qr. dearer than at the corresponding period last year; barley 1s. per qr., and oats 10d. per qr. dearer.

The Gazette returns for England and Wales have been:—

Week ending, 1885.	Wheat Qrs. sold.	Weekly Average.	Duty.	Corresponding period Last Year.
		s. d.	s. d.	s. d.
Sep. 30	73,888	40 10	1 0	40 11
Oct. 7	76,387	41 1	1 0	39 8
" 14	89,312	41 11	1 0	38 9
" 21	78,404	42 1	1 0	38 1

The importations since the harvest of 1864 have been:—

	Wheat. Cwts.	Other Grain. Cwts.	Total. Cwts.
Sixty-two weeks ended 23rd Sept....	22,666,194	30,474,167	53,140,361
Four weeks ended 21st October ...	2,841,016	3,124,413	5,965,429
	25,507,210	33,598,580	59,105,790

And the weekly averages have been:—

	Wheat.	Other Grain.	Total.
Sixty-two weeks ended 23rd Sept. ...	366,000	491,000	857,000
Four weeks ended 21st October ...	710,000	781,000	1,491,000
	More 344,000	290,000	634,000

STATE OF TRADE.

The state of business in the manufacturing districts was very animated at the commencement of the month. Since the Bank rate was raised to 7 per cent., the speculation in cotton at Liverpool has subsided, and this has interfered with activity at Manchester and elsewhere.

NOTICES TO CORRESPONDENTS.

We have arranged in future to issue a double number in February and August, instead of formerly in May and November. This has been rendered necessary by the great increase of the meetings of the Banks and Discount Companies, which will be always carefully collected in the pages of the *Bankers' Magazine*. We shall also give the proceedings of the various Credit and Finance Companies as they are more or less associated with banking, so that our subscribers and readers can refer to them without difficulty. One or two communications stand over for want of room. Correspondents will please forward communications addressed to the Editor No. 8, Birchin Lane; subscriptions and orders as usual to Messrs. Groombridge and Sons, Paternoster Row, or Messrs. Waterlow and Sons, Carpenters' Hall, London Wall. **BANKING AND FINANCIAL ANECDOTES.**—It will be perceived from notice elsewhere, that the Editor of the *Bankers' Magazine* is collecting and arranging a series of Banking and Financial Anecdotes. Any contributions from subscribers and readers of the *Magazine* will be thankfully received, particularly if the subject-matter shall not have previously appeared in print. Nothing personal or offensive will receive publicity.

CIRCULATION RETURNS.

SUMMARY OF WEEKLY RETURNS OF BANKS OF ISSUE.

	Fixed Issues.	August 26.	Sept. 2.	Sept. 9.	Sept. 16.
136 Private Banks	£4,178,285	£2,826,563	£2,835,090	£2,872,861	£2,913,145
59 Joint-Stock Banks ...	3,226,257	2,741,207	2,745,297	2,780,689	2,831,949
195 Totals.....	7,404,542	5,567,770	5,580,387	5,653,550	5,745,094

Average Weekly Circulation of these Banks for the month ending September 16th:—

Private Banks	£2,961,915
Joint-Stock Banks	2,774,785

Average Weekly Circulation of Private and Joint-Stock Banks ending as above £5,836,700

On a comparison of the above with the Returns for the month ending August 19th last, it shows:—

An increase in the notes of Private Banks, of	£18,784
An increase in the notes of Joint-Stock Banks, of	26,582

Total increase on the month £45,366

And as compared with the month ending September 17th, 1864, it shows:—

A decrease in the notes of Private Banks, of	£109,810
A decrease in the notes of Joint-Stock Banks, of	14,101

Total decrease, as compared with the same period of last year £123,511

The following is the comparative state of the circulation as regards the fixed issues:—

The Private Banks are below their fixed issues	£1,316,370
The Joint-Stock Banks are below their fixed issues	451,472

Total below their fixed issues ... £1,767,842

SUMMARY OF IRISH & SCOTCH RETURNS TO SEPTEMBER 16, 1865.

The Returns of Circulation of the Irish and Scotch Banks for the four weeks ending September 16th when added together, give the following as the average weekly circulation of these Banks during the past month, viz.:

Average Circulation of the Irish Banks £5,938,593
Average Circulation of the Scotch Banks 4,305,561

Total Average Circulation of these banks for the past month £10,244,154

On comparing these amounts with the Returns for the month ending 19th August last, they show:—
Increase in the Circulation of Irish Banks £274,680
Decrease in the Circulation of Scotch Banks 44,168

Total increase on the month £230,472

And as compared with the month ending September 17th, 1864, they show:—
Increase in the Circulation of Irish Banks £610,520
Increase in the Circulation of Scotch Banks 131,205

Total increase on the year £741,725

The fixed issues of the Irish and Scotch Banks at the present time are given in the *Banking Almanac*, as follows:—

6 Banks in Ireland, allowed to issue... £8,354,494
13 Banks in Scotland, allowed to issue 2,749,271

18 Banks in all, allowed to issue £9,103,765

The following appears, therefore, to be the comparative state of the circulation:—

Irish Banks are below their fixed issue £415,901
Scotch Banks are above their fixed issue 1,556,290

Total above the fixed issue £1,140,389

The amounts of Gold and Silver held at the head offices of the several banks, during the past month, have been as follows:—
Gold and Silver held by the Irish Banks £2,078,603
Gold and Silver held by the Scotch Banks 2,376,797

Total of Gold and Silver Coin..... £4,455,400

Being an increase of £38,419 on the part of the Irish Banks, and a decrease of £17,859 on the part of the Scotch Banks, on the several amounts held by them during the preceding month.

CIRCULATION OF THE UNITED KINGDOM TO SEPTEMBER 16, 1865.

The following is the state of the Note Circulation of the United Kingdom for the month ending the 16th September, 1865:—

Circulation of Notes for the Month ending 16th September, as compared with the previous month:—

	August 19.	Sept. 16.	Increase.	Decrease.
Bank of England (month ending Sept. 13)	£22,178,744	£21,617,745	—	£560,999
Private Banks	2,843,131	2,861,915	£18,784	—
Joint-Stock Banks	2,748,203	2,774,785	26,582	—
Total in England.....	27,770,078	27,254,445	45,366	560,999
Scotland.. ..	4,342,689	4,305,561	—	44,108
Ireland	5,664,013	5,938,593	274,580	—
United Kingdom.....	237,783,760	237,498,599	319,946	605,107

The comparison of the month ending September 17th, 1864, with the month ending September 16th, 1865, shows an increase in the Bank of England circulation of £999,063, a decrease in Private Banks of £109,910, and a decrease in Joint-Stock Banks of £14,101; being a total increase in England of £875,153; while in Scotland there is an increase of £131,205; and in Ireland an increase of £610,520. Thus showing that the month ending 16th September, as compared with the same period last year, presents an increase of £875,153 in England, and an increase of £1,616,877 in the United Kingdom.

The return of Bullion in the Bank of England, for the month ending September 15th, gives an aggregate amount in both departments of £14,397,146. On a comparison of this with the Return for the month ending August 16th, there appears to be a decrease of £44,163; and an increase of £1,322,966 as compared with the same period last year.

The stock of specie held by the Banks in Scotland and Ireland during the month ending 16th September was £4,455,400; being an increase of £30,560 as compared with the Return of the previous month, and an increase of £326,797 as compared with the corresponding period last year.

THE BANKERS' MAGAZINE,

AND

Journal of the Money Market.

DECEMBER, 1865.

BANK CHECKS ON BANK CLERKS.

It is said that when companies are prosperous, there is little chance of getting shareholders to look after their own affairs, and that words of warning are only listened to after the occurrence of calamities which timely attention to them might have averted. If this were an invariable rule, we should confess to a conviction that the writing of the present article would prove a bootless task. Our banks are for the most part prosperous and healthy, their deposits large, the rate of discount high, credit in the main sound, and business active, without any very dangerous amount of speculation. At such a time, it may seem a work of supererogation to dwell seriously upon a matter of common-place and every-day detail. Yet one or two lamentable instances of defalcation induce us to urge upon the banking world the desirability, or rather the imperative necessity, of some more frequent and efficacious check upon the accounts of banking employes than is at present common. We are not now alluding to cases of the Pullinger and Durden class, in which one trusted servant has robbed his employers to the sum of fifty, or five times fifty, thousand pounds. Exceptional instances like these, especially when the delinquent is a highly-placed official, may be accounted for by saying that directors and shareholders must trust some one, and that if perverted ingenuity hits upon a new expedient for evading scrutiny, or escaping detection, there is nothing for shareholders to do but to make up the deficiency and bear their losses with what philosophy they may.

But our present concern is with offenders of a different class. We are not now dealing with the generals-in-chief, or the field

officers of our commercial army, but with its rank and file. We are not about to suggest a new check, but the more constant application of an old one; not to indicate a place which has hitherto been left unguarded, but to urge that a watch, which every one admits to be necessary, should be rendered constant and effective. As to the mass of our bank clerks, it will be universally admitted that an efficient system of checks is a matter, not only of business policy, but of moral duty. It cannot be concealed that the development of a highly organized system of banking, as of other business, has tended to augment the value and to diminish the proportion of prizes within the reach of salaried servants. Of the multitude of young men who enter as bank clerks, only a very few will ever rise above "the daily drudgery of the desk's dull wood." Their lives will be spent in the performance of routine duties, but duties nevertheless, requiring incessant vigilance of eye, rapidity of hand, and activity of brain; but whose faithful discharge will never lift them above a position at the best of modest competence, at the worst of decent poverty and struggling gentility. Cases sometimes occur which show that in many thriving establishments, the condition of the clerks is infinitely below this. The wise liberality which has led many employers to give bonuses on salaries, and occasional gratuities in periods of exceptional success, has not been universally imitated, and in consequence we hear every now and then of men whom a lifetime of exemplarily discharged service has failed to raise above the daily and painful pressure of actual poverty. We do not say that such things are common, though we do say that they exist, but it is not necessary to cite extreme cases in order to point the moral which we now desire to impress upon our readers. By every consideration of regard for their own interest, by every prompting of duty towards their employes, we hold it to be the duty of bank proprietors and managers to keep their clerks well in check. And the system of check, to be effective, should be not only complete, but constant. If not actually, those subject to it should feel that it is, potentially, applied every day of their lives under a thoroughly efficient supervision; certain lamentable instances of which we have recently heard, ought to be impossible. There is surely something wrong in a system which leaves uncounted money in the hands of an ordinary cashier, three or six months, without any control by superior authority. We can but think that this involves a needless and undesirable exposure of the servant to temptation; of the master, whether individual or company, to serious loss. And this latter consideration becomes the more important when we remember the

multitudinous opportunities which this remissness in checking accounts affords to dishonest servants ; the constant temptations to wrong doing, which it places in the way of honest ones. A clerk or chashier overhears a conversation about some operation on 'Change which is sure to send up some particular stock. He knows that the people who are talking are likely to be well informed, and he has in his till, money enough to make a good thing out of the speculation. He knows also that he has but seldom to verify his statement of the contents of his till, and he believes that long before it is checked again he will have been able to make "a good thing" for himself and family out of the knowledge chance has thrown in his way. The false step once taken, an innumerable multitude of witnesses show how inevitable is the day of doom. *Facilis decensus averni*. Whether, in any instance, those who have once crossed the line that divides the faithful from the unfaithful servant have found their way back undetected, we cannot say, but the records of our criminal courts abound with the names of men who have found their way to the felon's dock through indulging the fatal self-deception that borrowing their employer's money without his consent was not dishonesty if the borrower, who became so by thus abusing the confidence reposed in him, purposed to return what he had taken at some convenient but indefinitely delayed season. It is almost superfluous for us to say that we offer no apology for crime, that we extenuate not the offence of those who resort to a plausible but transparent self-deception in order to disguise from their own souls the gravity of the offence they commit, either under pecuniary pressure or under the influence of the common but delusive hope of becoming suddenly rich ; but we do desire earnestly to press upon the proprietors and managers of banking and similar establishments the importance of removing all unavoidable temptation from their servants' way. A man who would scout the idea of stealing a pocket handkerchief, may not always discriminate between borrowing and stealing money for which he is accountable. And the men upon whom the now too common laxity exercises the most deleterious influence, are precisely those who are most likely to have their integrity tried by hearing of apparently golden opportunities for enlarging their fixed and sometimes straitened incomes.

We may be asked what remedy we propose for the mischief on which we have been commenting. We reply that we have no new nostrum to propound, nor any patent plan for making people honest, to publish. We think too well of bank clerks to believe that any large proportion of them will ever yield to

temptation, but we desire to shield them by removing the circumstances which now make it formidable. We would simply recommend that the balances in every cashier's till be checked at least once in three or four days, instead of in as many months; and we would have the time of such checking uncertain, in order that no forethought might enable a defaulter to evade his superior's scrutiny. To the thoroughly honest and faithful clerk this would be no hardship, inasmuch as it would only the more conclusively prove his value; to the would-be pilferer it would be an insurmountable obstacle in the way of his nefarious designs, while to the morally weak and vacillating; to those who commit crimes through concealing their enormity from themselves; who become thieves and forgers, through calling acts of moral turpitude by specious names, the knowledge that discovery was not only certain but immediate, would act as an effectual safeguard, and would save from the felon's dock and the convict's prison many who, under the existing system, may get there through the combined operation of their own laxity of principle, and their master's negligence in practice. To avert these evils, to save the instruments of banking property from the wretched and hopeless and utter ruin consequent on a criminal conviction, is surely worth the expense of an extra salary, even if such should be found necessary to ensure the constant application of the check we have suggested. But if additional motive be wanting, it is to be found in regard for the shareholders' interests, which, as experience has shown, may be more easily and more seriously jeopardised through the loss entailed by the ruin of one, than by securing, at a comparatively small expense, the security of a great number.

THE AMERICAN GRAIN TRADE THROUGHOUT THE WAR

THE American grain trade, for several years past, has gained steadily and rapidly in bulk and importance; and, among the well-informed, the opinion is now pretty general that at no distant period the grain trade of England and of Europe will be greatly affected by it. The form which the question of the American grain trade assumes as regards the future and ourselves is, that the new Western lands are extremely fertile, admit of rapid and inexpensive appropriation and cultivation, and pay no rent. Or, put differently, while the English farmer without the profits of stock-raising, could not pay his way with wheat at 40s. per imperial quarter, the Western farmer might maintain himself, not in affluence certainly, but still comfortably,

were he to be paid no more than one shilling a bushel for wheat, or 8s. an imperial quarter. Hence the apparent prospect of an eventual deluge of American grain, and the appropriation of all the best English wheat lands by the grazier. But the Western farmer is from 5,000 to 6,000 miles distant from Mark Lane, and his wheat would be cheaply carried were it put on board lighters in the City Canal at a charge of 8s. more. That brings the cost to 16s. a quarter, against 40s.; and it may readily be imagined that 8s. a quarter for wheat in the Western States would not encourage and stimulate cultivation. The Western farmer would no doubt be well pleased with twice 8s.; which, with carriage, would raise the price at which Western wheat could be profitably offered in Mark Lane to 24s. That it is not so offered at the present time, merely proves that the Western supply is still deficient; and it by no means proves that the Western farmer is just now realizing the actual price paid by the English consuming classes. The disbanding of the Federal armies, and the settlement of great numbers of the soldiers on Western lands under the homestead law, may largely increase the production next year. The present proportions of the trade are to be gathered from the recent report of Mr. Isaac Newton, the Commissioner of Agriculture at Washington. The yield of 1863 and 1864 and its value is as follows:—

QUANTITY.				
	Bushels. 1863.	Bushels. 1864.	Bushels. Increase.	Bushels. Decrease.

Previous to the war, cotton was the great disturber and regulator of the exchange with the United States, which the grain trade has since become ; but become only until such time as the production of American cotton is once more fully under way. Throughout the war, if credits were to be put up in London, for exchange or other purposes, flour, wheat, and Indian corn were in request in New York ; and the Western store houses gave of their abundance to the extent required. But when the circumstances were urgent, or when the quotations in New York were in excess of those at Mark Lane, which they frequently have been, and now are, the precious metals were employed. Apparent as this has been to all observers, it strangely seems to have escaped attention, both in New York and the Western States, that one of the earliest and surest consequences of the cessation of the war would be a demand for many articles which were not thought of, or if thought of were not sought while the war lasted. The United States are just now large buyers of almost everything usually supplied by Europe ; and at the same time they are not in a position to render the Western grain supplies available for payment. Winter has set in, and the watercourses leading to and from the Western States are frozen. The consequence is, that no considerable quantity of grain can be brought forward until next summer ; indeed, it is at the moment doubtful whether the Atlantic seaboard cities are adequately supplied for their own consumption. Those cities are for once bare of stock when large accumulations ought to have been on hand, and the penalty incurred by them may be that of a considerable and inconvenient, if not embarrassing, drain of the precious metals. But, under the peculiar circumstances, the oversight is excusable. Men of means in New York, Boston, Philadelphia, Baltimore, and Portland never, perhaps, had greater reason for keeping their resources in a state of readiness for possible emergency ; for there is no saying to what results large specie drafts on the reserves of an inflated, and to some extent an unsound system of banking would shortly lead. Between the banking system of the Eastern States, which now obtains, and that which existed before the war, the points of comparison of a favourable character are not many. The old established system has been supplemented and overborne by another, the basis of which is the possession of certain forms and amounts of indebtedness of the United States Treasury. Upon the security of those forms and amounts of indebtedness there have been new issues of notes, and in a season of perplexity it would not be satisfactory to the American public, were the new issues

of notes inconvertible into coin on anything that might be offered by the holders.

The present position of the American grain trade is partly to be gathered from the imports into the United Kingdom for the nine months ending the 30th September, and partly from the movements on the Erie Canal from Buffalo and Oswego to Tide Water, at Albany, since the opening of the canal to the 4th October :—

AMERICAN GRAIN IMPORTS INTO THE UNITED KINGDOM.

1865	854,212 cwt.
1864	7,100,042 „
1863	6,726,742 „

ERIE CANAL RECEIPTS AT TIDE WATER.

	1865. Canal opened May 1.	1864. Canal opened April 30.	1863. Canal opened May 1.
Flour, barrels	490,600	670,000	848,600
Wheat, bushels	5,733,700	11,572,400	12,197,300
Corn, bushels	10,493,900	7,435,600	18,313,100

This falling off, it may be well to repeat, is in the main owing to the absence of margin as between the prices current in New York and Mark Lane. The utter absence of a margin rendered the New York capitalists and trade indifferent to extensive operations in grain, and the supplies of the Western States have therefore been, and are still, seeking a market in the impoverished Southern States. Those States are insufficiently provided with the necessaries of life, and will continue so until next harvest.

Throughout the war the American grain trade has been less seriously disturbed than might *à priori* have been imagined. The market has had an upward tendency, and higher prices have been established, and when these statements are made there is hardly another word to say. Four years of costly war failed to bring about confusion ; failed to unsettle anything connected with the sowing, the planting, the gathering, or the selling of grain. The prices in New York on the 3rd January of each year have been as follows :—

PRICES OF GRAIN IN NEW YORK.

	1860.	1861.	1862.	1863.	1864.	1865.
Flour, State, barrels	\$4.30	\$5.35	\$5.50	\$6.05	\$7.00	\$10.00
— Genesee	7.50	7.50	7.50	8.75	11.00	12.00
Rye flour	4.00	4.00	3.87½	5.45	6.65	9.00
Jersey corn meal	3.90	3.15	3.00	4.00	5.65	8.80
Wheat, Genesee, bush.	1.50	1.45	1.50	1.60	1.80	2.60
— Michigan	1.50	1.45	1.50	1.53	1.83	2.70
— Ohio	1.45	1.45	1.48	1.53	1.83	2.60

1340 *The American Grain Trade throughout the War.*

	1860.	1861.	1862.	1863.	1864.	1865
— Southern	1.45	1.45	1.52	—	—	2.75
— Western	1.30	1.38	1.42	1.48	1.57	2.45
— Chicago	—	1.18	1.30	1.33	1.48	2.22
Rye, Northern	.92	.75	.83	.96	1.30	1.75

— new Southern	.80	.72½	.68	.86	—	—

In round numbers prices doubled ; a note could buy the half of what it bought before. And this, instead of being surprising, is itself a marvel, for according to the report of Mr. Fenenden, the first successor of Mr. Chase at the United States Treasury, the Treasury expenditure exceeded the revenue by the following sums ; exceeded it in the form of greenbacks, legal tenders, certificates of indebtedness, &c. :—

EXCESS OF TREASURY ISSUES.

1862	\$422,802,068
1863	603,310,229
1864	604,601,370
1865	904,278,608
				<u>\$2,534,999,265</u>

An emission of Treasury obligations nominally equal to the gigantic sum of £507,000,000, effected no more than an advance, in State flour, from \$4.30 to \$10.00, and in Genesee wheat, from \$1.50 to \$2.60. The increase seems incredible ; that is in the light of past experience in such matters. We were led to think, that in something like the proportion that a circulating medium became redundant, and that gold appreciated, the prices of commodities would advance. But in the United States we have examples of speculation in gold, and of indifference to the amount of notes issued by the banks or the Treasury. Gold, notes, and commodities were in the main acted on and influenced by separate causes ; and those causes were chiefly whimsical “ quersings ” which sometimes painted in the dullest colours the course of events, the conduct of the Government, and the ultimate action of the “ people ” at the polling booths on the question of repudiation. And what has happened in the United States is precisely what would happen in this or any other intelligent country at the present day. Who, for example, has not wondered at the equanimity with which sudden and extraordinary advances in the Bank rate are borne ? People now exercise their minds ; in times gone by they knew nothing of sensations, and fled like sheep when the cry of wolf was raised. And the change is a wholesome and

hopeful one: for now-a-days a free people might venture on almost any sacrifice in a popular cause, without coming to serious injury by so doing. For the same reason a bad and unpopular cause could not now possibly succeed; because no credit and no reserve of specie would counteract and make head against the opprobrium with which it must be assailed. The lesson, therefore, of the American war, as exemplified by the grain trade, is, that the world is not exactly as it was when the Bank of England was restrained by Act of Parliament from paying its notes in specie. Some fifty years of peace, good government, and education have modified, if not wholly invalidated, some of the most orthodox of the money theories. The age has become highly practical.

BANKING AND FINANCIAL ANECDOTES.

No. XIII.

THE LONDON BANKER AND THE IRISH MOUNTAIN.

THE flourishing seaport of Sligo, on the north western coast of Ireland, is celebrated for the boldness and beauty of its scenery; a short distance from the town there is a perpendicular or slightly sloping mountain called Ben Bulbin, better known in Ireland than in England. About half a century ago a trader in Sligo, more remarkable for enterprise than integrity, having exhausted all the legitimate and ordinary means of raising money, conceived the idea of floating fictitious acceptances, and with this object he forwarded to his English banker, for discount, several bills of exchange drawn on and accepted by Ben Bulbin and Co. The London banker not being acquainted with the acceptors, wrote to his Irish correspondent for his confidential opinion of the firm. The latter, well known for his love of humour, and treating the inquiry as a joke, replied as follows: "The parties inquired about are long resident in this locality, and are *looked up* to as the most extensive land holders in this district, possessing within their own limits the varied resources of rich pasture, turbary, and inexhaustible supply of mineral wealth and an unrivalled water power. In character, Ben, the principal of the partnership, is what we call here a stiff-necked sort of fellow, and I have heard it said that if his cap were on, he would not take it off to Royalty. Although he is constantly imbibing mountain dew, a term often used to express illicit spirits, his steadiness is undoubted; and as to his stability, it

cannot be questioned—as in fact he is the principal of the chain of mountains which run through this and the adjoining counties.”

This description, though meant as a joke, was actually considered by the London banker as a *bond fide* communication ; and though the bills were actually drawn on Ben Bulben and Co., a mountain range near Sligo, they were actually discounted ; and the manager of the bank, when the fraud was discovered, was compelled to resign.

A PECK OF SOVEREIGNS.

AT Wisbeach, in Cambridgeshire, the bank of Messrs. Gurney and Co. for a long series of years was generally known by the name of the local partner, as “Peckover’s bank.” During the severe panic of 1825 one of the partners is said to have had recourse to the following expedient for maintaining the credit of the firm. He caused a peck measure to be placed in the bank window, and heaping up sovereigns on a false bottom, fixed near the mouth of the measure, announced to the satisfaction of admiring customers, by means of a placard underneath, that the bank had “enough to pay and a peck—over.”

ON THE BANK PROSECUTIONS FOR FORGERY.

MANY of the forged notes of the Bank of England were at one time so well executed, that the authorities of the Bank themselves were at times unable to detect a forged from a genuine note, consequently many of the former were paid. This fact having been disclosed in the progress of the case referred to in a former number, numerous petitions were presented to Parliament against the punishment of death, but no circumstance tended more to cause the suppression of the one-pound notes than the bold stand made by the late Stephen Curtis, Esq., who was one of the jury on an occasion when a prisoner was on his trial for forging bank notes and acquitted. The judge having asked for an explanation of a verdict of acquittal when the evidence against the prisoner was so clear, Mr. Curtis publicly addressed the judge, saying, “We do not believe the evidence given by the detective, who, it appears, was employed in entrapping the unfortunate prisoner to commit the offence, he and others arranging to receive ten pounds each for every person convicted by their evidence. We consider such an arrangement highly objectionable.” And he added the following personal remarks,—“My Lord, as the Bank authorities are often unable to detect forged notes, I am determined never to bring in a verdict of guilty against any one who may be put on his trial for such

an offence, and, acting on this determination, I have resolved, let the consequences be what they may, to acquit the prisoner." Soon after this public exhibition against the law, as it then stood, it was happily altered, transportation being substituted for death for forging bank notes.

THE OLD LADY OF THREADNEEDLE STREET.

MANY people are much puzzled to know why the Bank of England is commonly called "The Old Lady of Threadneedle Street;" it arose from the circulation of a caricature by the celebrated Gilray, dated May 22nd, 1797, entitled "Political Ravishment, or the Old Lady in Threadneedle Street in danger." In the caricature an old lady is represented seated on a box, which is supposed to contain the money of the Bank so safely secured that it is not to be touched.

The stoppage of payment in specie by the Bank of England in the month of February in the same year, and Pitt's measure for the issue of one-pound notes, gave rise to the satire.

A PLEASING TRAIT IN THE CHARACTER OF THE LATE MR. COUTTS,
THE BANKER.

WHEN Mr. Coutts was a single man and known to be very wealthy he was an object of attraction to more than one noble family having portionless daughters, in the hope that an alliance with the rich banker would be the means of relieving them from their pecuniary necessities, but these aristocratic matrimonial speculators were all deceived and confounded by the choice Mr. Coutts made of a wife in the person of Elizabeth Starkey, a superior domestic in his brother's service, with whom he lived many years in the enjoyment of every domestic comfort. His family consisted of three daughters, who respectively married the Marquis of Bute, the Earl of Guildford, and Sir Francis Burdett. Few men ever enjoyed in an equal degree with Mr. Coutts the confidence and esteem of his friends, or obtained, unaided by rash or political power, so much consideration and influence in society. His conduct to the clerks in the bank was the constant theme of admiration. Take the following instance. It was a custom with Mr. Coutts at every return of Christmas to have his clerks in his private room, one at a time, when he would address them in the kindest manner, would inquire after their health and that of their families, would then say, "let me see," then turning to his memoran-

1344 *Forgery by the Directors of a Finance Corporation.*

dum of the preceding Christmas, he would say, "Oh, Mr. —, I find your family consisted of your wife and four children, have you during the past year had any addition to your family?" If the answer was in the negative, he would say, "Well, sir, here is a cheque for £60, £10 for yourself, £10 for your wife, and £10 for each of your children." If the clerk was to say, Yes, sir, I have had a son or daughter, as the case might be, since last Christmas, he would then give him an additional £10, and this he did on each return of Christmas. Of course the gratuities were in addition to their ordinary salaries, which were on a liberal scale. In the case of a clerk who was unmarried he would present him with a cheque for £10, and this continued until his last illness prevented his attendance at the banking house. An example well worthy of imitation by all bankers, for it is impossible to estimate too highly the value and importance of the gentlemen whose daily business it is to carry out the immense complicated transactions of our banking institutions throughout the country. If we view them as a body of men daily and hourly unreservedly intrusted with immense sums of money, we are led to place a high value on the integrity and fidelity with which their several duties are performed.

DANIEL O'CONNELL AND THE BANK TELLER.

THE late Daniel O'Connell was proverbial for his pungent remarks both in the House of Commons and in the law courts of Ireland. On one occasion he was counsel for a trader who was defendant in an action brought by one of the Irish banks. When cross-examining one of the witnesses for the bank, Mr. O'Connell is said to have asked the following question:—"What position do you occupy in this establishment?" "I am a teller," replied the clerk. "Now, on your oath," said Mr. O'Connell, "if you were made cashier, would you become 'a runner'?"

FORGERY BY THE DIRECTORS OF A FINANCE CORPORATION.

At the Bombay Criminal Sessions, before the Hon. Mr. Justice Anstey, on the 29th September, Dyal Jayraz, Khuttow Ludha, and Cullianjee Ludha, were arraigned for forgery, abetment of forgery, and abetment of criminal breach of trust. They pleaded not guilty.

Mr. McCulloch and Mr. Green conducted the prosecution; Messrs. Howard and O'Leary defended the first prisoner, Messrs. Mayhew and Cooper the second, and Messrs. Bayley and Hayllar the third.

The facts of the case were as follows :—In November, 1864, an association was formed under the designation of “The Commercial Finance and Stock Exchange Corporation.” Six names appeared in the list of directors, amongst which were those of the first and second prisoners; the third prisoner was not at that time associated with the corporation, but became a director subsequently. They did no business till March, 1865, and the first minute on the records of the association gave notice that they were to commence business in that month. During the interval several directors entered into an agreement to speculate in shares; especially in shares of their own company. By that agreement the first and second prisoners were to advance two lacs of rupees for speculation in shares. When the calls on the shares of the corporation were first paid, the association opened an account in the Central Bank; and the first and second prisoners, as directors, were authorised to draw from the Central Bank, on account of “Commercial Finance and Stock Exchange Corporation.” In March Mr. Taylor, the chairman, retired from the directorate, and up to the moment of his retirement, not one transaction of any kind whatsoever was done on behalf of the corporation. Yet, notwithstanding that there were no transactions, the six directors had been trading, and the loss of Rs. 3,39,442 was the final result of their speculations. Having exhausted the two lacs of rupees, they wanted more funds, and obtained it from the funds of the corporation by drawing Rs. 2,29,614, from the Central Bank, to make up their losses while speculating in shares. No business was done till March, and after a few more entries on the 11th of March, that set of entries was neglected, and the directors commenced a new account in December. These new entries were made at the request of the first and second prisoners, and another director named Toolseydass Dewjee; but Toolseydass having been made acquainted of his danger retired from the company, and furnished information which led to the prosecution of the prisoners. Nothing was known till the 10th of July, when it appeared from the accounts that a sum of Rs. 3,39,000 was lost to the corporation, in addition to possessing some 4,000 of their own shares, which were worthless. The conspiracy of the speculators involved the directors, and the second prisoner concocted a scheme which led to the present prosecution. He got some blank forms of agreement for the purchase of shares, then took them to the chairman, and after having obtained his signature to them, he took six of those blank agreements to a broker and got him to fill in, on the 18th July, the names of certain alleged vendors, the dates, and number of shares. The prisoner furnished the names which the broker inserted; and the third prisoner was in the room when the documents were forged. The agreements were in that form applied to the purchase of shares of the corporation, and the manager was instructed to enter them. It was on the 18th July when the manager was instructed to enter the purchases of February. The next thing done was the compromise of that purchase by the first prisoner, and to the second and third prisoners were granted a general power of attorney for the corporation. Thus Dyal, the first prisoner, obtained the sum of Rs. 2,45,300 as the net result of the transaction.

These facts having been proved, by evidence,

Mr. Howard, in addressing the jury on behalf of the first prisoner Dyal Jayraz, submitted that the case for the prosecution was not proved. The charge extended over about fifty counts, which his lordship had properly termed “oppressive;” and one could not help entertaining a doubt, where it took so much time and so many words to describe the charge, whether it was one on which they could convict the prisoner. His learned friend, the leading counsel for the prosecution, said the

prisoners were prominent and respectable persons, and it was no doubt a matter of interest that they were so. He did not for one moment ask them to give the prisoners any more respect on that account, but, on the other hand, desired that they would give them no less. The question, they were told by the counsel for the prosecution, was whether certain documents were executed in February, when they bore date, or in July; and he (Mr. Howard) should call evidence to prove that they were executed in February and not in July. And it was a matter of remark that the man who was said to have written these documents, Luckmedass Dharsey, had not been called by the prosecution. They had not called the very mehta who wrote the agreements: and why, because when they examined him before Mr. Banton, the chief magistrate, he flatly contradicted the case of the prosecution, and said the documents were written in February. His learned friend had shown a very good acquaintance with criminal proceedings, and he knew the importance of having a reply, and that he could not have a reply unless the defendants called evidence; and that was the reason that he had thrown upon them the obligation which—with deference to his lordship—according to the understanding of the profession, always devolves upon the prosecution of calling all the witnesses who were examined when the charge was first brought. Mr. Howard then proceeded to criticise most severely the conduct of Toolseydass Dewjee, who, he said, having made his exit from the scene as a scoundrel, appeared again as an informer. And that was the man upon whose evidence, if it was to be believed, the prisoners might be sentenced to transportation for life. Supposing what he alleged to be true, he himself was worse than the prisoners; for he had committed two crimes instead of one: the villain and the traitor was surely worse than the simple villain. He called upon the jury to discredit the evidence of one who came there covered with infamy, and who desired to ruin those men who—according to his own statement—had been the partners of his guilt. The learned counsel then contended that the evidence of Toolseydass was not only to be discredited on account of his own infamy, but by the other evidence for the prosecution; and in support of this assertion he quoted the evidence of Manockjee Hormasjee and of Kursondass Kutohra, the broker. How unlikely it was that any broker in Bombay should put his name to bank agreements, and then return them to the person who gave him them. As for Kursondass, his opinion was that he was an accomplice in the fraud, and therefore he could not strengthen the case for the prosecution at all. And when they mentioned Toolseydass and Kursondass, all the evidence had been mentioned that touched the prisoners; the others did nothing but fill up the story. Mr. Howard went on to say that the suggestion he had to make was, that Dinshaw Ardesseer Daver and Toolsedass Dewjee were the original contrivers of the fraud, and that Dyal Jayraz, in ordering the entry to be made in the minutes, merely did so at their direction. They would put in the evidence that was taken before the magistrate, and he thought they would be much struck with the development of the case since that inquiry. It was wonderful how Toolseydass's story had been touched up since that time, and its weak points improved. Considering the great number of shares the prisoners had in the company, their motive for cheating the company—which was, in fact, cheating themselves—was by no means so clear as that of the prosecutor, who had not nearly so many shares. It would be sworn that the contracts were not written by the orders of Dyal Jaraz, but by the orders of Toolseydass. That there was attempt at fraud, he was perfectly certain; only he differed from the prosecution as to the

persons on whom the fraud ought to be fixed. There was one who, by his own confession, was a criminal, but whether the persons whom he accused were connected with the fraud was another matter. Mr. Howard concluded by saying he would put in the depositions made before the magistrate, and would read the evidence of Luckmedass Dharsey, which he was proceeding to do when Mr. McCulloch interrupted him, objecting to his doing so on the ground he had already stated.

Mr. Mayhew then addressed the jury on behalf of the second prisoner, Khuttow Luddha, and began by stating his theory of the motives which had brought this prosecution about. He frankly admitted at starting that those six documents were intended to be used by the man whose name stood at the foot of them and by the prosecutor himself, as against the company, and for their own advantage. That, he thought, was the irresistible inference from the facts which the prosecutor himself had deposed with reference to Dinshaw Ardaseer Daver. Those two, with Kursondass Kutchra, they found working together, from the commencement of the company, as the secretary himself said, in constant conversation with him with reference to the affairs of the company. Looking at the state of affairs both then and afterwards, they would not find it an unreasonable supposition that the contracts were in reality put in writing by Dinshaw and Kursondass, with the knowledge of Toolseydass, in the month of February and quietly kept back for their own purposes until the time came at which they could make their claim against the company. He endeavoured to show, too, that it was also quite reasonable to suppose that the prisoners at the bar (Khuttow and Cullianjee) acting on the ready trust which they had all along had in Dinshaw as the man of business—merely did their part at the dictation of Dinshaw. And it was possible, that, pressed afterwards by questions from the prisoners, Dinshaw and Toolseydass felt obliged to turn about and make this charge against them. The real story the jury could never get to the bottom of, but they must be left to sift the matter in the dark, and perhaps they would see reasons to come to those conclusions. Mr. Mayhew pointed out that Toolsedass had proved himself to be unworthy of credit by practising an imposition on the jury, in saying that he did not understand English, when it was proved in the evidence that he could both speak and read English. He concluded by expressing the opinion that the evidence must irresistibly lead the jury to the conclusion—albeit they must be convinced there was a fraud, yet that it was not a fraud committed by the prisoners, but endeavoured to be palmed off upon them, the real actors seeking to make them the victims.

Mr. Bayley next spoke on behalf of Cullianjee Ludha, the third prisoner, and began by impressing upon the jury that his case differed in the most material points from that of the other two prisoners. Cullianjee was not an original partner in the share speculation, and was not, as Toolseydass had said, even a sub-partner with his brother, neither could it be said that he was indebted a single pice to the corporation. Mr. Robert Taylor—that model chairman of an association, a gentleman who came out at Rs. 200 for Messrs. Watson and Company—said he knew nothing whatever of Cullianjee. Not only was Cullianjee not a sub-partner with his brother in the slightest degree, but it was proved, even from the evidence of Toolseydass, that he was separate from his brother in food, worship, and estate—and that proved a great deal. All these things showed that there was a marked distinction between his case and that of the other two prisoners. The theory of the prosecution was this, that the fraud and the conspiracy were concocted for the purpose of enabling parties who had no money of their own, to meet their engagements and perhaps make a little profit; but

this theory could not apply to Cullianjee, who was a man of wealth and had not for a single moment owed a pice to the company. Therefore, he (the learned counsel) asked them to look upon him when he came upon the stage on the 18th July—when he first acted as a director, having been appointed only three days before—as one who came with clean hands. He then stated that Cullianjee was and is a judgment creditor of the prosecutor Toolseydass. He lent him Rs. 20,000 early in March of the present year, and sued him for payment, and on the 26th June decree for payment was obtained with an order for immediate execution. In consequence of some intercession, execution was delayed, and Cullianjee was persuaded by Toolseydass to lend him Rs. 11,000, a mortgage being executed in his favour upon some property belonging to Toolseydass on the 8th July. This was only seven days before he became a director, and Toolseydass in executing this mortgage in his favour must—if what he averred was true—have known that he was at that time engaged in a fraudulent conspiracy. Such conduct it was very difficult to understand. Then, coming to the appointment of two directors on the 15th July, he could not see how it was necessary for Dinshaw or Toolseydass, or any other person carrying on this fraud, that the directors should be appointed. Again, it was almost impossible to believe that Kursondass Kutchra came to the meeting on the 15th July merely to summon Toolseydass to his father's sickbed. Kursondass, it was said, filled up the blanks for those six agreements, at whose dictation? At Cullianjee's? No. And thus they saw again how distinct his case was from that of the others. It was Dyal and Kuttow, and those two alone, who gave instructions to Kursondass to fill up these blanks. Cullianjee was charged with forgery; but a man could not be charged with forgery unless he had done something. The learned counsel having referred to points indicating as probable that Cullianjee knew nothing at all about the transactions in question before the 18th July, proceeded to show that probably he merely signed the minute in obedience to the direction of his co-directors; and expressed his belief that the jury would see that he could not in the slightest degree be implicated with any body else. He could have no motive whatever either being indebted to the company nor to anybody else—for entering into any wicked conspiracy or fraud, such as that charged by the prosecution. He was a gentlemanly man, of good standing, and of high social position among his neighbours and his fellows. Monetary motives he could have none, for he had plenty of money of his own. To screen his brother it could not have been. To aid the other in perpetrating the crime it could not have been; for they could have done it without him. Prosecutor had brought him into the case through spite or revenge, or on account of the heavy debt under which he lay to him.

About eight witnesses were examined on behalf of the prisoners; some of whom gave their evidence in a most unsatisfactory manner. One of the justices of the peace, Mr. Luckmidass Khimjee, was severely reprimanded by the learned judge for having failed to inform the police about the plot which was made against the third prisoner, and of which he was cognizant.

The last witness examined was R. B. Barton, Esq., acting senior magistrate of police, who stated, that he committed the case for trial without taking any evidence for the defence. The prisoners were represented by their counsel. Neither Luckmidass Khimjee, nor anybody else, disclosed to him any plot against the third prisoner. Luckmidass Dhareey was treated by the prosecution as a hostile witness when at the police office.

Mr. Maculloch, the leading counsel for the prosecution, then replied at considerable length. He contended that the evidence for the prisoners had

totally failed to support the case for the defence; and stated that the reason why he did not call Luckmidass Dharsay was that he did not believe a word of his evidence, and, consequently, could not ask the jury to believe it. All the evidence as to the filling up of the blank forms had been brought forward by the prosecution; and it did not matter when the blank forms were prepared. Referring to the question of motive on the part of Toolseydass, he here remarked that it was of no consequence what his motive was. And why did the counsel for the defence, after having advanced as part of their case that the contracts were fraudulent and fictitious agreements, bring forward evidence to prove that they were *bona fide* agreements? The learned counsel then called the attention of the jury to the case for the prosecution as unaffected by the evidence for the defence, and dwelt upon the different points at some length.

His lordship afterwards proceeded to sum up the evidence, and in doing so read the depositions of the different witnesses *in extenso*; interspersing them with frequent comments and explanations of his own. He first went over the evidence of Mr. Weatherhead, Manockjee Hornusjee, and Mr. Robert Taylor, and afterwards observed that the jury would see, that if any of the transactions in question had occurred before the 23rd March, they must have been done underhand or fraudulently, and that was one great step gained in the discovery of the truth. The persons who ought to have known of them were kept in the dark. From the evidence he had read, they saw the position of affairs down to a period later than that when those six contracts were purported to have been written. That date was the 28th February, and they would see that down to some time after that the corporation had not commenced business. The chairman was ignorant of its having commenced business, the first secretary and his successor were also ignorant; so if they believed that, in spite of all this, the prisoners and their associates had been purchasing shares at that time unknown to those whose duty it was to control them, that alone was a very reprehensible breach of trust and was a point gained towards the elucidation of what was to follow. After referring to various remarks in the speeches of the counsel for the defence, his lordship said he must inform the jury that accuracy of dates was of no consequence whatever in proving an allegation of crime. A man might be indicted for a crime of murder committed on the 1st of December, though it was perfectly well supported in evidence that it was done on the 1st of November. Therefore, if they thought, though he could not see how they could come to that opinion, that the fabrication of those agreements was in February and not in July, their verdict must still be the same—a verdict of guilty—if they were kept back for the purposes for which they were alleged to have been used. His lordship then proceeded to read the evidence consecutively, omitting, of course, what he had read already. In going through the deposition of Toolseydass Dewjee, his lordship remarked that amongst all the minutes of the corporation there was only one minute referring to particulars of agreements made in the purchase of shares by the corporation, and that solitary exception was that very minute of the 18th July. Of this transaction there was no previous entry; there was no allusion to it to be found in any document whatever, or in any subsequent entry. The only entry referring to it was the entry which was impeached as fraudulent, and which formed the subject of the last five counts in the indictment. Further on, his lordship alluded to the remarks by counsel in regard to Luckmidass Dharsey, observing to the jury that they must understand, that, when a prisoner was brought before a magistrate he was not upon his trial. It was merely for investigation, and it was the duty of all persons concerned, who

thought that they could bring witnesses, to bring them, in order that the facts might be investigated. Accordingly, this man, who was said to have written these forms was very properly sent for by Mr. Barton, at the instance of Mr. Cleveland, the government solicitor, but he was treated from first to last as a hostile witness. The learned counsel who prosecuted for the crown on the present occasion, had one duty to perform; the government solicitor who made the investigation—for it was no more—before Mr. Barton, had quite another duty; and it was as right for Mr. Cleveland to bring Luckmidass before the magistrate to see what he would say, as it would have been wrong for the learned counsel for the prosecution to have done so in that court. Touching the question as to whose mehtas it was who wrote the agreements, his lordship said it was for the jury to consider whether the man whose mehtas they were gave them the instruction, or the man whose mehtas they were not. If they believed Luckmidass it was Dyal's mehtas who wrote them out, not by Dyal's direction, but by that of Toolseydass; and more, that that was not the first time this was done. And yet Dyal's name was to the minute of the 18th July which distinctly referred to these very agreements. He left it to the jury whether they should believe a syllable of this. After reading Toolseydass's evidence, his lordship said that if they believed it as it stood, as the evidence of an accomplice, they would return but one verdict, and that was a verdict of guilty on every one of the counts, because there was forgery, using forged documents, conspiracy and criminal breach of trust. All these crimes had been committed if they believed that evidence. Forgery, he informed them, consisted as much in the falsification of documents, in other respects genuine, as in the fabrication of an entire document. Thus, if for fraudulent purposes a man falsified a paper in his own handwriting to the injury of another, that was forgery, though it was his own signature: but it was much more so if it was the signature of some one else. So that inasmuch as these papers—even if signed, as he supposed they were, by the persons whose names they bore—contained false statements, false names, false rates, false numbers of shares, and false transactions, put in for the very purpose of injuring the corporation, and benefitting the conspirators at the expense of the corporation, it was as much a forgery as if Dinshaw Ardesser Davur was the only injured man. His lordship, referring to some remarks which had fallen from the counsel for the defence to the effect that Dinshaw had probably got a hint from Toolseydass to make his escape, directed the attention of the jury to the evidence of constable Jackson, to see whether it was proper to cast such an aspersion on Toolseydass who had enough aspersion to bear already. His lordship remarked that Manockjee Hormusjee had cleared himself in his evidence of all connection with this disgraceful fraud; and he pointed out that his evidence and that of Toolseydass fully agreed, and had the jury any reason for doubting the accuracy of either? It was for them to say if the witnesses who were called to contradict Toolseydass had contradicted him in any single particular. Before concluding, his lordship remarked that the doctrine had been broached that the man who turned traitor to those who trusted him was a double traitor. That was a monstrous doctrine. It was the duty of the thief to betray his accomplices. It was either an innocent or a laudable act, and he was no good citizen who taught to the contrary.

The jury retired for about twenty minutes, and returned with a verdict of "guilty" against the prisoners on all counts of the indictment, but recommended Gullianjee Lodha to mercy.

His lordship sentenced Dyal Jayras and Khuttoo Lodha to transporta-

tion for life; and confiscated their movable and immovable property to the crown. Cullianjee Ludha, having been recommended to mercy, was sentenced to four years' rigorous imprisonment.

Legal Miscellany.

THE BIRMINGHAM PENNY BANK.

MR. COMMISSIONER SANDERS delivered judgment at the Birmingham Bankruptcy Court on the 15th November, in the matter of the late Birmingham Penny Bank.

He said the application before the court was one on the part of James L. Johnson, Benjamin Hawkes, George Barlow, and George Wallington, for their orders of discharge, under the 110th section of the Bankruptcy Act of 1861. These four persons were, in 1852, directors, together with several other individuals, in a concern or speculation called the Birmingham Penny Bank. The other individuals were Henry Suckling, George B. Haynes, James Grainger, J. Blake, James Macbride, and William Chorley. Henry Suckling had quitted Birmingham; George B. Haynes had become bankrupt, as likewise had James Grainger; no particulars appeared as to Blake, and Wm. Chorley and James Macbride retired in 1858. Other persons of greater note were also connected with the penny bank. Mr. Scholefield, one of the members for the borough, permitted himself to be advertised as president; Mr. William Chance, jun., Mr. T. J. Winfield, Mr. Goodrick, and Mr. Baldwin lent their names, and attended more or less to the affairs of this so-called bank. As to how this bank originated, how its affairs were conducted, what was its capital, and what were the status and means of the directors—the bankrupt, George Barlow, stated in his evidence: "A few persons met together and agreed to form the bank. I think it was Chorley who asked me." This witness and director was a journeyman coachpainter. He confessed that, if he was solvent, he had not £20 over. Of the other directors two were hairdressers, and had since become toy dealers, one was a tailor, and there was certainly no reason to believe that the rest were of higher position or more ample means. With these men as directors the bank commenced, and it commenced avowedly without any capital whatever. Delusive and hypocritical advertisements, professing great interest in the welfare of the poor, attracted many depositors to the bank, and a large sum was drawn from the pockets of the thrifty and deserving poor, who were desirous of laying something up for a day of distress or for their surviving families. The money received was soon applied by the directors in advancing loans to themselves, in paying themselves salaries, and in establishing new and speculative companies, of which they were to be directors. No balance-sheet of the general affairs of the bank was made out for many years. No audits were made except occasionally by the directors themselves, and the manager took what money he pleased for current expenses, without control or investigation by the directors. Under these circumstances it was not to be wondered at that the concern closed in bankruptcy, nor that the loss sustained by the poor and deceived depositors was, and eventually would be, so great. That something was wrong either in the management or constitution of the bank—probably in both—must soon have become matter of suspicion to Mr. Scholefield, M.P., for the bank being started in 1850, he resigned his post as president in

1852, having first consulted an accountant, who reported that the bank was not safe. There could be no doubt that Mr. Scholefield was well advised in resigning. But one would have hoped that the benevolence which prompted him to accept the office for the benefit of the poor would have led him to forewarn them of their danger by publicly announcing his resignation. In this he failed, and the impression that he was still president continued to give effect to the delusions practised upon the public. In like manner the vice-president and trustees one by one resigned, and in like manner they left the public in ignorance of their having done so. Every circumstance, therefore, connected with this bank was matter of indignation or regret—indignation for the gross frauds practised, and regret at the indifference and want of pity shown by the president and officers of the bank to the saving poor, who suspected nothing wrong. But the case had been taken out of court by the assignees under the 110th section of the act of 1861, there being no hope in their minds of enforcing a remedy against any other parties to the fraud than the present bankrupts; and they did not desire the punishment of the latter, being content, in consequence of an arrangement made with them, to accept their accounts as satisfactory. If it were really true that no remedy could be found against the other parties, or if the remedy when found, would be too expensive to be attempted, he could only say that it was a matter grievously to be regretted. But that court had no further control or discretion in the administration of the assets of the bankrupts. With respect to the conduct of the bankrupts, a late decision of the Lord Chancellor Cranworth showed that the court had power to inquire into the question of conduct before granting the discharge applied for under the 110th section. The court might well exercise this jurisdiction when called upon to discharge the present bankrupts. But he could not help feeling that it would not be just to punish them when other parties in this bank, whose offences were equally grievous, escaped punishment. The bankrupts should, therefore, be discharged.

The liabilities of the late Birmingham Penny Bank were £9,448. The assets were between £3,000 and £4,000.

THE LEEDS BANKING COMPANY.—FRANGE'S CLAIM.

THIS case was decided in the Court of Chancery on the 14th November, by Vice-Chancellor Kindersley.

He said this was an adjourned summons arising out of a claim under the winding-up of the Leeds Banking Company by Messrs. Prange to be admitted as a creditor in respect of two bills of exchange, one for £500 and the other for £564, and of which they are the holders, and of which the banking company were the endorsers. The claim was resisted by the official liquidator on the ground that sufficient notice was not given of the dishonour of the bills, while on the part of Messrs. Prange it was contended that what took place was a sufficient notice under the circumstances. The first bill was for £564 at three months, dated the 4th of August, 1864, drawn by Watts and Co. upon Early and Smith. It was endorsed by several persons, and among others by the Leeds Banking Company, in these words, "In need at Smith, Payne, and Smith's, London," who were the London agents of the Leeds Banking Company. When the bill fell due it was presented to the London and County Bank, which was the bank referred to by the acceptor, and dishonoured. On the same day it was

presented at Messrs. Smith, Payne, and Smith's, and, as the Leeds Banking Company was then under winding-up, of course it was refused payment there also. It was continued on the part of Messrs. Prange that the presentation of the bill to Messrs. Smith, Payne, and Smith was a sufficient notification to them, and therefore to the Leeds Banking Company, that the bill had been dishonoured. There was no other notification. It was said that where a bill was refused payment at the bank indicated by the acceptor it was not necessary for the holder of the bill to give notice to the acceptor that the bank he had indicated had not paid the bill, and that there was an analogy between this case and that. But in this case the analogy failed. Then came the question whether Messrs. Smith, Payne, and Smith were agents of the acceptor. The endorsement was "in need," meaning in case of need, and that if the holder had occasion to apply to the endorser for payment he might apply to Smith, Payne, and Smith. The endorser merely pointed out a place to which the holder might refer for payment if he liked. But Smith, Payne and Smith were agents merely for the purpose of obtaining payment—not for the purpose of receiving notice of dishonour; therefore, it appeared to him impossible to hold—because the bill was presented to Smith, Payne, and Smith, and payment was refused by them, that there was implied notice to the acceptor that the bill had been dishonoured. In other words, Smith, Payne and Smith were not by the words of the endorsement constituted the agents of the acceptor so as to make refusal of payment by those bankers notice of dishonour to the acceptor. Another contention was that the presentation of the bill to Smith, Payne and Smith, was an implied notice to them that the bank indicated by the acceptor had refused payment; but on that point also he thought the contention failed. On these grounds it appeared to him that what had taken place did not amount to a sufficient notification to the acceptor of the dishonour of the bill. With regard to the second bill there was actual notice, but the question was whether the notice was given in sufficient time. The bill fell due on the 13th, but that being Sunday, it was presented to the London and County Bank on the 12th, and refused payment by them. On the 14th it was presented to Messrs. Smith, Payne and Smith's, and also refused payment by them. On the same day Messrs. Pranges' agents wrote to them informing them of the dishonour. They received the information on the 15th, and wrote to the official liquidator on the 16th, who received the letter in due course on the 17th. It was alleged that a day might be taken for each step in the transaction. It really came to this, whether a day should be taken up in communication from the agent to the principal in addition to the day allowed for communicating with the acceptor. It appeared to him that no such day was allowed, and the consequence was that there was a failure of one day in giving notice to the official liquidator, and so the claim could not be allowed. It was a proper case to bring before the court, and the official liquidator must have his costs out of the assets of the company.

THE BANK OF GIBRALTAR AND MALTA WINDING UP.

THIS case was argued in the Court of Chancery, before the Lords Justices of Appeal, on the 17th November.

It was an appeal from a decision of the Master of the Rolls upon a petition by four of the contributors to the liabilities of the above company, to have the company's affairs wound up by a compulsory order from the court, or, at any rate, under the supervision of the court. The applica-

tion was based upon the 138th and 165th sections of the 25th and 26th of Victoria, cap. 89, which gives the court power to call the public liquidators of a public company to account when exercising their powers under a voluntary winding-up order, as in the present case. The object of the application appeared to be to impugn the liquidators' conduct in reference to a sum of about £1,700 allowed in respect of the original promotion of the company, and expenses connected therewith. The Master of the Rolls declined to grant the relief sought, on the ground that the petitioners' remedy for the alleged grievance complained of was by bill for an account in the regular way.

Mr. Jessel and Mr. Holmes were for the appeal; Mr. Baggallay, Mr. Southgate, Mr. John Pearson, and Mr. Fischer for the respondents.

Lord Justice Turner, after briefly alluding to the facts, said that the appellants were a minority of the entire body of shareholders, that the company was nearly wound up, and that little or nothing remained to be done but to distribute the funds in hand. As it appeared to him, there were three questions to consider—first, whether the company ought to be wound up compulsorily by the court; secondly, whether it ought to be wound up under the supervision of the court; and, thirdly, whether any order ought to be made upon that part of the prayer which was directed especially against the acts and alleged breaches of trust of the officers and directors. The appellants did not desire a compulsory order if they could obtain a supervisory order, and the question was whether they were entitled to such an order. Upon that point, therefore, he thought that the 147th section left it absolutely to the discretion of the court whether such an order should be made or not; and nowhere, as far as he could find in the Act, was there any definition of the circumstances under which the legislature considered such an order proper. In this instance the case rested upon the alleged breaches of trust, but he thought that these might be reached, if not by the 165th, at all events by the 138th section, and therefore these charges afforded no ground for such an order. The legislature obviously intended that the wishes of the majority of the shareholders should be regarded, and the evidence showed no such wish on the part of the majority, but rather the contrary. As to a compulsory winding up, he thought also that it was properly dismissed, because, among other reasons, there had been a resolution of the company for a voluntary winding up, and he must hold that the appellants, who were themselves contributories, were bound by that resolution. As to the charges against the directors, he agreed with the Master of the Rolls that they would be more effectually tried by bill than by the summary jurisdiction of the court, and if the appellants intended to prosecute these charges they should institute a suit. The court should, however, grant them every facility, and should therefore allow them to use the name of the company as plaintiffs upon their indemnifying them against the costs. But as the Master of the Rolls had expressed his willingness to make an order to this effect, which the appellants did not accept, this variation of the order would make no difference as to the costs of the appeal, which must be paid by Mr. Jessel's clients.

Lord Justice Knight Bruce said that, with great deference to the Master of the Rolls, he agreed with his learned brother that the petition should not be wholly dismissed. As to the particular order to be substituted for it, he had felt some difficulty, but on the whole he thought that he might, consistently with his duty, agree in the order of the Lord Justice in all respects.

RE THE LEEDS BANKING COMPANY, EX PARTE ADDINELL. SAME, EX PARTE DOBSON. SAME, EX PARTE FEARNSIDE AND DEANE.

THESE causes were heard in the Court of Chancery by Vice-Chancellor Sir R. T. Kindersley on the 17th November.

These were adjourned summonses on the question whether the above parties were severally liable to be put on the list of contributories in the winding-up of this company. Inasmuch as the same facts applied to each, so far as the company were concerned, varied only by the different position of the parties, all the summonses were heard successively, and his Honour expressed his opinion on them all at the conclusion of the arguments. It will be recollected that this company having carried on business for many years, and having a certain number of unissued shares in reserve, determined, in June, 1864, to issue these to their then present shareholders in the proportion of one to each five of their shares, and a circular was sent by their manager, Mr. Greenland, to the effect that the directors being of opinion that it was desirable to issue the reserved shares, directed him to offer one share in respect of every five held by the shareholder, and there was a request that the recipient should sign in return an enclosed form, stating whether he was desirous to take up the shares or wished to have any more allotted. If taken up the amount must be paid on or before the 1st of October then next, or the shares to be forfeited; if paid before that time £5 per cent. interest would be paid on the shares. On the 4th of July Mr. Addinell (to whom one of these circulars was sent) returned for answer that he agreed to take four shares, being his proportion of the allotment and his proportion of shares in addition if he could have them on the terms stated in the circular. On the 18th of July, Mr. Greenland wrote to Mr. Addinell stating that the directors had allotted to him four additional shares for which he had applied, at £30 per share. in addition to the first four, making the number of new shares eight; that the directors, in consequence of the very numerous applications, were unable to allot any larger number; and then came the condition of forfeiture in case the amount was not paid before the 1st of October, with £5 per cent. on an earlier payment. The money was not paid, and, as is well known, the company failed before the 1st of October, 1864, and was ordered to be wound up, and the question now arose whether the above correspondence constituted a contract so as to make Mr. Addinell liable. It was contended for the official liquidator that there was such a contract; for Mr. Addinell that there was not.

With respect to the second case, it stood in this way:—Mr. Joseph Dobson was a holder in the company of five shares, and he died in 1846. Under the same circumstances as in Mr. Addinell's case, one of his executors, Mr. Dobson, applied for and had one share allotted to him, in respect of five shares and one additional share, but Mr. Thacker, his co-executor, did not concur. It happened that the entries in respect of these shares were made as the executor of the testator, and that there was a receipt for the money which was paid to him as executor. As to the case of Fearnside and Deane, this was also a case of executors—the testator, Mr. Edward Fearnside, who died in 1860, leaving Mrs. Sarah Fearnside and Mr. Deane executrix and executor, and being the holder, at his death, of ten shares, in respect of which, under precisely the same circumstances as the last, two shares were allotted to the executrix and executor, the only difference between this and Dobson's case being that both representatives applied.

Mr. Glasse and Mr. Gotton appeared for the official liquidator; Mr. Bailey and Mr. Wickens for the alleged contributors.

The Vice-Chancellor now referred minutely to the circumstances of each case, and was of opinion that Mr. Addinell was only liable to be put upon the list for four shares, inasmuch as with regard to the additional shares there had been no communication by him after the circular referring to the forfeiture on non-payment. As to Richard Dobson there was no doubt that the company had dealt with him as executor, and if he was liable at all it was in that character, but inasmuch as Mr. Thacker did not join with him, and one executor could not be placed upon the list without the other, there was no liability to be placed upon the list at all in this case. With respect to the Fearnside's case the same observation applied as to the last, but *a fortiori*; but inasmuch as both representatives had joined in the application they must both be put upon the list, but only in their characters of executrix and executor. It was evident that the intention of the company was to deal with them as executors.

Banking and Commercial Law.

NOTES ON JOINT STOCK COMPANIES.

By ROBT. ARTHUR WARD, Solicitor.

THOUGH there is no necessary connection between a shilling pamphlet on joint-stock companies and the principles of commercial law, the contents of this publication induce us to place it under this particular heading. Thirteen years ago the author published a treatise on investments generally, in which he discussed the respective merits of such modes of getting an income out of capital, without personal exertion, as were then in favour. In his remarks on the subject of investment generally, he, to some extent, forecast the effect of the Australian gold discoveries, and expressed his belief that a rise in the price of almost every commodity would constrain the owners of realized capital to seek for some more profitable way of using their money than was offered by stock in the funds, and purchases of, or mortgages upon, real property in the United Kingdom. Without inquiring whether Mr. Ward is entitled, on this account, to be ranked with the prophets of finance, we may at once admit that his anticipations have, to a great extent, been realized by the progress of events, and that the action of the legislature has tended greatly to accelerate a movement which these circumstances had originated. Auriferous discoveries and the Limited Liability Act have unitedly wrought wonders. The lengthening lists of undertakings brought out by promoters, and quoted on the Stock Exchange, bear testimony to the extent of the change which is now passing over the habits of commercial England: and Mr. Ward's

pamphlet derives its value from the accuracy with which it indicates the features of sundry important classes of recently introduced undertakings, and the legal responsibilities incurred by the constantly augmenting class of joint-stock shareholders. As was to be expected, a large portion of Mr. Ward's "notes" consists of safe generalities. A Mentor, who endeavours to make safe and simple the difficult task of getting a high rate of interest without perilling the principal, must begin by laying down a number of rules to which every one will assent, but which very few know how to apply. No doubt people ought to consider well beforehand the result of applying for shares, and to watch with interest the operations of the companies in which they put their money; to stop them in doubtful courses, if they have the power to do so, and to sell out of any concern when they find it is going down hill. And, given that a company is safe, no doubt prudent persons may wisely invest in it; granted that many companies are got up solely for their promoters' benefit, and that others, from some cause or other, miscarry, it is equally clear that every one who wants to keep his money must avoid holding shares in these undesirable undertakings. Still we seem to have heard all this before, and though we do not know that the publication of such platitudes can do much harm, we are quite sure they will not do any one any good. To do Mr. Ward justice, he seems conscious of this when he recommends intending investors to apply for advice to some solicitor who has made company law and practice his specialty; who can speak his mind under the shelter of professional confidence, and whose *bona fides* are secured, both by his own interest and by the sanctions of professional supervision.

But we should be doing Mr. Ward an injustice did we lead our readers to suppose that his pamphlet contains nothing more valuable than general counsels and a particular recommendation to consult a solicitor. On the contrary, he makes many suggestions upon which every shareholder ought to act, but which experience teaches us, all but a very small minority will heartily approve in theory, and utterly ignore in practice. The four essentials of success, our author tells us, are—a good scheme, a seasonable time, sufficient capital, and efficient management. In common with every practical man of business, he holds the belief that only when a trade is too large for individual management, is it a proper subject for joint-stock enterprise, and his suggestions as to the best mode of remunerating promoters, managers, and officials, are well worth the attention of any who have to consider these questions. On the means recommended for testing the *bona fides* of a new scheme, the scrutiny

of the list of original subscribers, the careful perusal of the articles of association, he gives advice which ought always to be followed, but which is certain to be neglected. In like manner the interrogatories he proposes for the examination of secretary and promoter would be very valuable if one could only be sure of getting them correctly answered, for, as he rather naively says, such answers, "*if truly given*, will throw much light upon the *bona fides* of the company." But subject even to this important qualification, the very fact of having the need for inquiry on the details of the company's get-up brought clearly before the public mind, will probably do much to check the blind confidence by which designing projectors profit and impetuous shareholders suffer.

The greater, and we may add, the most useful part of Mr. Ward's notes, is occupied with a brief resumé of the law of joint-stock companies. Of course, it is not possible in a few pages to indicate every point that may arise, or even to mention every decision that has been given. But though information in detail was not to be expected, the non-professional reader will be glad to have company law in outline. As in other portions of the lawyers' territory, the turnings and involutions, the debatable land and the uncertain boundaries are so numerous, that even the most skilful and experienced guides may sometimes err. But it is, nevertheless, true that the main features, the high roads, the common paths, are easy both to learn and to remember; or, dropping metaphor, we may say that the leading rules on which our courts act are perfectly intelligible and reasonable, and it is only in the particular application of them, in determining whether an individual set of circumstances falls within or without a certain class, that any difficulty or confusion is likely to arise. Mr. Ward has done this important portion of his work very well, and has wisely abstained from attempting to make every man his own lawyer. But we think his selection of cases is not always the happiest. The power of a shareholder to transfer his shares for the sole purpose of escaping his liability, was affirmed in the case of *ex parte Rudolph* (32, L. J. Q. B. 269), a decision more recent, and more important than the Irish case cited at page 15. When writing about preference shares, it would have been as well to refer to the test of the right of the holders of such shares to arrears of dividend, furnished by the decision of the Lords Justices in *Sturge v. Eastern Union Railway Co.* (7 D. G. M. & G. 158); *Henry v. Great Northern Railway Co.* (27 L. J. Ch. 1, 1 D. G. & J. 606); and though the caution to debenture holders is wise and well-timed, it is not quite correct to say that Lloyd's bonds stand on a different

footing to securities given to raise money in excess of a company's borrowing powers, inasmuch as the decision in *Chambers v. Manchester & Milford Railway Co.* (10 Jur. (N. S.) 700; 33 L. J. Q. B. 268; 12 W. R. 980, 10 L. S. N. S. 715), invalidated some of these very bonds, the court holding that though they might be lawfully given to secure payment for work, they could not be used as instruments for raising money. There is a similar obscurity in the statement of the case of *Maddick v. Marshall* (10 Jur. N. S. 1201; 13 W. R. 205), and it would have added to the value of the "notes" if the annotator had said something about the acts by which forfeiture may be incurred, and the cases in which it may be advisable, on the principle of throwing overboard the cargo, that the ship may ride through the storm. However, we observe that Mr. Ward is contemplating a new edition of his book on investments, and in that, probably, these omissions may be supplied. At the same time, also, it would be well to devote additional attention to the risks, duties, and liabilities of directors, secretaries and other officers. The cases of *Scott v. Dixon* (29 L. J. Ex. 62. N., *ex parte* Nicol, 28 L. J. Ch. 257); *Cullen v. Thomson* (6 L. T. N. S. 870), and a host of others, not to mention such unpleasant matters as the prosecution of Humphrey Brown and his colleague, are replete with salutary warnings to any well-meaning gentleman who may be too ready to assume directorial responsibilities or too anxious to pocket directorial fees.

Mr. Ward's estimate of the relative excellencies of different classes of companies is correct, and, in the main, encouraging. For various reasons, he doubts whether shares in the older joint-stock banks will maintain their high premiums, yet he thinks the field for banking, as well as for life and fire insurance, is, at present, too well occupied to leave new ventures a chance. Discount corporations seem the least lucky of money dealing; iron work companies of commercial joint-stock organizations. Like many other men, he speaks of the wondrous dividends paid by financial associations with surprise, but thinks them too risky to recommend. How far this is a correct or an over-cautious estimate must, of course, remain a problem for some time longer. Without in every instance endorsing Mr. Ward's views, we have said enough to show that these "Notes on Joint Stock Companies" are well worth perusal, and that they contain much matter which shareholders, actual and potential, would do well to bear in mind.

Reports of Joint-Stock Banks.

BANK OF BOLTON.

THE annual general meeting was held at the Bank, on Friday, the 25th September. The chair was occupied by Mr. Peter Martin, of Rivington, J.P., chairman of the board of directors. The other directors present were Mr. Thomas Barnes, M.P., Mr. John Orton, J.P., Mr. John Cannon, J.P., and Mr. Wm. Haslam, of Lever Grange. Amongst the shareholders present were the mayor (Richard Stockdale, Esq.), Alderman J. K. Wolfenden, Mr. Robert Wenden, and other gentlemen of position and influence in the town and neighbourhood. The report of the directors was read by Mr. Fergusson, the manager, and gave a very favourable account of the position and business of the bank. The losses for the year were amply provided for, the usual dividend of 10 per cent. for the year was declared, and a bonus of 10s. per share was added to the paid-up capital, making each share £12. 10s. paid up, and raising the paid-up capital to £125,000. The guarantee fund was stated now to amount to £38,887. The result to the shareholders for the year is £14. 3s. 4d. free of income-tax. Cordial votes of thanks were given to the chairman and directors, to the manager, and other officers of the bank, and the sum of £500 was placed at the disposal of the board for the valuable services rendered to the bank by the directors for many years.

LONDON AND SOUTH AFRICAN BANK.

THE ordinary half-yearly meeting was held on the 1st November, at the London Tavern; Mr. J. R. Thomson in the chair.

The following report of the directors was read by Mr. W. M. James, the manager:—"The directors beg to submit the accounts of the bank for the half-year ending the 30th June last, showing a net profit of £28,920. 4s. 5d.—equal to the rate of 11½ per cent. per annum on the paid-up capital. The accounts thus rendered convey a faithful statement of the transactions of the bank for the first half of the present year; but towards the expiration of that period information reached the directors from different points within their sphere of action in South Africa that extensive commercial failures had taken place, and that others were apprehended, which might entail loss upon this bank in common with other banking establishments in those colonies. They lost no time in despatching their London manager, Mr. James, to the Cape, with full power to protect the interests of the bank. He has lately returned, after making such arrangements as seemed to be advisable under existing circumstances. Although the commercial crisis in South Africa has not entirely passed away, measures have been taken so to reduce the liabilities of this bank as its directors feel satisfied will ensure the safety of the capital. Under these circumstances the directors think it their duty to refrain from declaring the usual interim payment on account of dividend, while they indulge the hope that it may be in their power to render a more cheering account to their shareholders at the conclusion of the present year."

STATEMENT OF LIABILITIES AND ASSETS.

LIABILITIES.

<i>Dr.</i>				
Capital paid up	£500,000	0 3
Circulation, notes, and bank post bills	32,507	0 5
Deposits	459,739	5 0
Bills payable and other liabilities	264,528	3 4
Reserved fund	18,181	6 5
Balance of profit and loss account (reserved to meet anticipated losses by bad debts)	28,920	4 4
			<u>£1,303,875</u>	<u>19 9</u>

ASSETS.

<i>Cr.</i>				
Specie on hand and cash balances	£130,349	5 0
Bank premises, furniture, fittings, and other property	20,060	7 8
Local bills discounted, bills receivable, government and other securities	1,151,858	1 4
Preliminary expenses—Original amount, £8,041. 9s. 9d.; less, deducted, £6,433. 4s.	1,608	5 9
			<u>£1,303,875</u>	<u>19 9</u>

PROFIT AND LOSS ACCOUNT.

Interest, commission and exchange paid	£10,690	2 10
Charges for the half-year, including rent, taxes, and all other expenses at head office and branches...	12,710	0 3
Rebate on bills not due...	11,229	8 1
Balance reserved to meet anticipated losses by bad debts	28,920	4 5
			<u>£63,549</u>	<u>15 7</u>

<i>Cr.</i>				
Balance of undivided profit carried forward, as per last annual statement, to 31st December, 1864	£377	9 4
Rebate on bills not due 31st Dec., 1864, brought forward	13,019	1 11
Gross profit for half-year, to 30th June, 1865...	50,153	4 4
			<u>£63,549</u>	<u>15 7</u>

The Chairman, in moving that the report and statement of accounts be read and adopted, remarked that it had been his pleasing duty on previous occasions to announce a dividend; but on the present occasion, he was sorry to say, circumstances had arisen which would make it, in the opinion of the directors, injudicious to trespass on the profits of the half-year in order to pay a dividend, but to reserve them to meet past-due bills and other contingencies that must arise from the crisis that had taken place in the colony. With regard to their own position, he thought he might safely say that they had gone successfully through that crisis, and from the accounts recently received from the colony he had every reason to believe that their capital was perfectly intact. (Hear, hear.) They no doubt must suffer a considerable loss, but he believed that they had the means of meeting it without trenching upon the capital. The profits of the bank for the half-year ending June 30, amounted to about £29,000, and they had a reserve of £18,000, making together £47,000 to their credit,

without trenching upon the capital. Independent of reductions, they had the profits up to the present time and to the 30th December, which would be more than sufficient to protect the capital entirely, under any circumstances arising from the commercial crisis he had alluded to.

Colonel Holland, deputy-chairman, seconded the motion.

A Shareholder complained that the working expenses, £12,000, were disproportionate to the profits. (Hear, hear.) He thought thirteen directors were more than sufficient, and that five would be quite competent to manage the concern, and he suggested that they should receive £1,500 a year.

The Chairman remarked that the shareholders had no knowledge of the expense of travelling in a colony where some of the branches were 700 or 800 miles distance from each other, and where it was necessary to keep up an expensive establishment of clerks. The directors had thought it better to reduce the number of branches, and keep up those only which were the most profitable, and they were taking steps to effect that object.

A Shareholder inquired the amount of the ascertained losses.

The Chairman replied that on the 30th of June last, the past-due bill accounts amounted to £76,000. Since then £21,000 had been received, and from the latest accounts from the colonial inspectors and managers, they estimated the loss that would be sustained at £21,000 or £22,000. The directors, however, were not quite satisfied that that sum would cover the whole loss, and therefore they recommended that no dividend should be declared.

The Chairman, in reply to a question as to the cause of the increase in the charge for interest, explained that it was occasioned by the increase of deposits, which had risen from £250,000 in 1862 to £459,003 on the 30th of June this year.

A Shareholder thought it would be desirable for Mr. James, the manager, who had just returned from the colony, to give some explanation as to the state of their affairs.

Another Shareholder inquired whether the losses had arisen in the ordinary course of commerce, or from advances made by the managers on worthless securities?

The Chairman answered that the pressure had entirely arisen from the collapse occasioned by the drought, and the war in the Free States, which had prevented the merchants from realizing their produce and meeting their engagements. The directors had anticipated an objection advanced by a third shareholder as to the remuneration of the directors by declining this half-year to take any remuneration. (Hear, hear.)

Mr. James, the manager, responding to an appeal from several shareholders in reference to the losses, stated that the past-due bills on the 30th June amounted to £76,000, against which they held securities amounting to £171,000. He did not think that these securities could be fairly valued at so large a sum, taking into account the depreciation of every description of property in the colony, but if they took it at half that amount, there was still a large margin. Out of the £76,000 over-due bills, £30,000 had been paid in full, thus bringing down the amount to £56,000 on the 30th June. Many of the other bills would likewise be paid in full, and others, which had two or three good names upon them, would yield good dividends. The working expenses were a little more than formerly, in consequence of the opening of the new branches and of some slight additions to salaries. He thought it would have been wiser if they had not opened the branches at Colesburg, Graaf Reinet, and Richmond. The Richmond branch was opened without the knowledge of the directors, and instructions had been given out to close it and the other two. At the same time he did not

anticipate any great loss as arising from those branches. No doubt there had been some overtrading in the colony, besides which a system of passing accommodation bills had prevailed to a very great extent. That was, however, now put a stop to, and no further losses were anticipated from that source: He did not believe that one penny of the capital of the bank was touched. Having formed his own judgment as to the probable dividend which would be realised on all the past-due bills, he could safely say that the capital of the bank was not touched, and he could go further even than that and say, that taking into account the profits of the whole year, he did not believe the reserve would be touched. (Cheers.) But of course he could not pledge himself on this point.

Several shareholders expressed their thanks to the manager for his very succinct and satisfactory explanation.

A Proprietor inquired if the reserve was invested.

Mr. James—£17,000 of it is invested in Government securities.

In reply to further questions,

Colonel Holland (deputy-chairman) stated that the reason why the directors had not given any precise statement of the actual losses was that they had no positive statement before them. Up to the present time, however, he did not believe they amounted to more than £5,000. During a great commercial crisis, such as the Cape had passed through, a large amount of bad debts had unavoidably been incurred, but they were covered by a very large amount of securities, and although those securities more than doubled the amount of the over-due bills, the directors could not as conscientious men recommend the appropriation of any portion of the profits to the payment of a dividend, as it was impossible, so many good houses at the Cape being still shaky, and the depreciation of property there being so great at present, to say what might be recovered, or whether the losses might not absorb the whole of the profits.

A Shareholder inquired what was the nature of the securities?

Colonel Holland—It is to some extent land which we took as collateral security only.

In reply to further questions,

Mr. James added that the securities, if taken at a largely depreciated value, would more than meet the past-due bills. The liabilities were already largely reduced, and instructions had been sent out to the colony not to open any new branches without the consent of the directors.

The motion adopting the report was, after some further discussion, put and carried unanimously; after which the meeting was made special, and the supplemental charter granted by her Majesty, and dated 15th June, 1865, was accepted and confirmed.

A vote of thanks to the chairman and directors, and a special compliment to Mr. James, the manager, concluded the proceedings.

LEEDS BANKING COMPANY.

THE official liquidator and other parties attended before Mr. Buckley, the chief clerk of Vice-Chancellor Kindersley, at chambers, 2nd November, further to proceed with other matters arising out of the failure of this corporation.

Mr. Hansom and Mr. Williams, from the office of Mr. Freshfield, represented Mr. Turquand, the official liquidator, Messrs. Richardson and Farmer, of Leeds, also appeared.

Mr. Hansom said the first matter would be the case of Mr. John Pape, who had been a corn-miller at Leeds, and Messrs. Thomas Pape and Charles Oxley were his executors. The deceased had a claim of £3,343. 15s. 9d. against the bank as a depositor, and he was also on the list of contributories. It was intended to apply to the court as to whether the one might set off as against the other.

Mr. Richardson however assented, and the Chief Clerk made the necessary order.

Mr. Hansom observed that in the matter of Mr. James Ashworth he desired to prove against the estate of the Leeds Banking Company, as endorsee of a bill of exchange for £222. 12s. 2d. The bill had been endorsed by Mr. Marsden to Joseph Marsden and Sons, by them to the Leeds Banking Company, who endorsed it, and it then got into the hands of the applicant. He (Mr. Hansom) had to point out that the notice of dishonour was given too late.

The Chief Clerk suggested that an action would lie against the bankers for negligence.

Mr. Hansom said the plan had been tried, and the applicant was defeated, and now they were anxious "to do" the Leeds Banking Company, but found they were a day too late.

Mr. Turquand pointed out that he was urged by the contributories of the Leeds Banking Company to insist on their strict legal rights, and therefore had no alternative.

The Chief Clerk said he should be very uncomfortable under the circumstances were he the party liable for the bill.

Mr. Turquand suggested that the applicant still had his action against the drawer.

The Chief Clerk—Yes, of course.

Mr. Turquand said he was obliged to act strictly on the letter of the law; but he might say that the acceptance was one of the many forgeries that Marsden sent into the world through the Leeds Banking Company.

The Chief Clerk—Then in reality there was no acceptance at all. The holder, having failed to give notice of the dishonour at time fixed by law, lost all claim as against the banking company as endorsees. He would not, however, advise the applicant. He could apply elsewhere if he pleased.

Mr. Foster, solicitor, thought it would be the best way to give it up and lose the money altogether.

The Chief Clerk said the learned gentleman could take the matter further, and apply for a summons on another day.

Mr. Hansom applied for an order of substituted service in the case of Mr. Kirby, who formerly lived at 15, Cambridge-terrace, Paddington. That gentleman was on the list of contributories for 52 shares, at £10 a share. Several attempts had been made to serve the order for the payment; but the wife of the contributory refused to give his address, and told the clerk that it was on account of his liability for the Leeds Banking Company that her husband was not "in the way."

The Chief Clerk could not see the object of substituted service in such a case. It was not known where the contributory was living.

Mr. Turquand was advised that it might be possible to get hold of the furniture and all other effects. He was, however, personally anxious to say that he did not like, nor did he ever wish, to proceed to extremes upon the contributories' list, if the parties showed a disposition to pay; but he would observe that there were several who kept out of the way; and he (Mr. Turquand) had seriously thought of advertising for "gentlemen wanted,"

and offering a reward for intelligence of their whereabouts. This might be considered a very extreme measure, but there were many who treated the matter very lightly. He could instance two whose names it would perhaps be unadvisable to mention, who had ample means of discharging the claims against them. Another one had cost the estate about £30 in expenses, who could and would be made to pay when he was to be found. He (Mr. Turquand) asked for an order to invest £35,000, cash in hand, in Exchequer Bills, according to the forms of the Court.

The chief clerk suggested it should be paid away.

The official liquidator said the amount at present in hand was not sufficient to justify another dividend, but he hoped at the end of December to be able to distribute another 4s. per share.

The meeting for the further dividend was then adjourned.

LONDON AND MEDITERRANEAN BANK, LIMITED.

AN extraordinary general meeting of this company was held on the 6th November, at the Baltic Sale Rooms, South Sea House, to submit a resolution for the voluntary winding-up of the company, consequent upon its amalgamation with the London and Bombay Bank; W. J. Maxwell, Esq., in the chair. The secretary having read the advertisement,

The Chairman said it would be unnecessary for him to detain the meeting, as it was purely of a formal character to propose a resolution for winding up the affairs of the company voluntarily.

Resolution put and carried unanimously.

A vote of thanks to the chairman closed the proceedings.

LONDON AND BRAZILIAN BANK.

AN extraordinary general meeting of the shareholders of this bank was held on the 10th November, at the bank offices, Old Broad Street, Mr. Cater in the chair, for the purpose of confirming the resolutions which were adopted at the meeting of the 10th October last.

The following are the resolutions referred to:—

“That the supplemental agreement now read, between this bank and the banks of Mauá & Co., and Mauá, McGregor & Co., referring to the liquidation of the respective businesses of the respective establishments by the ‘London, Brazilian, and Mauá Bank, Limited,’ be and the same is hereby approved, and the directors of this bank are specially authorised and empowered to carry the same into effect, with any modifications or alterations in the provisions thereof which may appear to them necessary or proper.”

“That the foregoing resolution shall in no degree repeal, alter, or affect the special resolutions of the company, passed on the 11th May, 1865, and duly confirmed on the 9th of June, 1865, or the powers or authorities thereby given to, or conferred on, the directors of this bank; except only and so far, if at all, as the supplemental agreement approved by this meeting varies any provision contained in the memorandum of agreement for amalgamation, or may render the alteration of the dates mentioned or referred to in such memorandum of agreement or special resolutions, or any or either of such dates, necessary, or in the judgment of the directors expedient or proper.”

The Chairman having put the resolutions for confirmation, Mr. Cantor said that at the last meeting it had been stated that the final liquidation of the present bank would not be for two years. He wished to know whether the profits between the 30th of June to the 31st December would not be divided, or whether they would be accumulated, and the whole reserved for two years hence.

The Chairman said there were two years allowed for the liquidation, but he knew nothing that should prevent them from winding up their affairs at a much earlier date. With regard to the dividend, the directors, after receiving the returns of 31st December, would be able to form an opinion as to whether there ought to be a dividend or not. For himself, he saw no reason why they should not declare that dividend, because he supposed there would be a considerable balance over. But it would depend on the reports they received from their officers and from the Brazilian board after the 1st of January. The institution was never in a more healthy position, its credit never stood higher, and most deservedly so. (Hear.) He looked forward to a happy future for the shareholders. He was not infallible, but when the war in Brazil was over he looked forward to a very healthy position for the bank. There was one debt which they had doubts about, but the last mail brought accounts which showed that this debt was perfectly secure.

Mr. Cantor said he was glad to hear what the chairman had said regarding the dividend, because the public were under the impression that they should not have any more dividend for two years. From what had been now stated it appeared that if no untoward circumstances occurred they would have a dividend about the middle of next year.

In answer to another proprietor,

The Chairman stated that the reserve fund would not be divided until all their affairs were wound up. The present half-year foreshadowed the best results they ever had. (Hear, hear.)

The motion was then adopted, as was a vote of thanks to the chairman and directors for the zeal and ability with which they conducted the affairs of the bank.

In reply to a question whether there had been any change in the board of directors,

The Chairman said there had. The deputy-chairman and himself could not altogether agree upon certain points, and he sent in his resignation, which was accepted. He regretted this, and he expressed his regret to the deputy-chairman. He regretted that the deputy-chairman assumed a position which he did not think he was warranted in assuming. He maintained his opinions as he (the chairman) maintained his, but differ as they might he hoped there would exist that respect which he should claim for himself from everybody, whether on the board or elsewhere. He was sure that the bank would not want directors of standing or judgment to conduct its affairs. Another director had also resigned, from ill-health, so that there were now two vacancies. Baron Mauá would be a member of the new board.

The meeting then separated.

IMPERIAL OTTOMAN BANK.

A SPECIAL general meeting of shareholders was held on the 16th November, at the London Tavern, Sir W. Clay in the chair, to decide respecting the issue of new shares, and to modify certain articles of the statute relative to the reserve fund.

The Chairman explained that the business of the meeting was limited to the two objects mentioned in the advertisement. As to the affairs of the bank, it was sufficient to say that they were going on satisfactorily. At the last meeting, in July, in alluding to the striking facts and figures which made manifest the increasing business and extended operations of the bank, he intimated that in the opinion of the committee it would be probably necessary to call for an increase of capital. In pursuance of that opinion, the soundness of which had been confirmed by the experience since July, the board had summoned the present meeting. There were two points for consideration—first, the amount of the increase; and secondly, the mode in which the shares should be issued and the capital called up. With regard to the amount, there were two main considerations to be kept in view. On the one hand, that they should have abundant capital to enable them to carry out whatever enterprises, and to conduct whatever business appeared to the directors to hold out the prospect of advantage; and on the other hand, to avoid calling up a larger amount of capital than could be advantageously employed. Upon these two considerations, the English board, in conjunction with their French colleagues, had bestowed great attention, and he hoped the shareholders would be of opinion that the result had arrived at the just medium. When the new capital, as proposed in the resolutions he was about to submit, was called up, and added to the existing capital, the total amount of capital they would have available would be £2,025,000. As to the employment which they had for capital, first it was important that they should provide sufficient capital for working the several branches of the bank, because it was through those branches that a great part of their profits were derived. On previous occasions he had noticed the increased area of their operations and the number of their branches. The old Ottoman Bank had four branches. Now they (the Imperial) had, including those in active operation, those which were being established, and those which were in certain contemplation of being established, 17. They had branches at Beyrout and Aleppo, in Syria; at Aidin, Kara Hissa, Sparta, and Magnesia, in Asia Minor; on the shores of the Black Sea they had branches at Varna and Trebizond; and in European Turkey and other places they had already, or were arranging for, the establishment of others, making up the number he had stated. The capital required for these branches could not be taken at less than £600,000. Then by the statutes they were under a permanent advance to the Ottoman government of £500,000; and again, for the large centres of Constantinople, Paris, and London, large sums must be reserved, making together a requirement for at least the capital which they would have if the present proposal were sanctioned. But beyond this it must be borne in mind that part of the duty of the bank was to assist in the promotion of every great industrial enterprise that could offer a good security for the advance, and which might be useful in developing the resources of the country, increasing its prosperity, and consequently of improving the position of the bank. There were several such enterprises now in progress, in the shape of railways and other works, and there were various other objects to which the capital of the bank might be advantageously directed, and rendering it important that they should always have ample funds at their disposal. There were now, as the shareholders were aware, 135,000 old shares, and it was proposed in the new issue to give one new for every two old shares held. The new shares would be issued at a premium of £2. 10s. each, and the payments upon them would be £5 on 1st December, £3 on 1st February, £3 on 1st May, and £1. 10s. on 5th July, making £12. 10s. per share; viz., £10 to bring up the shares to the same amount paid as the old shares, and £2. 10s.

premium. It was also proposed that, notwithstanding the capital to be called up on the new shares would not be fully paid until July next year, they should be entitled to divide with the old shares the entire profits of the year 1866, as well as the ad interim dividend of five per cent paid at Christmas as the general dividend when the accounts for the year were made up at Midsummer. This was, no doubt, offering a great advantage to the new shares, but the committee of directors considered that, as it was the old proprietors who would become the proprietors of the new shares, it was right; and that they were right, therefore, in offering them these new shares, that they should offer them also all the advantages attendant upon them. (Hear.) It was further proposed to place the whole of the premiums received upon the new shares to the reserve fund. (Cheers.) The amount of the reserve fund at the period to which the accounts were last made up was £42,830; the amount of the premiums on the new shares would be £168,750, which, when added, would bring the reserve fund up to £211,580. The statutes provided that ten per cent. of the profits should be set aside every year to the reserve. And the directors were advised that, to set aside these premiums to that purpose, the statutes must be modified in this particular. They had obtained the assent of the Porte to such modification, and a second resolution would be submitted to the meeting to authorise it. In the opinion of the board, if the proprietors passed these resolutions, they would be provided with abundant capital for all the objects they contemplated. In their position capital was power, and it was most important that they should retain and enhance the opinions which prevailed of their wealth and solidity, coupled with a character for liberality and fair dealing. He begged to propose the following resolution:—“That the nominal capital of the bank be increased to £4,060,000 (101,250,000fr.), by an issue of 67,500 shares of £20 (500fr.) each. That these shares shall, in the first instance, be offered by advertisement to the holders of the existing shares, at a premium of £2. 10s. (62fr. 50c.) per share, in the proportion of one new share to every two old shares. That any shares remaining unapplied for by the holders of the existing shares by the 1st December, 1865, shall be disposed of by the committee for the benefit of the bank. That £10 (250fr.) per share (exclusive of the premium) shall be paid on each of these new shares, and that the total amount payable on these shares shall be paid at the following dates, viz.:—£5 (125fr.) on the 1st December, 1865; £3 (75fr.) on the 1st February, 1866; £3 (75fr.) on the 1st May, 1866; and £1. 10s. (37fr. 50c.) on the 5th July, 1866, with power to the committee to receive payment of the several instalments in advance, on such terms as they shall think fit. That interest be charged on all payments in arrear, at the rate of six per cent. per annum, from the days they are respectively payable. That if any instalment and interest thereon be not paid within one month after the day fixed for such instalment, the said shares shall be dealt with in accordance with article 14 of the statutes. That the new shares shall be entitled to participate in all profits with the old shares from January, 1866.”

The motion having been seconded,

Mr. Davis thought the proposition was one that ought not to be accepted too hastily, but that time should be given for fully considering it. He had confidence in the committee, and believed them when they stated that more capital was required to carry on the business of the bank; but if so, why should not the shareholders have the advantages secured to them by the concession; one of which advantages was, that all new shares should be issued to the shareholders at par? (No, no.) Yes, such was the effect of the articles of concession, and as they were entitled to the new shares at

£10, it was very absurd for them to give £12.10s. each. (Hear, hear.) He agreed in the importance of having a reserve fund, but let it be formed in the proper manner, by a periodical setting aside a portion of the profits, and not by calling up so much capital from the pockets of the shareholders. He further contended that the reserve should be invested in safe securities, paying three or four per cent., and not used as capital, to be dealt with in the ordinary banking business. This practice of creating new shares seemed to be all the rage now. A company of which he was a shareholder, and which had gone on prosperously, and accumulated a reserve of £250,000, lately determined upon issuing new shares, and the result was, that the first dividend after the issue was reduced by £1 per share, and the quotation of the shares fell from £68—£72, to £48. (Hear, hear.) What was the motive of the directors in taking this £2.10s. a share out of the pockets of the proprietors? They did not require it for increasing confidence. They had now a capital of £1,300,000, which, with the addition proposed, would be now £2,000,000, with a back of £2,000,000 more uncalled up. That surely was sufficient in the way of security. After some further remarks, he concluded by moving, as an amendment, that the shares should be issued at par. (Cheers.)

A Shareholder seconded this proposal, which seemed to meet with very general favour from the body of the meeting, but

The Chairman assured the meeting that the plan recommended by the directors, after mature consideration with their French colleagues, was that which would be most advantageous to the company and to every proprietor. He reminded them that some of the best conducted banks had taken the same course of issuing new capital at a premium, and carrying that premium to the reserve. It was a great advantage to have a large reserve, and in this case, while securing that object, the directors were benefiting the old shareholders directly, by offering them the shares at a price much below the market price of the existing shares. In the old Ottoman Bank, one of the best conducted and most successful financial institutions ever established, they had increased the reserve by adding to it money that might otherwise have been divided among the shareholders, and in this way, accumulated a large amount. [A voice, "But that was out of profits."] (Hear, hear.) At all events, the board felt that they would not be doing their duty if they accepted a resolution for an enlargement of capital without a premium on the new shares, and the meeting would have the kindness to understand that the proposition submitted to them on the part of the board was that the shares be issued at a premium of £2.10s., and that if that was negatived, the whole affair, so far as raising additional capital, would fall to the ground.

Some shareholders protested that this was in the nature of a threat.

Mr. Walter Church also protested against what the chairman said, as a threat against the shareholders, and moved the adjournment of the meeting.

A shareholder contended that the course proposed from the chair tended to depreciate the market value of the shares, inasmuch as it would place them in the hands of the public instead of keeping them in those of the existing shareholders.

Another shareholder wished to know whether the proposed increase of the capital would add to the remuneration, nearly £20,000 a year, already received by the directors.

The Chairman replied in the negative. The founders, whose interests were identical with those of the directors and the shareholders, gave up any claim they might have for increased emolument consequent upon the increase of capital.

Mr. G. Seymour said, having been consulted by the board as to the best manner of issuing the shares, and having been to Paris to consult the French committee there, he must say that he believed the course proposed was the best one for the shareholders generally. From the tone which some of the shareholders assumed, it would be almost supposed that the founders and directors had different interests from those of the shareholders, but that was not the case. The board were anxious to strengthen the position of the bank by an addition to its capital, and by a large reserve fund, which was held for the benefit of the shareholders themselves. It was said that, because the directors would not accept the proposal of issuing the new shares at par, they threatened the proprietors, but that was not the case. The fact was that by the statutes they could not act without the assent of their French colleagues. In conjunction with the French committee, they had framed a proposal which had been submitted to the meeting. If the shareholders did not approve of it, they could reject it; but the directors could not accept the suggestion of offering the shares at par, inasmuch as it was at variance with the conclusion which the French committee had sanctioned.

The Chairman also explained that, however painful it was for the committee to differ from the shareholders, it was not in their power at present to consent to an alteration in the terms upon which the new shares should be issued. All they could do, if the motion submitted from the chair was negatived, was to report the opinion of the meeting to the French committee, and consult with them before taking any further steps.

After a long discussion, in the course of which Mr. Davis was urged to put his amendment himself as the chairman seemed to object to do so—it was arranged that the meeting should be adjourned for a fortnight, to afford the English committee an opportunity of consulting their French colleagues, the motion for the adjournment—which it was understood was to be taken as an expressed disapproval of the terms proposed by the board—being carried against one dissentient only. Some of the proprietors were, however, not satisfied with this, and insisted upon Mr. Davis's amendment being put to the meeting, which was accordingly done by Mr. Davis himself after the chairman had left the chair, and declared to be carried.

LONDON AND VENEZUELA BANK.

THE following is the report of the directors of the London and Venezuela Bank, Limited, to be presented to the proprietors at the second ordinary general meeting to be holden at the London Tavern, on November 30th, 1865.

In presenting their second report, with the accompanying balance-sheet, the directors have to congratulate the proprietors on the greatly improved position of the bank since they last had the pleasure of meeting them. Increased strength has been secured to the bank by the issue of the balance of the first 5,000 shares. As, however, the additional capital thus raised had not reached Venezuela at the date of making up the accounts in Caracas, it will be seen that the profits of the half-year have been earned on a paid-up capital of about one-half the present amount, and the result shown in the balance-sheet is therefore most satisfactory, having regard to the limited amount with which the directors were enabled to deal. The gross profit for the half-year amounts to £4,349. 12s. 11d., or at the rate of 26 per cent. per annum. This added to £784. 8s. 4d., the balance brought forward from last account, makes £5,134. 1s. 3d., and deducting current

expenses, leaves a balance of £2,349. 6s. 8d. Deducting rebate, at the rate of 12 per cent. per annum on all undue bills in Venezuela, and at 7 per cent. per annum on those in London, amounting together to £1,080. 16s. 5d., a net balance available for distribution remains of £1,268. 10s. 3d. This amount the directors propose to appropriate as follows, viz., to payment of a dividend for the half-year, at the rate of 5 per cent. per annum, free of income tax, £833. 0s. 8d.; and to reduction of preliminary expenses, at the rate of 10 per cent. per annum, £380; after which there will remain a balance of £55. 9s. 7d. to be carried forward to the next account. The figures in the balance-sheet, as compared with last account, show a considerable increase in the amount of business transacted, and evince the confidence which the bank is acquiring. This is particularly evident in the amount held on current and deposit accounts, which is more than double what it was in April last. The directors look forward with confidence to the permanent success of the bank, and to a large increase of profits available for distribution from the augmented capital now at their disposal, enabling them to develop the operations of the bank, without any material increase of expenditure. The directors have much pleasure in informing the proprietors that no loss of any kind has been made by the bank; nor, it is believed, is there a single bad or doubtful security in its possession. As a large margin of profit can be made on money deposited in London, even after allowance of a liberal rate of interest thereon, the directors invite the shareholders, as partners in the bank, to use their individual influence in introducing this description of business. The directors, having regard to the increasing business of the bank, have acquired permanent offices at No. 9, Tokenhouse Yard. If the dividend proposed be approved by the meeting, the warrants will be ready for delivery to the shareholders on Monday, the 4th day of December.

VICTORIA FINANCE AND BULLION ASSOCIATION OF BOMBAY, LIMITED.

AN extraordinary general meeting of the shareholders of the company was held on the 23rd of October, when a large number of shareholders were present. Damodhur Jettabhoy, Esq., chairman of the association, was in the chair. Mr. Keir, of the firm of Messrs. Keir and Ramsden, solicitors to the company, was also present.

The following resolutions were moved and carried unanimously:—

Proposed by Mr. Ambaram Kevulram, and seconded by Mr. Anundjee Govindjee, "That the resolution passed at the meeting of the 9th of August last, that the company be wound up voluntarily, be confirmed."

Proposed by Ambaram Kevulram, and seconded by Mr. Vishram Govindjee, "That Mr. Damodhur Jettabhoy and Mr. Ghellabhoy Jairam be appointed liquidators."

Proposed by Mr. Mahomed Ibrahim Purkar, and seconded by Mr. Vishram Govindjee, "That the remuneration of the liquidators shall be two per cent. upon all moneys received by them."

Proposed by Mr. Nowrojee Dadabhoy, and seconded by Mr. Ambaram Kevulram, "That the thanks of the meeting be given to the chairman, the manager, and the solicitors of the Company."

The meeting then dispersed.

OTTOMAN FINANCIAL ASSOCIATION, LIMITED.

AN extraordinary general meeting of the shareholders of this company was held on the 20th of November, at the London Tavern, for the purpose of "taking into consideration certain propositions for an amalgamation;" Mr. Kitson in the chair.

The Secretary having announced that the preliminary arrangements for the amalgamation were not sufficiently matured to be taken into consideration at that meeting, and that an adjournment would be necessary,

The Chairman explained that at the time the meeting was called, the directors thought they would be in a position by then to present to the shareholders such an arrangement as they could adopt with advantage, but although the arrangements had not been brought to that point which they expected, still he thought it right to inform them that no adverse circumstances had arisen. The negotiations were still pending and advancing

favourably. No obstacles had been thrown in the way. It was simply because sufficient time had not been given to bring the negotiation to a conclusion. He hoped, however, that by the 5th of December, to which day he would propose an adjournment, everything would be in readiness, and that an arrangement would be submitted to them of a satisfactory character.

Some slight discussion ensued, in the course of which information was sought as to the name or character of the company with which the proposed amalgamation was to take place, and also as to how the adjournment would affect the call which had been made.

The Chairman thought it would not be wise at that stage of the proceedings to give the information respecting the company with which their undertaking was about to amalgamate. At the meeting on the 5th of December, however, they would be supplied with all information, and he had no doubt that the other company would by that time be in existence. Respecting the call, it was made for the purpose of giving effect to the arrangements for the amalgamation. There was, however, no intention of enforcing that call until these arrangements were complete, so that no interest would accrue through non-payment on the date specified, and the shareholders would attend the meeting on the 5th December precisely in the same position as to-day.

The explanation seemed to give general satisfaction, and on the motion of the chairman the meeting adjourned till Tuesday, the 5th December.

FINANCIAL ASSOCIATION OF INDIA AND CHINA.

THE following circular, with statement attached, has been circulated among the shareholders of this association :—

“ Sir,—I am instructed by the board of directors to hand you herewith copy of balance-sheet and profit and loss account of the association for half-year ending 30th ultimo. Although the articles of association only require the books to be balanced once a year, the directors have thought it advisable to institute a special investigation into the state of the company's affairs at the present time, with the view of ascertaining to what extent it had suffered from the effects of the recent commercial crisis in Bombay; and the result of this investigation is now published for the purpose of satisfying shareholders as to the soundness of the company's present position. In addition to the accompanying accounts, the directors have caused a very careful estimate to be made of the probable losses arising on the outstanding transactions of the association, from which it appears that the probable total loss will amount to Rs. 13,95,461-15-9, to meet which there is at the credit of reserve fund Rs. 10,00,000, and at the credit of profit and loss account Rs. 6,07,204-9-8, showing a probable surplus of Rs. 2,11,742-9-6 remaining at the credit of these two accounts. This estimate is, of course, subject to increase or diminution according as the transactions involved may realise a larger or smaller amount than that at which they have been valued; but the directors confidently anticipate that the ultimate result of these realisations will be even more favourable than the estimate here presented. The sum of Rs. 10,00,000 at the credit of reserve fund at 31st March last, having been deposited for fixed periods with the Commercial Bank of India, Asiatic Banking Corporation, and the Royal Bank of India, in terms of the intimation made to that effect at the general meeting of shareholders held on the 10th April last, and having been thereby excluded from the ordinary business operations of the association, the directors think it right to intimate their intention

of withdrawing the same at the earliest opportunity, and employing it towards meeting the losses which the company has sustained. The directors regret to announce that Mr. Cowasjee Jehangeer Readymoney has been compelled, from ill-health, to resign his seat at the board, but they have the pleasure of announcing that his place has been supplied by the Honourable Rustomjee Jamsetjee Jejeebhoy, who has consented to act as a director, and who has been elected accordingly."

Balance-sheet for the Half-year ending 30th September, 1865.

ANGLO-EGYPTIAN BANK, LIMITED.

THE second ordinary general meeting of the shareholders of this bank was held on the 23rd November, at the London Tavern, Bishopsgate Street, to receive the report of the directors and a statement of accounts, to declare a dividend, and for general purposes. At two o'clock the chair was taken by G. G. M'Pherson, Esq., chairman of the board of directors, and governor of the Agra and Masterman's bank.

Mr. O. Foa (secretary) having read the advertisement convening the meeting, the following report was read:—

"The directors have much pleasure in presenting to the shareholders their balance-sheet for the first financial year.

"It shows a net profit of £67,344. 8s. 11d., or more than 16 per cent. per annum, on the paid-up capital, which, on the average, has been only ten months in the hands of the directors, and they have divided it in the following manner:—

1. Interim dividend paid for the first half-year, at 8s. per share	£16,000	0	0
2. Declared dividend for the second half-year, at 18s. per share	36,000	0	0
3. Repayment of preliminary expenses	10,703	6	8
4. Balance carried forward	4,641	2	3
				<u>£67,344</u>	<u>8</u>	<u>11</u>

"The shareholders will, no doubt, consider this result satisfactory, especially when it is remembered that the prevalence of cholera in Egypt was so great that business there was almost at a stand-still for some months.

"It will be gratifying to the shareholders to be assured that the bank has made no bad debts, nor experienced any losses whatever in its extensive transactions, notwithstanding the monetary crisis which caused so many failures in Europe, and more particularly in the East.

"The directors are glad to be able to state that the business of the bank progresses steadily; and as the prosperity of Egypt is largely increasing under the liberal and enlightened rule of His Highness Ishmail Pacha, the Viceroy, it is obvious that the prospects of the bank are most encouraging.

"By order of the board,

"OCTAVE FOA, Secretary.

"London, 15th November, 1865."

Balance brought down to new account	£4,641	2	3

The Chairman said that as the report had been for several days in the hands of the shareholders, it was not necessary that he should detain them by many observations, but in moving that it be adopted he wished to say one or two words on the condition of their affairs; and in the first place, he should say they had reason to congratulate themselves on the amount of profits they had earned during the past year, and especially that it was done in an exceptional year and under exceptional circumstances. He might remind them that shortly after the bank was set on foot the monetary affairs of this country were in a most unsatisfactory condition, and in process of time its effects were felt in Egypt. Public confidence was almost entirely destroyed, owing in a great measure to the enormous losses sustained by cotton, the consequence of which was the failure of many respectable mercantile houses both there and in this country. While this depressing influence was felt in Alexandria and Cairo, the cholera broke out and carried off an enormous number of people, and such was the panic created that all business was in a great measure suspended. Now, during the whole of this period their excellent manager in Egypt and colleague at the board, Jules Pastré, Esq., conducted their business without shrinking from any danger, and remained at his post amid the perils by which he was surrounded. (Cheers.) It might have been expected that a gentleman of his age and position would have hardly exposed himself to such dangers, but he remained at his post and conducted their business in the midst of every difficulty. (Cheers.) He mentioned this to the shareholders, because it was an act of courage and heroism not often performed, and thus the business of their bank was carried on during that frightful period without any interruption whatever. (Hear, hear.) With respect to the business of

the bank itself, he knew it was thought by many as of recent origin. That no doubt was quite correct as regarded London, but the bank in Egypt had been carried on for nearly forty years by the eminent firm of Messrs. Pastré Frères and Messrs. Sinadino & Co., of Alexandria. That business was transferred to the present company, and they were now carrying it on with the result seen by the dividend they were about to declare. (Hear, hear.) Their net profits during the year amounted to £87,844. 8s. 11d.; and if their preliminary expenses, amounting to £10,000, were considered excessive, and ought not to be paid off within the year, he should only say that he and his colleagues were of a different opinion, and especially in the belief that these expenses ought to be written off at once. (Loud cries of "hear, hear.") If their affairs turned out as fortunate during the coming, as they had been the last year, they would be enabled to set aside a sum of money for a reserve fund. (Hear, hear.) He was also happy to inform them that the bank made no bad debts during the year—a circumstance entirely owing to the able and efficient management of Jules Pastré and G. Sinadino, Esqrs., to whom, in consequence of their devotion to their interests, their thanks and gratitude were eminently due. (Cheers.) He did not wish to detain them by any further observations, and should simply move that the report of the directors be received and adopted, and that a dividend of 18s. a share be now declared.

Mr. Eugene Pastré seconded the motion.

A Shareholder was of opinion that the state of the bank was very satisfactory, and thought the directors acted very properly in writing off the preliminary expenses. (Hear, hear.) The condition of their affairs was mainly owing to the able management carried on in Egypt; and for his own part he could not help congratulating them on having a model manager, who never made a bad debt in so large a number of transactions.

The Chairman, in reply, quite agreed that it was well to be as specific as possible in regard to the expenses, assuring the shareholders at the same time, that those of the past year had been well bestowed, and could not have been made less without injuring the bank. The item of £100,000 to Messrs. Pastré and Sinadino consisted of 8,000 shares paid up to £12. 10s. and he intimated that after a reserve fund had been formed the board might consider the expediency of devoting a portion of it to the liquidation of that item. The rebate on bills not due was put down at £67,000, being calculated at the rate of 10 per cent., and although that would not be all profit, the balance, whatever it might be, would augment the profits of the next half-year.

Mr. Gerstemberg pointed out that the item of £100,000 paid for the business, was in reality more analogous to preliminary expenses than anything else, and he suggested that in addition to the reserve fund, which would probably be created by a new issue of shares at a premium, there should be a separate fund for the liquidation of the item in question.

Mr. Josephs observed that the item consisting, as it did, of shares, the holders were subject to all future calls and to the various incidents attending the position of shareholders. He preferred to see the sum treated as an asset, because it was in reality a portion of their fixed capital. Of course, if they chose to pay it off the dividends would be larger, inasmuch as the amount applicable for division would be divided among the holders of 32,000 instead of 40,000 shares.

The Chairman felt inclined to concur in the suggestion that a sinking fund should be formed for the purpose of liquidating the item; and he assured the meeting that the matter would have the serious attention of the board.

The report and accounts having been unanimously adopted and the dividend approved,

A vote of thanks was next moved and carried to the auditors, Messrs. Sawyer and Harvey, with a sum of £30 each.

Mr. E. Masterman next proposed a warm vote of thanks to Messrs. Pastré and Sinadino, their managers at Alexandria, for the manner in which they discharged their duties. It was most profitable and creditable to the shareholders to have dealings with men of such high honour and probity, and he therefore should move them a vote of sincere thanks.

Mr. E. Morrice thought a vote of that kind should come from the shareholders, and he for one had great pleasure in adopting and moving the vote of thanks proposed by Mr. Masterman.

Mr. Fawcett seconded the motion, and it passed unanimously.

Thanks were next voted to the chairman, the board of directors, the general staff, and to the auditors for their efficient supervision of the accounts; after which the proceedings terminated.

THE FLUCTUATIONS IN JOINT STOCK BANK SHARES.

The Commercial Circular published by Messrs. Seyd & Co. gives a very curious table of the variations in Joint Stock Bank Shares during the last three years; from this we extract the following, showing the results up to the end of October last.

Above 200 per Cent. Premium.

			When Established	Avg. 36 Months	Oct. 1865.

The following banks are not quoted at present on the London Stock Exchange. They are generally branches or agencies of highly respectable Scottish, or Australian, or Indian Banks, whose head-quarters and Shareholders are not in London :—

National Bank of Scotland Branch (one of the first Scotch Banks)

Commercial Bank of Sydney

Royal Bank of India

National Bank of Australia

Central Bank of Western India

London and Bombay Bank

The following banks are either not quoted on the Stock Exchange, or their affairs are not sufficiently developed :—

General Exchange Bank Limited (lately London, Hamburg and Continental Bank)

Challis's Banking Company Limited

Universal Banking Company Limited

Royal Military and Naval Bank Limited

Madrid Bank Limited

The following banks cease to exist :—

South Eastern Bank Limited changed its name to English Joint-Stock Bank Limited WHEN ESTABLISHED.

Anglo-Portuguese Bank Limited ...	1863	} have amalgamated with other Banks on fair and equal terms.
English, Belgium and Netherlands Bank Limited	1863	
Imperial Bank of China and Japan ...	1862

London Bank of Scotland	1863	} are winding up.
London and Scottish Bank Limited ...	1864	
Scottish and Universal Finance Bank Limited	1864	
London and Middlesex Bank	1862	

Total increase and total value of the paid-up banking capital of joint stock banks in London (including the Bank of England).

NOVEMBER, 1862.

Capitals paid-up, £32,363,000.

Value as per quotations, £69,799,000.

An average of 116 per cent. premium.

OCTOBER, 1865.

Capitals paid-up, £53,998,000.

Value as per quotations £106,995,000.

An average of 98 per cent. premium.

The increase in the amount of capital employed is 67 per cent., but the corresponding increase of value so far is only 53 per cent. Some three or four banking companies, who have not succeeded in amalgamating in time, are being wound-up, and the losses of these may amount to say half-a-million, which ought to be included in the above. It must also be borne in mind that in 1862, some three or four private banking firms had not yet become joint stock companies, and further that a very large portion of the new capital is employed in colonial and foreign banking interests.

BOMBAY CHAMBER OF COMMERCE.

THE RIGHTS OF EXCHANGE BANKS WITH REFERENCE TO DOCUMENT BILLS.

A SPECIAL general meeting of the members of this Chamber of Commerce was held in October to consider the question which has lately arisen in England as to the rights of exchange banks in reference to document bills. Mr. A. J. Hunter (of Messrs. W. and A. Graham & Co.) occupied the chair, and about twenty other members were present.

The Chairman said the meeting had been called in consequence of his receiving a requisition to do so from some of the principal merchants of Bombay. He would not occupy the time of the chamber by making any lengthy remarks upon the subject which the meeting was called to discuss, as Mr. Andrew Grant, one of the signers of the requisition, was present, and he would no doubt enter fully into the question; but he (the chairman) might mention that he had obtained copies of the letters of hypothecation used by all the banks of Bombay. These he might divide into four classes, although with the exception of that used by the Asiatic Banking Corporation, they were very much alike. In the first class were the Oriental and other banks, which, on default of payment of hypothecated bills at maturity, retained the right of selling the goods, or a part of them, and applying the proceeds in payment; or, in other words, if payment is tendered at maturity the bank is bound to give up the documents to the acceptor. In the second class, a great many banks had the same clause as the Oriental; but, in addition, they retained the right of selling the goods in the case of the bankruptcy of the drawee. In the third class were banks which retained the right of selling in case of the bankruptcy of the drawer, provided the drawee, on being required to do so, does not furnish further security to the said bank. In the fourth class was the Asiatic Banking Corporation, which retained the right, in the event of the failure of any of the parties to the bill, to sell the goods and retain

the balance as security for other bills due to the bank. The usual meaning attached to letters of hypothecation he believed to be substantially the same as giving security for a loan—goods were tendered as security along with the documents, and they were handed back when the money was returned. This was the basis upon which such transactions were usually accomplished; but the proceedings of the Asiatic Banking Corporation were totally opposed to this principle. With the exception of that bank and the Central Bank of Western India, none of the banks in Bombay asserted any right to retain documents, provided payment is tendered by the acceptor of the bill. The question thus became one between the parties selling the bills and the bank; and the proper course would be not to sell to any bank having such monstrous clauses in its letters of hypothecation. The remedy lay in people's own hands, and if they refused to deal with such banks, then the latter, in their own interests, would be obliged to discard such clauses altogether. The chairman concluded by reading the following extract from the hypothecation letter of the Asiatic Banking Corporation:—

“We further authorise the Asiatic Banking Corporation, or any manager or agent thereof, on default being made in acceptance on presentment or in payment at maturity of any of the above bills, or charges pertaining to the same, or should the drawees or any of the parties to such bills, prior to the maturity of the said bills, have suspended payment, have become bankrupt or insolvent, or have compounded with their creditors, or have signed a deed of inspectorship, to sell the said goods or a competent part thereof at any time thereafter, without waiting for the maturity of the bills, and without either notice to or concurrence on the part of any person or persons, and to apply the net proceeds (after deducting usual commission and charges) in payment of such bills with re-exchange and charges; and we authorise the corporation to hold and retain the goods while unsold, and the balance of the net proceeds when sold, as security for and towards the payment of any other bill or bills, which any of the managers or agents of the said bank may have purchased from us, or towards the security or liquidation of any claim the bank may have upon us, or otherwise to be at our disposal.”

Mr. Andrew Grant (of Messrs. Campbell, Mitchell & Co.) said he considered the subject which the Chamber had met to discuss to be one of very great importance to the mercantile community; for it was one which, if not settled at once in a satisfactory manner, might lead to embarrassment and mischief of which it was impossible to see the end. There was nothing, they would all admit, more prejudicial to business generally, or which cut at the root of credit and confidence, than any doubt arising between merchants and their bankers. The bankers who had taken action in this case might say to us—“If you look at the papers you have signed you will see we have done nothing but what we are entitled to do by this hypothecating document;” but the mercantile community were bound to take into consideration the suspension of mercantile usage in this transaction; and all would agree with him that the usage of Bombay had been, that when documentary bills were taken up either by the party on whom they are drawn and accepted, or any other party for the honour of the drawer, when the acceptor was not able to take them up at maturity, it was the custom of the bank to surrender the security which had been lodged with them against these documentary bills. And it stands to reason that such should be the case: for if one merchant was always doing business with the same merchant at

home, it might be reasonable for a bank to say—"We are in such and such a position, and will retain the security we hold and place it against your other obligations;" but there were thousands of other cases in which the acceptor and the drawer of a bill were different from day to day. He might cite as an illustration, the case of a merchant in England sending an order for cotton to a merchant in Bombay, and telling him to draw against the cotton—supposing the price to be £20 a bale—to the amount of £12, and to draw clean bills against the balance. Both being accepted, the documentary bills were given as security, and the merchant in England expected to receive his cotton on payment of the other £12 a bale to the bank; but supposing the cotton had risen to £25 a bale, the bank stepped in and said—"We will keep your cotton and place the money to the credit of the drawer." Now, was not this a very hard case for the owner of the cotton? On tendering the money for the documents he had paid £8, but when he offered to pay the other £12, he was staggered when he was refused and told that the £25 was to be retained against some bill which he owed to the bank. Many things had occurred during the last twenty years to consignees at home; but the owners of documentary bills always trusted to the usage of those bills being given up to them when the money was paid. Just let them imagine the position of a merchant when a bank retained his documents on account of some transaction which he never heard of! Why, if the determination which two of the Bombay banks had expressed on this subject were acted on, the mercantile community would be led into the greatest embarrassment. He thought the Asiatic Banking Corporation had gone further than any other bank would be inclined to go; and as a proof of this he might mention a case which had occurred to himself. One day a native called on him and said he had consigned a quantity of cotton to a firm in Liverpool; but as it had suspended payment, he wished the documents to be sent to his (Mr. Grant's) agents there, and the cotton sold on his account. In his ignorance of any obstacle in the way, he made arrangements for the cotton being sold, and a power of attorney was sent to his agents at Liverpool. The agents went to the Asiatic Bank and asked to have the documents surrendered to them on payment being tendered; but the bank said that owing to the failure of the drawee, they intended to exercise the right contained in their letters of hypothecation, and to sell the cotton and apply the balance in liquidation of the drawee's obligations to them. Now this was rather a stretch of authority. The chairman had told them that the Asiatic and Central Banks intended to push their determination so far as to retain documents when it suited them to do so, and to sell the goods to which they related to cover other liabilities. This course placed exchange banks in a different position to that they formerly occupied. They announced that it was by exchange to which they looked to make their profits: but if they acted as they said, we should hear of them becoming cotton merchants, and buying or selling document bills as they thought the cotton market would be higher or lower at home. He thought the chairman's remarks very much to the point, and he also thought that if some of the bankers of Bombay were going to pursue such an eccentric course, the merchants must bind themselves together and say to them—"If you are going to act in this manner, we must transact our business elsewhere." Were the merchants to act in this manner, the banks would very soon come to their senses. He thought that if the Committee of the Chamber were to place themselves in communication with the banks in question, and explain to them the hardship

which such a course as they were pursuing entailed, they would see how desirable it was, for their own interests, to return to the custom which formerly prevailed between the mercantile community and the banks of Bombay—that when the bills were taken up by the acceptor, or by the agent of the drawer, at the time of maturity, the bank was bound to deliver up all the documents which were lodged with it as collateral security. If the committee would do this, and explain what the feeling of the mercantile community was on the matter, he thought they would abandon their present course, and adhere to that which had hitherto been followed in Bombay.

The Chairman said he knew a case where the drawer of a bill was solvent, but the drawee became bankrupt; and the bank refused to give up the surplus of the amount due to the drawee. The case of Dewjee Premjee had also been brought to his notice. This gentleman consigned a quantity of cotton to two firms in Liverpool, both of whom failed, and on his writing home to the firm of David Sassoon and Co., asking them to take up the bill for his honour and receive the documents, the bank refused to allow them to do so, and paid the money to the liquidation of the debts of another firm. It was a great hardship to prevent the owner of the goods from receiving them on payment, and making him responsible for debts with which he had nothing whatever to do; but by the letters of hypothecation he thought the bank was justified in doing so.

Mr. Peter Adams (of Messrs. Edward Bates & Co.) pointed out that by letters of hypothecation the interests of endorsers were not adequately protected. It seemed to him that the bank should be in a position to secure the proceeds of goods in case of default of payment at maturity, but still he thought that it should hold the defaulting party responsible for any loss which might accrue to the endorser.

Mr. Alexander Brown (of Messrs. W. Nicoll & Co.) concurred in what had been said about the objectionable nature of letters of hypothecation of the Asiatic Banking Corporation; but he thought there would be some delicacy in the Committee of the Chamber remonstrating with them on the subject. He thought it would meet the case if the meeting expressed its opinion of the bank's departure from the mercantile usage of Bombay, and of the hardship which it entailed upon parties selling document bills.

The Chairman said, that as the whole affair was merely a private transaction between the bank and its customers, the Chamber had no right to interfere. All they could do was simply to pass a resolution expressing their opinion that the course pursued by the bank was contrary to the usage and to the individual interests of the mercantile community. He therefore begged to move the following resolution:—"Resolved—That in the opinion of the Chamber the course adopted by the Asiatic Banking Corporation and the Central Bank of Western India in refusing to receive payment of bills from any of the parties to the same, and to deliver up shipping documents hypothecated to those banks as collateral security therefor, is contrary to mercantile usage, and tends to obstruct business and interfere with mercantile confidence. That the Chamber leave the committee to take whatever steps they may consider necessary for the protection of its members and the public."

Mr. Andrew Grant seconded the resolution, which was carried unanimously, and the meeting broke up.

THE REDUCTION OF THE BANK RATE OF DISCOUNT.

WHILST everybody a fortnight or three weeks ago was expecting, if not an advance in the rate of discount, at least a maintenance of the official *minimum*, the accounts of the Bank have so rapidly improved that there has been a reduction of 1 per cent. From 7 the quotation has gone back to 6, and now some people are sanguine enough to imagine that it may go to 5 per cent. We ourselves are not so sure of that, because, although there is not much activity in the open market, the Bank, through the payments on account of the revenue, &c., possess the principal of the resources, and they, for the moment, command the best business. If it is therefore recorded that the Bank is absorbing the principal discount transactions, whilst out of doors the brokers and others are doing next to nothing, it will be quite sufficient to support the price even should it not eventually lead to an advance.

The Bank of France, simultaneously with its reduction from 7 to 6 per cent., placed their rates from 5 to 4 per cent., and that establishment stands in a more favourable position than it did a week or two ago. There ought to be now, in both establishments, a steady return of money from the provinces, whither a large amount of notes and coin is always sent in the autumn to assist in the development of agricultural operations. Besides this, in our own case, we shall have the reflux of sovereigns from Ireland, and the excess of the arrivals from America, West Indies and Australia, beyond what may be required for export to India and the East.

Nevertheless, we are now steadily approaching that period of the year when money is required for the completion of every kind of engagement, and when the rate is more likely to be supported than decreased. Should the quotation, by any fortuitous combination of circumstances, recede to 5 per cent., it will assist greatly to carry over satisfactorily the final operations of December. But it must also be remembered that a reduction will be calculated to give a stimulus to the introduction of fresh loans, fresh companies, from a surfeit of which we are now suffering, and the securities connected with which greatly embarrass the ordinary course of transactions at the Stock Exchange.

With the rate remaining at 6 per cent. no great inconvenience will now be experienced by the commercial public, and the maintenance of this price will be a check to the organization of undertakings which make capital temporarily unproduc-

tive and lead to renewed speculation, and finally to a collapse. A word of advice to promoters and others will be to delay any large number of schemes till the spring, when the money market generally may be in a much more healthy state to receive them.

BANK OF TURKEY

THE Ottoman Company, Limited, invite applications for the capital of the Bank of Turkey, Limited. The amount is £1,000,000, in 20,000 shares of £50 each, with power to increase. The first issue is to be 10,000 shares. The deposit is placed at £1 per share on application and £4 on allotment; the calls not to exceed £5 per share, and at intervals of not less than three months. It is stated that this company is formed at the express solicitation of merchants and others engaged in trading and monetary operations in the Ottoman empire, for the purpose of extending to the community of Turkey that legitimate aid which in more favoured countries is rendered necessary to commerce by well-conducted banking institutions. The Imperial Ottoman Bank is the only bank in Turkey, and therefore, it is contended, there is plenty of room for other similar institutions.

CONVERSION OF THE OTTOMAN DEBT.

THE General Credit and Finance Company of London, Limited, have received the following notice from the Imperial Ottoman Government for publication. It will be perceived it allows an extension of time for the progress of the conversion. It is stated that the conversion of the internal debt of the Ottoman empire had reached nearly 21,000,000 sterling at that date:—

[Translation.]

“CONVERSION AND UNIFICATION OF THE INTERNAL DEBTS OF THE OTTOMAN EMPIRE.

“Official Notice.

“The Imperial Government, taking into consideration the circumstances which have impeded the progress of the conversion, principally the cholera which has scourged Constantinople, and the unforeseen delay in the fabrication of the bonds of the general debt, has determined not to enforce the reduction of 10 per cent., which was applicable in virtue of the terms of article 11 of the law of the 19th (31st) March, 1865, to the securities presented for conversion after the period of three months, and during the second period of one month and a half determined by said article.

“In consequence the securities of the internal debt will continue to be received for conversion, without reduction, up to the 19th (31st) December 1865, on the same terms, in the same form, and at the same places as before.

“At the expiration of this last period the operations of the conversion will be closed irrevocably.

“Five days after the definite closing the coupons for interest due on

the non-converted securities will be paid at Constantinople, and the bearers will be entitled to interest on those coupons from their due date to the day of payment at the rate of 6 per cent. per annum.

(True copy.)

CREDIT FONCIER AND MOBILIER OF ENGLAND.

A SPECIAL audit of the accounts of the Credit Foncier and Mobilier of England has just been effected, and the following is a copy of Messrs. Quilter, Ball and Co.'s report:—

"3, Moorgate street, Nov. 23.

"At the request of the court of directors of the Credit Foncier and Mobilier of England Limited, we have examined the company's account books, and such other documents as we have thought necessary for the purpose of testing the accuracy of the balance-sheet and profit and loss account, dated the 30th September, 1865, annexed to the report presented to the shareholders at the general meeting, held the 24th October, 1865. The results of our examination enable us to certify as follows:—1. That the accounts so presented are in due accordance with, and form a correct summary of the company's books, and that the books are accurately kept and upon a proper system. 2. That the securities comprised in the balance-sheet are duly held and accounted for. 3. That in estimating the value of the securities as stated in the balance-sheet, they were taken at prices rather below the quotations appearing in the official lists of the Stock Exchange of the 30th September, 1865, and that on the basis of such valuation of the securities, the profit and loss account of the 30th September, 1865, exhibits a correct view of the profit results of the company's operations to that date. 4. That the commissions paid to the directors and managing director, by way of remuneration for their services, have been strictly within the limits of the provision made for that object by the company's deed of association.

(Signed)

"QUILTER, BALL & Co."

TENDERS FOR BILLS ON INDIA.

THE biddings for 35,00,000 rupees in bills on India took place on the 2nd November at the Bank of England. The proportions allotted were—To Calcutta, 19,16,000 rupees; to Madras, 5,84,000 rupees; and to Bombay, 10,00,000 rupees. The minimum price was as before—1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11¾d. will receive about 52 per cent., and on Bombay at 2s. 0½d. about 17 per cent., above these prices in full. Further biddings took place on the 16th November. The proportions allotted were—To Calcutta, 26,38,000 rupees; to Madras, 15,000 rupees; and to Bombay, 10,00,000 rupees. The minimum price was as before—1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. Tenders on Calcutta and Madras at 2s. will receive in full, and on Bombay 2s. 0½d.; about 20 per cent. above these prices in full.

LONDON AND MIDDLESEX BANK.

THE following circular has been issued to the shareholders of the London and Middlesex Bank, Limited, in liquidation :—

"Sir,—I am instructed by the directors of the London and Middlesex Bank, Limited, to inform you that they are enabled to make a further return to their shareholders, in respect of the capital of the bank, at the rate of £1 per share, and that you may receive the amount due upon the shares registered in your name on application here any Monday or Thursday in the month of November or December next, between the hours of ten and three o'clock. It will be necessary that you should forward your share certificates for examination a few days before you apply for the amount due upon them. The liquidation of the bank is now almost completed, and when a final settlement can be arrived at any balance remaining will be distributed with a statement of account.—I am, Sir, your obedient servant,

"OSWALD HOWELL, Accountant.

"54, Bishopsgate Street Within, London, E.C.,

"Oct. 30, 1865."

BANK AMALGAMATION.

The English Joint Stock Bank, Limited, has absorbed the business of Messrs. Olding, Osborne, and Co., of Clement's Lane. By this arrangement the English Joint Stock Bank becomes a London bank, having hitherto carried on a country business only. Two of the partners of Olding, Osborne and Co., viz., Mr. Louis Courtauld and Mr. Stephen Olding, join the direction of the bank, the subscribed capital of which is £403,725, and the paid-up capital £161,490. The arrangement has been completed through the death of one of the partners of Messrs. Olding. The general business of the English Joint Stock Bank is now conducted at the new building in Clement's Lane recently erected. Mr. Courtauld and Mr. Olding will conduct the London business. The private firm of Messrs. Olding, Osborne and Co. was established in 1762, and the chief partner in it for a lengthened period was Mr. Samuel Rogers; the house being then Messrs. Rogers, Olding and Co.

Communications.

To the Editor of the "*Bankers' Magazine*."

PROFITS OF ENGLISH BANKS.

London, 14th November, 1865.

SIR,—In your number of this month, a correspondent signing himself "H," makes some inquiries as to the practice of some English banks of charging interest on their customers' cheques from the date on which such cheques are drawn, instead of that on which they are paid.

In reply, and for the benefit of those establishments who follow this custom, permit me to submit the following extracts bearing on the subject:—

A banker has no right to debit the customer who draws a cheque from the date at which it is drawn; he is bound to make the entry as of the date when the cheque was cashed." (Grant on Banking, 2nd edit., page 89.) "It has not been unusual for bankers to enter cheques in the pass-books as of the date when they were drawn, and not as of the date when they were actually paid, and to calculate interest accordingly. But a banker should debit his customer, not from the date of the cheque, but from the time of payment." (Byles on Bills, 8th edit., page 25.)

I am, Sir, your obedient Servant,

J. D. F.

14th November, 1865.

SIR,—With your permission, and with all deference, I will undertake to justify the practice challenged by your correspondent "H." under the head of "Profits of English Banks."

I should infer that he is not a banker, because, if he were, he should know that in the course of business, as now existing, the banker would soon be very seriously damaged were he to adopt the practice suggested of charging his customer interest only from the date on which the drafts appear to the debit in the ledger; and for these two very potent reasons, amongst others—first, that in the case of an establishment having branches and a London agent (a country bank particularly for instance), the cheques which reach it every morning in the several remittances by hundreds, have all been given credit for to the parties paying them in, or have been cashed out of the tills of the establishment somewhere, one, two, and often three days before, as the case may be; and, secondly, that since the establishment of the country clearing office, the banker who receives cheques upon another country bank has to give credit for them on the day of receipt, whereas he has to wait from three to four days before they appear at his credit with his London agents.

Now, surely your correspondent is not prepared to argue that the customer (who, let it be fully borne in mind, from the moment he has issued his cheque, has ceased to have any property or control in it, and is liable to have his account charged with it on that same or any subsequent day), is entitled to benefit in interest from the delay necessary for transmission, or even from any delay in presentation through other accidental causes! You will see, I think, sir, that at least it is not the drawer of the cheque who has any *locus standi* for claiming the intervening interest, but the holder, whether he be one of the general public, or, what is much more commonly the fact, the banker who has first received the cheque. Whether the interval be long or short, it is quite clear that by no force of logic can the drawer show either that he is damaged by being charged interest from the date of his cheque (i.e., the date on which he gets a discharge for the payment for which it was given), or that bankers, as a community, derive any undue "profits" from the practice.

Our Scotch neighbours, whose keenness in all matters of business is world-wide known, do not need to be made alive to this, I'll warrant me.

The date of a cheque is legally the presumed date of issue and of payment, though there may occasionally be some peculiar and special cases otherwise; but they do not come within the range of this argument.

I therefore strongly counsel all bankers to continue adhering to this most reasonable, and, indeed, essential mode of self-protection, and those who have not hitherto adopted it, I recommend to do so forthwith.

I am, Sir, yours respectfully,

A BANKER.

A BANKER'S LIBRARY.

SIR,—I should much like to see a banker's library established in London for the use of bankers and their employes throughout the kingdom.

Being engaged in a country branch of a joint-stock bank I have no means of doing much towards so desirable an end, but believing you will kindly insert this letter in your next month's impression, I have a hope it may come under the eye of some one or more persons who would be glad to see such a thing established, and have the means at command to enrol others interested in such an object. I can only say I should be a most willing subscriber, and I have very little doubt it would be a success. Banking works are very expensive, and you must know the salaries of employes are not large enough to afford them.

I am, Sir, your obedient servant,

W. W.

BRANCH BANK CHEQUES.

Wells, 7th November, 1865.

SIR,—In reply to your correspondent "T. I." I can from my own knowledge affirm that there were no special grounds affecting the case I quoted as being decided in the Queen's Bench.

I leave it to your correspondent "W. I. A." to explain how the interpretation of the law he has received can be considered otherwise than "false and absurd" in the face of the decision of a superior court, supported as it is by the universal practice of country bankers.

Yours faithfully,

H. G. MARSHALL.

BANKING PRACTICE.

London, 1st November, 1865.

SIR,—In reply to your correspondent "H.," whose letter appeared in your November number. It is the rule of London as of all other bankers to debit the account of their customers with the amounts of their cheques on the day such cheques are paid; it could not be otherwise, or the bank books would be in endless confusion.

Yours, &c.,

A. D. H.

Mullingar, 20th November, 1865.

SIR,—I beg to subjoin, for the information of your correspondent "H." in your last number, the law as quoted in "Grant's Law of Bankers and Banking," page 94.

"A Banker has no right to debit the customer who draws the cheque from the date at which it is drawn; he is bound to make the entry as of the date when the cheque was cashed."

Your obedient servant,

A SUBSCRIBER.

THE LEEDS BANKING COMPANY.

Winchester, 17th November, 1865.

SIR,—Permit me to draw the attention of your readers to the decision of the Vice-Chancellor, on the 14th instant, re Leeds Banking Company, Prang's claim. With regard to the second bill, which, having been dishonoured by the acceptor, and bearing the endorsement of the Leeds Banking Company, "in need at Smith, Payne & Smith's," was presented there on the 15th, the Leeds Banking Company being at that time in liquidation, it was again dishonoured. Prang & Co.'s agent sent them notice the same day, and on the 16th they forwarded notice to the official liquidator, who received it in due course on the 17th. The Court said—"Then came the question whether it was part of the law that, as between principal and agent, an additional day should be allowed for the purpose of notifying dishonour. The Court was of opinion that the law permitted no such additional time to be given, and therefore, as the notification to the official liquidator was too late, the claim in regard to the second bill must also be disallowed." This judgment appears to be in direct opposition to the law as laid down in "Byles on Bills," page 264—"A banker with whom a bill is deposited to receive payment is, for purpose of notice, to be considered as a distinct holder, and has a day to give notice to his customer, and the customer another day to give notice to the antecedent parties."

In the report, of the above case, it is not stated whether the agent employed was a banker, but I presume that could make no difference.

I am, Sir,

Your very obedient servant,

E. O. D.

THE CHEQUES OF CUSTOMERS.

20th Nov., 1865.

SIR,—Your correspondent "H." "will be glad to hear that it is not the invariable custom of the English banks" to debit their customers' cheques on the day they are dated, instead of on the day of payment. I shall be glad to know (and I dare say many of your readers also) from what source "H." obtained information of this curious practice which he attributes to the English banks. A well-known legal authority says, "a banker in charging interest to a customer who has overdrawn his account, should compute it not from the date, but from the payment of the customer's cheques," and without doubt the same rule applies when the account is not overdrawn, and where interest is allowed. Does "H." speak from experience?

I am, dear Sir,

Your very obedient servant,

D.

BANKER'S COMMISSION.

Hereford, 15th November, 1865.

SIR,—Will you be so kind as to answer me the following questions in your next number. What is the usual practice of bankers, town and country, in such a case as this? A. B. removes his banking account from Smith and Co. to Jones and Co. on, say 1st October, and in November a bill of A. B.'s, dated in September, and lying in Smith's hands, matures payable

with them. Are Messrs. Smith and Co. justified in presenting the bill for payment to the acceptor's new bankers with a commission, and in case of the latter promising to pay the principal of the bill only without commission, can Smith and Co. legally refuse to receive it? Again, is a banker, after dishonouring acceptances of a customer, legally right in paying, later in the day, other acceptances of the same person, or is he bound to retain any funds he may receive to be applied to the payment of those first presented.

I am, Sir,

Yours obediently,

BANK CASHIER.

1.—We do not think the charge for commission could be legally enforced.

2.—Assuming the first dishonour to have taken place in consequence of insufficient funds belonging to the acceptor, if funds were subsequently supplied, the banker is justified in paying the first acceptances afterwards presented.]

STAMP RECEIPTS.

Birmingham, November 7th, 1865.

SIR,—I shall feel obliged if you will say in your next whether a formal receipt or an acknowledgment by post of a sum of money above £2, given for the purpose of assisting in the improvement of a church, requires the usual penny stamp. I am aware that a receipt for money contributed for charitable purposes requires no stamp, but the case in question can scarcely be considered one of charity.

Is it an understood and recognised rule that the Act of Parliament does not apply to receipts for moneys which are not recoverable at law?

Again, is it necessary that an employée in giving to the firm by which he is engaged a receipt for money paid on account of salary, should affix the penny stamp to the paper?

I am, Sir,

Your obedient servant,

F.

[We should consider such a gift of money as is referred to exempt from the duty on receipts. The receipt for salary requires a stamp.]

AD VALOREM STAMP.

14th November, 1865.

SIR,—Will you be good enough, in your next number, to state whether in the case of a cheque drawn in, and upon London, payable either to "order" or to "bearer," having been negotiated abroad, is liable to the same ad valorem stamp duty as an ordinary foreign bill of exchange; and oblige

Your obedient servant,

S. B. C.

[By 27 and 28 Vict., c. 56, s. 2, such a draft is liable to the ad valorem duty, if endorsed abroad.]

28th November, 1865.

SIR—1. Would a bill drawn by and on a bank in England, at any fourteen days date, and which was sent abroad and there endorsed, such

endorsement carrying with itself proof of having been effected out of the United Kingdom, require an ad valorem foreign bill stamp in addition to the inland stamp it bore at time of issuing before payment in England?

2. Some of the London bankers have recently adopted the plan of perforating their cheques with the "two lines," and the words "and Co.," instead of the old system of crossing. Do you consider such perforated cheque is a legally crossed one?

Your replies to the above will be esteemed by,

Yours obediently,

ALPHA.

[1. No:

2. The Act of Parliament does not define how the "transverse lines" of the crossing are to be made, but such crossing is required to plainly appear; we therefore think the terms of the Act are complied with if the latter requirement is fulfilled.]

CROSSED CHEQUES.

Llanidloes, 22nd Nov., 1865.

SIR—I shall feel obliged by your kindly answering the following question in your next monthly number.

Is not a banker upon whom is drawn and duly presented a cheque dated 28th October, 1865, but crossed with the words, "not to be cashed before the 28th November, 1865," such crossing however not confirmed by the drawer's signature, bound to pay it on presentation if there be funds? If he be not legally bound to honour such cheques, any third, fourth, fifth, or sixth party who might become in possession of such a document in the way of business, might make a similar crossing, for some reason or other, and thereby cause endless trouble and unpleasantness.

[We think the banker is not bound to pay with such a crossing; if made by the drawer it is clearly illegal, as the cheque is no longer payable on demand; if made by any other person it is such a material alteration as would, we think, justify the banker in refusing to pay.]

MONTHLY CHRONOLOGY.

November 12.—The National Bank of Belgium raised their rate of discount on bills to 6 per cent., the rate for advances on commercial securities to 6½ per cent., and advances on stocks and shares to 6 per cent.

16.—The directors of the Bank of Holland raised their rate of discount from 5½ to 6 per cent.

23.—The directors of the Bank of England reduced their minimum rate of discount from 7 to 6 per cent.

The directors of the Bank of France reduced their terms for discount from 5 to 4 per cent.

BANKING OBITUARY.

On the 5th September, at the Bank of Bengal, Lucknow, Mr. William M'Farlane, late of Clarendon Road, Notting Hill, in his 33rd year.

On the 1st November, Mr. Alexander Frederick Merrett, manager of the Gravesend Branch of the London and County Bank, aged 48 years.

On the 12th November, at Claremont Place, Forest-gate, Mr. Edward Harrison Wilkinson, of the Oriental Bank Corporation, aged 31 years.

Notes of the Month.

A DEFAULTING CASHIER.—A cashier in the establishment of Messrs. Olding, Osborne and Co., absented himself a week or two ago, and upon investigating his accounts, preparatory to the transfer of the business to the English Joint Stock Bank, it was found he was a defaulter to the extent of £1,995. It is expected a portion, if not the whole, may be recovered. Discouraging as this is, the reports were to the effect that the total was very considerable.

At an extraordinary general meeting of the proprietors of the Provincial Bank of Ireland, Sir James Weir Hogg, Bart., in the chair, Mr. William Wallace, of Austin-friars, and Mr. Harry Hankey Dobree were severally elected directors in the room of Mr. Samuel Eustace Magan, and Mr. Matthias Wolverley Attwood, both deceased.

It appears that Messrs. Laurie and Young, as directors of the City Bank, have felt themselves compelled to resign their seats at the board of the English Joint Stock Bank, Limited, on the commencement of a London business by the latter, through their amalgamation with Messrs. Olding, Osborne and Co.

It is stated that Mr. Wright, the London manager of the National Bank of Australia, has accepted the general management of that bank, and proceeds to head-quarters, Melbourne, by the December mail. The London management will be temporarily filled by Mr. Muttiebury, one of the London directors.

The Asiatic Bank Corporation have declared an interim dividend at the rate of 5 per cent., free of income tax, on the original shares, which became payable on and after the 13th November.

On the 27th October, the offices of the London and Venezuela Bank were removed to No. 9, Tokenhouse Yard.

TRADE OF THE UNITED KINGDOM.

THE Board of Trade returns for the month and nine months ended the 30th September, were issued on the 31st October, and are once more of a very favourable character, showing a considerable increase in the value of exports, the improvement extending to most of the leading articles of commerce, but more particularly to cotton and linen yarns and cotton and linen manufactures. The total declared value of exports for the month of the present year was £17,316,681, against £14,697,943 in 1864, and £14,542,862 in 1863, being an increase of £2,628,757 over 1864, and of £2,773,819 over 1863. For the nine months of the present year the total was £119,717,377; for the same period last year it was £123,404,161; and for 1863, £104,294,713; showing a decrease of £3,686,784 as contrasted with the former period, but an increase of £15,422,664, as compared with the latter. With respect to exports, there has been an increase in alkali, firearms, coals and culm, cotton yarn, cotton manufactures, haberdashery and millinery, hardware and cutlery, linen yarn, linen manufactures, metals, seed oil, silk manufactures, and wool and worsted yarn. The decline is shown in gunpowder, beer and ale, earthenware, machinery, thrown silk, spirits, and woollen and worsted manufactures. As regards imports, there has been an increase in clocks and watches,

raw cotton, guano, hemp, raw silk, tallow and wool; but a decline in flax, flaxseed, and linseed, cocoa, spirits, sugar, tea, tobacco, and wine. In the case of cereals there has been an increase in the importation of barley and beans, but a falling off in wheat, oats, peas, Indian corn, and wheatmeal and flour. With respect to provisions there has been an increase in bacon and hams, salt beef, and butter and cheese, with a decline in salt pork, eggs and lard. The subjoined tables exhibit the alterations in the chief articles enumerated :—

Monetary Intelligence.

MONETARY REVIEW FOR THE MONTH OF NOVEMBER.

THE progress of financial and commercial affairs throughout the whole of the month of November was tranquil and satisfactory. The rumours connected with the probability of war with America, and apprehensions arising from the Fenian movement, occasioned no great alarm, although there was a little temporary uneasiness. The maintenance of the rate of discount at 7 per cent. until the Bank was in a position to reduce to 6 per cent., exercised a healthy influence over the general market, and although it is now said there is a prospect of the quotation descending to 5 per cent., it is questioned if this will in reality prove the case. An Austrian loan has been introduced and is alleged to be a success, but the principal subscriptions must have been obtained abroad, because capitalists here are not just now disposed to encourage this kind of operation. The Bank of France have lowered their quotation for discount from 5 to 4 per cent., and it is not supposed that they will further reduce the price at present. Endeavours are every now and then made to float public companies, but in consequence of the state of things created by the decision of the Stock Exchange respecting settlements there is no anxiety manifested to subscribe to them. Since the reduction of the rate of discount by the Bank of England there has been a better supply of money, and the rates have been rather cheaper, but not to an extent to show that large balances have been brought forward. At the last moment three months bills have been negotiated at $5\frac{1}{2}$ per cent., and six months at $5\frac{1}{2}$ to $\frac{1}{2}$ per cent.

The market for English stocks has been slightly in the ascendant. Not a great deal of activity has been apparent but prices have improved, first through government, and secondly through private purchases. The government broker has been taking for three weeks past about £80,000 Reduced, and New 3 per Cents. on account of the sinking fund, and these will continue for some time longer.

Foreign stocks have fluctuated to an extent. Spanish, owing to the declaration of war against Chili, and Greek in consequence of the unsettled situation of the ministry. Both descriptions, after being very depressed, have slightly recovered. Turkish have on the average been sustained, and in the case of Consolides the time for carrying out the conversion has been extended. The Confederate loan continues flat, the states as well as the government authorities at Washington repudiating the debt.

Railway shares were in the early part of the month very firm. Since then they have receded. The speculation for the rise having recently been carried to a high point, a reactionary tendency is now noticeable. It has extended throughout the entire of the department.

Joint-Stock Bank shares have been steady, but in every case the fullest quotation has not been supported. A very fair extent of business has nevertheless been transacted. The shares of the credit and finance companies have been well maintained, and have in special instances advanced on the prospect of forthcoming dividends and the progress of their operations.

In the produce market there has not been any important business, but prices have been firmer since the reduction of the rate of discount. A rise of about £20 per ton in copper has taken place owing to the aggression of Spain upon Chili, so large a portion of our supplies of metal coming thence.

THE GRAIN TRADE.

THE markets for all descriptions of grain have ruled very high during the greater part of the month, but latterly there has been much less firmness, with a general decline in prices. The accounts from the agricultural districts are favourable, and the autumnal operations are proceeding satisfactorily. The recent very wet weather has caused most of the samples of wheat to be brought to market in an unfavourable condition, and this, with the continued large supplies from abroad, chiefly caused the decline in prices. The latest official average quotations were:—Wheat, 46s. 11d. per qr.; barley, 33s. 7d.; and oats, 22s. 9d. per qr.

The *Gazette* returns for England and Wales have been:—

Week ending, 1866.	Wheat. Qrs. sold.	Weekly Average.	Duty.	Corresponding week Last Year.
		s. d.	s. d.	s. d.
Oct. 28	68,951 ...	42 4 ...	1 0 ...	38 6
Nov. 4	77,330 ...	43 4 ...	1 0 ...	38 9
„ 11	75,828 ...	45 3 ...	1 0 ...	38 11
„ 18	71,570 ...	46 11 ...	1 0 ...	38 9

The importations since the harvest of 1864 have been:—

	Wheat. Cwts.	Other Grain. Cwts.	Total. Cwts.
Sixty-six weeks ended 21st Oct. ...	25,507,210	33,598,580	59,105,790
Four weeks ended 18th November...	1,922,849	2,439,337	4,362,186
	27,430,059	36,037,917	63,467,976

And the weekly averages have been:—

	Wheat. Cwts.	Other Grain. Cwts.	Total. Cwts.
Sixty-six weeks ended 21st Oct. ...	336,000	509,000	895,000
Four weeks ended 18th November ...	480,000	610,000	1,090,000
More	94,000	101,000	195,000

THE STATE OF TRADE.

Business in the markets of Manchester and throughout Lancashire has been steady, and with rather lower terms for money will, it is expected, improve at the time of the quarter.

NOTICES TO CORRESPONDENTS.

We have arranged in future to issue a double number in February and August, instead of as formerly in May and November. This has been rendered necessary by the great increase of the meetings of the Banks and Discount Companies, which will be always carefully collected in the pages of the *Bankers' Magazine*. We shall also give the proceedings of the various Credit and Finance Companies as they are more or less associated with banking, so that our subscribers and readers can refer to them without difficulty. One or two communications stand over for want of room. Correspondents will please forward communications addressed to the Editor No. 8, Birkhain Lane; subscriptions and orders as usual to Messrs. Groombridge and Sons, Paternoster Row, or Messrs. Waterlow and Sons, Carpenters' Hall, London Wall. **BANKING AND FINANCIAL ANECDOTES.**—It will be perceived from notice elsewhere, that the Editor of the *Bankers' Magazine* is collecting and arranging a series of Banking and Financial Anecdotes. Any contributions from subscribers and readers of the *Magazine* will be thankfully received, particularly if the subject-matter shall not have previously appeared in print. Nothing personal or offensive will receive publicity.

BANK OF FRANCE. **DEBTOR.**

SUMMARY OF WEEKLY RETURNS OF BANKS OF ISSUE.

	Fixed Issues.	Sept. 22.	Sept. 30.	Oct. 7.	Oct. 14.
135 Private Banks	£4,139,459	£2,988,847	£3,072,119	£3,193,849	£3,252,194
59 Joint-Stock Banks ...	3,216,257	2,904,280	2,905,083	2,936,615	2,930,639
194 Totals.....	7,355,726	5,893,127	5,977,202	6,130,464	6,182,833

Average Weekly Circulation of these Banks for the month ending October 14th:—

Private Banks	£3,123,009
Joint-Stock Banks	2,919,154

Average Weekly Circulation of Private and Joint-Stock Banks ending as above

On a comparison of the above with the Returns for the month ending Sept. 16th last, it shows:—

An increase in the notes of Private Banks, of... .. £260,087

An increase in the notes of Joint-Stock Banks, of... .. 144,800

Total increase on the month £404,887

And as compared with the month ending October 15th, 1864, it shows:—

A decrease in the notes of Private Banks of £20,000

An increase in the notes of Joint-Stock Banks, of... .. 23,718

Total decrease, as compared with the same period of last year £21,318

The following is the comparative state of the circulation as regards the fixed issues:—

The Private Banks are below their fixed issues £1,917,027

The Joint-Stock Banks are below their fixed issues 207,100

Total below their fixed issues £1,824,927

SUMMARY OF IRISH & SCOTCH RETURNS TO OCTOBER 15, 1865.

The Returns of Circulation of the Irish and Scotch Banks for the four weeks ending October 15th when added together, give the following as the average weekly circulation of these Banks during the past month, viz.:

Average Circulation of the Irish Banks £6,607,715

Average Circulation of the Scotch Banks 4,515,404

Total Average Circulation of these banks for the past month

On comparing these amounts with the Returns for the month ending 16th Sept. last, they show:—

Increase in the Circulation of Irish Banks £689,122

Increase in the Circulation of Scotch Banks 208,943

Total increase on the month

And as compared with the month ending October 15th, 1864, they show:—

Increase in the Circulation of Irish Banks £792,731

Increase in the Circulation of Scotch Banks 217,050

Total increase on the year

The fixed issues of the Irish and Scotch Banks at the present time are given in the *Banking Almanac*, as follows:—

6 Banks in Ireland, allowed to issue... .. £6,254,004

13 Banks in Scotland, allowed to issue... .. 2,740,271

19 Banks in all, allowed to issue

The following appears, therefore, to be the comparative state of the circulation:—

Irish Banks are above their fixed issue £253,221

Scotch Banks are above their fixed issue 1,706,133

Total above the fixed issue

The amounts of Gold and Silver held at the head offices of the several banks, during the past month, have been as follows:—

Gold and Silver held by the Irish Banks £2,320,500

Gold and Silver held by the Scotch Banks 2,420,917

Total of Gold and Silver Coin

Being an increase of £241,066 on the part of the Irish Banks, and an increase of £26,120 on the part of the Scotch Banks, on the several amounts held by them during the preceding month.

CIRCULATION OF THE UNITED KINGDOM TO OCTOBER 14, 1865.

The following is the state of the Note Circulation of the United Kingdom for the month ending the 14th October, 1865:—

Circulation of Notes for the Month ending 14th October, as compared with the previous month:—

Ireland	5,938,593	6,007,715	69,122	—
United Kingdom.....	237,498,599	239,129,789	1,631,190	—

The comparison of the month ending October 15th, 1864, with the month ending October 14th, 1865, shows an increase in the Bank of England circulation of £1,178,312, a decrease in Private Banks of £50,433, and an increase in Joint-Stock Banks of £23,318; being a total increase in England of £1,151,197; while in Scotland there is an increase of £217,050; and in Ireland an increase of £72,731. Thus showing that the month ending 14th October, as compared with the same period last year, presents an increase of £1,161,066 in England, and an increase of £217,050 in the United Kingdom.

The return of Bullion in the Bank of England, for the month ending October 11th, gives an aggregate amount in both departments of £13,535,206. On a comparison of this with the Return for the month ending Sept. 13th, there appears to be a decrease of £771,942; and an increase of £651,000 as compared with the same period last year.

The stock of specie held by the Banks in Scotland and Ireland during the month ending 14th October was £4,762,678; being an increase of £207,176 as compared with the Return of the previous month, and an increase of £410,633 as compared with the corresponding period last year.

Bankers' Weekly Circulation Returns.

SUMMARY OF WEEKLY RETURNS OF BANKS OF ISSUE.

	Fixed Issues.	Oct. 21.	Oct. 28.	Nov. 4.	Nov. 11.
135 Private Banks	£4,139,469	£3,201,328	£3,128,899	£3,132,115	£3,073,371
59 Joint-Stock Banks ...	3,226,257	2,923,744	2,892,336	2,883,012	2,870,584
194 Totals.....	7,365,726	6,125,072	6,021,235	6,015,134	5,943,955

Average Weekly Circulation of these Banks for the month ending November 11th:—

Private Banks	£3,133,928
Joint-Stock Banks	2,892,421

Average Weekly Circulation of Private and Joint-Stock Banks ending as above £6,026,349

On a comparison of the above with the Returns for the month ending Oct. 14th last, it shows:—

An increase in the notes of Private Banks, of... ..	£11,926
A decrease in the notes of Joint-Stock Banks, of... ..	26,733

Total decrease on the month £14,807

And as compared with the month ending November 12th, 1864, it shows:—

A decrease in the notes of Private Banks of	£77,420
An increase in the notes of Joint-Stock Banks, of	86,996

Total decrease, as compared with the same period of last year £10,423

The following is the comparative state of the circulation as regards the fixed issues:—

The Private Banks are below their fixed issues	£1,006,541
The Joint-Stock Banks are below their fixed issues	833,836

Total below their fixed issues £1,339,377

SUMMARY OF IRISH & SCOTCH RETURNS TO NOVEMBER 11, 1865.

The Returns of Circulation of the Irish and Scotch Banks for the four weeks ending November 11th when added together, give the following as the average weekly circulation of these Banks during the past month, viz.:

Average Circulation of the Irish Banks	£6,897,925
Average Circulation of the Scotch Banks	4,696,636

Total Average Circulation of these banks for the past month £11,594,610

On comparing these amounts with the Returns for the month ending 14th Oct. last, they show:—
Increase in the Circulation of Irish Banks £280,310
Increase in the Circulation of Scotch Banks £181,381

Total increase on the month £461,691

And as compared with the month ending November 12th, 1864, they show:—
Increase in the Circulation of Irish Banks £281,615
Increase in the Circulation of Scotch Banks £252,351

Total increase on the year £1,183,996

The fixed issues of the Irish and Scotch Bank at the present time are given in the *Banking Almanac*, as follows:—

6 Banks in Ireland, allowed to issue...	£6,864,494
12 Banks in Scotland, allowed to issue	2,746,271

18 Banks in all, allowed to issue £9,610,765

The following appears, therefore, to be the comparative state of the circulation:—

Irish Banks are above their fixed issue	£239,431
Scotch Banks are above their fixed issue	1,947,414

Total above the fixed issue £2,486,845

The amounts of Gold and Silver held at the head offices of the several banks, during the past month, have been as follows:—

Gold and Silver held by the Irish Banks	£2,491,904
Gold and Silver held by the Scotch Banks	2,644,198

Total of Gold and Silver Coin £5,136,102

Being an increase of £171,345 on the part of the Irish Banks, and an increase of £304,181 on the part of the Scotch Banks, on the several amounts held by them during the preceding month.

CIRCULATION OF THE UNITED KINGDOM TO NOVEMBER 11, 1865.

The following is the state of the Note Circulation of the United Kingdom for the month ending the 11th November, 1865:—

Circulation of Notes for the Month ending 11th November, as compared with the previous month:—

	Oct. 14.	Nov. 11.	Increase.	Decrease.
Bank of England (month ending Nov. 9)	£21,965,514	£21,964,808	—	£706
Private Banks	3,123,003	3,133,928	£11,926	—
Joint-Stock Banks	2,919,154	2,892,421	—	£26,733
Total in England.....	28,006,670	27,891,154	11,926	127,443
Scotland.....	4,515,404	4,696,636	280,232	—
Ireland	6,607,715	6,897,925	181,281	—
United Kingdom.....	£39,129,789	£39,475,764	£473,417	£127,443

The comparison of the month ending November 12th, 1864, with the month ending November 11th, 1865, shows an increase in the Bank of England circulation of £269,366, a decrease in Private Banks of £77,420, and an increase in Joint-Stock Banks of £26,996; being a total increase in England of £217,944; while in Scotland there is an increase of £281,232; and in Ireland an increase of £281,615. Thus showing that the month ending 11th November, as compared with the same period last year, presents an increase of £217,944 in England, and an increase of £23,101,910 in the United Kingdom.

The return of Bullion in the Bank of England, for the month ending November 8th, gives an aggregate amount in both departments of £13,136,813. On a comparison of this with the Return for the month ending Oct. 11th, there appears to be a decrease of £383,366; and a decrease of £143,939 as compared with the same period last year.

The stock of specie held by the Banks in Scotland and Ireland during the month ending 11th November was £5,136,102; being an increase of £375,536 as compared with the Return of the previous month, and an increase of £359,571 as compared with the corresponding period last year.
